The clauses prohibiting a company to commence business until the minimum allotment of stock is subscribed and the provisions requiring a statutory meeting have, however, not been adopted. It appears from the practice in the Canadian provinces that have adopted this legislation in full that the clauses relating to the minimum allotment and statutory meeting, however beneficial they have been intended to be, are completely evaded. The suggested amendment merely compels companies which offer their shares to the public to file a prospectus, disclosing the exact state of the company's affairs and make the directors responsible in damages for any misstatement.

A ruling of the Canadian Department of Justice cast doubt upon the competency of a company to reduce its paid-up capital except where that capital has been lost or impaired. There are many cases where, for the purpose of reorganization, a reduction of capital is necessary, A number of applications have recently been made to the department for a reduction of capital where, on account of restriction of business owing to the war, the capital of a company is beyond its needs. There is some doubt whether such reduction could be made, and this amendment is suggested in order to remove all doubts on such reductions. The amendment is taken, with merely verbal changes, from the Consolidated Companies Act of the United Kingdom. The administration of the section is being placed in the hands of the secretary of state instead of in the courts, as in the United Kingdom.

Transfer of Shares.

In a recent judgment of the Court of Appeal of Ontario, in re Goode v. Jacob Y. Shantz and Sons Company, Limited, it was decided that there was no statutory power under the Companies Act authorizing a company to pass and enforce a by-law restricting the right to transfer fully paid-up shares. The discussion of the subject in that judgment appears to cover the statutory authority alone, and to be applicable only to a by-law passed after the issue of the shares. It has been the practice to include in charters an authority to limit the transferability of shares whenever such authority was asked for, and this would, no doubt, be enforceable as a contract between the company and the shareholders, irrespective of the provisions of the act. To avoid doubt, it has been considered advisable to insert another section, providing that a by-law limiting the transferability of shares shall be made applicable only to future issues unless the consent of all the holders be obtained. The section also provides that if there are limitations to the transferability of shares they must be set out in the share certificate, otherwise they are not binding upon the shares represented by the certificate.

The following sections are taken without substantial modification from the Imperial Companies Act. They deal with the registration and due publicity of mortgages, charges and other securities issued by companies. These provisions do not in any respect seek to control the issue of mortgages or charges, but merely to give due publicity thereto. The difficulty in this respect was greater in the United Kingdom than it is in Canada. Except in the counties of London and York (Ontario), there are no offices for the registry of land mortgages. Bills of sale and chattel mortgages are, however, required to be registered. But beyond land and chattel mortgages there are floating charges which were not required to be registered either in the land registry office or under the Bills of Sale Act. In Ontario, floating charges have been held to be outside the Bills of Sale Act, and not required to be registered.

To Ascertain Mortgage Liabilities.

Notwithstanding the Canadian Registry Acts and Bills of Sale Act, the practical difficulty of ascertaining the mortgage liabilities is very serious unless all the business of the company is carried on in one county.

This section is intended to prevent the unauthorized use of names as directors of companies in prospectuses.

The preparation of an annual financial statement and its distribution to the shareholders of the company serve no effective purpose unless there is adequate machinery to compel the making of a statement which shows accurately the financial state of the company. For this purpose an audit is necessary. Certain sections, therefore, place the appointment of the auditor in the hands of the shareholders, set out the auditor's duties and empowers the secretary of state to appoint an auditor when one is not appointed by the shareholders, or where one so appointed cannot act, or neglects to act.

These sections are taken without material change from sections 109 to 113 of the Imperial Act of 1908.

When Shareholder Wants Balance Sheet.

There is no provision in the present Canadian Companies Act under which a shareholder can demand a copy of the balance sheet or a financial statement of the company's affairs. In fact, a company under the act is not bound to hold an annual meeting. Neither is it required to make an annu audit, or to report the state of its affairs to the shareholder These sections of the proposed new act are to provide for an annual meeting, an annual audit and a report to the shareholders. These matters are usually provided for in the bylaws of the company. But companies are not obliged to pass such by-laws. The sections in question are taken with slight change from the Imperial Companies Act, 1908.

As the companies Act now stands, there is no provision for making annual returns. After a company has been incorporated there is no automatic method of ascertaining whether it is in existence or who are its officers or shareholders. In fact, if its head office is changed there is no practical method of obtaining any information respecting it. It is true that under section 106 the secretary of state may ask for a special return. But there is no machinery to enforce the provisions of this section, and it is, in fact, often impossible to communicate with a company when such a return is asked for. Provisions calling for annual returns are included in all other similar known acts.

The proposed section follows section 26 of the Imperial Act more closely than it does section 134 of the Ontario Companies Act. Some of the details of the returns of the Ontario Act are added. The provisions respecting the posting of the return in the head office is eliminated. The method of collecting fines is by summary conviction before a magistrate, as the *qui tam* proceedings of the Ontario Act are cumbersome and dilatory.

Not to File Shareholders' List.

The provisions of the Imperial Companies Act respecting returns have been madified by not requiring a list of shareholders or a financial statement. The filing of a list of shareholders is omitted because it puts an unnecessary labor upon the part of the company and agords no substantial information. In cases where this information is necessary it can be readily withheld and the provisions of the act still complied with. This is done either by putting shares in the name of a trustee or by the issue of share warrants. In each case the owner of the shares is not known to the company, and the company is, therefore, unable to set it out in the return.

The filing of an annual statement is objected to as disclosing to the public and to competitors in business the details of the company's affairs.

The sections provide for the publication in the publi newspapers and the Canada Gazette notice of the incorpora-

tion of a company or the extension of its powers. This [illegible] very considerable expense and serves no beneficial purpose.

Sections 5, [illegible], 9, 10 and 12 are made applicable [illegible] companies, whether incorporated under Part I [illegible] II [illegible] act. There is as much reason for a company incorporated by special act of parliament to make an annual return or file a prospectus as there is for a company incorporated under letters patent.

PROFITS OF COAL DEALERS

Examination of 250 Canadian Dealers Regarding Cost of Coal and Charges Made to Customers

In his report on anthracite coal, Mr. W. F. O'Connor, K.C., acting commissioner enquiring into the cost of living, gives the results of his examination of more than 250 Canadian coal dealers, as to the cost to them of coal delivered to their customers, and the charges made by them to such customers. The difference shows what Mr. O'Connor terms "the clear profit of the dealer." The report continues:—

"The elements entering into the cost to the dealer are many. Among them must be reckoned the cost of coal at mines, freight, loss in transit, unloading, storing, maintaining storage, degradation, depreciation and operating expenses, including salaries, rent, advertising, loss by bad debts, selling, weighing charges and delivery. These various costs for the purposes of some following comparisons I shall aggregate into three: (1) Cost at mine; (2) freight; (3) receiving costs, overheads and fixed costs.

Large Operators' Prices are Reliable.

"I have traced these costs as best I could in every individual case of a coal dealer investigated. First, then, as to the cost at the mine. The coal is the product of a foreign country, so I cannot go into the matter of the cost of mining and selling to the Canadian buyer. I have to accept as my basis of costs the figures as quoted from time to time by the larger mining and sales companies of Pennsylvania and New York as the selling prices at the mines. These selling prices so quoted by companies producing about 90 per cent. of the entire output, are uniform as among them. They drop annually on the 1st of April 50 cents per ton and scale upwards monthly 10 cents per ton until September, whereafter the price the price remains steady during the winter months. Such prices are referred to in the trade as 'circular prices.' Those who quote them are referred to as the 'large operators,' and their prices afford the only reliable basis. It should be mentioned, however, that besides the large operators there are some smaller fry known generally as the 'independents,' who handle only a very small percentage of the total output—not more than 10 per cent. and who are 'outlaws' when it comes to selling prices and conditions. They act independently in all respects, cutting under the 'circular' prices when production is at its maximum and prices at their lowest, and when the market is tight on account of production and transportation being curtailed by labor shortage, strikes, railway congestion, weather conditions, etc., they take every advantage. In the result the average of their prices runs very high and their coal is generally much inferior, containing a much larger percentage of slate and bone than that of the 'regular' operators. The main reason for the inferiority in the quality of coal shipped by the smaller 'independent' companies is that a 'coal breaker' to properly break a mine production, costs about half a million dollars, and only the large operators can afford the installation. It would be a waste of time, therefore, and no practical results would ensue if I were to attempt to take into consideration, otherwise than by way of exception in exceptional and known cases of purchases from 'independents,' the figures of these smaller dealers. They quote prices independently of each other as well as of the larger concerns. I would have to figure on a new cost price for practically every sale and itemize each transaction, which process on account of the small percentage of business done by them in this country would not be worth while.

"Having discovered the cost f.o.b. cars at mines, I next add transportation charges to receiving or delivery point. These prices and freights are usually based on the long ton of 2,240 pounds. From f.o.b. cars or boats at destination [illegible] possible, as it is [illegible] customer's [illegible] freight [illegible] such as the cost of receiving, degradation, storing, handling, selling and general expenses, which for the purpose of computing this example, might be placed at $1.60 per ton. This would make the total cost of coal laid down in the customer's cellar [illegible]. A selling price [illegible] would show a profit of [illegible] cents per ton, [illegible] per cent. This is the manner in which costs and selling prices are arrived at in this report.

"While all the costs, overheads, fixed charges and selling prices are not guaranteed to be absolutely correct (this because of the insufficiency or the unreliability in many instances of the only available records of transactions) they will be found to be approximately accurate at least. I have applied the communicated knowledge of all to the circumstances of each, thus being enabled to fill in many gaps, and by a system of averaging according to localities I have arrived at costs results which, when tested by application to concrete conditions have always stood the test well. By taking the figures of, say, a dozen firms within a certain district, covering a certain period, and thoroughly comparing and approximating the same, one is bound to arrive at a pretty close average and to produce a figure which for all practical purposes is acceptable and reliable.

Spring and Summer are "Cheap" Seasons.

"As already stated, the only stable mine cost prices are those quoted by the larger producers, whose prices for the past few years have been at their lowest figure in April of each year. On the first day of that month a premium or discount of 50 cents per ton on all coal purchased and shipped goes into effect and lasts for the month. On the 1st day of May this is reduced by 10 cents, making the discount for that month 40 cents per ton, and in June 30 cents, July 20 cents and August 10 cents, so that in September the price has gone back to the maximum which rules until the next spring. The lower spring and summer prices are designed to encourage the laying in of large stocks by dealers during the spring and summer months, which are the seasons of cheapest production, when the mines would, perhaps, if no inducement to purchase were offered, be forced to cut down output on account of a slack market. This is also the very best time of the year from a transportation point of view, the railways being then free of the difficulties incident to winter weather. Further, lake and river navigation is proceeding, the handling situation is easiest and cheaper freight rates are available, especially where routing by water is possible.

"Coal dealers reckon their year as from April to March, so, where any discrepancies are noted between the figures of any dealer and those shown herein as applicable to any particular section of the country the probable reason may be known. Note also that the figures first given are yearly averages. Presently prevailing prices are dealt with at a later stage of the report. Note further that the averages for 1916 are exclusive of the month of December of that year. The reason for excluding that month is that abnormal conditions developed within it and these continued for a time after the first of this year and throughout the winter. It is my purpose to consider these months of abnormal conditions by themselves."

WAR CERTIFICATES ON SALE

A war savings certificate which will sell at $8.60 and return to the purchaser $10 at the end of three years, says an Ottawa despatch of August 21st, will be placed on sale immediately at all banks and money order post-offices in Canada, according to an announcement by Sir Thomas White. Up to that date $10,000,000 has been made available for the purposes of the war through the sale of war savings certificates, over 140,000 certificates in the denominations of $25, $50 and $100 having been sold since last January. During the past several months sales have ranged from $200,000 to $300,000 a week.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Porcupine Crown Mines, Limited.—The directors of this company have decided to pass the quarterly dividend, owing to a shortage of labor.

Dominion Textile Company, Limited.—The company, says a Montreal despatch of August 14, contemplates erecting a factory to have 100.000 spindles and 3,000 looms, the total expenditure involved being $2,790,000.

Southern Canada Power Company.—The company has issued a statement for nine months to June 30th, which shows substantial improvement in the earning power. The chief items and increases are:—

	1917.	Increase.
Gross earnings	$336,842	$90,893
Operating expenses	127,662	26,577
Purchased power	47,856	30,364
	$175,519	$56,042
Net earnings	161,323	34,851
Interest and administration charges	118,200	11,400
Surplus	$ 43,123	$23,451

Nipissing Mines Company.—The company, says Wall Street Journal, during July mined ore valued at $272,490. Every ounce of silver finds a ready market and with prices at their current high level earnings have broken into new high ground.

It costs more to produce silver to-day than a year ago and considerably more than three years ago, before war prices boosted supplies, and prior to the many wage advances. This naturally has cut down what would otherwise be a rapidly growing margin of profit.

Although a substantial extra dividend could be comfortably paid, the prospective action of Nipissing directors when they meet for disbursement payable in October cannot be forecasted at this time. The July dividend amounted to 5 per cent. and it would seem as though an extra of at least 5 per cent. would be ordered with the next regular disbursement of that amount.

Nipissing will soon pass as an American corporation, for stockholders will meet this month to vote upon the proposition to transfer the charter of the holding concern —Nipissing Mines Company—from Maine to Canada. This will effect a large saving in taxes.

American Cyanamid Company.—The company, a Canadian-American concern, which manufactures fertilizer materials, with plants at Niagara Falls, Ontario and Warners, New Jersey, reports net profits of $638,648 for the year ending June 30th last, against only $58,583 two years ago when the company's business was demoralized by the war. Profits as shown were equal to slightly more than 8 per cent. on the $7,895,200 preferred stock outstanding at the end of the year. The company's securities are traded in on the Toronto stock exchange and the Canadian interest in the company is fairly large.

Net sales for the past year amounted to $2,705,053 against $1,881,532 the preceding year. Contracts for delivery in the current year already in hand are placed at $2,025,811.

The balance sheet shows current assets of $1,343,328, of which $105,066 is cash, against current liabilities of $684,443, including $359,114 notes payable.

Surplus account which was $232,283 a year ago, stands at $525,402 after deducting $148,051 for losses sustained through dismantling part of the Niagara Falls plant and $106,578 for deferred dividend paid last December. Accrued dividends due on the preferred stock amount to $439,837.

During the past twelve months the company acquired the entire capital stock of the Ammos-Phos Corporation, which is to begin manufacturing a new fertilizer material, ammonium phosphate, this month, and has already been producing sulphuric acid and sulphate of ammonia. With this corporation was also acquired in the same transaction the Amalgamated Phosphate Company, which owns phosphate rock mines in Florida.

The annual report makes the following comment: "The demands upon your company's treasury to defray the cost of the phosphate mines extensions (the capacity of the mines is being doubled), coupled with the extensions and improvements at the Ammo-Phos plant and at Niagara Falls, have been such, together with the undue risk at this time of the world's history in assuming large loans, as to involve the necessity of passing the dividend on the preferred stock, amounting to 6 per cent. for the fiscal year ended June 30th, 1917. The preferred stock is cumulative, so that this action is only a deferment; all accrued dividends on the preferred stock must be discharged before any dividends can be paid on the common stock. Your directors have taken this action with the conviction that this reinvestment of earnings in plant extensions and improvements at this time will result in extraordinary and immediate benefit to holders of both the preferred and common stock."

Porcupine Crown Mines, Limited.—The directors of the company have passed the dividend. which has been at the rate of 12 per cent. per annum since the dividend was started in 1914. Dividends have been paid quarterly on the basis of 3 per cent. Owing to the excessive shortage of labor in the Porcupine district and the resultant inability to keep the mine development ahead of production, the directors of the company deem it advisable to temporarily discontinue dividends. As soon as the labor situation adjusts itself, dividends will be resumed.

The company was enabled to pay its dividends for the six months ended June 30, 1917, only by drawing on the broken ore reserves, a further continuation of which would be highly detrimental to the economic interests of the company.

Production of bullion, gross value	$245,031
Mint charges, mining, milling and general mine expenses	120,851
Profit on operating mining property	$124,179

Profit and Loss Account at June 30, 1917.

862; deferred charges to future operations, $4,122; current liabilities, accounts payable and accrued charges, $166,789.

Capital account—Corporation of city of Toronto—By-law No. 5036, cash advanced, $2,240,124; debenture discount and expenses, $509,875—$2,750,000; by-law No. 5918, cash advanced, $1,816,774; debenture discount and expenses, $383,225—$2,200,000; by-law No. 6674, cash advanced, $641,335; debenture discount and expenses, $58,665—$700,000; by-law No. 7176, cash advanced, $906,700; debenture discount and expenses, $93,300—$1,000,000; by-laws Nos. 7584 and 7642, cash advanced, $1,243.469; debenture discount and expenses, $4,530—$1,248,000; total bonded debt, $7,898,000; less funds in city treasurer's hands for redemption, $590,195; net bonded debt, $7,307,804.

Reserves—For depreciation of general assets, $694,331; for depreciation of leasehold property, $42,475; for contingencies, $6,500; for sinking fund, $590,195; for redemption of serial debentures, $10,684—$1,344,186; surplus, $63,390—$8,882,171.

The commissioners in their report to the shareholders said that the operations for the year 1916 were as follows: The gross income amounted to the sum of $1,706,177; the cost of electric current and the expenses of operation and management, including repairs and maintenance, absorbed the sum of $1,072,134; leaving a surplus of income on operating account for 1916 of $634,042; interest, depreciation and sinking funds for the year absorbed the sum of $615,646; leaving a surplus of net income of $18,396.

The whole of the cost of getting and promoting new business had again been met out of the year's income. Nothing was charged to capital expenditure that should have been charged to revenue. The enterprise has therefore fully paid its way and earned a small surplus. During the year negotiations were entered into for the purchase of the assets of the Interurban Electric Company. A tentative agreement was reached under which the system early in the present year undertook the operation of the Interurban Electric Company's lines, until such time as the customers could be transferred to the lines of the system. Nothwithstanding the large increase in the amount of electrical energy sold by the system, the prevailing high cost of material and the abnormal business conditions at present existing, the expenses of operation and management, including repairs and maintenance, have, by strict economy, again been reduced below the figure of the preceding year.

The board of commissioners are: P. W. Ellis, chairman; T. L. Church, mayor; R. G. Black, commissioner.

NET DEBT OF AMERICAN CITIES

It Averages $76.64 Per Capita, Nearly Eight Times That of National Government

In 149 of the 213 American cities of more than 30,000 population the excess of expenditures for governmental costs, including interest and outlays for permanent improvements, over revenues, during the fiscal year 1916, amounted to $86,013,326, or $3.68 per capita, according to a preliminary report issued by the Census Bureau. In the remaining 64 cities the excess of revenues over expenditures was $12,422,256, or $1.40 per capita. Taking the entire 213 cities as a group, the excess of expenditures over revenues amounted to $73,591,070, or $2.28 per capita. The net indebtedness of these cities averaged $76.64 per capita. Eighty-nine cities, or nearly 42 per cent. of the total number, are operating under the commission form of government.

The aggregate revenues of the 213 cities during the year amounted to $994,710,241; the aggregate expenditures for current governmental costs, including interest, to $780,742,643; and the aggregate outlays to $287,558,668.

Tax Receipts Draw Big Revenues.

Of the total revenues, $695,106,895, or nearly 70 per cent., represented receipts from the various kinds of taxes. The bulk of this amount, $623,300,805, was derived from the "general property tax," made up of taxes on real and personal property. Of the remainder, the largest item, $38,024,542, was contributed by taxes on the liquor traffic. This amount is somewhat smaller than the corresponding sum reported for the fiscal year 1915, $39,606,956, although the total number of cities covered by the report was greater by nine in the later year than in the earlier. Next to taxes, the largest source of revenue was found in the earnings of public service enterprises, which amounted to $99,797,175. This sum was considerably more than double the amount of payments for expenses of public service enterprises, $44,636,007, thus leaving a net revenue from this source of $55,161,168. The bulk of the earnings of public service enterprises came from water supply systems, from which the receipts aggregated $79,423,776.

Net Increase Less than Last Fiscal Year.

The expenditures during the year for governmental costs in these 213 cities, which aggregated $1,068,301,311, differed but slightly in amount from the cost of conducting the Federal government. These expenditures, in the order of their importance, were: For expenses of general departments (legislative, executive and judicial establishments, schools, police and fire departments, sanitation, etc.), $603,060,076; for outlays, $287,558,668; for interest on indebtedness, $133,046.560; and for expenses of public service enterprises (water supply systems, electric light and power systems, docks, wharves, landings, etc.), $44,636.007. The amount expended for outlays was considerably below the corresponding sum for the preceding year, $329,585,561. The average per capita expenditures for all governmental costs, including interest and outlays, in the 213 cities, amounted to $33.11, a sum considerably more than three times as great as the per capita cost of conducting the Federal government, $10.36; and for all governmental costs, including interest but excluding outlays, the average per capita payments of the cities were $24.20.

The net indebtedness (funded and floating debt less assets in general sinking funds). for the entire 213 cities amounted to $2,473,103,681, or $76.64 per capita. The corresponding figure for the Federal government is $989,219,622, or $9.77 per capita. Thus the per capita indebtedness of the cities of over 30,000 is nearly eight times as great as that of the National government. The net increase during the fiscal year for all the cities taken as a group, $106,770,100, was considerably less than the corresponding increase during the preceding fiscal year in the 204 cities covered by the report for that year, which amounted to $142.731,834.

NO MORE COPIES ARE WANTED

In response to the advertisement printed in these columns two weeks ago, asking for copies of *The Monetary Times* of July 20th, sufficient copies have now been received.

Your Financial Agent

When travelling, when your property is in a distant city or province, or when your own convenience suggests it, you will find this Corporation ready and competent to manage your financial affairs for you at a very reasonable service charge.

Smith, Marshall; Greenwood, $9,000 15-years not ex. 8 per cent. annuity. L. Thorn, Lloydminster; Polar Crescent, $6,600 15-years not ex. 8 per cent. annuity. R. E. Higham, Asquith; Third Meridian, $1,200 15-years not ex. 8 per cent. annuity. D. S. Hutchinson, Davidson; Findlater, $6,000 15-years not ex. 8 per cent. annuity. E. J. Topping, Findlater; Red Jacket, $1,800 15-years not ex. 8 per cent. annuity. J. K. McDougall, Red Jacket; Hohenlohe, $3,700 15-years not ex. 8 per cent. annuity. H. Fissler, Langenberg; Hubbard, $6,000 15-years not ex. 8 per cent. annuity. R. H. Longmore, Hubbard; Park Line, $3,500 14-years not ex. 8 per cent. annuity. R. W. Bunyan, Quill Lake.

The following is a list of bonds reported sold:—

School Districts.—Colmer, $2,000. Canada Landed and National Investment Company, Winnipeg; Okno, $1,800. Western Canada Bond Company, Winnipeg; Lakeside, $2,000 Great-West Life Assurance Company, Winnipeg; Beswick, $2,000. Great-West Life Assurance Company, Winnipeg; Salt Lake, $1,600. Canada Landed and National Investment Company, Winnipeg; Barton, $500. Western Canada Bond Company, Winnipeg; Shaunavon, $15,000. Great West Life Assurance Company, Winnipeg; Allan Hills, $1,800. Goldman and Company, Regina; Ramsay, $6,000. Bond and Debenture Corporation, Winnipeg.

Rural Telephone Companies.—Red Lake, $13,200. Moose Jaw Sinking Fund Trustees; South Antelope, $18,500 Goldman and Company, Regina; Hillsborough, $23,200. W. L. McKinnon and Company, Regina.

Town.—Rosthern, $23,000. W. L. McKinnon and Company, Regina.

Rural Municipality.—Dufferin, $2,500. Nay and James, Regina.

Winnipeg, Man.—The board of the sinking fund trustees submits the following report for the year ended April 30th, 1917: The total amount of money available for investment during the year was $3,133,040.17, being receipts for the year and balance carried forward. This amount has been applied as follows: Debentures redeemed, $491,057.27; expense, $6,501.63; exchange, $630.01; law costs, $230.67; new investments, $1,665,136.06; accrued interest on new investments, $14,658.23, which left a balance in the bank at the close of the year of $955,407.40.

The assets of the trustees now amount to $8,142,604.33, an increase for the year of $1,180,700.45; the increase since 1913 being as follows:—

		Increase.
1913	$3,770,176.55	$ 504,040.50
1915 .	5,772,330.05	2,002,154.40
1917	8,142,604.33	2,370,303.38

The excess earnings for the year from investments amount to $148,461.33, and this added to the surplus at the beginning of the year $46,352.74—makes a total of $194,814.07. This amount has been distributed as follows: Premiums on various investments acquired during the year, now written off to reduce same to par value, $14,590.50; administration and general expenses, $7,380.31; transferred to investment reserve, $50,000; transferred to levies account in connection with by-law No. 5052, $51,258.54; leaving a surplus of $71,575.72.

The investment reserve account now stands at $200,000. This account has been set up to provide for any possible losses or depreciation in value of securities. During the last two years we have taken $56,958.52 from our profits and written off all premiums, so that now, no security is valued at more than face value. Bonds purchased at a discount are included at cost. The par value of the latter is nearly $300,000 in excess of the cost, and may be said to form an additional surplus realizable at maturity. The board reports that payments have been well met. Outside of one Roman Catholic separate school district in the province of Saskatchewan which is now being investigated by the local government board, the board had, at the close of the financial year, only two coupons of small amounts overdue. Both of these matured after the first of January, 1917, and at this date (May 15) have been paid.

There are two debenture by-laws under which the city has not levied sinking fund. One of $40,000 for Maryland Street bridge which matures on April 4th, 1925. This amount will probably be taken care of out of sinking fund excess earnings of some year prior to the maturity of the debentures, so that it will not be necessary to make a re-issue. The other by-law is one for $50,000 which indebtedness was incurred for the purchase of a suburban park. The debentures were issued April 30th, 1904, and fall due August 1st, 1933. Arrangement should be made with the parks board to provide a sufficient amount out of their levies to take care of these debentures at maturity. The net debt of the city has been reduced during the year by $2,759,916.99 as follows: Debentures and stock paid off which matured during the year, $419,077.31; reduction in debt by bond conversion, $1,154,049.23; increased accumulation of sinking fund, $1,186,790.45.

In 1915 the council decided that no capital expenditure would be incurred that could possibly be avoided, and this policy has been continued to date, with the result that since April 30th, 1915, the debt of the city has been reduced by $4,782,845.73:—

April 30.	Gross debt.	Sinking fund.	Net.	Reduction.
1914	$41,802,918	$4,609,087	$37,193,831	....
1915	42,050,324	5,772,330	36,277,993	$ 915,837
1916	42,126,896	6,955,993	35,170,902	1,107,091
1917	40,553,679	8,142,694	32,410,985	2,759,916

In some cities the policy has been to issue debentures to cover patriotic grants and expenses. Winnipeg has paid all sums of this kind out of the general taxes. The surplus is growing very rapidly, and while it is deemed advisable to take a reasonable amount from the yearly profits and add to the investment reserve account, it is considered right and proper that the ratepayers of to-day should benefit in the excess earnings of the sinking fund. It has therefore been decided to take out of this year's surplus $51,258.54 and place to the credit of by-law No. 5052. This is a by-law for $1,450,500 due in 1938 and the general taxpayers have to provide an annual levy of $25,862.56. We understand that it is the intention of the city to apply against the amount of this by-law, approximately $710,000 being the estimated profit of the second bond conversion. It is estimated that the amount in the sinking fund at the credit of this by-law at the present time, together with the amount now transferred, will yield sufficient to pay the debentures at maturity, thus relieving the general taxpayer of providing the annual levy of $25,862.56 per year for the next 21 years. The average rate of interest earned on investments during the year was 6.03 per cent.

The sinking fund trustees are: E. F. Hutchings (chairman), W. H. Cross, Frank O. Fowler and H. C. Thompson (secretary).

"MADE IN CANADA"

Some idea of the extent of the work of the department of militia in war times may be gleaned from the fact that over 7,000 different articles enter into the equipment of Canadian armies in the field, nearly all of which are manufactured, in whole or part, in Canada. The Canadian National Exhibition, Toronto, has arranged for a gigantic display, and in order to adequately do justice to it an entire structure, the Educational Building, will be devoted to the exhibit, which will include everything of interest, from hospital equipment to the latest type of Pom Pom gun, just now coming into general use in France. There will also be a free display of moving pictures showing the manufacture of Canadian war supplies.

Experience in Investment

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of trust funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

TRAVELLING OUR GREAT LAKES

Steel Liners Operating on Trips Which Only This Continent Can Give

The Great Lakes of America are known to travellers of all nations. Not only do these vast waters, (millions of acres of which help to make up Canada's area), form part of the itineraries of tourists and holiday makers, but business men almost invariably make their tickets read "via boats" whenever practicable. A long train journey westward or eastward across the continent is given a refreshing break by the voyage across the Great Lakes. Traffic this season, despite the vagaries of the weather, has been exceptionally heavy and the outlook for the coming weeks of the season is excellent. Our inland waters are being learned by travellers who previously thought the Atlantic and Pacific were about the only waves worth while. Those who, before the war went to Europe for vacations, now include the Great Lakes trips in their programme. Since the war commenced the ocean has become thick with belligerent terrors and Americans have been compelled to learn more of their own continent. Therein is the reason for the heavy passenger traffic over our railroads to the prairies, to the mountains, to the seaboard, to the lakes. For years, the Grand Trunk Railway, for example, has run excellent steamship specials to Sarnia, to connect with the substantial liners of the Northern Navigation Company which ply across Lakes Huron and Superior. Yet only during the past three years has the patronage of the instructive trip from Detroit or Sarnia to Duluth and back, risen to the excellence of a model Great Lakes cruise. Two years ago Canadians commenced in serious numbers to learn the Great Lakes at first hand. Tourists from the United States in greater numbers also came to Canada for the same reason. Now the traffic flow has begun, only each winter will temporarily stop it.

The average man is suspicious of railroad and steamship descriptive folders. He believes their fiction is of strength and that their facts are weak. He lives in dread of lurking "extras." The Northern Navigation Company's folder says that a cruise on one of the company's "palatial steamers offers the traveller all the pleasures of an ocean voyage. In addition it makes possible daily sight-seeing trips to most interesting and delightful places. Such a cruise is more than an exploration—more than an education—more than a romantic diversion—and at no time is there the monotonous sameness of the voyage on the ocean. Along the shores of these inland seas were waged some of world's most relentless wars of absolute extermination. Upon their waters occurred thrilling adventures of the early explorers." It continues with a detailed description of the trip and recalls the fact that experience with travellers has taught that they most appreciate a steamer service in which everything has been carefully planned in advance for their comfort and entertainment. Then only is a voyage nearly ideal. This is made possible by the Northern Navigation perfectly appointed steamers and the helpful and courteous employees who operate them for the passengers' pleasure. To enhance that pleasures are added personally conducted side trips, such as visits to falls, boulevard drives, fishing excursions and basket picnics to quaint spots. As a matter of fact, the Northern Navigation Company's Great Lakes cruise is one of the few trips of its kind in which the performance is better than the advance description. "Extras" are unknown, and every effort is made to satisfy the exacting traveller of the twentieth century. That the company is successful in doing this is the best advertisement it can have. It ensures that an endless crowd will decide to see Canada and the Great Lakes first.

Three Steel Liners.

With three Canadian-built steel liners ranging from gross tonnage of 3,329 to 6,905, the Northern Navigation Company, a Canadian corporation, is giving the business man and the pleasure seeker a trip which only this continent can give. From Sarnia to Duluth and back is 1,600 miles. These are the boats:—The "Noronic," flagship of the fleet, is a steel liner of 6,905 tons gross, stateroom capacity 558 persons, dining room capacity 278 persons, and freight capacity 3,200 tons. The "Noronic" operates between Detroit, Windsor, Sarnia, Sault Ste. Marie, Port Arthur, Fort William and Duluth. The "Hamonic," sister ship of the "Noronic," is a steel liner of 5,264 gross tonnage, stateroom capacity 332 persons, dining room capacity 160 persons, and freight capacity 2,850 tons. This vessel is operated between Detroit, Windsor, Sarnia, Sault Ste. Marie, Port Arthur and Fort William. The "Huronic" is the third of these steel lake liners and is of 3,329 gross tonnage. Stateroom capacity 184 persons, dining room capacity 100 persons, freight capacity 2,400 tons. This boat is operated between Detroit, Windsor, Sarnia, Sault Ste. Marie, Port Arthur and Fort William, from April 28th to December 1st. These vessels are doing business from early spring to late fall, catering alike to those who desire vacations soon after the winter's strain, or during the heat of the summer, or just before the late autumn's business round begins.

Almost an Ocean Trip.

The journey has all the advantages of an ocean trip, minus the salt air, but plus the notable advantage of a stop at a port every day to stretch newly acquired sea legs on land again for a few hours. So that marine monotony may not develop, the longest jaunts across Lakes Huron and Superior are made during night. Then the traveller is sleeping a sleep which only a clear mind, fresh air, sunshine and good meals will bring. After the run across Lake Huron, a trip of about 200 miles, there is the journey through St. Mary's River, one of the most picturesque parts of the entire cruise. Then acquaintance is made with the canals of Sault Ste. Marie, where the 6,000-ton liner is lifted in 10 minutes to the level of Lake Superior, which, as we learned at school, is the world's largest lake. At Port Arthur, while the vessel is doing its important part in the movement of freight, a side trip is taken to Kakabeka Falls. Someone has termed them the Niagara of the North, unfair, because Kakabeka Falls have a style, color and magnetism distinctly their own. From Port Arthur the Northern Navigation boats travel to Fort William and then to Duluth, the iron city, which between its duties as one of the greatest inland ports,, has many picturesque spots to show the visitor. The return trip to Sarnia or Detroit is varied by an excursion at Port Arthur to Mount McKay. It is good business to learn one's own continent first. These Great Lakes tours help to accomplish that and in an unusually pleasant way.

The

Monetary Times Press

Is thoroughly equipped for the production of printed matter with great attention value.

Users of printed matter are assured of a high standard of workmanship when they place their orders with the MONETARY TIMES PRESS

A Record of Fifty Years

THE *Monetary Times* was first published in August, 1867, and is therefore 50 years old this month. In countries which have had the benefit of civilization counted by centuries, a fifty years' record of financial and commercial journalism may not be unusual. In Canada, comparatively a new country, *The Monetary Times* has no competitor in the matter of age; we think it will never have a serious rival so far as honesty of purpose and enterprise are concerned.

Since a short history of this paper was last printed the circulation of *The Monetary Times* has again gained considerably. For the benefit, then, of the many new readers, and as a string of recollections for old friends, an outline of the paper's career is given.

Fifty years ago, when Canada did not reach from ocean to ocean, but consisted of the two Provinces which are now Quebec and Ontario; before Confederation; before there was any Yukon, or any Cobalt, or any "North-West," it occurred to a small group of men in Toronto that need existed for a "weekly" of commercial and financial opinion, a paper that should deal intelligently and courageously with insurance, commercial law and practice, and matters relating to investment generally. They decided to start *The Monetary Times.*

The late Hugh Scott, the well-known underwriter, and the late William A. Foster, Q.C., were sponsors for the first issue. It was a 16-page sheet, small quarto, with very few advertisements, for, as Scott proudly said afterwards: "We never canvassed for a single card until the venture was self-supporting by means of subscriptions or voluntary advertisements." Its first printer was John Ross Robertson, then a publisher on Yonge Street, now proprietor of The Evening Telegram, Toronto.

The paper was intended to be, in the domain of business, what The Nation afterwards was in the literary field, a vehicle for the views and feelings of Canadians, aiming to be self-governed, patriotically ambitious, resenting dictation and pedantic methods in either government or commerce. Its tone and purpose commended *The Monetary Times* from the start, and Foster became its editor.

At that date (1867) there were twenty-six chartered banks in Canada whose paid capital was $29,831,000. Nineteen of these have since been amalgamated or wound up. The remaining eight, which are still in existence, with greatly enlarged scope, are the Bank of Montreal, the Canadian Bank of Commerce, the Bank of Nova Scotia, the Bank of British North America, the Bank of Toronto, The Molsons Bank, the Merchants Bank, and La Banque Nationale, together with others which have since come into existence. There were in Canada at that day 120 bank agencies in 55 places of Ontario and Quebec. To-day, there are more than 3,000 branches and agencies of Canadian banks, distributed from Sydney to Vancouver and Alaska, with a hundred agencies abroad.

Confederation of the scattered Provinces was effected in 1867, when Nova Scotia and New Brunswick and Prince Edward Island became part of Canada. The purchase of our far west prairie lands from the Hudson Bay Company followed in 1870, and in the next year British Columbia joined the Dominion. Our nation-building was begun, and there followed a period of growth and expansion during which the Canadian Pacific Railway became a wonderful factor in extending our trade with the world.

During these years *The Monetary Times*, under the editorial management of the late J. M. Trout, grew with the country. It absorbed three other commercial papers, one in Toronto and two in Montreal; the subscription list of one of the latter, the Trade Review, founded by Erastus Wiman, and edited by Hon. James Young, gave it a hold upon the commercial reading public in Quebec and the other Atlantic Provinces which it has ever since retained; while, as Manitoba and the West came into increasing prominence, the circulation of the paper west of the Great Lakes went ahead steadily.

The aim of the management was then, as it is to-day, to furnish a paper that should be carefully written, from the standpoint of experience and calm observation. Knowledge of affairs, independence of judgment, moderation of tone were usually to be found in the utterances of its writers, among whom were cabinet ministers, prominent financial men and lawyers, well-known manufacturers and merchants and agriculturalists. Though not always brilliant or spicy, it was usually sound; and, while not assuming to possess all the virtues, it showed fearlessness and rectitude in high degree.

The paper soon became known for its outspokenness upon fraudulent finance or business dishonesty. Some of the writers who laid the foundation of its reputation, and helped to maintain it, in addition to Foster, who was a brilliant writer, were George Hague, who long wrote the Monthly Financial Review; Charles Lindsay, whose able summaries of The Situation were a feature for many years; R. R. Grindley, Hon. James Young, James Hedley, and other prominent publicists. While giving much attention to home affairs, in dealing with budget speeches and commercial decision, or summarizing blue books, it kept a wider outlook in having correspondents in England, United States and elsewhere.

This brief outline of a formative period in the history of the Dominion suggests many contrasts, statistical and other, into which there is not space or time to enter. But it is a satisfaction to those—some of them still living—who helped to found *The Monetary Times*, to know that it has reached a goodly age for a young country, and that its hold upon the respect of its increasingly numerous patrons is well maintained.

WORK OF A FINANCIAL PAPER

Views of the Editors of 1870, When The Monetary Times was Three Years Old

The first issue of *The Monetary Times* was published on August 15th, 1867. So far as we know there are, unfortunately, no copies of the first and second annual volumes in print. A complete file of the paper from 1867 to the date of the Parliament Buildings fire at Ottawa was housed in the Parliamentary Library there. When the fire occurred last year these volumes were burned. If, as Editor Rathom, of the Providence Journal (the man who exposed German plots in the United States and Canada) says, our Parliament Buildings were burned by German spies, we can add to the record of German crimes the destruction of the only early copies of *The Monetary Times* in existence. At this present time, while we are celebrating our fiftieth birthday, it is interesting to read again the editorial comment printed in the issue of August 19th, 1870. Here it is: –

The present is the first Number of our Fourth Volume. *The Monetary Times* was first issued on the 15th August, 1867, and contained but *Eight* pages; these have been gradually increased to *Twenty*, and even this number does not so well suffice to supply the demand for space now as did the original Eight at that time.

To us it is a most gratifying fact that, whether considered as a business undertaking or as a means of influencing public opinion on the subjects with which it deals, the three years' career of this Journal has been one of marked success. The circulation has risen from a few hundreds to as many thousands. Not a town or village of Ontario has failed to furnish its quota of readers; in Montreal and Quebec a list of subscribers has been secured which the more pretentious dailies cannot rival. The business men of the Lower Provinces, the United States and Great Britain find *The Monetary and Commercial Times* the best exponent of the business interests of the Dominion, and consult its pages accordingly; while much-prized patrons are distributed through Manitoba, British Columbia, South America and the West Indies.

It is unnecessary now to put in a plea for vigorous and independent special journals. The universal, practical and hearty recognition accorded to this Journal could not have been won except by merit—would not have been extended unless it had been felt that the interests concerned were being served by its advocacy. So long as the daily papers are crammed, as now, with the latest news, and swelled out with the daily chapter of accidents, adorned with distended black head-lines; so long as the latest rumor or sensation is a more vendable commodity than the hard facts of commerce, or the figures which illustrate the movements of trade, the progress of banking or insurance, the journals will give them the same enviable prominence that they now receive. Take up the best of our morning papers: one column, triple-leaded, and overshadowing the editor's "leader," contains an eloquent eulogium on the doubtful virtues of Mr. Sleek-em-Down's horse powders, or a pathetic appeal to gullible humanity on behalf of Mr. Dosem's "marvellous and unparalleled" remedy for all the grim category of human ills, from a mosquito-bite to the Asiastic Cholera, backed up by bogus certificates of wonderful cures that never were performed. Puffs, paid for by the line (for that is now the only way to secure editorial recognition) news, extracts and tales occupy all but the last solitary corner of the last page, which is generously devoted, or so much of it as is not required for other purposes, to the great absorbing subjects of trade, commerce, banking and other powerful interests that lie at the bottom of the country's prosperity, and that are of the most vital importance to the whole people. Unfortunately, when these subjects are dealt with, they often fall into bad hands, and suffer seriously from the mistaken efforts of ill-informed advocates. What greater necessity could be supposed, then, that a journal which concentrates the best talent of the Dominion upon the discussion and elucidation of these questions; which supplies the best thoughts of the best minds as to what is and what is not for the common interest; and which gives that kind of news only which specially concerns the classes for whom it is designed? Discharging these duties as efficiently as it has done for the business men of the Dominion, it is easy to account for the hearty reception which has been accorded to *The Monetary and Commercial Times*, and for the ample patronage it has enjoyed during the three years of its publication.

Within the past year increased space and attention have been devoted to Trade and Commerce. A combination with the whilom able organ of the Montreal Trade interests has placed us in a position to speak to the whole body of traders. This favorable opportunity is not being lost. We have endeavored, and shall continue our endeavors, to impress those business maxims which success has proven to be sound and worthy of adoption. We have sharply rebuked the various abuses that have crept into the practice of trade, and have mercilessly laid bare the misdeeds of that class, too numerous, who practice fraud and rascality under cover of the bankrupt law, and who, as "insolvents," filch from their creditors to fill their own pockets. We are after these gentry, and shall not spare them: let them take notice.

We take some credit for having excited greater interest in the beneficent cause of life insurance, and for contributing to its spread among all classes. As an Insurance Chronicle this Journal has become a *vade mecum* with the life agents—a most deserving and benevolent class, whose efforts prevent a world of misery every day, whose persistency very often secures the bread and butter, home comforts, friends, all, to many a household in the hour of saddest bereavement. We have done our part, too, in promoting sound fire insurance, and if we have used the scalpel freely at times, events have proven that we used it wisely. In this department of labor we take increasing interest and shall make it the subject of more assiduous care.

The wise management of our system of banking and finance involves the welfare of the Dominion, and cannot be too exhaustively discussed. A sound and correct public opinion on this subject is the best possible check upon the schemes of the currency doctors and the financial nostrums that are ever cropping up. Some of these are as delusive as the apples of Sodom—fair to the eye but dust in the mouth.

Our 2,500 miles of railways are being continually added to, and will soon be doubled. Our mines are suffering from a period of depression, but it must not be inferred from this that the hidden wealth of Canada is to lie dormant, because lying and trickery have driven capitalists and honest men out of the field. The numerous projects that spring up under the limited liability act, and which seek the confidence of investors, often require dissection, and always call for an intelligent discrimination on the part of the public. A cardinal plank in our platform is to recommend no enterprise, no matter by whom, or in whose interest, projected, which does not command our full confidence after investigation. We have already seen service in this department and shall not spare criticism where it is deserved.

Entering now upon another year we shall make *The Monetary and Commercial Times* still better and more useful. It will be guided by the same principles and directed by the same hands as in the past. As the only journal in the Dominion devoted to the subjects of which it treats, it will occupy the field fully. A staff of the ablest writers will contribute regularly to its pages, and everything possible will be done to heighten its interest and value. We ask from the public a continued recognition of our efforts, and that fair reciprocity to which our merits entitle us. Thus stimulated we shall deal vigorously, truthfully and fearlessly with the issues that are presented to us for discussion, at whatever cost, and endeavor to establish still higher claims to public approval.

REPRINTED FROM THE MONETARY TIMES, AUGUST 26TH, 1870.

MONTREAL STOCK MARKET.

Reported by Robert Moat, Broker.

MONTREAL, August 23, 1870.

The improved feeling in this market noticed last week still continues, and with a superabundance of money, for which it is difficult to find profitable employment, prices of most securities are steadily advancing. For discount, money is readily procurable at six to seven per cent., while large amounts are offered on call at five per cent. Exchange on London closes very weak at 9⅜ to 9½ for bank, and 8¾ to 9¼ for private.

Banks.—Transactions have been limited, owing to the very small amounts offered. Montreal sold at 191 but has since advanced, and is now held for 194. Merchants was dealt in at 114 and 114½. Ontario is decidedly firm, with considerable sales at 104, holders now asking 104½. Molsons

THE CITIZENS' INSURANCE COMPANY
(OF CANADA.)

Subscribed Capital........................ 1,000,000

Especially empowered by Act of Parliament, and fully authorized by Government under the Insurance Bill.

HUGH ALLAN, - - - - PRESIDENT.

Life Department.

THIS sound and reliable Canadian Company—formed by the association of nearly 100 of the wealthiest citizens of Montreal—issues policies on all the Modern Plans, including—Limited Payments, Endowments, Part Credit Premiums (without notes), Income Producing System; and several new and valuable plans.

A comparison of the very Low Rates, and of the liberal and unrestrictive nature of this Company's Policies, with those of any other Company, British or American, is especially invited.

All Life Policies are absolutely Non-forfeitable.

Persons intending to assure their lives are particularly requested to first examine the Prospectus, List of Shareholders, and Policies of this Company, which, together with all information concerning the constitution of the Company, the working of the various plans, &c., may be obtained at the
Head Office, Montreal—No. 71 GREAT ST. JAMES STREET,

Cheques, money orders, &c. should be made payable to J. M. TROUT, *Business Manager, who alone is authorized to issue receipts for money.*

The Canadian Monetary Times.

FRIDAY, OCTOBER 8, 1869.

HARVEST OF 1869—REPORTS BY THE GRAND TRUNK RAILWAY.

An annual account of the growing crops, furnished by the station agents, is a feature in the management of the Grand Trunk. That for 1869 has just been given to the public through the daily press. The reports are interesting and of some value if they are not so comprehensive as they should be. Without doubt, they give a pretty correct idea of the crops in the important districts through which the Grank Trunk and its subsidiary lines pass.

It appears that along the Buffalo and Lake Huron Road, the yield of wheat has varied from 20 to 30 bushels per acre, giving an average of about 25 bushels. From Sarnia to Georgetown, on the western section, the average yield would be about 30 bushels, and from Georgetown to Toronto 35 bushels to the acre. From Toronto to Belleville the average is from 20 to 30 bushels; from Belleville east, the figures vary from 12 to 22 bushels. Taken altogether, the statements indicate a crop above the average as to quantity. In point of quality, the accounts are not so satisfactory. Rust did much damage, causing the berry to be small and shrunken. Harvest weather was generally cloudy and wet so that the grain was housed before being made thoroughly dry. This will tell against the flour trade next season. When the weather is warm it is impossible to prevent flour made from damp or unsound wheat becoming heated and turning sour.

The coarse grains are favorably reported on in almost every district. Barley grew rank and tall and will give a large yield in quantity, but the quality is very inferior. It cannot be doubted that the season was unsuited to the barley crop. The berry is plump, it weighs well, but the color is wanting, and upon that the name and fame of Canadian barley chiefly depends. Pease are generally good, though the wet weather did them much mischief. Oats are described as a luxuriant crop; they were widely sown—never more so—in consequence of the high prices and the scarcity of the past two seasons. Such an abundance of oats with an unusually heavy crop of hay and of roots, must give a superabundance of fodder for live stock, and make it correspondingly cheap. We should add that the potatoes in the Province of Quebec were much injured by being rotted with the excessive wetness of the ground.

The midge did very little damage in the districts intersected by the Grand Trunk; this is re-assuring; we hope soon to be rid of this pest altogether.

In the counties of Simcoe, Grey and Bruce, we happen to know from other sources that a great portion of the wheat crop has fallen a victim to the midge, it having migrated thither. The farmers of that section will have to adopt the tactics which have proved so successful in the older townships to repel the foe.

The harvest of 1869 is fully two weeks later than last year. This is an unfavorable circumstance. It crowds the fall work into a few weeks; it renders it difficult to get grain, barley especially, threshed and marketed before the close of navigation. This is of the utmost consequence in the case of barley, as it has to be malted during the cold weather or held over till the next season. The cheapness of carriage by water enables dealers to pay a much better price for it during navigation than they can do afterwards.

As a whole the retrospect is pleasant. The prospect, also, is full of hope. A good harvest and good prices for it mean prosperity for all classes. Successful agriculture with us is the basis of successful commerce and manufactures; without it they would be like a stream severed from its fountain.

A BRILLIANT OPERATION.

Mr. E. H. King seems to have been a prominent actor in the drama played off so successfully on Friday week, in Wall Street. Those who ought to know, assign him a leading position in the clique which planned and executed the scheme to corner gold. We have no information as to the final result to Mr. King of the many brilliant operations he is supposed to have participated in on that occasion. Let us hope that he and his bank have not fallen in with the same kind of luck that has happened to most of the other leading spirits in that memorable "bull-and-bear" fight, which has made them pretty sick of the whole business.

One transaction of Mr. King's in this connection is of interest to Canadian business men and ought to be placed on record. The facts are: A Canadian broker arranged with an agent of the Bank of Montreal on Friday for the use of $10,000 gold, in New York, for a large consideration, which, with $10,000, was deposited in the agent's hands. The agent at once telegraphed the branch of the Montreal Bank in New York, to place to the credit of Mr. So-and-So $10,000 gold. No reply was obtained for some time; finally, after much evasion, it was ascertained that the agents order was dishonored—the bank substantially protesting its own draft—and thus the firm was deprived of the use of the money which it had paid for. And not until the following Tuesday, after a new arrangement had been made, was the $10,000 handed over. We happen to know that Mr. King is himself directly responsible for this little stroke of financiering. No other inference can be drawn from it than that the funds of the bank were locked up in Wall Street operations, and were not available. Such is Canadian banking, as interpreted by the Bank of Montreal.

AMERICAN LAKE AND OCEAN MARINE.

Representatives of the shipping interest at Boston are agitating for a change in the navigation laws of the United States, so as to allow the registry, at their Custom Houses, of foreign built bottoms, which shall become the property of American Citizens. It is charged that Congress has taxed American tonnage out of existence; and the shipowners thus deprived of their property are not permitted, by the existing law, to purchase tonnage in the cheapest market, but are compelled to employ foreign vessels, and hand over to them the profits of the carrying trade. So long as the vessels of each nation had the monopoly of their own trade there was no ground for complaint, but now that the prin-

CANADIAN STOCK AND BOND QUOTATIONS IN 1869.

(Reprinted from The Monetary Times, August 27, 18[illegible])

sold at [illegible] will be paid. Toronto declined to 15[illegible], at which price it was sold. City is firm but unchanged at 86 to 89. For Quebec 107½ is offered. Royal is offering at 67½, with buyers at [illegible] to 67. Commerce is asked for at 120. Jacques Cartier is wanted at 112, Eastern Townships at 103, and Peoples at 100 ex-dividend, no sellers of either.

Sundries.—Montreal Telegraph sold to some extent at 183, which price is still offered. Peoples Telegraph sold at 96½. City Passenger Railway is higher, there being buyers at 128. Richelieu is asked for at 150. Canadian Navigation continues very heavy at 104½.

Bonds.—In Governments there have been no transactions. For Dominion Stock or Bonds 107 to 107½ would be paid. Currency sixes are asked for at 102 to 104. For fives, 92 is offered and 96½ asked. Montreal sixes are wanted at 99½ with sellers at 100.

HAMILTON MONEY MARKET.

Reported by Stinson's Bank.

HAMILTON, August 24, 1870.

Money continues easy, although the discount demand is slightly increasing. Many enquiries for County Debentures and mortgages on farm property, but with few offering. Several loans on City property were effected during the week at 8 per cent. Banks steady, although not attracting buyers; can only quote one sale of Bank of Commerce stock at 121½, sellers now ask 122. The prospect of the decline in gold has caused an increased desire on the part of capitalists to invest in 5.20 U.S. Bonds, purchases and sales readily effected within a ¼ per cent. of New York rates. Gold in New York in greater demand; speculation during the week is against a rise, consequently there is an active demand for New York Exchange.

EXTRACT FROM AN EDITORIAL REPRINTED FROM THE MONETARY TIMES, AUGUST 26TH, 1870.

COMMERCIAL AND FINANCIAL SUMMARY.

Amid the daily bustle and excitement incident to a time of war on so vast a scale as that now raging in Europe, it may and will seem to those who live in the romantic atmosphere of *la haute politique*, a narrow view to take of that terrible conflict, to say that it has little practical interest to this country beyond the question as to how it will affect the value of our wheat and other produce. But so it is. That question directly affects every individual throughout this Dominion, of which each harvest may be said to be the aggregate annual income, the remainder of which, when the aggregate expenditure is deducted, representing the progress made in financial strength. The condition of the Wheat and Produce trades is that of utter paralysis. The war news brought feverish excitement and inflation; with singular rapidity a reaction has set in, arising, chiefly, from 1st. The improved harvest prospects of this continent and Europe, and, 2nd. The conviction that the war will not involve England, and will shortly be over, owing to the marked success of the Prussian arms.

EDITORIAL, "A WARNING TO SPECULATORS," REPRINTED FROM THE MONETARY TIMES, AUGUST 26TH, 1870.

A WARNING TO SPECULATORS.

Canada is not cursed with the spirit of wild speculation to the same extent as the United States. We have not in Montreal and Toronto, the gambling in gold and stocks, which is carried on in New York and other American cities—gambling which enriches a few and ruins many every day in the week. But there is vastly too much of this reckless spirit even in Canada, and there is reason to fear that it is on the increase. Many who are doing well in business, and ought to stick to it, are seized with the hope of becoming suddenly rich, and commence to speculate, passing from one rash venture to another, until they are hopelessly ruined.

A case which illustrates these remarks has just occurred in the enterprising town of Galt. Mr. James Hunter removed there a few years ago and commenced business in a line not requiring much capital. He manifested a great deal of enterprise, and soon built up a considerable trade, and obtained public confidence, as an active, reliable and successful business man. He made money. In a short time, it was reported, and we believe correctly, that he had made from $15,000 to $17,000. Flattered by this success, his attention was soon attracted to the New York Gold Room, and ultimately to the stock market. In an evil hour he made a venture in gold, and lured on by some trivial success, he then tried railroad stocks—in each case putting up a margin. Then came a wrong turn of the market—a period of hopeless effort on the part of Mr. Hunter to get out of the (so-called) speculations without loss—and then the almost inevitable collapse! Not only every dollar that he had made has been lost, but creditors and friends from whom he obtained money on credit, have lost largely by the wretched gambling which he was tempted to try, and now he has fled the country.

Though not a failure involving so much capital as some others, this case conveys a pointed lesson. Here was a man in business doing well. He was not rapidly amassing a fortune, but he was steadily making money and living comfortable. But he was not content with the fruits of legitimate business, he was dazzled with the hopes of sudden wealth. He had read how Cornelius Vanderbilt and James Fisk, Jr., made fortunes in an hour, and, with strange infatuation, determined to try his luck with the bulls and bears of Wall Street. The result is—ruin to himself, and serious loss to all who trusted him.

We have placed this case on record that it may prove a warning to our ambitious young business men especially. Gold and stock gambling is little better than any other gambling. There is nothing like sticking to one's legitimate business; that is the surest road to success. Any man who is not clever enough to succeed at his own calling, has not the ghost of a chance among the sharks and schemers in the gold and stock markets; and even if he is clever, he is likely to reap the bitter experience of Mr. Hunter.

pressing their thanks for the support which has been accorded to them in the effort to establish a newspaper organ for a variety of interests hitherto, if not ignored, at least given but scant justice. The advantage accruing to such interests from this undertaking having been appreciated, a consequent increase has taken place in the circulation, influence and usefulness of the journal. From a local enterprise it has grown into a *quasi* national representative, finding supporters in all the Provinces of the Dominion, and readers both in Great Britain and in the United States.

EDITORIAL COMMENT REPRINTED FROM THE MONETARY TIMES, AUGUST 20, 1869.

The Ontario Mutual Life Insurance Company, for which a charter was obtained by some parties in Waterloo village, has taken in Mr. D. L. Sills as organizer and supervisor. We are quite aware that a difficulty was found in floating the scheme, but did not imagine matters were so desperate as this step would indicate. "Drowning men catch at straws."

EDITORIAL REPRINTED FROM THE MONETARY TIMES, SEPTEMBER 24, 1869.

THE NEW FINANCE MINISTER.

It is now generally understood that Sir Francis Hincks will become Finance Minister of the Dominion. With the political objections that may be urged against such an appointment we have nothing to do, but as regards the fitness of Sir Francis for the position, there can be but one opinion. As a financier he has no equal in the country, and great benefit must result from the most important office in the Ministry being filled by a gentleman so thoroughly capable of discharging its duties as all admit Sir Francis to be. It is also understood that he entertains opinions totally at variance with Mr. Rose's banking scheme; and the people of Ontario, at least, must feel pleased at the idea of having a Minister of Finance whom Mr. King will be unable to hoodwink or manipulate.

SUBSIDIES TO RAILWAYS.

The friends of railway enterprise will have read with satisfaction that portion at least of the Lieut.-Governor's speech, which indicates the determination of the Ontario Government to devote a portion of the surplus in the treasury in aid of railways to open up the unsettled territory of the Province. We think there can be but little diversity of opinion as to the wisdom of this policy. Every railway extended into the new territory to the north of us opens up a new highway for the inroads of population and improvements. It cannot be supposed, however, that direct aid in cash can be extended except sparingly; but the immense public domain that forms a part of the patrimony of Ontario, ought to be made available for the encouragement of railways to a liberal extent. This is the most economical and effective way of filling up the country with population, and of increasing its tax-paying power. These lands are now worthless and useless; but once extend cheap colonization railways through them and the timber, minerals and other products will pour into market, and such portions as are fit for settlement will soon be peopled. By this increase of population the revenue from customs and excise will be rapidly increased; and though the lands are given away, the country is in every respect the gainer. Cheap railways is the solution to the difficult problem of how to turn the tide of emigration and develop our unsettled territory. We hope no parsimonious policy will be adopted in this matter. The feeling of the country is in favor of an energetic effort to develop our resources and promote public improvements; and we very much mistake the quality of the Ontario Ministry if they do not correctly interpret the views of the people on the railway question, and give effect to them by decided, speedy and vigorous action.

BURN WAR BONDS TO REDUCE DEBT

Trustees have been appointed for the Northumberland Red Cross War Memorial scheme for the public burning of war loan bonds in memory of the dead, according to the London Daily Mail. The trustees are the masters of Jesus College, Cambridge, and W. Moorhead, of Broomhill.

The memorial has been established to follow the example of the King in giving £100,000 for the war instead of lending it at interest. A committee of working miners, soldiers and tradesmen has been formed, and the Duke of Northumberland will act as the medium of communication between the trustees and the King.

It is proposed to have the first "public burning" in the course of the summer, and a brazier will be erected upon a suitable site in memory of the dead. The bonds destroyed will be registered, and His Majesty will be informed of the amount which will cease to be a liability of the country. Subscribers will receive an illuminated certificate stating the fact that they have destroyed war loan scrip in honor of the illustrious dead and to relieve the taxation of the country.

FREAKS OF WORKMEN'S COMPENSATION

Inconsistencies of the workmen's compensation law as administered in some of the States are pointed out by the National Industrial Conference Board, an organization of manufacturing interests, in advocating a permanent, scientific and uniform system of compiling accident statistics.

The committee, after a thorough investigation, cited an instance where the Ohio Industrial Commission awarded compensations, to the dependants of a stenographer, because, when taking dictation from her employer, she was murdered by a jealous suitor. Another instance was noted where the New York Industrial Commission awarded compensation for the death of a street railway process server from gangrenous diabetes, alleged to have resulted from having his toes trodden upon by a fellow-passenger in a car of the company which employed him.

The report says uniform laws would go far toward determining definite standards of liability and equitable compensation rates, and would enable legislators to judge the real hazards of various occupations and "permit the just extension of the compensation principle to many workers now arbitrarily excluded from its terms."—New York Evening Sun.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 17th, 1917 :—

McKinley-Darragh-Savage, 83,066; Kerr Lake Mine, 60,183; O'Brien Mine, 108,900; National Mine, 45,606; Dominion Reduction Company, 86,000 Temiskaming Mine, 47,586; Buffalo Mine, 65,596; Nipissing Mine, 367,840; Aladdin Cobalt, 156,320. Total, 1,121,097 pounds, or 560.54 tons.

The total shipments since January 1st, 1917, now amount to 18,429,803 pounds, or 9,210.4 tons.

PUBLICATIONS REVIEWED

Insurance.—Proceedings of the Insurance Institute of Toronto, 1916-17. Issued by the Insurance Institute of Toronto. Secretary, Mr. C. Elvins, Imperial Life Assurance Company, Toronto.

Royal Mint.—Forty-sixth annual report (for 1915) of the deputy master and comptroller of the mint, giving a summary of the work of the department and tables relating to the total number of pieces struck. Published by His Majesty's Stationery Office, Imperial House, Kingsway, London, W.C. Price, 3s. net.

Choosing Your Investment Banker.—In view of the large number of investors resulting from the Liberty loan, this pamphlet is a timely one, and comes to the aid of the individual man, showing him in clear, concise terms how to be assured of the character of the firm recommending his bonds. The copy, "Choosing Your Investment Banker," can be obtained from Messrs. Halsey, Stuart and Company, Chicago. Issued free of charge.

Banking.—A pamphlet of the National Bank of Commerce, New York, briefly reviews and summarizes the laws, rules and regulations covering "acceptances, rediscounts and open market transactions of federal reserve banks" as in force to-day. A useful and comprehensive index is appended.

Commercial Banking Practice. Issued by the service department of the National Bank of Commerce, New York.

Industrials.—An invaluable book to the investor or banker interested in industrial securities, Poor's Manual of Industrials is the largest work of its kind, and contains the latest income accounts and balance sheets of industrial companies, presented in comparative form, and showing at a glance the growth of the business. This is one of the indispensable books of a financial and business man's library.

Poor's Manual of Industrials. Issued by Poor's Manual Company, 80 Lafayette Street, New York. Price, $10.

Business Finance.—This book deals exhaustively with the principal branches of finance, capitalization taking a prominent part in the work. It not only deals with business conditions from a United States point of view, but includes many references to the experience and practice of other countries. The point of view taken throughout is that of an organizer or financial manager of an enterprise. The volume is one of the best of its kind. The author, Mr. William H. Lough, is a well-known expert on corporation finance and business matters generally. His experience and knowledge, combined with an attractive style of writing, make the book exceptionally valuable.

Business Finance. By William H. Lough, president of the Business Training Corporation, New York. Published by the Ronald Press Company, 20 Vesey Street, New York. Price, $3.

Mining.—The Canadian Mining Manual, edited by Mr Reginald Hore, caters not only to the mineralogist, but the mining-engineering world in general. The exhaustive description of the various mining products shows a careful and detailed analysis of his subject. There is much valuable information in this section alone, and it is made doubly by several interesting photos, showing the various ore deposits, mines and machinery. There is appended a list of the mining companies operating in Canada, with photos of the leading men in connection with them. There is an especial need for basic information in the present day, and additional matter has been gleaned from various government and company reports, technical journals and mining societies, making it a most useful and up-to-date work.

The Canadian Mining Manual. Edited by Reginald E. Hore. Published by the Canadian Mining Journal, 263-265 Adelaide Street West, Toronto. Price, $3.

LOANING FUNDS TO FARMERS

Co-operation and Encouragement of Loaning Agencies Has Assisted Development

The time for strained and irritating relations between the farmers of western Canada and the financial institutions in the conduct of mutual business is fast disappearing, said Mr. Wm. Toole, president of the Mortgage Loans' Association, speaking at the second annual meeting at Edmonton. "The expansion of the farmers' organizations and increase of mail and telephone facilities has provided opportunities for investigation and enlightenment," said Mr. Toole, "which has put a crimp in the local agitator who gained and held his influence by perniciousness and amiability to commiserate with those who fancied they had a grievance to unload. This class of gentleman is well known to us all. He kept before the public the horrible example of capital and the power and obliterating influence it would wield, etc., if given an opportunity. This sort of talk only emanates from ignorant sources, but is, nevertheless as palatable to a certain class of people as the sucker to our land shark. The financial institutions made no effort to refute these very malicious accusations, and consequently are being continually upbraided for the actions of individual mortgagees who insist on usurous rates of interest and take advantage of the mortgagor's misfortune to extort the pound of flesh. Fortunately for the country, there are very few of this class of money-lender. The public are very quick to jump to conclusions without investigating, when it is necessary to protect the security, and take drastic legal proceedings, but the same publicity is not given to the cases of leniency and consideration which form part of the daily routine of every large lending office in this country. These instances could be numbered by the thousands.

Absolute Confidence Established Credit.

"Western Canada has passed through many vicissitudes in the last twenty-five years, and just think of the co-operation, assistance and encouragement the lending institutions and large loaning agencies have extended to farmers and all classes of citizens when unable to meet their principal and interest on due dates, and in numerous cases not for months but years afterwards. I have no hesitation in stating after watching the situation from the start to the present, extending over a period of twenty-eight years (and remembering the mortgage loans in the three western provinces of Manitoba, Saskatchewan and Alberta aggregate over three hundred millions), that the absolute confidence of the large lending institutions in the future of western Canada and their knowledge of the integrity and ability of the farmers to 'make good,' enabled the extension of credit which has been one of the greatest factors in the development of this country.

"Our organization can take credit for amendments to the Provincial Seed Grain Act passed at the last session, by which it has been established that seed grain liens and practically all other advances by the provincial government, will not be registered ahead of mortgages. This is, I understand, the first time that such a precedent has been established in Alberta, and it should have a most beneficial effect as an indication of the government's sensitiveness to public opinion. We all know the injury the seed grain, fodder and relief liens and advances of 1915 did this province. It was quite unnecessary in rendering the assistance to those in such unfortunate circumstances to injure the farm land credit of those farmers who were striving to struggle through without seed grain, fodder or other relief from the government. However, the legislation was passed by both the Federal and provincial governments despite petitions and delegations to the contrary.

Investors can not Easily Forget.

"It will take many years for those interested in mortgage investments to forget how ruthlessly their first charge on the title and past consideration to the mortgagor, was ignored. So that looking back our provincial government is to be congratulated for the precedent they have established, which we hope is the forerunner of the elimination of much of the badly digested and injurious legislation of recent years, which has had such a very deterring effect on capital coming into the province for permanent development.

"At the present time there is more money available for investment in farm mortgages in the province than the experienced loan managers and lending agencies can put out. The reasons are obvious. First of all the companies will not go into the north, [illegible] and lend to the homesteader 'proving up,' as they had been in the habit of doing until the wave of the so-called 'advanced legislation' passed over the province. That class of territory and its settlers who, in my opinion should receive consideration, being the real pioneers, will have to look to the government for the greater percentage of their loans until mortgages are reinstated as 'first charges' and confidence of mortgages restored; and it is only fair and proper that the government should now step in and fill the breach they encouraged. I am most creditably informed they propose to do so and let these pioneer farmers have the money at cost plus expenses, and that no effort will be made to dole out charity, as was quite plainly the intention of the Manitoba government, judging by some of the press reports I read when their rural credits scheme was being launched.

Better Borrowing Conditions.

"The Alberta farmers have expressed themselves as opposed to anything of that nature, but in favor of the most stringent experienced business management including a most accurate account of all expenses incidental to the administration. Then they claim it will be a fair competitor and influence better borrowing conditions. Another reason for the present congestion of loaning funds is the effect of the war and scarcity of labor which keeps the farmers from increasing the area of their holdings or land under cultivation and still another, very pleasing, but important factor has been the tremendous sums realized for our agricultural and live stock production during the last two years. It is estimated that in Alberta alone the receipts from these sources in 1915 aggregated 135 millions, and in 1916, owing to further increased prices, 175 millions. Just bear that revenue in mind in connection with my previous remark—that we are only pricking at the development of our agricultural area."

Officers and Executive Members.

The following are the officers of the association: President, Wm. Toole, Canada Life Assurance Company, Calgary; vice-president, W. T. Creighton, Canada Permanent Corporation, Edmonton; secretary-treasurer, J. S. McMurchy, Northern Trusts Company, Calgary; assistant secretary, J. Garrett, Associated Mortgagors Investors, Edmonton. Members of executive at Calgary: W. D. MacKay, Manufacturers Life Assurance Company; H. A. Howard, Trusts and Guarantee Company; Hugh Melvin, Oldfield, Kerby and Gardner; and S. Kidd, Royal Trust Company. Members of executive at Edmonton: G. H. Gowan, Credit Foncier F.C.; A. E. Scrase, National Trust Company; C. W. G. Browning, Canadian Mortgage Association; and R. P. Baker, Canada Trust Company and Huron and Erie Mortgage Corporation.

TRADE INCREASES $100,000,000

Canada's trade, says an Ottawa despatch, exclusive of imports and exports of coin and bullion and of foreign merchandise shipped through Canada, increased, according to a statement by Hon. J. D. Reid, minister of customs, by almost one hundred million dollars in July last as compared with July, 1916, and by nearly $290,000,000 in the four months ended July 31st in comparison with the like period last year. The value of merchandise entered for consumption in July, 1917, was $90,181,595, and in July, 1916, was $63,622,687. Goods entered for consumption in the four months of the present fiscal year amounted to $382,100,850 as against $249,867,867 in the like period of 1916.

Exports of domestic goods reached $177,366,148 in July last and $507,854,674 in the four-month period. They were $104,064,270 in July 1916, and $350,345,305 in the first four months of the last fiscal year.

The ordinary receipts of Quebec province for the fiscal year ended June 30th, 1917, amounted to $10,441,113, and the ordinary and extraordinary expenditure for the same period amounted to $9,907,673. The surplus of ordinary revenue over ordinary and extraordinary expenditure last year is $533,440.61. Out of the surplus was paid the sum of $375,000, to the Canadian Patriotic Fund, during the year, on account of the subscription of $1,000,000 of the province, authorized at the last session of the legislature. The surplus over and above all ordinary and extraordinary expenditure and payments on account of the Canadian Patriotic Fund is $158,440.

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

CREDIT MEN ELECT OFFICERS

At the annual meeting of the board of directors of the Ontario division of the Canadian Credit Men's Association, Limited, the following officers were appointed for the ensuing year: President, W. H. Lamont, secretary-treasurer H. S. Howland Sons and Company, Limited, reappointed; vice-president, Thos. McMillan, Ansley Dineen Hat and Fur Company, Limited, succeeding James A. Catto, W. R. Brock Company, Limited; secretary-treasurer and manager, A. S. Crighton, reappointed.

The following new directors were added to the board of directorate: H. E. Dane, Canadian Consolidated Rubber Company, Limited, Toronto; John B. Kirby, Williams, Greene and Rome Company, Limited, Kitchener, Ont.; W. S. Duffield, John McPherson Company, Hamilton; James A. Lamb, Grant-Holden-Graham, Limited, Ottawa; Mark Rowe, Canada Furniture Manufacturers, Limited, Woodstock; E. S. Little, Robinson, Little and Company, Limited, London.

CANADA'S COAL AND COKE PRODUCTION

The following are revised statistics of Canada's coal and coke production in 1916, compared with that of the previous year, the figures being issued by Mr. John McLeish, B.A., F.S.S., chief of Division of Mineral Resources and Statistics, Ottawa:—

Coal.

	Calendar years. 1915. Short tons.	Calendar years. 1916. Short tons.
Production by provinces:		
Nova Scotia	7,463,370	6,912,140
New Brunswick	127,391	143,450
Saskatchewan	240,107	281,300
Alberta	3,360,818	4,559,054
British Columbia	2,065,613	2,584,061
Yukon	9,724	3,300
Total	13,267,023	14,483,305
Distribution of coal production:		
Sold for consumption in Canada	9,826,712	10,701,530
Sold for export to United States	1,330,718	1,451,075
Sold for export to other countries	297,343	284,513
Total sales	11,454,773	12,437,118
Used by producers in making coke, etc.	701,975	804,814
Used for colliery operation and by workmen	1,110,275	1,241,463
	1,812,250	2,046,277
Stocks in producers' hands, December 31st	171,205	78,702
Exports (as reported by customs department)	1,770,543	2,135,530
Imports (as reported by customs department):		
Bituminous, run of mine	6,106,794	9,504,552
Bituminous, slack	2,286,916	3,505,236
Total bituminous	8,393,710	13,009,788
Anthracite	4,072,192	4,570,815
Total imports	12,465,902	17,580,603
Total Canadian consumption of coal	23,906,692	29,865,856
Used by railway locomotives (years ending June 30th)	6,677,536	8,677,354

Oven Coke.

	1915.	1916.
Coal used in making oven coke	1,850,303	2,134,011
Coke output by provinces:		
Nova Scotia	584,993	653,836
Ontario	316,211	452,502
Alberta	24,187	42,548
British Columbia	275,375	299,896
Total output	1,200,766	1,448,782
Exports	35,869	48,533
Imports	637,857	757,110

WESTMINSTER TRUST COMPANY

During the past two or three years there can be no question but that all financial institutions have passed through a very trying period. In spite of this fact, however, it is gratifying to note from the balance sheet of the above company that it has been able to show an actual profit of $17,488.60 for the year ending March 31st, 1917. The reserve fund now stands at $251,707.59 as against $214,793.59 at the end of 1916. To have been able to accomplish this in view of the period of readjustment through which we are passing is something to be proud of, and augurs well for the future of this institution, and reflects credit upon the management.

The company's affairs are now being handled by the secretary-treasurer, Mr. R. F. Walker, with the assistance of a management committee composed of the president, Mr. T. J. Trapp; first vice-president, Dr. A. J. Holmes, and Mr. H. Ryall, director; Mr. J. J. Jones, former managing director; and Mr. J. A. Rennie, the former secretary having resigned.

It is interesting to note that this company was the second in British Columbia to register under the new provincial trust company act.

CANADIAN NORTHERN RAILWAY'S IMPORTANCE

In January, 1915, at a little station called Basque, on the main Thompson River, near Ashcroft, B.C., the last rail was laid of the transcontinental steel of the Canadian Northern Railway between Quebec and Vancouver. During October of that year the company celebrated the prospective inauguration of through traffic in passengers and freight by operating a fifteen-car special train carrying seventy-eight senators and members of the House of Commons of Canada, together with thirty-four newspaper men from points in eastern Canada, New York and Chicago over the rails of the Canadian Northern Railway from Atlantic tide water at Quebec to the Pacific. The train was operated the entire distance, division point to division point, by one locomotive, and even while traversing the mountain sections, the locomotive used was not of the road's heaviest capacity.

While the party was running east a stop was made at Gladstone, in Manitoba, the village from which the Canadian Northern enterprise had its inception in 1896, and the members of parliament presented to the president, Sir William Mackenzie, a complimentary address containing the following paragraph:—

"We had not conceived it possible that a railway, possessing the standard of alignment and gradient of your road could have been constructed across Canada within so short a period. The evenness of the roadbed and the facility with which one locomotive has hauled across the continent a train nearly one-quarter of a mile in length fully demonstrates the high standard of construction obtaining throughout the line of travel.

"The rise and development of the Canadian Northern Railway system occurred during the period of greatest prosperity in the history of Canada. There never has been any doubt but that it was the spread of railways throughout the prairie provinces of western Canada which made possible Canada's position as the granary of the Empire, and, of course, the commercial development and spread of settlement in the prairie provinces of Canada followed hard upon the increase in production of cereals. As the Canadian Northern has been engaged in the construction of its lines in the prairie provinces since 1896, it is fair to assume that it has contributed to a considerable extent to the development of the country lying between the Great Lakes and the Rocky Mountains north of the 49th parallel. It is competing vigorously for business with its strong competitor in the more southerly sections of that great country, but it has occupied a dominating position in the great mixed farming areas lying to the north since 1905, when it completed its main line through the Saskatchewan valley, between Winnipeg and Edmonton. To-day the company serves alike the flat plains of the south and the well-wooded, well-watered areas to the north with more than six thousand miles of line. It opened vast areas of virgin land to settlement and encouraged new people to enter its territory from Europe and from the United States, and so aided very materially in the spectacular development of Manitoba, Saskatchewan and Alberta."

HELPS BUYERS OF LIFE INSURANCE

That is One of the Things Licensing of Insurance Agents Does

Discussing at the Winnipeg convention of life underwriters the licensing of insurance agents, Mr. A. E. Ham, insurance superintendent of Manitoba, said that the laws governing the supervision of insurance must necessarily extend beyond the examination of companies' accounts, the filing of periodical statements and the tabulation and publication of annual returns. Important as these matters are, it must also embrace the agent. He continued: "The profession of a life insurance agent is an important one. Indeed, one of the chief factors in the development of a company's business is an efficient agency staff. Without agents, the success of any company would be problematic. This is clearly shown by the limited business done by the governments who have adopted life and annuity insurance.

"A good agency force is one of the principal assets of a company. It should, therefore, be conserved, improved and strengthened by recommending for license only such men who possess intelligence, integrity and character, and who will become efficient and successful underwriters. The knowledge and responsibility of the agent is vital to the assured and assurer alike; both interests are entrusted to him. If he is the right kind of man, his advice is equally as valuable to prospective insurers as that of a lawyer or doctor would be to his clients or patients. To-day there is a demand for service—efficient service. The very best is sought after, the highest is demanded, and for the man who makes up his mind to give the best that is in him to himself, his company and his client there is unlimited scope for advancement.

Benefits of Manitoba Law.

By the operation of the Manitoba agents license law there are numerous benefits that accrue: (1) To the agent, (2) to the company, (3) to the citizens of the province, and (4) to the administration of the insurance department.

First—To the agent, by limiting the privilege of license to a bona-fide resident of Manitoba, who must have secured an appointment from a duly registered or licensed company, thus eliminating illegitimate agents, unscrupulous solicitors and undesirable companies, and bringing his occupation into the better repute and giving to him a higher standing with the community.

Second—By the company being able to secure the cancellation or revocation of an agent's certificate of authority if he collects any premiums from the assured and retains the same beyond the terms stipulated in his agency contract or agreement, or if the agent has been guilty of any misrepresentation, fraud, deceit, dishonesty, or any violation of the Insurance Act of the Dominion of Canada or the Manitoba Insurance Act. What would appear to me as the most important of all the benefits accruing to the company is that an agent can only represent one life company on his certificate of authority, thereby enabling the company to have full control over their agent during the period of his contract.

Helps the Insurance Buyer.

Third—By the citizen having the right to demand from any agent or solicitor of insurance evidence of his authority, and if he holds such certificate of authority, then the prospective assurer knows that such solicitor is representing a duly qualified company, a company holding a license or a certificate of registration for the purpose of operating within the province. A company which has deposited either with the provincial treasurer or with the Dominion government sufficient securities to guarantee the reinsurance of its policyholders in the event of necessity. Thus the public is enabled to avoid getting into the hands of unscrupulous agents and unlicensed and unworthy companies. Citizens may also avail themselves of the privilege of lodging a complaint against any agent holding a certificate of authority should he be guilty of misrepresentation, fraud, deceit or dishonesty. If such complaint is well founded the superintendent of insurance may revoke his license.

Fourth—To the administration of the province by completing the circle of control, so that from the establishment of the company to the collection of the premium and the payment of the claim the department is charged with the responsibility of conserving and protecting the rights and interests of the whole community.

There are over three thousand agents in Manitoba. In Canada and the United States there are estimated to be over half a million agents. It is not to be wondered at in this case, however, that there are a few whose sole aim is personal pecuniary profit, but by far the larger majority look not merely at the immediate first commission, but at the quality and permanence of the best interests of their company.

The main object of the licensing law is to raise the standard and quality of the agent. The trivial annual fee is, in the opinion of many, far too small, and fails to keep out the unfit and the undesirable, as well as the man who obtains an appointment merely for the sake of doing a single case on the life of a friend, and who makes no effort to acquaint himself with the principles and facts of life assurance. To be a real, live, expert, full-time agent and get the full benefit of the agent's license law a man must devote himself to the study of insurance, and must keep himself abreast of the times and conversant with the facts and laws affecting his business and the constant and increasing advantages that are accruing to the public.

There are evils to be overcome if the full purposes of the act are to be secured. The agent who may transfer his services from one company to another must not only honorably close his account, but must refrain from any action that will render any amendments dealing with "rebates" and "twisting" necessary. The companies can always render assistance to the department by exercising care in the acceptance of business, so that none but licensed agents shall derive the monetary advantages to which they alone are entitled. Instances have come under my observation (more particularly, perhaps, in other branches of insurance) where business has been accepted from unauthorized persons without making the necessary inquiry.

INSURANCE COMPANIES INCREASED ASSETS

The Department of Insurance, Ottawa, in a letter to *The Monetary Times*, gives some interesting facts with reference to the changes that have taken place in the assets of Canadian life insurance companies during the three years of the war. The table below shows the figures as at July 1, 1914, compared with the corresponding ones at the present time:—

	July 1, 1914.		July 1, 1917.	
Class of investment.	Amount.	% of total.	Amount.	% of total.
Real estate	$ 10,786,030	4.3	$ 14,324,804	4.5

INSURANCE COMPENSATION BILL

System of Government Insurance for United States Soldiers and Sailors

The bill introduced in the United States Senate early in August, providing for family allowances, indemnification, re-education and insurance in behalf of officers and enlisted men of the army and navy of the United States, is outlined in a letter from Secretary McAdoo to President Wilson. He says:—

"After a revision of the bill had been completed, I submitted the measure to the advisory committee of insurance representatives apointed as a result of the insurance conference held July 2. This committee considered it over a period of two days and reported its general approval of the several parts of the bill, except that providing for government insurance. They made a number of suggestions of change in details, some of which have been accepted.

"One of their fundamental objections to the proposed plan of insurance whereby any man in the service can purchase from $1,000 to $10,000 of insurance was, that this gave an opportunity to the wealthier men to get something which the poorer men could not obtain. They admitted that they had failed to ascertain the premium rates to be charged under the plan contemplated. This objection is not tenable because the president of the Actuarial Society of America stated in their presence, in response to my question, that the premium rate to be made by the government during the war would be between $7 and $8 per $1,000 of insurance. This rate would make the cost of $10,000 insurance only $80 per year—and only $40 per year for half that amount—and would enable practically every private to take the maximum amount.

Total Expenditure for Two Years.

"After careful consideration of actuarial estimates, and after consultation with Capt. S. H. Wolfe, of the war department, one of the leading actuaries of the country, I have reached the conclusion that if the bill is promptly enacted into law the total expenditure for the first and second years will be as follows:—

	First year.	Second year.
Family allowances	$141,000,000	$190,000,000
Death indemnities	3,700,000	22,000,000
Compensation for total disability	5,250,000	35,000,000
Compensation for partial disability	3,200,000	21,000,000
Insurance against death and disability	23,000,000	112,500,000
Total	$176,150,000	$380,500,000

"The main purpose of the bill," says Mr. McAdoo, "is to grant a reasonable government indemnity against the losses and risks incurred in the discharge of a patriotic duty and in the performance of an extraordinarily hazardous service to which the government has called and forced the citizen. It provides not only for the man but for his family. It aims to accomplish these ends by granting a reasonable measure of indemnity against the risk of loss: (1) Of support of the breadwinner; (2) of life and limb; (3) of present insurability at ordinary rates.

Allotment Supplemented by Government.

"The risk of dependency, in the case of an enlisted man's family, is indemnified against by allotment of part of the pay of the enlisted man, supplemented by a family allowance granted and paid by the government.

"To illustrate: A private gets $33 a month for service abroad. If he has a wife and two children he must allot to them at least $15 out of his pay. The government supplements this by giving the family an allowance of $32.50. This family's minimum income, therefore, would be $47.50. The father can allot as much more as he pleases. If there is another child, the government will allow $5 additional. If that man should have a mother or father actually dependent upon him, and to whom he has been accustomed to contribute, say, $15 a month, he can secure an allotment of $10 a month from the government for the parent by allotting $5 more of his pay. Thus, the private with a wife, three children and a mother actually dependent upon him, by giving $20 out of his $33 a month, would get from the government for his family $47.50 a month, giving the family an income of $67.50, and still leave the man $13 a month for spending money. If there are more children, or if there is also a dependent father, the government would give up to $50 in all, over and above the man's own allotment."

Mr. McAdoo continued: "If total disability results from personal injury suffered or disease contracted in the course of the service, the compensation, based on the percentage of pay, but with a minimum of from $40 to $75 per month, according to the size of the family, may increase for the higher officers to a maximum of $200 per month. Compensation, however, is not payable while the officer receives retirement allowance. Partial disabilities are compensated for on the basis of percentages of the compensation for total disability, dependent upon the average impairment of earning capacity resulting from such injuries in civil occupations. Provision is made for commutation under regulations, but of a part only of the compensation. Medical, surgical and hospital treatment, supplies and appliances are given.

Two Principles of Bill.

"Two principles are established in the bill: (1) The man's obligations to avail himself of such opportunities as the government may provide or cause to be provided under penalty of loss of compensation during any period of unreasonable refusal. (2) A man's right to disability compensation regardless of his individual economic recuperation. This is an esential spur to the full development of his potentialities.

"If death results from the injury or disease incurred or contracted in the course of the service, compensation is paid to the widow, children and dependent widowed mother. The amount, based upon percentage of pay, ranges from a minimum, according to the size of the family, of $15 to $60 per month, to a maximum for the higher officers of $200 per month. Burial expenses of not exceeding $100, as may be fixed by regulations, are allowed. This compensation ends for widows two years after remarriage; for children, on reaching 18, unless they are physically or mentally incapable of following a substantially gainful occupation."

Insurance is Non-Assignable.

In conclusion Mr. McAdoo said: "The cheapest form of insurance, costing during the war on an average of $8 per $1,000 of insurance, and thus bringing even the maximum of $10,000 insurance within the reach of practically every private, is provided for. After the war the insurance may be converted into other forms with earlier maturity, the premiums to be based, however, on the same mortality tables and without 'loading.' All insurance is to be payable in instalments, to be non-assignable and free from the claims of creditors either of the insured or of the beneficiary. It is to be limited to wife, children and other specified kindred. It must be appled for within 120 days after the terms are promulgated or subsequent enlistment or entrance into the service. For those who are totally disabled or die before they have had an opportunity to insure within the prescribed period of 120 days insurance in the sum of $5,000 is deemed to have been applied for and granted.

"Through the insurance the opportunity is given to every man to gain greater protection for himself and for his family than the government itself voluntarily gives in case of total disability or death resulting from injuries or disease contracted in the service. The bureau is further empowered to give information to the men and to act for them in respect to their outstanding insurance. In this way many existing policies that might lapse may be saved by prompt payment of premiums out of the man's deposit."

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

SOUTHERN CANADA POWER

The company's balance sheet shows:—

	1917.	1916.	Increase.
Gross earnings	$336,843	$245,943	$90,899
Operating expenses ...	127,663	101,086	26,577
Purchased power	47,856	17,492	30,364
Total expenditure	$175,519	$119,474	$56,042
Net earnings	161,324	126,467	34,857
Interest and administration ..	118,200	106,800	11,400
Surplus	$ 43,124	$ 19,667	$23,457

Earnings of the company for the nine months ending June 30 last, show a substantial gain in the gross and net earnings. Gross for the period aggregated $336,843, an increase over the corresponding period of 1916, of $90,899. Operating expenses, however, increased $26,577, and purchased power, $30,364, leaving the net earnings at $161,324, an increase of $34,857. After interest and administrative charges had been paid, there was a surplus of $43,124, or nearly double that for the same period of the preceding year.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Alton, Ont.—August 20—Alton Knitting Mills, owned by Mr. J. M. Dods, totally destroyed. Estimated loss, $110,000, fully covered by insurance.

Belmont, Ont.—August 16—Mr. David Taylor's barns. Loss covered by insurance. Cause, lightning.

Berwick, Ont.—August 17—The Misses Hamilton's barn and contents. Cause, lightning.

Brantford, Ont.—August 20—Freight car containing $7,000 worth of raw hemp, property of the Brantford Cordage Company, destroyed.

Camden, Ont.—August 16—Mr. C. Leeper's barn and outbuildings destroyed. Cause, lightning.

Dawn, Ont.—August 16—Mr. O'Neill's barn, containing season's hay and grain, destroyed. Cause, lightning.

Digby, N.S.—August 12—Mr. Maurice Webber and Leonard Raymond's store destroyed; Mr. Bout's restaurant badly damaged.

Earlscourt, Ont.—August 21—Mr. A. Kirkman's house, 9 Carrington Avenue and Mr. Paccing's, 7 Carrington Avenue, badly damaged. Estimated loss to Mr. Kirkman's dwelling, $1,000, to contents, $300; Mr. Paccing's furniture and contents suffered damage to the extent of $500.

East Oxford, Ont.—August 20—Mr. T. Nicholas' barn completely destroyed. Cause, lightning.

Edmonton, Alta.—August 17—Mrs. McGhee's cottage, 11335-126th Street. Estimated loss $500. Cause, explosion of oil stove.

Goderich, Ont.—August 15—Mr. George Johnston's garage practically gutted. Loss is covered by insurance.

Hamilton, Ont.—August 18—Mr. A. T. Enlow's Chevrolet car completely destroyed. Partly covered by insurance. Cause, defective wiring.

Jardine, B.C.—August 9—Williams Shingle Mill destroyed. Estimated damage, $3,000. No insurance carried. Cause, electric dynamo.

London, Ont.—August 15—Mr. Matthew Cole's home destroyed.

Montreal, Que.—August 20—H. Gray and Company's building, 25 Common Street, badly damaged. Estimated loss, $40,000. Cause, spontaneous combustion.

Rossmore, Ont.—August 20—Mr. T. Roblin and F. Pitcher's barns and outbuildings destroyed. Mr. Roblin's loss is estimated at $5,000, partly insured; and Mr. Pitcher's $2,500.

Sharon, Ont.—August 14—Mr. Doan's barn burned to the ground. Loss, $1,000. Cause, lightning.

Soperton, Ont.—August. 18—Halliday. and Birney's cheese factory and contents completely destroyed. Estimated loss, $2,000; insurance carried, $2,300.

St. Colomb, Que.—August 17—Mr. Delisle's shoe repair shop severely damaged. Estimated loss to building, $1,000; to stock, $500; partly covered by insurance.

Sutton, Ont.—August 14—Mr. Arthur Pugsley's barn, containing 55 loads of hay, destroyed. Estimated damage, $2,000; amount of insurance, $1,000. Cause, lightning.

Toronto, Ont.—August 18—Broderson and Centner's fur store at 245 Yonge Street. Estimated loss to stock $2,500, to building, $50.

Trail, B.C.—August 9—Mr. J. R. Randall's warehouse and contents, carpenter's shop, residence and contents; Mrs. Lutsky's house and contents; Mr. Dixon's residence and contents; and the Catholic church hall and contents completely destroyed. Total estimated loss, $22,500; total insurance, $10,800. The loss divided is as follows: Loss on Mr. Randall's office, warehouse and sheds, $1,500; on stock of flour and grain, $4,500; on residence, $2,300; on contents, $1,500; on carpenter's shop, $200. On Mrs. Lutsky's residence, $1,000. On Mr. Dixon's residence, $1,500. On Catholic church, $1,600; on contents, $800; on Catholic parish hall, $4,000; on contents, $800. On Canadian Pacific Railway freight warehouse and contents, $1,000; on damage to two freight cars, $1,000. The insurance was carried as follows: Mr. Randall's [illegible] and contents with J. H. Schofield and Company, $3,000; on carpenter's shop, $200; on residence and contents, $1,500; on warehouse and contents with F. W. Warren, $1,000. Mrs. Lutsky's house and contents carried with Schofield and Company, $600. Mr. Dixon's residence and contents with Schofield and Company, $1,000. The Catholic Church, hall and contents, with Schofield and Company, $3,500.

Vaudreuil, Que.—August 15—District Chief Briere's residence totally destroyed. Cause, lightning.

Victoria, B.C.—August 11—Mr. Wm. Polson's barn and contents. Estimated loss on building, $750; on contents, $750. No insurance carried.

Winnipeg, Man.—August 15—Mr. E. Garrett's studio, 602 Main Street. Estimated loss to stock, $1,500; insurance on same, $800; loss on building, several hundred dollars, fully covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Mantua, N.S.—August 2—Mr. Thos. Mounce's frame barn. Insurance on buildings, $1,500; total insurance, $3,000; $1,500 carried in the Aetna Insurance Company, the remainder in the Caledonian. Cause, lightning.

Yellow Grass, Sask.—August 3—Mr. Jas. McCann's house destroyed. Occupants, Mr. L. Corbett. Estimated loss on effects, $1,000; on building, $2,000; insurance on stock, $500; on buildings, $800; total insurance, $1,300, carried in the Norwich Union Insurance Company.

AMERICAN CYANAMID'S REPORT

The affairs of the company during the year ending June 30th, 1917, show a marked financial improvement, with substantially increased earnings and a very creditable balance sheet. The president, Frank S. Washburn, in his annual address to the shareholders, said that "the demands upon the company's treasury to defray the cost of the phosphate mines extensions, coupled with the extensions and improvements at the Ammo-Phos plant and at Niagara Falls, have been such as to involve the necessity of passing the dividend on the preferred stock, amounting to 6 per cent., for the fiscal year, ended June 30th, 1917. All accrued dividends on the preferred stock must be discharged before any dividends can be paid on the common stock. The directors have taken this action with the conviction that this reinvestment of earnings in plant extensions and improvements at this time will result in extraordinary and immediate benefit to holders of both the preferred and common stock."

The net profits of the company, according to the annual report just issued to shareholders, totalled $638,648, compared with $58,583 two years ago, an increase of $580,065, or 990.1 per cent., and equal to over 8 per cent. on the preferred stock.

The net sales for the year amounted to $2,705,053, compared with $1,881,532 for 1916, an increase of $823,521, or 43.7 per cent., while contracts in hand for delivery in the current year are placed at $2,025,811. The balance sheet shows current assets of $1,343,328, of which $105,066 is cash, against current liabilities of $684,443, including $359,114 notes payable. The profit and loss surplus at the end of the year totalled $523,402 after deducting $148,951 for losses sustained through dismantling part of the Niagara Falls plant, and $196,378 for the deferred dividend payment distributed to shareholders last December. Accrued dividends due on the preferred stock now amount to $439,837.

The report, considering the financial position of the country owing to the war, is most satisfactory.

Mr. George William Monk, retired capitalist and legislator, has just died. The late Mr. Monk was a director of the Canada Permanent Mortgage Corporation, Ontario Accident Insurance Company, Great-West Life Assurance Company, and was also interested in several industrial enterprises. He represented Carleton county in the provincial House from 1871 to 1894. The deceased was 79 years old.

UNIFORMITY IN INSURANCE LAWS

Superintendent Fisher, Saskatchewan, Makes Important Suggestions With That Object in View

Can we have uniformity in the laws relating to insurance contracts throughout Canada? This was the question discussed at the Canadian Underwriters' convention, Winnipeg, last week, by Mr. A. E. Fisher, insurance superintendent of Saskatchewan. His answer, in brief, was that much can be done in that direction, if the proper steps are taken. Mr. Fisher pointed out that provincial insurance laws, generally speaking, deal with the following items: (1) The incorporation of insurance companies, both stock and mutual; (2) the licensing of provincial and extra-provincial companies, including Dominion licensees; (3) deposits for the security of the policyholders of provincial and extra-provincial companies, and the administration of these deposits in case of necessity; (4) licensing of agents; (5) regulation of mutual companies; (6) laws relating to contracts of insurance as issued by the companies, and procedure in case of loss; and (7) penalties.

Discussing these items with a view of seeing how far uniformity is necessary and how far it can be attained, Mr. Fisher said:—

Incorporation of Companies.

1. Incorporation of companies.—This is a matter which pertains to each province and its own particular needs. In Ontario the organization of insurance companies is governed by the insurance act. In the western provinces they are incorporated by special acts of the legislatures. Uniformity in this item does not seem expedient owing to the difference in the general financial condition of the various provinces. If the requirements as to the capitalization of companies which are to be found in the Ontario act were incorporated in the laws of the western provinces, whether in the insurance act or in the special acts, we would have no insurance companies, a field of operation or investment, as the case may be, being thus rendered difficult for our citizens.

[illegible] ation. At the present time there does not appear to be any hope of uniformity as the amount of the fees payable rests entirely with the legislature of each province. However, the documents to be filed are substantially the same throughout the west.

3. Deposits.—There is uniformity in this respect throughout the west, both as to the amount and the method of administration. I fail to see, however, how such uniformity can be made general throughout Canada owing to the difference in development of the various provinces. The minimum amount of deposit required by the insurance acts of the western provinces is lower than the minimum required by Ontario. The reason is patent. We in the west could not, in view of western conditions, adopt the Ontario standard. The safety of the policyholders is of paramount importance from the viewpoint of the insurance departments, and as the amount of deposit over and above the minimum varies directly with the amount at risk, each province must safeguard its own policyholders. The field of operation is not so large in the west as in the east, hence uniformity of deposit requirements would unfairly affect either the east or the west. No advantage would be derived by such uniformity except by two or three companies.

4. Licensing of agents.—There is at the present time uniformity in the western provinces and Ontario in the general principles of the system, the method of carrying out the provisions of this branch of the law being somewhat different, due entirely to local conditions.

As to Mutual Companies.

5. Mutual Companies.—As mutual companies in the majority of cases operate within the confines of the province by which they are incorporated, there is not the necessity for uniformity here as in other matters. Generally speaking, the laws at the present time re mutual companies are practically the same in Ontario, Manitoba, Saskatchewan and Alberta.

6. Laws relating to contracts of insurance.—This is the particular subject matter on which there undoubtedly should be uniformity throughout Canada. The statutory conditions which must be incorporated in every contract of insurance other than life, the general question of beneficiaries and other matters pertaining to life insurance companies, and the method of procedure for recovery of a claim are covered by this branch of our laws. In other words, the benefits not only to the companies but to the people as well, to be derived from uniformity in this department of law are most patent, and it should be the aim of all the insurance superintendents to do all in their power to bring it about.

Having briefly dealt with the general subjects covered by provincial laws let us consider what steps have already been taken towards uniformity. Special reference will be made to the progress made in this regard in the different classes of insurance.

Fire Insurance Matters.

Fire.—In May, 1914, the superintendents of insurance for the western provinces held a meeting at Calgary at which were present representatives from the fire insurance companies, both stock and mutual, and as a result of that conferenc there has been placed on the statute books a standard polic of fire insurance, thus securing uniformity in that importan class of insurance in Manitoba, Saskatchewan and Alberta Our statutory conditions in the west are practically the sam as those in the east, with this exception, that the time allowed for notice of cancellation is longer in the west owing to mail service here not equalling that of the east.

Hail.—All contracts of hail insurance in Manitoba and Saskatchewan are uniform and, although a standardized ha contract does not appear on the statute books in the provinc of Alberta, yet the deputy superintendent of insurance has approved of the standard form, and policies in accordanc therewith are being issued by the hail companies in that pr vince. Consequently there is practically uniformity in this class of insurance in the prairie provinces.

Accident and Health.—At the present time negotiation are under way for the standardization of these contracts. Mr Ham, superintendent at Winnipeg, has been requested by th western superintendents to collect data relating to a [illegible] and health insurance, and we are at the present time [illegible] ing for a meeting at which this question will be discuss[illegible] The Ontario department has expressed a willingness to join the western provinces in the conference, and undoubtedly uniformity will be secured at an early date.

Ideal War-time Policies
Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

DAIRYING IN CANADA

Ontario and Quebec Produce About 70 Per Cent. of Total

In a press bulletin issued recently the Census and Statistics Office of Canada reports on the total production of butter and cheese in the creameries and cheese factories of Canada for the year 1916, as compared with 1915, the report being based upon returns collected from the dairying branches of the provincial departments of agriculture. The figures for 1915 represent approximate estimates, as the returns for that year are not quite complete. The total number of creameries and cheese factories operating in 1916 is reported as 3,446, including 993 creameries, 1,813 cheese factories, 624 combined factories (cheese and butter) and 16 condensed milk factories. The total number of patrons contributing to creameries and cheese factories during the year 1916 was 221,192, the deliveries of milk amounting to 2,600,542,987 lb. and of cream to 157,620,636 lb. The two chief dairying provinces of the Dominion are Ontario and Quebec. Both manufacture cheese and butter; in Ontario more cheese is made than butter; in Quebec more butter is made than cheese. In Ontario the total number of establishments operating in 1916 was 1,165 and the patrons numbered 87,325, whilst in Quebec the establishments numbered 1,984 and the patrons 79,145; so that the average number of patrons per establishment was 75 in Ontario and 40 in Quebec.

Value of Creamery Butter.

The total production of creamery butter in Canada in 1916 is returned as 82,564,130 lb., of the value of $26,966,357, as compared with 83,824,176 lb., of the value of $24,368,636 in 1915. Comparing the relative production of the provinces the production in 1916 is highest in Quebec with 34,323,275 lb., of the value of $11,516,148, as compared with 24,680,109 lb., of the value of $8,031,998 in Ontario. These two provinces together produce about 70 per cent. of the total creamery butter of Canada. Of the other provinces the production and value of creamery butter in 1916 were in relative order as follows: Alberta, 8,521,784 lb., value, $2,619,248; Manitoba, 6,574,510 lb., value, $2,038,109; Saskatchewan, 4,310,669 lb., value, $1,338,180; Nova Scotia, 1,586,679 lb., value, $505,000; British Columbia, 1,243,292 lb., value, $497,316; New Brunswick, 709,932 lb., value, $236,194; and Prince Edward Island, 613,880 lb., value, $184,164. The average price per lb of creamery butter for all Canada works out to 33 cents in 1916 as compared with 30 cents in 1915. By provinces in 1916 the highest price was in British Columbia, 42 cents, and the lowest in Prince Edward Island, 30 cents. In the other provinces the price per lb. for 1916 was as follows: Nova Scotia, 32 cents; New Brunswick, 33 cents; Quebec, 34 cents; Ontario, 33 cents; the prairie provinces, 31 cents.

Value of Factory Cheese.

The total production of factory cheese in 1916 was 192,968,597 lb., of the value of $35,512,530, as compared with 183,878,898 lb., of the value of $27,587,775 in 1915. By provinces the lead in production is taken by Ontario with a total quantity in 1916 of 126,015,870 lb., of the value of $23,312,935, Quebec being second with 61,906,750 lb., of the value of $11,245,104. These two provinces together account for 98 per cent. of the total production of factory cheese. The production and value of factory cheese in the other provinces in 1916 were as follows: Prince Edward Island, 2,121,736 lb., value, $409,495; New Brunswick, 1,185,664 lb., value, $210,692; Manitoba, 880,728 lb., value, $158,931; Alberta, 745,122 lb., value, $154,454; Nova Scotia, 94,727 lb., value, $16,959; and British Columbia, 18,000 lb., value, $3,060. The average price per lb. of factory cheese for all Canada works out to 21 cents in 1916, as compared with 17 cents in 1915. In 1916 the average price was highest in British Columbia, 25 cents. In Quebec and Ontario the average price was 18 cents and in Alberta it was 21 cents.

Back Copy of *Monetary Times* Wanted.—One of our subscribers is very anxious to secure a copy of *The Monetary Times* of May 24th, 1913. If any reader having a copy of that issue which he has no further use for would kindly send it to this office it would be very much appreciated.

RISE AND FALL OF WHEAT

Many Fluctuations in Last Hundred Years—High Market To-day

An interesting article in the Canadian Credit Men's Journal records the fluctuating price of wheat during the last century. "During the Napoleonic war, which lasted from 1812 to 1816, wheat reached the highest known figure, viz., $4.25. Exports to England were cut off from France, Holland and Germany. England was also at war with the United States in 1812, and for some time in this troublesome period the price remained steady around $3.86. The lowest figure quoted in the first quarter of the nineteenth century was $1.37, in 1822. In the second quarter of the nineteenth century, the lowest figure was reached in 1835, when wheat sold at $1.35; therefore the second quarter of the nineteenth century was a fairly high wheat period also.

Steady Climb in 1854.

"In the third quarter of the century was the Crimean War, which started in 1854, when Russia was fighting England and France, and wheat sold at $2.50 per bushel, having started at $1.71 in 1851, and had a steady climb until the $2.50 price was reached. There was a declining fluctuation then until 1864, partly owing to the Civil War, when wheat began to advance until $2.10 was reached. From 1864 to 1875 there was a steady tendency downward, the lowest price being $1.37 in 1875. By 1877 the price had gradually climbed to $1.72, and in 1878 went back to $1.40. From that on a period of steadiness followed until 1883, when the wheat quotation was $1.25.

Below the Dollar in 1886.

"The market continued to decline and the even dollar was reached in 1884, and in 1886 94c. This is the first time wheat went below the dollar mark since 1800. In 1891 the price of wheat was $1.13, and in 1894 reached 60c. It was fourteen years before the $1 price was again exceeded, namely, from 1894 to 1909. There were periods along about 1895 when the farmer only received 40c. per bushel in Manitoba, and an old grain merchant claimed to our representative that he bought wheat at Boissevain, Man., in 1895, at 36c. (No. 1 Hard). There has been an upward tendency in recent years, and especially since August, 1914, when the trading in wheat has been exceedingly active. In the past few months there has been a steady rise, and $3.05 was the highest bid on the Winnipeg Exchange, but Minneapolis and Chicago markets have had quotations at $3.25. All signs point to a high wheat market, even should we have a restricted market."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first two weeks in August:—

Canadian Pacific Railway.

	1916.	1917.	Increase or decrease.
August 7	$2,985,000	$2,559,000	— $426,000
August 14 .	[illegible]	2,746,000	— 107,000

Grand Trunk Railway.

August 7 ..	$1,256,376	$1,320,706	+ $ 64,330
August 14	1,236,989	1,320,753	+ 83,764

Canadian Northern Railway.

August 7 . ..	$ 868,000	$ 775,500	— $ 92,500
August 14 . ..	[illegible]	740,800	— 94,700

The Guardian Accident and Guarantee Company has changed its name to that of the Guardian Insurance Company of Canada. This company at present transacts accident, liability, plate glass and burglary insurance, and issues guarantee bonds.

Mr John H C Durham, vice-president and general manager of the Merchants Fire Insurance Company, has left with his family for Quebec and Murray Bay to spend a well-earned vacation The Merchants reports a very successful half-year's business.

Investments in Western Canada

PROVINCIAL *Governments Should Not Legislate Timidity into Capital—Security of First Mortgages Has Been Harmed—How a First Mortgage Was Made a Secondary Claim, Raising Amount of Two Claims Above Value.*

INVESTMENTS in Western Canadian securities and the effect thereupon of the legislation passed by the Western provincial governments in recent years, was the subject of an important address by Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto, at the Life Underwriters' Association at Winnipeg last week. "I believe," he said, "you hold here in your vast, rich prairies the potential wealth and opportunity which will attract great tides of immigration and upon this the future greatness of the whole of Canada depends, so that the interest of the East merges with your own and is affected by whatever retards or accelerates your development. The East needs you and you need the East with the capital which it can supply. The importance of each to the other is nearly enough equal to enable us to solve any problems which may arise in a way which will prove fair to both.

"We have always had too much sectionalism in this country. It has retarded our progress in many directions. Let us work intelligently against further aggravation of this national weakness, and do whatever we can to unite the full strength of the East and the West and to use it for our mutual advantage and for the benefit of the country as a whole. In that way we can make the most of the great opportunities which lie before us for the development of our great natural resources and the comfort and happiness of the whole Canadian people, present and prospective.

"Life insurance funds have played an important part in the development of this country. For a long time the companies have been investing in Western securities many times the amount of money that they have collected in premiums from the same sections and some of us have a very large percentage of our assets invested here. A good many of us have established loan branches and we anticipated a call for capital when immigration again sets in, as it is sure to do, which will make the West the great logical field for investment. The experience we have had in the past on the whole has been very satisfactory and we have great confidence in the future of the country and the value of the security you will have to offer. Values on the whole have stood up well during these last few years of unprecedented disturbance, and confidence has not been shaken.

"To maintain the quality of security, and to cultivate the practice of reasonably prompt payment on the part of the borrowers, is the sure and only means of encouraging heavier investments here and of effecting a reduction in the rate of interest. We do not seek exorbitant rates and a life insurance company is the last of all institutions which should accept a loan which carries an unusually high rate, for that suggests risk. Security is the primary essential in all our investments. We are not allowed to foreclose and hold real estate for speculative rises in value. We can hold only for a reasonable time to effect transfers of any to which we may be forced to take title, but we, in common with other reputable institutions which have money to loan, are forced to be sensitive to any experience which leads us to question the quality of security. On the whole, we have made no loss in our Western investments, and we look forward for values to increase rather than depreciate, but during the last few years of stress which the whole country has borne in common, certain legislation has applied in all four of the Western provinces, which introduces a new and disturbing factor in this branch of our business. The purpose aimed at in most of this legislation was in the main commendable and in the majority of cases the people needed the relief which it effected; in most cases the trend of the legislation was fair to all concerned.

"It is regrettable, however, that the method employed in the application was in so many cases grossly at fault and worked a hardship and a risk to those who had advanced money on the security of mortgages in the country, and in many cases, particularly in connection with a general moratorium, gave no compensating advantage to the one it was supposed to benefit. Little difficulty was experienced under the act in dealing with the real farmer or occupying owner, but often where the property had come into hands of those who held it more or less for speculative advantage, it has been tied up and arrears accumulated which are not at all likely to be discharged when the moratorium lifts.

"Similarly with reservist provisions in some of the provinces. But the chief difficulty has been experienced in the operation of those acts which provided for certain charges to be made a first claim upon the property, in priority to any previous mortgage.

"In this connection one case has been brought to my attention where a first mortgage of $1,100 (50 per cent. of the value of the property) was registered against a quarter section and charges of $1,400 were later registered in priority of the claim. This made the first mortgage a secondary claim and raised the amount of the two claims above the total value of the property. This is the most striking case I have heard of. In another case, liens of $900 were registered in priority to the title after a property had been foreclosed, in ignorance of the fact that the relief for which the priority claim was later registered had ever been granted. There are many other cases similarly affected in the allotment of the $15,000,000 or more relief which has been granted under this legislation, and which little or no attempt has been made to collect or remove the liens though the relief was granted nearly three years ago. This is the sort of thing which is calculated to disturb confidence and prevent the inflow of money into the country and which tends to keep up the rate of interest.

Government Rural Credit Schemes.

"I am in sympathy with the principle of rural credit schemes which the governments are attempting to introduce into this country, first, because I believe that the country will need all the capital it can secure and that there is ample room for this government effort to be exerted without interfering with the business of the companies which have been regularly loaning here for many years. I welcome it mainly because it will, if properly conducted, serve to demonstrate the actual cost of transacting the business here and determining what the fair rate of interest is, and so establish a standard which will be fair and equitable.

"In normal times capital knows no national or provincial lines, but will flow in the direction of good interest, provided the security offered is sound, and as the quality of the security improves, it will come in increasing quantities, which will tend to reduce the rate.

"Of course, to make the rural credit scheme permanent, the borrower must pay the full cost to the government of securing the money, must make up for any losses it may incur and pay the full cost of transacting the business. This is the only basis on which it can ultimately be continued and on which independent companies can compete in loaning. On any other basis independent loaners would soon be forced to withdraw and the government be compelled to assume the responsibility of borrowing enough money to meet the whole requirements of the country. This would not seriously affect us as insurance companies, for the government, in assuming liability for the large amounts which would be required, would affect the price of their bonds to the point where they would be very attractive to us as an investment, rendering us a good net rate and relieving us of the cost and risk of dealing with the individual borrowers, but this, I think, is a very remote contingency.

"The fact is, we have never sought, and we are not seeking, an excessive rate, so our services will continue to be required in this direction. We must follow the trend of interest; but, above everything, we must seek security, and anything you can do to stabilize or improve conditions in the security or to influence your people towards prompt payment of interest so as to prevent the accumulation of arrears which encroach on the margin of safety, will encourage the flow of capital to this country and help toward its rapid development.

Loaning in United States.

"Study the history of loaning in the middle west of the United States; there you will find that the rate of interest has been much higher than it has been here, in all periods of similar development. For rural credits read Morman whose book gives a summary of the findings of the commission appointed by the United States government to study that question in those countries of Europe where rural credits have operated for a long time. You will find it applies there to very small farms in densely populated countries, and that for the most part the borrowers are grouped in communities, and are held individually and collectively responsible for repayment. The contrast in conditions there and here is the chief difficulty our governments will encounter in applying the principle and making it work satisfactorily, but whatever happens, don't worry, for you live in a country whose future prosperity is assured. By studying these questions and helping to solve them, you can do a great deal toward maintaining a steady inflow of capital to meet the country's means. Insist on fair treatment always, but be careful of any unnecessary disturbance in this matter. You cannot kill off, for your prairies afford too good picking or values, but by bungling you can scare off whole flocks of the geese which lay the golden eggs; they are very timid and there are many fields for them to visit."

LICENSING OF INSURANCE AGENTS; STANDARD INSURANCE LAWS

A report of the address of Mr. A. E. Ham, insurance superintendent, Manitoba, at the life underwriters' convention at Winnipeg last week on the licensing of agents, appeared in *The Monetary Times* last week, as also a report of the address of Mr. A. E. Fisher, insurance superintendent, Saskatchewan, on uniformity in insurance laws.

WAR LOANS AND LIFE INSURANCE

That the government's advertising of war loans and war savings certificates is helping the cause of life insurance, was the statement made by Mr. C. H. Carpenter, superintendent of eastern agencies, of the Great-West Life, Toronto, at the Winnipeg life insurance convention last week. "These advertisements," he said, "are teaching the people to save small sums of money. Every man has four financial requirements: (1) A bank account. (2) An income in the event of disability. (3) Protection for the family. (4) A competency for old age. These four requirements are not given by war savings certificates. A life insurance policy affords the four requirements. Many people able to buy life insurance are not able to buy war loans. By purchasing life insurance, the people are helping the insurance companies to purchase war loans.

"Among the objections to taking life insurance is the contention that the return on the money is small. The return on an insurance investment is not more than that of a savings bank account, and generally less, but the four requirements, noted above, are fulfilled by the investment.

"Another objection is that insurance is tying up money. The answer is that every time one invests $3 in life insurance, an average of $2 can be used. This is possible through the loan privilege."

Mr. Carpenter thought that the compulsory savings which insurance exacted, was one of the greatest features of life insurance.

Among the valuable selling hints to life insurance salesmen given by Mr. Carpenter were these: (1) Sit close to the prospect. (2) Do not proceed faster than he can follow. (3) Prevent discussion of other topics. (4) Do not criticize, unless favorably, the policies of other companies. (5) Always speak well of a competing company. (6) Create some doubt as to the ability of the prospect to pass the medical examination. (7) Appeal to the heart.

Mr. Carpenter's address was followed by a discussion participated in by Messrs. Patten (Great-West Life), Toronto; S. R. Tarr (Canadian Finance), Winnipeg; and F. G. Hassard (Dominion Life), Toronto.

UNAUTHORIZED INSURANCE COMPANIES

Their Representation is Prevented by Licensing of Agents —Incompetence and Dishonesty

Interesting comments from state insurance commissioners, regarding the licensing of insurance agents, were read by Mr. A. E. Ham, Manitoba insurance superintendent, at the life underwriters' convention at Winnipeg last week.

Mr. Charles O. Austin, commissioner of insurance of the State of Texas, says: "The agent's law generally has been satisfactorily received by all persons at interest, and we have heard no complaint against it. We believe the law to be highly beneficial to the agent as well as to the companies and the public generally."

Mr. Bruce T. Bullion, commissioner of insurance of the State of Arkansas, says: "To this date, we find the agent's law working satisfactorily. It requires agents to be more carefully chosen, and has a tendency to prevent 'fake' agents that sometimes infest this State from imposing upon the people."

Mr. F. B. Patrick, deputy superintendent of insurance of the State of Ohio, says: "The working of the agent's law has been so satisfactory that at the urgent solicitation of agents and companies the last legislature passed an agent's qualification law, which provides rather exacting qualifications on the part of the agents to transact the business of insurance in this State."

Mr. W. N. Van Camp, commissioner of insurance of the State of South Dakota, says: "The licensing of agents secures for the department a certain amount of control over the operations of the agent, in that we are able to prevent wrong acts by the agent, and so safeguard the interests of the insuring public. On complaint, the agent is given a hearing, and if found guilty, his license for the solicitation of insurance is taken away from him. You can readily see that the licensing of agents has good effect."

It Prevents Misrepresentation.

Mr. F. W. Potter, superintendent of insurance for the State of Illinois, says: "The fact of the agent's law in this State naturally is to prevent the representation of unauthorized insurance companies, and this is quite beneficial. I am of the opinion that each State should have a law providing some qualifications for insurance agents, and making it possible through this means of eliminating insurance agents whose transactions have shown them to be dishonest and unreliable."

Mr. J. C. Luning, state treasurer of the State of Florida, says: "The agent's license law in this State has been very satisfactory. The fact that agents must have a license has raised the standard of the men in the insurance business in this State. The license law of Florida does not give the insurance commissioner the authority to recall an agent's license once it has been issued. If our law did give this authority, it would be more effective."

Mr. Burton Mansfield, insurance commissioner of the State of Connecticut, says: "The agent's license law in this State tends very much to promote the quality of the agency force as a whole, and, of course, that is the purpose of it. The companies and the department work together in the matter, and objectionable people are oftentimes weeded out."

Mr. Jesse S. Phillips, superintendent of insurance of the State of New York, says: "With watchful care on the part of the department, under this law, the standard of life insurance agents in this State has been decidedly improved. The business in itself—that is, the business of a life insurance agent—is becoming more of a profession. High-grade men are going into the business and with the help of the underwriters' association, which we have throughout the State, results in better conditions. To secure absolutely satisfactory results, there must be real co-operation on the part of the companies, and they must exercise judgment in approving or countersigning the application. It is the duty of the company, primarily, to satisfy itself that the applicant is a worthy man. Certainly an agent's licensing law of the character we have in this State is a benefit to the agent, to the public, and to the State."

Mr. F. H. Hardison, insurance commissioner of the commonwealth of Massachusetts, says: "The licensing provision has seemed to work well in this commonwealth, as it results in the weeding out of many persons who, by reason of their incompetence or dishonesty, are unsuitable to hold licenses as agents."

Mr. Emory H. English, commissioner of insurance of the State of Iowa, says: "Relative to the operation of agent's license law in this State it is not that there is any tendency at all to return to the old system of unregulated agents. I am heartily in favor of any legislation that will serve to raise the standard of character and qualification of those employed by the various companies, although I think that such legislation should always fix the responsibility with the individual company rather than any department of state for the qualification and activities of the agents."

Mr. Otto L. Kaluss, state auditor of the State of Indiana, says: "I might suggest that this department would not be willing to have the agent's license law eliminated, and open the field of agency licenses to persons over whom the department would have no control. The tendency is, of course, toward higher standards, and this would be impossible of accomplishment except through control exercised by virtue of the license law."

ALBERTA'S BONDS SOLD IN CANADA

An issue of $1,000,000 5 per cent. 5-year province of Alberta bonds has been placed with Canadian investors. The price was 94.70 and accrued interest, yielding 6¼ per cent. The bonds are a direct and primary obligation of the province, and are payable from its general revenues. The legislature of the province has power to supplement, if necessary, the ordinary sources of revenue by levying a direct tax upon all the assessable property within the province to provide for the payment of the principal and interest of these bonds. No such tax has ever been levied by the province, however, the ordinary revenues having hitherto sufficed. The bonds are free from all succession duties, taxes and impositions levied by the province. Temporary debentures are to be issued pending delivery of the definitive bonds.

The total outstanding debt of Alberta at December 31st, 1916, was:—

4%	Debentures, due 1938, issued for purchase of telephone system	$ 2,000,200.00
4%	Debentures, due 1922 (convertible into 30-year stock), four-fifths for telephone expenditure and one-fifth for public expenditure	4,804,373.33
4%	Debentures, due 1922, issued for telephone and public expenditure	133,333.34
4%	Registered stock (converted), issued for telephone and public expenditure.......	62,293.33
4½%	Registered stock, due 1943, issued for telephone and public expenditure.......	4,866,666.66
4½%	Debentures, due 1943, issued for telephone and public expenditure	133,333.34
4½%	Debentures, due 1923, eight-eighteenths for public expenditure, five-eighteenths for telephone expenditure and five-eighteenths for elevator expenditure....	3,600,000.00
4½%	Debentures, due 1924, all for public expenditure	7,400,000.00
5%	Debentures, due 1925, for public expenditure and other purposes	4,000,000.00
5%	Debentures, due 1926, for public expenditure and other purposes	2,000,000.00
		$29,000,200.00
	Less sinking fund	368,190.72
	Net debt as of December 31st, 1916....	$28,632,009.28

Of the above debt there is practically $13,000,000 in remunerative investments on which the province does not have to provide interest.

The purchase of the bonds from the province was negotiated by the Dominion Securities Corporation, Toronto, and the issue was placed entirely in Canada. The attractive price brought a very satisfactory response from the Canadian market. Despite the high income yield, however, the United States market failed to respond. This is a significant indication of the condition of the money markets there, a situation which is becoming more acute, United States war loans having the right of way.

President and Vice-Presidents of the Life Underwriters' Association of Canada

J. T. WILSON, Halifax, President.

T. J. PARKES, Sherbrooke

G. W. MERRITT, St. John

E. S. MILLER, Regina

At the eleventh annual convention of the Life Underwriters' Association of Canada, held at Winnipeg last week, Mr. J. T. Wilson (Canada Life), Halifax, was elected president, with the following district vice-presidents: Manitoba and Saskatchewan, Mr. E. S. Miller (Imperial Life), Regina; Ontario and Quebec, Mr. T. J. Parkes (Sun Life), Sherbrooke; Maritime Provinces, Mr. G. W. Merritt (Great-West Life), St. John, N.B.; British Columbia, Mr. J. H. Campbell (Equitable Life), Vancouver.

J. H. CAMPBELL, Vancouver
(Formerly mgr of The Molsons Bank, Vancouver)

Mr. T. J. Parkes' win-the-war resolution, with the fervent, patriotic speech preceding it, was one of the hits of the convention.

Mr. J. T. Wilson, Canada Life, Halifax, as vice-president of the Dominion Life Underwriters' Association, responded to the addresses of welcome on Wednesday morning. Mr. Wilson is now president of the association.

Mr. A. E. Ham, the Manitoba insurance superintendent, in concluding his address on Wednesday afternoon, referred to the code of ethics for underwriters, drafted by the Minneapolis Underwriters' Association, and printed in *The Monetary Times* of August 17th. "In *The Monetary Times* this week," said Mr. Ham, "you will find this code of ethics. I think it would be wise to get a copy of this and have it placed in the hands of the members of all your associations. I pass the suggestion along to you."

Mr. J. F. Weston, managing director, Imperial Life, Toronto; Mr. A. Homer Vipond, general agent, New York Life, Montreal; and Mr. Fred. W. Field acted as judges of the essays.

Hon. T. C. Norris, Manitoba's premier, spoke at the banquet for thirty-five minutes; Sir James Aikins for thirty minutes; Consul-General Ryder, Winnipeg, thirty-five minutes; and Mr. T. G. McConkey, Toronto, ten minutes.

Mr. D. J. Scott, Sun Life, Winnipeg, and president of the Winnipeg Life Underwriters' Association, delivered an address of welcome on Wednesday morning. Mr. Scott will be remembered as the man with the triple expansion voice and the hair-raising signature. The voice was still on the job in welcoming the delegates, but at the earnest solicitation of friends he has rejected his former signature and now writes a real hand, also a lot of good business for the Sun Life.

THE NEXT WAR LOAN

Canadians will be asked to subscribe to another war loan during the coming fall. The amount will probably be $150,000,000. As the third war loan has only recently been entirely placed with the ultimate investor, the natural market for the next loan is restricted. It will prove a big task to subscribe our fourth war loan. The people of Canada will have to help make the market for the issue. They have not been asked to make any financial sacrifices in subscribing to the previous issues. All the loans have been made according to prevailing financial conditions and have yielded the investor a substantial return. At whatever rate the finance minister decides to issue the next loan, it will have to be fully subscribed. The nation must have the money to carry on its share of the war and to help to bring the struggle to a successful and, if possible, a speedy conclusion. As it is imperative that the government should be provided with these funds for that purpose, it remains for the financial institutions, insurance and other companies, industrial corporations, individual investors, large and small, to do their part, co-operating with the authorities to make the war loan a success.

We cannot count on much help from the United States in this matter. That country is busy subscribing its own war loans. We will be compelled, therefore, to raise our war funds almost entirely in Canada. To each of the three previous loans, we received United States subscriptions of from $25,000,000 to $30,000,000. On this occasion, the amount will be very much smaller. On that account, and because we will practically have to create the market for the war loan, the task of raising $150,000,000 will be a heavy one. It can be met only by the carefully planned preparation on the part of the finance department, using the assistance of every possible organization throughout the country.

Most savings and war loans campaigns have been conducted in a spasmodic and unscientific manner, the United States Liberty Loan and the British Victory Loan campaigns being notable exceptions. Our war loans have been successful in the past but we have reached a point at which the greatest possible organization must be arranged in order to raise the necessary funds. We need a comprehensive educational and organizing campaign to touch every part of the country, to appeal to every citizen.

A war bond should be held in every home. The government has the right to ask and to obtain the practical co-operation of every organization and citizen of Canada to make the next war loan a complete success and to place some of the loan with investors who have not previously purchased war bonds.

ATTRACTION OF CAPITAL

While the United States acted as our banker for two years, the United Kingdom being closed to all except war loans, both the New York and the London markets are now practically closed to Canadian borrowing. This is a direct result of the war. War financing not only controls the financing of the United Kingdom and the United States but it dominates the position here also. After the war, it is hoped to raise in both countries considerable capital for development in Canada. As time goes on, we may count more upon the funds of the Canadian people to finance their own enterprises, but having in view the tasks of future development, the capital which can be raised at home is insignificant. We will have to depend for some years to come upon outside capital for the next era of active development, even although Canadian savings will take a greater part in the work.

That our taxation schemes and policies generally should be friendly to immigration and to capital is apparent. While our primary duty is to win the war and to see that a part of the cost is paid as we go along, we must see to it also that attractions to capital and labor, especially agricultural labor, are sufficiently substantial to compete with those afforded by other countries and by other parts of the British Empire. In a recent address to the shareholders of the British Empire Trust Company in London (a company which has invested $300,000,000 in this country), Mr. R. M. Horne Payne expressed the hope that it would not be found, from a financial standpoint, that confidence in British institutions and laws in Canada had been misplaced, and that these afford the investor less just protection than those of other countries. He recalled that a spirit has manifested itself in certain parts of the Dominion which seems to show a very great deal less than fair play towards enterprise. This is the more regrettable as the Dominion parliament itself is always careful to treat British capital with fairness and consideration. "I hope," he added, "that just counsels may prevail, and that the rights of investors will receive fair protection in all parts of Canada; but should the contrary occur, the people concerned must not be surprised if they find after the war that fresh capital is unobtainable, and that existing loans and mortgages cannot be renewed." This reference to the radical legislation passed by various provincial governments is well timed. The governments are finding that, after all, much of the legislation is against the best interests of their constituents, their province and their country.

AFTER THE WAR

The need of thorough preparation on the part of the federal and provincial governments for after-war conditions is admitted. While some action has been taken, Canada and its affairs are so disturbed by politicians and their machines, that our measure of preparation is seriously short. Germany has already a plan whereby it hopes to break competition. The idea is that the government should become a large trust and have absolute control of the country's exports. In this manner Germany will try to undersell and crush individual competitive merchants of other nations. If Canada wishes to retain its trade after the war we will have to plan carefully now.

In an instructive address at Winnipeg last week, Professor Swanson, of the University of Saskatchewan, pointed out that the United Kingdom has hammered out various economic instruments which have been used with telling effect since the outbreak of war. It is safe to assert that they will not be thrown aside unused when peace comes. Great Britain has taken entire control of the export and import business of the nation, and directs the flow of goods to suit her own needs and effect her own objects. Before the war the British tobacco interests virtually controlled the export prices of tobacco in Virginia and other tobacco-growing States. It was even then realized what a tremendous power a foreign combination might gain over the prices of domestic products. The converse of this was just as true. Brazil, by means of its valorization scheme, was able to determine the price of coffee in Europe and America; and at this time the government of Yucatan is mulching the farmers of the United States and Canada of millions of dollars, through its control of sisal hemp. If after the war, as has been foreshadowed, Germany and other European countries shall give to purchasing trusts the sole right to import cotton, copper, rubber and the many other commodities essential as raw materials to their industry, it can be predicted that foreign nations will be in a strong position to control the prices of many American products.

As Professor Swanson truly said, the great industries of the United Kingdom, Germany, Austria and France, have been keyed up to the point of highest efficiency; they have been organized to achieve national ends and ambitions as never before. Peace will inevitably be but the forerunner of an economic war for supremacy in the neutral markets of the world. Are we doing our proper share of preparation to meet these conditions?

UNIFORM INSURANCE LAWS

The plea of Mr. A. E. Fisher, insurance superintendent of Saskatchewan, for the standardization of provincial insurance laws, is worthy of serious support. The Western insurance departments have done much to obtain uniformity of laws in their section of the country. Comparatively little practical help appears to have been given to their advances for more widespread uniformity, except perhaps in one or two of the eastern provinces. As Mr. Fisher pointed out in his address at the life underwriters' convention at Winnipeg last week, it would be a great convenience to policyholders, and, in the case of life insurance, to executors, beneficiaries, and other persons interested, if a common procedure were adopted by as many provinces as possible, so that a knowledge of the insurance law of one province would afford an acquaintance with the local laws throughout the greater part, if not the whole, of the Dominion. "There is no one," he said, "but will admit the desirability of such a condition of affairs, and, speaking from the standpoint of Saskatchewan in particular, and of the West in general, there seems to be every willingness to support such a movement in so far as local conditions may warrant it."

Mr. Fisher did not overlook the fact that, while the eastern provinces are more or less settled in their ways, the West is in a state of development and consequently conditions are changing. He suggested that that was the one point which might cause delay in securing absolute uniformity of laws from the Pacific to the Atlantic. While there is something in that contention, it should be comparatively easy to obtain a large measure of uniformity in our provincial insurance laws. The western insurance superintendents have made an excellent beginning and it is to be hoped that the superintendents of all the provinces will meet in the near future to discuss this important subject.

GREAT-WEST LIFE MEN HAVE CONVENTION

The Hundred Thousand Club of the Great-West Life Assurance Company of Winnipeg held its annual convention in that city from August 21st to 25th. About seventy-five members were present at the opening session on Tuesday morning where they were welcomed by the president of the company, Mr. A. Macdonald, and by the vice-president, Mr. R. T. Riley. Mr. Macdonald mentioned the remarkable fact that in ten weeks prior to the convention $10,000,000 of insurance had been secured by the agents of the company. He also gave interesting reminiscences of the early days of the company with which he has been connected since its inception and drew particular attention to the solid foundation which had been laid by the founders of the company, especially the late managing director, Mr. J. H. Brock. The new president for the 1917 club year was then installed in his chair of office. Mr. A. H. Aronovitch, the new president, is a Winnipeg man and replaces Mr. P. Moreau from the province of Quebec, who was the president last year. He gave interesting predictions as to the business for next year, and urged the adoption of a slogan, "One hundred members for 1917." He was followed by Dr. H. H. Chown, the medical director of the company, who gave interesting information regarding the selection of risks. Addresses by Mr. C. A. Butler, manager of the company at Montreal, on the "Appeal of the Great-West Life," and by Mr. J. A. Johnson, manager at Vancouver, on "Statistics," completed the day's session, and the evening was occupied by a dinner at the Fort Garry Hotel, at which many interesting speeches were given by the vice-presidents of the club from the various provinces.

The second session was addressed by Mr. W. McQuaker, the treasurer of the company, who presented to the club the investment methods of the company and gave a most interesting analysis of them. This was followed by an address, "Since we last met," given by Mr. C. C. Ferguson, the general manager of the company. Mr. Ferguson's remarks showed the growth of the company along various lines since the date of the last convention. The figures quoted and the explanations given were most valuable from the point of view of the agents, and many valuable pointers were secured. The convention then adjourned to take part in the proceedings of the Dominion Life Underwriters' convention meeting in Winnipeg last week.

The damage to the soil through forest fires in Canada is a severe annual burden upon the country. The United States estimates that forest fires annually do half a billion dollars injury to soil fertility.

Convention Personals

Messrs. W. Lyall Reid, Meiklejohn, P. A. Wintemute, A. H. Newman and Renworth, Vancouver, acted as business committee for the convention.

Mr. J. Burtt Morgan's (Great-West Life, Victoria), plea for a Dominion-wide license for agents received the hearty endorsation of the convention.

Mr. T. B. Parkinson, Ætna Life, London, looked after the transportation arrangements of the delegates in his usual thorough style. He was one of the hardest workers on the trip.

Messrs. C. M. Twiss, H. S. Boynton, F. P. Hayden, E. H. Bissett, J. H. O'Connor and J. K. Lowry acted as entertainment and banquet committee for the convention, and thoroughly lived up to the Western standard of hospitality and service.

Messrs. A. H. Vipond, New York Life, Montreal; George Hunt, Imperial Life, Toronto; T. J. Parkes, Sun Life, Sherbrooke; J. T. Wilson, Canada Life, Halifax; and D. J. Scott, Sun Life, Winnipeg, acted as resolutions committee for the convention.

Mr. J. A. Wilson, Canada Life, Brandon, and president of the Brandon Life Underwriters' Association, was one of the Westerners who welcomed the delegates. Mr. Wilson has become one of the big insurance writers of the West, and recently placed a policy for $75,000 on the life of a Western business man.

Mr. J. F. Weston, managing director, Imperial Life, Toronto, attended the convention and delivered a thoughtful address on Friday morning. He is now on the way to the Pacific Coast on a business trip, having recently completed a tour of Newfoundland and the maritime provinces. The Imperial Life will probably write over $500,000 of insurance in Newfoundland this year.

Mr. A. Homer Vipond, past-president of the Dominion Life Underwriters' Association and the New York Life's Montreal manager, in his usual attractive style responded to the addresses of welcome on Wednesday morning. Mr. Vipond put in a good word for Quebec province, which, he said, was misunderstood, and needed only the right approach to bring it into line in every way with the other provinces.

Professor W. W. Swanson, of the University of Saskatchewan, made a great hit with his address on the economic value of life insurance. At its conclusion, Mr. Burtt Morgan, presiding, said: "If any of us had the impression that the average university professor is a fossil, our minds have been disabused this afternoon. What a great thing it is we have such men manning our universities in this Western country!"

Hon. Sir James Aikins, lieutenant-governor of Manitoba, was one of the principal speakers at the life underwriters' banquet at Winnipeg last week. He made a notable patriotic speech, expressing his conviction that the English-speaking peoples would see to it that no foreign foe ever disturbed the peace again. Colonel Frederick M. Ryder, the United States consul-general at Winnipeg, also addressed the gathering, and stated that the United States was in this war until it was successfully concluded. Other speakers were Mr. Winslow Russell, Hartford, and Mr. T. G. McConkey, Canada Life, Toronto.

Mayor Davidson, of Winnipeg, one of the most popular occupants of the mayoralty chair of the Western metropolis, welcomed the delegates on Wednesday morning in an excellent address. Speaking of the requisite qualities of a life insurance agent, he said: "There are several qualifications which go to make up the successful commercial traveller that apply to the insurance agent, namely: (1) He must believe in the house he represents. (2) He must believe in his goods. (3) He must believe that men need the goods he has to sell, and that he is doing the man, the family and his children a service in placing insurance on his life. (4) He must believe that he is the best judge of the goods; in other words, that he has confidence in himself."

Principal J. B. Reynolds, of the Manitoba Agricultural College, welcoming the delegates at the college on Thursday, said that ten years from now, war or no war, "we will show cause why the Manitoba Agricultural College was built on such a large scale." Production and economy, he continued, were the dominating influences to-day. Institutions teaching agriculture and domestic economy, to his mind, were most in line with modern thought and conditions. Principal Reynolds forestalled, amid laughter, any insurance delegates who had hoped to write him for $50,000. "Personally," he said, "I have insurance, and in five companies. I think I can say the same of my staff!" Mr. Meiklejohn and Mr. Ralph Ripley, Sun Life, Hamilton, expressed the thanks of the underwriters for the entertainment of the government and the college.

Mr. T. J. Parkes, of Sherbrooke, with the following members, acted as the nominating committee, Mr. Parkes acting as convener: Kingston, Thomas Mills; London, T. B. Parkinson; Peterborough, Peter A. Lemieux; Moose Jaw, P. A. Ferguson; Quebec, V. A. Lemieux and H. Morin; Regina, J. H. Wright; Saskatoon, W. B. Crawley; Winnipeg, C. M. Twiss; Stratford, J. A. Quarry; Victoria, J. C. Wilson; Winnipeg, C. M. Twiss and D. J. Scott; Brandon, J. E. Matthews; Brantford, F. J. Ritchie; Calgary, J. W. Keith; Edmonton, W. H. Spiers; Fort William, F. W. Atkinson; Halifax, W. R. C. Hewitt; Hamilton, Ralph C. Ripley; Montreal, Geo. E. Williams; Ottawa, O. E. Switzer; Prince Albert, R. E. Williams; Richmond and Sherbrooke, Que., T. J. Parkes; St. John, N.B., W. Merritt; Sydney, Mr. Archibald; Toronto, J. L. Purdy; and Vancouver, T. S. Smith.

Mr. A. E. Ham, the Manitoba insurance superintendent, in addressing the life underwriters in convention at Winnipeg last week, put in a good word for the business. "Viewing, as I do, life underwriters and life companies as public benefactors," he said, "I am proud to be in any sense associated with the business. No business or profession has done more to encourage and promote habits of thrift, prudence and forethought; no body of men has done more to brighten life's darkest hours, to lighten the burden of the widows and the fatherless. Human nature is prone to procrastinate, and in thousands of instances only the thoughtfulness, tact, industry and insistence of the life agent has saved business from wreckage and homes from destruction. Life assurance companies, by the utilization of their wealth of reserves, have largely assisted in the development of our cities and Dominion, and in the great crises of our Empire's need have rendered immeasurable help in financing the war."

Mr. C. C. Ferguson, general manager and actuary of the Great-West Life, is honorary president of the Winnipeg Life Underwriters' Association, which worked exceedingly hard to make the convention the success it was. Mr. D. J. Scott, Sun Life, is president. The other officers and committees are: Past-president, D. J. Johnston, Ætna Life; vice-president, H. S. Boynton, Metropolitan Life; treasurer, W. T. Hart, Policyholders' Mutual; secretary, W. M. G. DesBrisay, London Life (402-5 Lindsay Building. Phone Main 2104). Committees—Membership: D. J. Johnston, H. S. Boynton, A. H. McLeod. Subjects and speakers: C. M. Twiss, A. Frankland, J. F. Trotter. Legislative: R. S. Rowland, H. B. Andrews, A. E. Lawson. Finance: W. T. Hart, H. J. Smale, W. L. Burgess. Audit: L. W. Scott, A. H. Logan. Board of management—D. J. Johnston, D. J. Scott, H. S. Boynton, W. T. Hart, W. M. G. DesBrisay, H. B. Andrews, Imperial Life; J. H. Callahan, Prudential Life; C. M. Twiss, Manufacturers' Life; F. B. Blackley, Western Life; A. W. Newman, New York Life. The convention committees of the Winnipeg association were: Advisory: C. C. Ferguson, J. W. W. Stewart, Adam Reid, Wm. Smith, H. R. S. McCabe, Dr. H. J. Meiklejohn. Reception: R. S. Rowland, H. E. Turner, A. W. Newman, J. F. Trotter, J. H. Baird, W. A. Mackie, Wm. Govenlock, Wm. McBride. Representing Brandon: J. E. Matthews, E. Daw. Entertainment and banquet: C. M. Twiss, H. S. Boynton, F. P. Hayden, E. H. Bissett, J. H. O'Connor, J. K. Lowry. Representing Brandon: J. A. Wilson, J. J. Smiley. Finance: H. B. Andrews, W. T. Hart, H. T. Clarke. Representing Brandon: R. H. Wright. Publicity: W. M. G. DesBrisay, J. G. Stephenson, R. D. Bell. Representing Brandon: W. J. McAlpine, F. E. Johnson.

ECONOMIC VALUE OF LIFE INSURANCE

Professor Swanson, Saskatchewan University, Says Governments Should Help Build Up the Business

"The business of life insurance is intimately bound up with the economic life of the nation," said Professor W. W. Swanson, of the University of Saskatchewan, addressing the Life Underwriters' Association on the economic value of life insurance. Professor Swanson then proceeded to show that the greatest of all virtues, for efficiency in war or in peace, is thrift, and demonstrated what a factor life insurance is to that end. "In fact," he continued, "its wide ramifications, if fully traced, would, in their effects upon the social and business conditions of the country, astonish even the professional investigator. It goes without saying that, colossal as the life insurance business is to-day, it must inevitably assume larger proportions in the future. While the fundamental idea underlying insurance has remained the same since its inception centuries ago, its application constantly assumes new and more efficient forms in the body politic. And there is no reason to believe that insurance organizations have reached the limit of their development in attempting to meet the ever-changing conditions of modern life. There is no more fascinating field for research, and none more important for the scientific investigator of social and economic life, than the present and future forms which life insurance is assuming and will assume in the days to come. The Great War has fundamentally affected the life of all nations and of all communities, and it must therefore react upon the efficiency and the adaptability of life insurance to meet the economic requirements of our time.

Governments Should Help.

"We cannot insist too strongly," he said, "that governments should do everything in their power to build up the life insurance business. Too frequently it would appear that legislators are more anxious to gratify the passion of the mob in its insensate desire to destroy big business than to safeguard the vital interests of the State.

"It is scarcely necessary at this late day to dwell long upon the distinction between saving and hoarding. Nevertheless, there is still, in some quarters, much confusion of mind on this subject—a matter of fundamental importance in the life insurance business. Aside from those in control of insurance corporations, few realize that the hundreds of thousands of premiums paid annually for life insurance, small as the individual contribution may be, amount in sum total to an enormous volume of capital which is used productively to fertilize industry, commerce and agriculture throughout the length and breadth of the nation. The railroads that have opened up the fertile West, the towns and cities that have been built almost overnight, the vast industrial equipment that has made America the workshop of the world—these and a thousand other enterprises—have all been rendered largely possible through the investments of life insurance corporations. The truth is that, aside from the benefits that the individual derives from his policy, the whole nation shares in the fruits of such enterprise. If the business of life insurance were destroyed, the nerve centre of the nation's economic life would be paralyzed.

"While comparisons may not be adequately made between life insurance corporations on the one hand, and banks and other financial enterprises on the other, it may be safely said that the former have contributed more to the upbuilding of the basic industries of the nation than the latter—that the railroads, the municipal utilities, the canals and the shipping of the country owe much more to life insurance investments than to banking accommodation. All this comes about because of the essential difference in the nature of the business of these social organizations—the life insurance corporations depending upon long-time investments for their income, and the banks upon short-time commercial loan. They play equally important rôles in different ways

Premiums and Investments.

"Life insurance agents need to concentrate, much more than they have done in the past, upon the investment aspect of the individual's insurance problem. The man in the street knows little, unfortunately, of the business of life insurance, and practically nothing of the disposition of the funds which he contributes by way of premiums. Very often he imagines, in a sort of hazy way, that his premium payment is used by the insurance corporation merely to satisfy someone else's present claim. Superficially this is correct, no doubt, but only superficially. If the insured comprehended fully just what became of his premium payments—that they were used for investment, for productive purposes—he would assuredly take more interest in the transaction.

"The prospect, therefore, who looks into the desirability of life insurance can be fully assured that he is neither hoarding his money nor gambling—that he has to die in order to win. The essence of gambling is found in the fact that an attempt is made to gain by taking chances that are not the unavoidable incidents of productive enterprises. The essential purpose of insurance is the imperatively important one of equalizing and eliminating chance. Modern insurance is, basically, mutual in its nature. The total premiums equal the total losses, plus operating expenses; the interest on the reserve of premiums counting as part of the premium payment. In a sense, it may be said that the insured gets future protection by bearing the present losses of others. In other words, the less urgent wants of the present are sacrificed in order to protect the income that will take care of the wants and necessities of the future. To be economically sound, therefore, insurance must have to do with true, productive work and really productive agents; and with somewhat regular, ascertainable events beyond the control of the insured. Both in fire insurance as well as in life insurance these events may be illegitimately controlled by the beneficiary. A man carrying life insurance may benefit his family, as he sees it, by committing suicide; and an individual having heavily insured his buildings may burn them down and collect the principal sum from the company which has assumed the risk. But after all, especially in life insurance, such swindlers are relatively few in numbers; sufficiently few, in any event, to have little or no influence upon the general principle as stated above.

Better Than Government.

"Without doubt private insurance corporations can handle life, accident and sickness insurance—the first two, certainly—more efficiently than can any government. Where the State grants free old age pensions, as in the United Kingdom, or State-assisted insurance against old age, as in France and Germany, the private corporation cannot successfully compete. There is no reason, however, why the problem should be neglected because of possible antagonism between the State and private corporations. Especially is unemployment insurance urgently necessary in America to-day. Unemployment and industrial depression are certain to follow at the close of the war—perhaps not for a year or two, but certain nevertheless—and if needless privation and suffering are to be prevented, a comprehensive scheme of out-of-work insurance should be mapped out now, and applied as soon as possible. On a contributory basis this will preserve the workman's self-respect, and permit him to maintain premium payments on his life policies, and eliminate the waste arising under the loan practice."

CANADIAN NORTHERN NOTES SOLD

Messrs. William A. Read and Company, of New York, announce that they have sold all the $10,000,000 1-year 6 per cent. notes of the Canadian Northern Railway Company recently purchased by them.

To a Salesman who prefers the Coast:

INSURANCE POLICY AND SHAREHOLDERS

Shareholder Who Buys Stock to Mathematically Compensate Him for Hardships in Earlier Years, is Like Schoolboy Financier, Says C. C. Ferguson

"My advice to any group of men who contemplate the establishment of a new life insurance company is just one word, "Don't." So said Mr. C. C. Ferguson, general manager and actuary of the Great West Life Assurance Company, Winnipeg, in introducing his remarks on the subject of the new company and its shareholders. Mr. Ferguson stated that the general aim of his address would be to ascertain the value as an investment of the stock of a life insurance company about to be organized. "In attempting this," he said, "tests will be made assuming, in the first instance, an excellent management in all particulars and, in the second instance, an average management with regard to administration expenses and the same excellent management in other respects. This process will involve the setting up of a model company, using the word model not as equivalent to perfct or ideal, but rather a standard, and so representing the type of company which might be found in actual practice on the various conditions assumed. Accordingly the development of this model company may perhaps be interesting in general respects, and it will illustrate the expected results to policyholders as well as shareholders, but for the purpose of this paper the results to policyholders will be regarded as more or less incidental."

C. C. Ferguson, Winnipeg.

For the model company Mr. Ferguson assumed the following particulars:

1. Paid up Capital of $100,000.

2. Premium on Capital $150,000.00 of which $50,000.00 is spent in sale of stock and other organization expenses. (It is not my purpose just now to contradict or affirm any opinion that such expenditure would be inconsistent with excellent management).

3. New business written varying gradually upwards from $750,000.00 in the first year to $10,000,000.00 in the 20th year.

4. Average withdrawal rates assumed so that the business in force develops to something over $50,000,000.00 in 20 years.

5. Mortality experience assumed on a basis believed to be about equivalent to the experience met with in ante-bellum years by the Canadian Companies which have been reasonably careful in the selection of risks.

6. Surrender values are assumed on an average basis as now allowed by Canadian Companies.

7. To avoid calculations which would otherwise be extremely involved, it is assumed that all business is issued on the 20 Payment Life Plan at age 32 and at an annual premium of $34.60 per thousand.

8. It is assumed that all business is issued on the 20 year Deferred Dividend Plan.

9. A net rate of interest of 6 per cent. is assumed throughout.

10. Under what will hereinafter be termed **"excellent"** management, the expenses of management are assumed to be 150 per cent. of the new premium income in the Company's first year, but this percentage is reduced gradually and uniformly throughout the first ten years, so that during the eleventh and following years the expense rate for new premiums is 100 per cent. The expenses applicable to renewal premiums are assumed to be 10 per cent. throughout. Under what will hereinafter be termed **"average"** management, the expenses applicable to first year premiums are placed at 150 per cent. in the Company's first year, reducing during the next four years to 130 per cent. and remaining thereafter at that figure. The expenses applicable to renewal premiums are in this instance assumed to be 13 per cent. throughout.

11. The above expense rates do not include the $50,000.00 assumed to be spent in organization expenses, sale of stock, etc.,

Shareholders, Insurance Act and Profits.

Continuing Mr. Ferguson said:— To return now to the purpose before us, we must first examine the Dominion Insurance Act to determine the conditions under which the shareholders stand with reference to the distribution of profits. In brief, it may be said that shareholders are entitled to a maximum of 10 per cent. of the total divisible surplus in addition to interest at the Company's net rate on the funds standing at the credit of shareholders. These funds consist of the capital and any premium on capital stock which has not been expended or applied in conection with the business and of any balances held back from distribution to shareholders.

Considerable difficulty arises in the interpretation of this section of the Act, but I have taken it to mean that the shareholders will never be entitled to interest on any part of the premium on capital stock which has been expended in organization expenses and that so long as no surplus has arisen from the insurance policies themselves, the shareholders are entitled to interest only on the capital and on the unimpaired premium on the capital, but when the business develops sufficiently so that the premium on capital ceases to be impaired (except for organization expenses) the shareholders then become entitled to interest on the whole of the capital and premium less the expenditure for definite organization expenses. An interpretation decidedly less favorable to the shareholders would, I think, follow more naturally from the wording of the Act, but I wish to discuss the shareholders prospects in their favorable light.

The liabilities in the tables at the foot of the following page consist of the policy reserves computed on the Om (5) 3½ per cent. basis, with deductions for initial expenses as permitted under the Insurance Act. All other liabilities are assumed to be deducted from assets.

Conclusions derived from the tables:—

(A) Under "Excellent" Management.

1. A surplus for policyholders cannot be expected in less than ten years and consequently no dividend to shareholders could (in view of the attitude of the Insurance Department) be paid in less than that time while prudence would no doubt suggest a further postponement.

2. At the end of 15 years the total fund at the credit of shareholders would represent a return of the capital and premium with interest at 4½ per cent.

3. At the end of 20 years the shareholders' fund would represent a return of the capital and premium with interest at 6 per cent.

4. After the expense rates have reached a permanent basis, the individual policy result under the 20 year Deferred Dividend Plan (Life 20 Payments, age 32) would be:

Reserve....................	$538.78
Profits....................	457.53
Total......................	$996.31

From the excellence of the above result, no doubt it will be readily agreed that we did not exaggerate in describing the management in this instance as "excellent."

5. Thus under the most favorable circumstances a Company which spends $50,000.00 in organization expenses will not be in a position to pay its shareholders more than ordinary interest in their investment for at least twenty years. After twenty years something more could be paid but it is doubtful

JOHN McCLARY, President A. M. SMART, Manager

whether the ordinary investor would care to wait so long for his returns in view of the fact that even this return will not materialize if the management falls short of being "excellent." For his return under less perfect management see paragraph (B) 2. on the following page.

(B) Under "Average" Management.

1. A surplus for policyholders or a dividend for shareholders cannot be expected in less than thirteen years.

2. At the end of 20 years the fund to shareholders account would represent a return of capital and premium with interest at only 4¾ per cent. for the whole period.

3. The individual policy result after expense rates have reached a permanent basis would be

Reserve....................	$538.78
Profits......................	331.81
Total.........................	$870.59

4. It will be observed that the effect of the higher expense rates is to reduce the profits by 28 per cent but the management in other respects has been so efficient that the above result to the policyholder is still excellent. Accordingly, from the point of view of the policyholder, we were very niggardly in describing the management in this instance as only "average." However the point with respect to the shareholder is that if $50,000.00 be spent on organization expenses he must wait till long after 20 years for any dividend greater than ordinary interest on his investment unless he chances into a Company whose management is unusually good and then he must wait at least 20 years. What shall we say if the management besides incurring the higher expense rates, fails to realize 6 per cent. interest on its securities, or makes losses on its investments or does not achieve a favorable mortality experience?

An important question is this: What is the minimum premium on capital stock required to keep a new Company's capital from becoming impaired at any time? This will depend upon the extent and character of the business transacted, but if the history of our model Company represents the probable and desirable programme of the new Company in question, then after paying all organization expenses there should be provided a premium of $70,000 for "average" management and $62,000 for "excellent" management. This would barely keep the capital unimpaired, and doubtless some further margin would be desirable.

Perhaps $50,000.00 will be regarded as an exorbitant allowance for organization expenses. I would certainly agree with that view, but let us now consider how the shareholders will fare on the other extreme when no organization expenses whatever are incurred.

The tables show that after 20 years on this assumption, the fund in shareholders' account would represent a return of the capital and premium with interest at about 7 per cent in the case of "excellent" management and about 6 per cent in the case of "average" management. In view of this I would again submit the conclusion that, even in this most favorable extreme, there is nothing in prospect to attract the shareholder unless he had some guarantee of unusually good management and even then the returns would be very moderate indeed.

Mathematics and the Schoolboy.

I am quite well aware that by projecting the history of our model company far enough into the future, we can find returns to shareholders sufficient to **mathematically** compensate them for their hardships in the earlier years but my suggestion is that the shareholder who buys his stock on this consideration is in a position somewhat similar to that of the schoolboy who,

Assuming the Management defined in the foregoing as "excellent," the following table illustrates the history of our "Model Company":—

Year	Business Issued	Business In Force	Net Assets	Net Liabilities	Policyholder's Surplus	Shareholder Total Fund

wishing to be known as the founder of a family of financiers, decides to deposit a few cents in the savings bank, so that in the distant future the fabulous accumulations on this sum would enrich his heirs. Mathematically the schoolboy would be quite correct in his theory.

The general conclusion I have come to is that, under the restrictions of the present Insurance Act, there is not enough margin for profits to shareholders to make the organization of a new Company advisable even with the premise of moderate organization expense and reasonably good management, and it should be remembered that this conclusion has been arrived at after interpreting the Insurance Act in the most favorable light from the shareholders' point of view. As stated above a more obvious interpretation would show results much less favorable.

On the other hand, I think that the tables shown in this paper clearly demonstrate the fact that good management will in the future as in the past achieve satisfactory results to policyholders, so that the same Company may be excellent in the eyes of its policyholders but unsatisfactory in its returns to shareholders.

SHAREHOLDERS OF YOUNG INSURANCE COMPANIES

Protest Against Views Expressed at Underwriters' Convention

The following letter has been addressed to the president of the Dominion Life Underwriters' Association by Mr. F. O. Maber, secretary of the North-Western Life Assurance Company, Winnipeg :—

"I listened to an address yesterday morning (August 23rd) by Mr. C. C. Ferguson, general manager and actuary of the Great-West Life Assurance Company. This was a finished and carefully prepared paper, but I am sorry to say that I cannot help but consider it as a deliberately planned, yet insidious attack on new life insurance companies, or rather on young life insurance companies, although the author very cautiously endeavored to shelter himself behind his reference to the insurance act. It appears to me that the only object of the article is to, if possible, shake the foundations of young companies by deliberately creating a disturbance among their shareholders; also, perhaps, to prevent the organization of other companies.

"Mr. J. Burtt Morgan, the chairman of the meeting, gave the hearers of the address no opportunity to respond or to ask questions, and so, Mr. President, I write you in this way to know if it is usual at conventions of life underwriters to permit the introduction of matter so foreign, so contentious, and fraught with possibilities of so great harm to many members of the life underwriters' association. I feel, under the circumstances, that Mr. Ferguson should be publicly asked to explain his object in introducing such a subject, if not for the express purpose I have mentioned, so that I may tender an apology for so greatly misunderstanding and misinterpreting him.

"It is, of course, needless for me to say that I do not agree with his conclusions—neither do I share these views alone.

"Mr. Ferguson has printed his article and it has become public property, so I have handed a copy of this letter to the press."

MONTREAL TRAMWAYS REPORT

The annual report of the Montreal Tramways Company covering the year ended June 30th, which was mailed to shareholders this week, shows a marked improvement over last year, gross earnings for the year increasing $1,115,733, while the net shows an improvement of $221,015.

While the gross earnings show a satisfactory increase the operating expenses have increased in greater proportion, the ratio of operating expenses to passenger earnings being 62.40 per cent. against 57.35 per cent. last year.

The gross passenger earnings amounted to $7,374,295.79 this year compared with $6,443,309.66 last year, an increase of $930,986.13 or 14.45 per cent., while the operating expenses increased $894,718.80 or 24.14 per cent. The ratio of operating expenses to passenger earnings is 62.40 per cent. this year, compared with 57.53 per cent. last year.

The sum of $567,082 was charged to contingent renewal account during the year, representing expenditures made for special renewals, compared with $313,575.99 last year.

LIFE INSURANCE IN EDUCATIONAL INSTITUTIONS

What is Being Done—Suggestions of Professor Boggs, University of British Columbia

The teaching of life insurance in our higher institutions of learning was the subject of a thoughtful address by Professor Theodore Boggs, of the University of British Columbia, at the convention of life underwriters at Winnipeg last week. In answering a hypothetical objection as to whether the need or demand for instruction in life insurance is sufficiently real to justify its establishment—whether such instruction would appeal to a sufficiently large group, Prof. Boggs quoted extracts from an address delivered by Dr. S. S. Huebner, of the University of Pennsylvania, before the New York Life Underwriters Association on February 24th, 1915. "Few institutions so vitally affect the average family," Dr. Huebner declared, "the very basis of our whole social structure, as life insurance. . . . . . Life insurance should constitute today a substantial item in every family budget, just like food, clothing, rent and fuel. It is the only sure means of eliminating one of life's greatest gambles. It alone enables a breadwinner to capitalize his value as such for the benefit of those who depend upon that bread. It should do more than any other institution to eliminate the curse of worry. Not only is it a powerful agency for inculcating thrift, but even for the person who can save it furnishes the only certain method of hedging against the possibility of the saving period being cut short."

Appreciation of Principles.

Thus the public, he adds, through an intelligent appreciation of the principles of insurance may "protect itself against the loss and misery occasioned by the premature death or improvidence of its productive members. . . . . For, he who does not insure gambles with the greatest of all chances and if a loser, makes those dearest to him pay the forfeit. That the gamble is a risky one is easily demonstrated by any mortality table. Moreover, the roseate views which so many have concerning their intention and ability to accumulate should be tempered by a frank statement of the facts as they actually exist."

"Thus it is asserted" said Professor Boggs, "that in general over eighty per cent. of the adults of the country leave no estate at all and that about one-third of the widows in the country lack the necessities, and 90 per cent. the comforts of life. In short, few subjects in a university curriculum impinge more directly than life insurance on the everyday family and business life of practicaly all members of the community.

"That our Canadian universities do not in general provide instruction, in the regular Arts course, in the principles of insurance," continued Professor Boggs, "will at once be apparent upon a perusal of their calendars. The one notable exception to the rule is the University of Toronto, which makes it possible for candidates for the Degree of Bachelor of Arts to elect courses in actuarial science which cover the field of insurance. To be sure, in justice, mention must also be made of the single course given both at the University of Alberta, and the University of Saskatchewan on the Mathematics of Investments, in which reference is made to insurance annuities.

"Likewise in the British universities it is substantially true that in the course of study leading up to the B.A. degree there is little if any attention paid to insurance. Although the same in general is the case with the universities in the United States there is evidently an increasing tendency to provide elective courses in insurance in the regular Arts curriculum. Of those which already have done so, probably the most notable are the Universities of Pennsylvania, Yale, Cornell, Chicago, Minnesota, Wisconsin and Illinois. According to a compilation prepared in 1910 it appears that of the 550 colleges and universities which were canvassed in the United States only 33 offered special courses in insurance. These in general comprised the larger institutions. By 1913, the number offering such courses had increased to nearly fifty. In addition there were approximately forty other institutions which confined such instruction to their law departments.

Instruction in Insurance

Many universities, however, which do not provide instruction in insurance in the regular Arts course do at the same time furnish such instruction in their schools of commerce and business administration. In such cases the courses in insurance are normally open only to students enrolled in the school of commerce and finance. Prominent among the universities of this class are McGill in our country, Birmingham, Manchester,

Income at the rate of 5% per annum is paid on fixed dates half-yearly. The means used to safeguard still further this conservative channel of investment are described in our Booklet, mailed on request.

National Trust Company
Limited

18-22 KING STREET EAST, TORONTO

London and Leeds in England, and in the United States, Harvard and New York University.

"The advanced and highly technical courses in insurance, designed for students intending to enter the career of insurance, should quite properly be offered in the university school of commerce, which, as already mentioned, is a professional school of business.

"Inasmuch as our Canadian universities, save for McGill and Toronto, have not as yet established special courses in insurance it would appear that this lack might abundantly be met through the appointment of a peripatetic lecturer who, with great advantage to the universities and general public alike, might devote successively one month to each of the other leading institutions. Through a course of twenty lectures, for example, at each of the universities, thus delivered by an expert in the field of insurance, instruction in this science would be made available to a large number of students. This suggestion, first voiced probably by President Westbrook of the University of British Columbia, if acted upon by the Life Underwriters Association of Canada would bring in its wake much benefit to all concerned.

In Canadian Universities.

"Pending the establishment in our Canadian universities of professional schools of business administration, which in itself would strengthen the view that the career of business is essentially a profession, it is highly desirable, in the interests of public enlightenment and welfare, that instruction in life insurance be provided in our institutions of learning."

WINNIPEG MAYOR'S VIEWS OF LIFE INSURANCE

Mayor Davidson, Winnipeg.

"The handsomest compliment and present for a wife is wrapped up in a policy of life insurance on which the payments have been kept up. A woman's husband was dying, and a friend inquired about her financial position. She had an interest in a house, and also a life insurance policy. That did not take the place of her husband or compensate her for the loss, but it lifted a large burden off her shoulders. A marriage license and a life insurance policy should go together. Every man accepts the responsibility for his wife and children while they are living, but as a rule he neglects to provide for them properly when he is gone.

"Men are careful to insure their property, but neglect life insurance; yet, when we stop to consider, there is no comparison between the two, because a building *may* burn, a life *must* die. When a building is burning, men ask the question, 'Is he insured?' Every day we see funerals on the street, yet no one asks, 'Did he carry insurance?' There are three things a man should know when he is dying. (1) Is he at peace with God? (2) It is satisfactory to know that he has helped the betterment of humanity. (3) That he knows he has made provision for his family to the best of his ability. Provision by life insurance for his loved ones is the most practical form of applied Christianity. A poor man's best investment is an insurance policy. That home has a strong anchor which can boast of such a document amongst its treasures."—Mayor Davidson, addressing the Life Underwriters' Association of Canada at Winnipeg, August 22nd, 1917. *(Photo by British & Colonial Press.)*

WOMAN: FOUR-HORSE PLOW: INSURANCE

How a Joint Life Insurance Policy Was Written on the Saskatchewan Plains

Here is an interesting experience related by Mr. M. B. Farr, the Monarch Life Insurance Company's representative at Regina. The story was told at the company's convention dinner at the Manitoba Club, Winnipeg, last week, and the historian was one of the insurance men concerned in the episode.

A general life insurance agent was visiting his local agent in Saskatchewan, and while motoring along the road, suggested to the local agent that the two interview a man engaged in removing the stones from a field that was in the process of being summer-fallowed.

They walked across about one hundred yards of the plowed ground and came upon a married man, small in stature. They well knew before they approached their man, who was the boss around that home but were surprised when the man's wife appeared on the scene, driving a four-horse outfit pulling a two-furrow gang plow. Her first greeting, with a gasp, was, "O Lord, some more insurance men." She was thanked for the compliment, and due appreciation of her industry was expressed.

Husband Would Not Insure.

She said, "Well, you know life insurance is a good thing, and I believe in it, but John will not take it out. He thinks that it will make him die and that I will get another man. John used to be an old bachelor out here, and he had a friend down in Ontario who wrote and told him that he knew of a girl that would suit him well; that was me. So John came to Ontario, and I guess it was a case of love at first sight. We got married and came out to this old shack, but John is jealous of me, and I would like to see him take out life insurance. I am only 34 and John is 53, so he knows that he will die first and that is the reason he does not want the insurance. He thinks I ought to take out a policy."

The agent agreed because, looking at her from the insurance company's viewpoint, we thought that if poor John did not die a natural death in the very near future an inquest would be required.

John fell heartily in accord with the policy on his wife, so the husband and wife policy was suggested. We knew who handled the purse in that home. Consequently it did not appear there was much money around that plow, so the general agent suggested that he would motor up to the house and the local agent would walk up the field and chat with them, wishing to make sure that they would find their way to the house.

Medical Examination and Cash.

After waiting a considerable time at the house the general agent began to investigate as to what had happened to the local agent and his esteemed prospects. He found that the plow had been turned around at the end of the field and was on its way back. He lost no time in getting through the barb wire fence and in giving the local agent assistance immediately. At last the wife consented to sign the application on the distinct understanding that if she did not pass the medical examination John would go ahead with his insurance just the same. She made John give her his word of honor that he would not flunk. The medical examinations were made in due course and we regret to say that our lady applicant felt that the doctor had asked her many unnecessary and impertinent questions, and had she known that he was going to be "so rude," she never would have consented to take out the policy!

The agents, unfortunately, could not obtain a cash settlement at the time, and consequently the policy had to be issued C. O. D. When the time came to deliver the policy the lady had changed her mind. She said that they did not have the money, but poor John divulged a secret by stating that the money was in his wife's name in a savings account at the bank. A counter cheque was duly presented, which she hesitated to sign, stating that she would send in the money the first time she was in town. After considerable persuasion she was induced to sign the cheque and the transaction had been duly consummated.

It is expected that the newly married couple will live happy ever after

Three and a quarter billion feet of wood are taken from Canada's forests every year to meet the commercial demand for lumber.

July Bank Statement Records Heavy Deposits

Total Deposits in Canadian Banks at the end of July were $1,380,000,000—Call Loans Abroad are 14% Lower than a Year Ago, while Current Loans at Home are 12% Higher—Loans to Municipalities again Increased—Low Level of Call Loans in Canada Reflects Inactivity in Stocks.

	July, 1916.	June, 1917.	July, 1917.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$431,958,188	$449,689,670	$450,849,356	+ 4.3	+ .3
Deposits after notice	789,363,919	900,510,552	929,442,340	+ 17.7	+ 3.2
Current loans in Canada	740,040,741	839,355,782	829,560,700	+ 12.1	— 1.1
Current loans elsewhere	62,356,259	93,150,083	90,253,882	+ 45.1	— 3.2
Loans to municipalities	42,385,096	42,757,673	43,989,207	+ 2.3	+ 2.3
Call loans in Canada	87,355,648	76,085,220	71,376,788	— 18.3	— 6.5
Call loans elsewhere	177,121,733	159,309,133	151,875,676	— 14.6	— 5
Circulation	129,225,475	157,886,938	161,762,871	+ 24.8	+ 2.5

The above are the principal changes in the statement of the chartered banks for July. The figures show comparatively few important differences compared with those of June. Call loans in Canada showed a decrease of 6.5 per cent., and that is one of the heaviest changes during the month. Demand and notice deposits both increased in July, the latter account having gained $29,000,000 or 3.2 per cent. Current loans in Canada and abroad were slightly less and loans to municipalities were increased about $1,000,000. Call loans abroad and in Canada in July were less than in the previous month. Circulation increased 2.5 per cent.

Domestic deposits for the past thirteen months are as follow:—

	Deposits payable on demand.	Deposits payable after notice.
1916—July	$431,958,188	$789,363,919
August	443,317,275	806,774,687
September	454,148,049	816,374,171
October	489,230,234	814,297,404
November	459,277,454	836,593,269
December	458,208,417	845,006,717
1917—January	427,308,526	864,163,344
February	430,331,801	880,456,637
March	448,151,528	888,745,698
April	471,312,285	874,948,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552
July	450,849,356	929,442,340

The increase of $29,000,000 in after notice deposits is a gratifying feature of the bank statement. It is to be hoped that during the next few months the saving accounts will be materially strengthened by actual savings and surplus funds which may be used late this year for subscription to the fourth domestic war loan. Demand deposits are about $1,000,000 greater than a month ago, but are considerably less than in several months of the past year.

The course of the deposits account during the past five years is shown in the following table:—

July.	On demand.	After notice.	Total.
1913	$356,585,196	$621,347,388	$ 977,932,583
1914	346,854,051	671,214,125	1,018,068,176
1915	340,950,215	691,731,719	1,032,681,934
1916	431,958,188	789,363,919	1,221,322,107
1917	450,849,356	929,442,340	1,380,291,696

The trend of the bank loans for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1916—July	$740,040,741	$87,355,648
August	739,938,513	86,351,216
September	752,545,756	88,145,851
October	774,928,222	90,412,023
November	813,791,047	89,305,370
December	820,378,557	82,569,983
1917—January	806,479,147	79,737,064
February	813,302,717	78,686,535
March	843,054,466	76,478,708
April	880,523,807	82,737,417
May	844,890,589	78,514,798
June	839,355,782	76,085,220
July	829,560,700	71,376,788

Current loans in Canada were slightly less than in June and were considerably lower than in the spring of the year. In April, for instance, these loans totalled $880,000,000. Last month, they were $829,000,000. This may be partly accounted for by the facts that loans to munition manufacturers have been considerably smaller; that a number of industrial corporations are in sufficient funds without depending as largely as previously on bank loans; and that the financing of the crop movement has only just commenced. Call loans in Canada were $5,000,000 less than in June, and $19,000,000 less than in October last. This account reflects the lack of activity in the stock markets.

The following table shows the course of the principal loan accounts during recent years:—

July.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913	$858,429,069	$42,960,513	$67,991,255	$ 89,266,235
1914	840,198,625	48,013,052	68,441,816	125,545,287
1915	758,340,517	41,784,633	71,168,233	117,821,174
1916	740,040,741	62,356,259	87,355,648	176,121,733
1917	829,560,700	90,253,882	71,376,788	151,875,676

Current loans in Canada in July were greater than during July of the previous two years. Current loans abroad were double the amount of four years ago, showing an increase of over 30 per cent. above the total of July, 1916. The enlargement of this account is probably due to special transactions on account of the war. Call loans abroad stood at a high point, $151,000,000, but were 14 per cent. less than they were a year ago.

The course of call loans abroad for the period beginning two months before the declaration of war is of interest and is shown in the following table, compiled by *The Monetary Times*:—

	1914.	1915.	1916.	1917.
January	....	$ 85,706,641	$134,248,552	$155,747,476
February	....	89,890,982	139,138,651	162,344,556
March	....	101,938,685	141,889,989	161,616,735
April	....	121,522,971	147,146,443	159,156,054
May	....	136,098,835	163,400,659	168,692,675
June	$137,120,167	124,604,875	182,757,015	159,309,133
July	125,545,287	117,821,174	177,121,733	151,875,676
August	96,495,473	120,607,677	171,380,353	....
September.	89,521,859	135,108,412	173,877,586	....
October	81,201,671	120,681,624	189,346,216	....
November.	74,459,643	135,530,562	183,250,389	....
December.	85,012,964	137,157,869	173,878,134	....

Call loans abroad are likely to be decreased as funds are brought back from New York to assist the financing of the crop movement.

Satisfactory reports were presented to the life underwriters' convention by the following: Executive committee (chairman, Mr. G. E. Williams; general secretary, Mr. J. H. Castle Graham); education committee (chairman, Mr. A. J. Meiklejohn); financial committee (chairman, Mr. J. B. Hall); legislative committee (chairman, Mr. A. S. Wickware); transportation committee (chairman, Mr. T. B. Parkinson); essay committee (chairman, Mr. Wm. May, jr.); grievance committee (chairman, Mr. E. R. Machum); Life Underwriters' News report (Mr. J. H. Castle Graham, managing editor).

Of the deposit in Central Gold Reserves $14,710,000 is in gold coin: the balance is in Dominion Notes.

MONARCH LIFE CONVENTION

A number of the field force of the Monarch Life Assurance Company, Winnipeg, held a convention in that city on Monday and Tuesday last week. One of the sessions was given up to seven-minute talks as follows: "Cash Premiums and How to Secure Them," Mr. Ellis; "New Territory and How to Organize It," Mr. Brydon; "How to Secure New Agents," Mr. Davis; "How Our Branch Managers or Superintendents can Secure Personal Business in addition to Their Other Duties," Mr. Crysdale; "How to Meet Competition," Mr. Castle; "Co-operative Collection Service," Mr. Romig; "How to Sell Life Assurance to Farmers," Mr. Lee; "Life Assurance Business as a Field of Opportunity," Mr. Farr; "Co-operation," Mr. Splatt; "How to Use the Binding Receipt," Mr. Cornell; "Investment of Life Insurance Funds," Mr. Telfer; "The Banker as a Life Insurance Agent," Mr. Simpson; "The Monarch Maximum Twenty-Payment Life Policy," Mr. Buchanan; "The Fire and Accident Man as a Life Insurance Agent," Mr. Philpot; "The Monarch Accelerative Endowment Policy," "War Clauses," "Re-Assurance and Optional Policies," "The Importance of Forms Nos. 30 and 40," Mr. Macfarlane.

A banquet was held at the Manitoba Club on Tuesday evening, presided over by Mr. Mathieson, a director of the company. Mr. J. W. W. Stewart, managing director, and several other directors and head office officials were also present, with about fifty of the field force.

The Canadian Pacific Railway uses 50,000 telegraph poles every year and over 60,000,000 feet of lumber.

Dominion Government---July, 1917

CANVASSING FOR LIFE INSURANCE

At the Winnipeg Life Underwriters' convention three teams entered a competition for the best actual canvass for life insurance. One man was the prospect, the other had to sell him a life insurance policy. The time limit was five minutes. Mr. E. J. L'Esperance, Imperial Life, Montreal, first canvassed Mr. Wintemute, Manufacturers Life, Calgary, to start the ball rolling. The entries were: (1) Mr. Archibald, Canada Life, Sydney, and Mr. W. G. Keddie, Canada Life, Ottawa. (2) Mr. Fraser, Great-West Life, Saskatoon, and Mr. Campbell, Saskatoon. (3) Mr. Crawley, Great-West Life, Saskatoon, and Mr. Petty, Great-West Life.

Cash prizes of $20 and $15 were offered by Mr. E. Morwick, Mutual Life, Hamilton, and Mr. George Hunt, Imperial Life, Toronto, respectively. The competition would have proved far more practical and interesting had the time limit been longer and had the salesman to canvass someone other than another life insurance salesman.

The Saskatchewan insurance department is preparing a bulletin on fire prevention for use in public schools.

"We never know about the crop in the West until the money is in the bank. The crops of the prairie provinces will be better than we anticipated a few weeks ago. Conditions have materially improved recently. From the money standpoint, it will have a value about the same as last year."—Mr. C. W. Rowley, manager, Canadian Bank of Commerce, Winnipeg, in a statement to *The Monetary Times.*

FARMERS NEED LIFE INSURANCE

It Helps Their Credit at the Bank—Insurance for Sons and Daughters

Life insurance for the farmer was the subject of an interesting address at the life underwriters' convention, Winnipeg, last week, by Mr. P. A. Wintemute, (Manufacturers Life), Calgary. "Possibly," he said, "the farmer has more need for life insurance than any other individual. I am speaking of farmers in a general class, including every man who tills the soil for gain, be it fifty acres in Ontario, or a section, or ten sections, in Western Canada. The average farmer to-day, particularly the grain grower, has more at stake in each year's crop than the average business man; is a greater gambler and hence in event of his premature death, if his estate is going to be in the shape he had hoped to leave it, he should have life insurance.

P. A. Wintemute, Calgary.

"Records of probates prove that reductions to farmers' estates are larger than to the estates of other lines of business, more particularly those of a non-speculative nature, mostly caused from the want of ready money at the time of the owner's decease.

"Many who have had any experience in selling to farmers can recall more than one case where he has made his best effort to sell a policy, using all the arguments at his command, including the fact of the need of provision for ready cash in event of premature death, only to be met with the proverbial, 'I can put that money in a steer and make more;' go away without making the sale, hoping that possibly you have dropped some little word that will cause him to think, and reconsider your proposition on your next call.

Case of Bill Jones.

"In the country, calls cannot be as regular as in the towns and cities. However, one does eventually get to the district again, making enquiries perhaps of the 'local' agent or of some friend concerning several men whom you have canvassed, and find that Bill Jones—he of the 'put-it-in-the-steer' idea—has succumbed to the ravages of typhoid. The doctor's bill was large, and as he had a reputation for 'good pay,' a nurse was provided at $30 per week. His wife or his wife's folk thought a lot of Bill, and they needs must provide a high-priced funeral. Bill Jones was not a second-rate farmer. He was a 'rustler,' and certainly bid fair to become one of the leading men in the district; in fact, was looked up to by his neighbors.

"You have, no doubt, asked about the wife, and family if there happened to be any, and learn that they are living with the wife's folk. You learn further that he had put the last few dollars which he had in the bank, into calves; had mortgaged his homestead to buy another quarter for pasture. There was interest outstanding, and no ready money. Of course, something can be sold, but this takes time, and, in order to raise cash, very often means sacrifice.

"If this man had purchased even enough life insurance to have taken care of the immediate obligations, how much better position his estate would have been in; in fact, the chattels, and possibly, realty, instead of being sold at a sacrifice could have been held until prices advanced, or until stock had matured, all of which would have gone a long way towards bringing Bill Jones' estate up to what he no doubt hoped to bring it by persistent and continued effort.

"Progressive farmers are invariably adding to their holdings, either in land, or cattle, or buildings, and are not always in a position to pay cash, and hence resort to loans, secured by mortgages in most cases, and it is surely the province of a wise man to have at least enough life insurance to cover these obligations, and leave the estate intact.

Credit is Helped.

"In arranging a line of credit with their bankers, farmers are learning that such can be considerably lengthened if they have life insurance, and, while the banks do not always ask for even a temporary assignment of the insurance, they consider the man with insurance,—even if the same is made payable to a stated beneficiary,—a better man to do business with than the man without, as, in the event of the decease of the borrower, instead of their having to ask that some part of the estate, regardless of opportunity, be sold to satisfy their claims, there are funds to take care of the same.

"The farmer who has become more or less 'well-to-do,' and has, say, several sons, is realizing more than ever that an endowment policy placed on himself, to mature at an age when his boys are wanting to start on their own account, provides funds to buy that fifty acres, or the quarter section nearby, and thus keeps the family circle inviolate; and could we men be engaged in any finer work than selling endowment policies to that end!

"A great many farmers, too, are seeing the need and advisability of placing insurance on their boys as they attain the age of, say, fifteen or sixteen—mostly twenty-pay life insurance policies are bought in such cases. The father invariably pays one or two premiums, and then puts the obligation of continuing the insurance up to the boy. This encourages thrift on the part of the boy. These boys, too, as they become of age, and get running farms, or doing business on their own account, make a fertile field for increased insurance.

"Six years ago I encouraged the father of seven sons to place $1,000 twenty-pay life insurance policies on each, of two of them. Since then, four others have attained the age of fifteen, and have been written, and there is still one to secure when he attains that age. In the meantime, the first two are now farming on their own account, and one man has raised his policy to $5,000, and the other increased his by $5,000. If they live long enough and continue to prosper, I expect that they will each eventually have at least $10,000 of life insurance with our company.

Insurance for Farmers' Daughters.

"Most of us are aware of the fact that even yet some farmers' daughters are working alongside of their brothers, early and late, doing their part to help pay for the old homestead, or buy more land, only to find that when the day comes for them to leave home and parents, to join in marital felicity with a neighbor's son, perhaps she receives the munificent gift of old 'Bess,' the old cow that always was hard to milk, and when father eventually succumbs to the call of 'time,' she has been forgotten completely in the will, or, at the most receiving $100, the boys of the family dividing the land and stock amongst them.

"Thanks to the persistency of the life insurance salesman, we now find a great many farmers placing insurance on their lives for their daughters. What better dower could be provided? In encouraging him to buy an endowment policy one is safeguarding the daughter's interest to the best advantage. Farmers, too, who are in the 'better-off' class, and possibly have some life insurance, are now purchasing to some extent [illegible] [illegible] policies for their daughters. This is a field for cultivation."

MAN IN GRAVE; WIDOW WITH MONEY

How Monthly Income Life Insurance Prevents Disastrous Investments of Women

The advantages of the monthly income form of life insurance policy were discussed at the life underwriters' convention last week by Mr. E. J. L'Esperance, manager of the Montreal agency of the Imperial Life Assurance Company. "This form of contract," he said, "is the usual contract of insurance, payable over a period instead of in a lump sum. When I am selling this to the business man, I frequently ask him how he would like to put his wife on the pay roll when he goes off the pay roll.

"Here is an illustration of what an income policy can do. Suppose one were to deposit $807 in a bank. It would draw interest at 3 per cent. This is what an insurance company can do with a deposit of $807. At your death it will pay your wife, $100 a month for the term of her life, or $1,200 a year. In twenty years this will amount to $24,000. To this will be added dividends which, based on the dividends of last year, will be $8,280, making a total of $32,280. Furthermore, the chances are the wife may expect to live eight years longer, which means the company will pay her $9,600 more, plus dividends, making a total of $43,508, in all probability, if you died to-morrow. At the end of twenty years, if your family has grown up and has been provided for, we can give you back $16,000, or all you have paid in.

E. J. L'Esperance, Montreal.

Week to Week Basis.

"Income insurance is a good thing because most wives and most men live on a week to week basis. I maintain it is wrong to leave a lump sum to a woman unless you know what she is going to do with it. If we live on a week to week basis, is it not a nice thing to arrange to leave the insurance money in the same way for the period after the breadwinner has gone?

"A lot of widows are fleeced out of money by unscrupulous scoundrels, money which has been saved perhaps at great sacrifice and invested in life insurance by a careful man. A man should provide for his wife knowing exactly what her income will be after his death, when and how it will be paid. Some women gratify previously unfilled wants with lump sum payments of life insurance. Monthly income insurance does away with that contingency. The temptation of the widow is to follow fool advice in regard to the investment of her insurance money.

"When I offer monthly income insurance to a man, I ask him, 'What do you want, a room income, a flat income, or a home income?' In other words, do you want your wife to have an income of $10, $50 or $100 a month?

"Some men say they rely upon a trust company to see that their insurance funds are properly invested. That is all right, but I [illegible] that the average income from invested trust funds is 4 per cent. The average income on funds placed with participating life insurance companies is 6 per cent. Can the man who insures afford to lose that two per cent.? Other men rely upon trustees to look after their estate. The trustee is not a good proposition. All sorts of things may happen to make his choice of investments disastrous to the widow. He may die and another trustee may have to be appointed.

Insurance and Automobiles.

"Real estate is a mighty good investment, but it cannot be relied upon to give the widow a stable income. I know of a widow who was left property valued at $23,000. Her equity was $14,000. When the war came, she could not get the property rented for sufficient to carry it. She had to realize, sell, and obtained only $6,000 for her $14,000 equity.

"Here is another case. A woman was left $8,000 life insurance. The first thing she did with the money was to buy a $3,000 automobile. You never can tell what a woman will do with money until she is put to the test. Then it is too late; he is in his grave, and she has got the money.

"Another point in favor of these income policies is that a man is not so apt to raise a loan on his life insurance contract. He thinks seriously before he will impair by a loan the income his wife will have after his death.

"A bright woman was left a lot of money. To-day she is poor because she loaned her insurance money to her relations. I know of another woman who was left $80,000. She is living in Switzerland now because it is cheaper to live there.

May Marry Wrong Man.

"A widow may remarry and get the wrong kind of man. He may take her lump sum insurance. If, however, it is monthly income, he may possibly get the first cheque from her, but I guarantee he will not get another one.

"Give a man all the insurance he needs. Few men can carry too much. I went in to sell insurance to a man who wanted $5,000 of insurance recently. I put in front of him an application for $50,000 of insurance. He said, 'How much insurance will your company carry on my life?' I told him. 'Well,' he replied, 'I'm sorry, because you could have written me for another $50,000.' I wired to my head office in Toronto and next morning I had the second policy for $50,000. Placing it on his desk I said, 'Now I've called your bluff; here is the policy for the other $50,000;' and he signed the application. Not long ago I met that man and he said: 'I cannot get insurance now, because I cannot pass the doctor. You knew when you sold me $100,000 of insurance some time ago, what I could have taken. Why did you not sell me enough?'

"Behind all this money we are selling for future delivery, what is there? There is far more than selling money to purchase necessities. We are selling education to the children, a comfortable home for the widow and the family, coal and food, and so on."

Sell Insurance by Direct Method.

Mr. L'Esperance then gave some useful pointers to the insurance salesmen as to how to sell insurance. He used, he said, the direct method of selling. He did not get letters of introduction but sold insurance just as a man would sell coal or shoes. "The coal man does not carry letters of introduction to his prospective customer," said Mr. L'Esperance. He thought that one of the most important things was first to make the prospect want what one was selling. That was especially important in the case of insurance.

CUPS AND PRIZES FOR LIFE INSURANCE MEN

The Brandon Life Underwriters' Association won the totem pole offered by Mr. W. Burtt Morgan, president of the Dominion Association, for the greatest percentage increase in membership during the past year, as noted elsewhere in this issue.

The J. R. Reid cup for membership was awarded to the Calgary association.

The North American Life cup, presented by Mr. L. Goldman, for the best essay on salesmanship, was won by Mr. D. H. Shortell, Confederation Life, Montreal.

For the best two essays on insurance topics, Mr. J. E. Matthews, North American Life, Brandon, and Mr. George McBroom, London Life, London, were awarded cups and cash prizes.

GROUP INSURANCE IN CANADA

It Will Probably Be Written Soon — Life Insurance for Manufacturers

"While 1916 was the greatest in the history of life insurance in the United States, so far as the writing of new business is concerned, business written in Canada exceeded that of 1915, and nearly reached the total of our greatest life insurance year, 1913," said Mr. T. G. McConkey, superintendent of agencies, Canada Life Assurance Company, at the underwriters' banquet at Winnipeg last week. "In the two countries new business of 1916 totalled $4,500,000. Of this $231,000,000 was written in Canada. The total business in force in Canada at the end of last year was $1,402,000,000, of which $900,000,000 is carried by Canadian companies.

"We find, however," continued Mr. McConkey, "in getting down to a basis of insurance in force per capita, we are a long way behind the United States. In that country the amount of insurance protection per capita at the end of last year was $227, while in Canada is was only $143.

War Risks and Claims.

"The companies of this continent have kept abreast of the times and the new ideas introduced or developed have been very important. While co-operative advertising has not been introduced, the present advertising of our life companies reflects in a large measure the educational idea underlying co-operative advertising. There has also been a large measure of co-operation by the Canadian companies to secure uniformity in connection with their practice on war risks. The United States companies, not having had the same experience, have not as yet adopted any uniform extras or limits.

T. G. McConkey, Toronto.

"While war claims have been somewhat heavy, there is no occasion for unrest. The assets of the companies in Canada are $418,667,000. War claims paid amount to less than $8,000,000.

"Monthly income policies and total disability benefits have become more popular. The companies have done their share, and it is up to you, as members of the association, to put Canada on at least as good a footing as the United States, regarding our per capita insurance.

"With our improved conditions this ought not to be a difficult task. In 1913 our trade balance was three hundred million dollars against us. At the end of the last fiscal year it was two hundred and forty-nine million dollars in our favor. In 1869 our wheat crop was 17,000,000 bushels, in 1916 it was 220,000,000 bushels. Our dairy production for the same period was increased from 74,000,000 lbs. to 416,000,000 lbs., with gains in about the same proportion for barley, oats, etc. Our population now stands at nearly 8,000,000.

"With this large increase in food products we have at the present time a large increase in prices, improving to a great extent the financial position of the farmer, a point not to be overlooked in looking for prospects. This is a field promising great results, and well worth cultivating.

Life insurance has lately found great favor among the large manufacturing and industrial concerns. Where certain men are responsible for the carrying on of the work, who are essential to the success of a concern, large policies are carried by the corporation. Employers of labor are now favoring life insurance for their employees and usually carry it on a co-operative basis. Group insurance is becoming very popular in the United States. For this purpose, and while up to the present time our own government has not allowed its introduction here, the matter is now under consideration and likely to be passed at an early date. Business and financial men are taking large blocks of insurance to cover succession duties and to create reserves.

"I do not propose to discuss the failings of our field men, but will content myself with a quotation from the book of Proverbs: 'And about the eleventh hour he went out and found other insurance agents standing idle, and saith unto them, "Why stand ye here all the day idle?" They saith unto him, "Because we are working on advances!"'

Monthly Payment System.

"We as insurance men know that a large percentage of the money paid to beneficiaries of policyholders is either dissipated, or lost through bad investments. Many a widow receiving $4,000 or $5,000 is, for the first time in her life asked to handle what seems to her an enormous sum. Often, through ignorance, she lives for a short time on the principal. Others seek advice from incompetent sources and lose their all; while the monthly income overcomes this objection.

"I have in mind more particularly business in force prior to the adoption of the monthly payment system—and whether the amount is $1,000 or $10,000, I think that you as field men can be of invaluable service to widows and orphans by cheerfully giving them advice as to how to invest their money—pointing out what probable income they can derive, and on what basis they must figure for life, or for a shorter term of years, especially where there are dependent children. Unfortunately the average man cannot carry sufficient insurance to provide ample income for his dependants. Far better for the widow so placed to realize from the start that she must augment her income, rather than spend her all during the first few years. I have in mind a Toronto case where a widow upon receiving proceeds of a $1,000 policy, immediately spent a little more than half this amount to purchase a motor car.

Uniformity in Insurance Methods.

"A great deal has been said about welcoming the United States as our ally in the present European war which is rightly classed as a War of Democracy against Autocracy, or the right to live, against the desire of power. As veterans in the war we greet them. They will be of great assistance for political and economical reasons. The life insurance companies of the two countries have to some extent worked together in the past; and we as insurance men cannot but hope, now that we are brothers-in-arms fighting for freedom, it will also bring us as companies closer together, that we in Canada may benefit by their larger experience and go further than heretofore in adopting uniform methods and practices for the general betterment of the life insurance business."

HAIL INSURANCE IN SASKATCHEWAN

The stock companies' hail insurance premiums in Saskatchewan this year will probably total $2,000,000. The loss ratio will not likely exceed 20 per cent., so Mr. A. E. Fisher, provincial insurance superintendent, tells *The Monetary Times.*

SASKATCHEWAN WILL REGULATE GASOLINE SALES

The Saskatchewan insurance department are working upon the regulations regarding the sale of inflammable fluids. The inspection of installation and means of disposition will be handled by the local assistants to the provincial fire commissioner. The regulations will provide that inflammable liquids shall be sold only in red containers. The regulations, while not as yet promulgated, have been discussed with the oil companies, the Retail Merchants' Association, and the Western Canada Fire Underwriters' Association. All have approved of the government's proposals.

TO WHOM SHALL WE SELL INSURANCE?

Life Insurance Salesmen Discuss the Best Means to Enlarge Their Clientele

Addressing the life underwriters in convention at Winnipeg last week regarding the enlargement of the life insurance salesman's clientele, Mr. F. G. Hassard, Dominion Life, Toronto, said that one way to secure prospects was by noting the family connections of the client just written and making a point of calling on his brothers and sisters; also suggesting to the man that he carry some insurance on his wife, or if he be a father, that maybe it would be advisable to have some insurance on his son. "The request for the name of friends for reference," he continued, "often proves a source of new prospects, if not immediate for future business.

"Every healthy male who has reached the age of discretion, and is earning his own living, whether he has dependants or not, is a prospect for life insurance. It therefore behoves every life underwriter to extend his acquaintance as much as possible. Some men shrink from meeting strangers. Personally I take advantage of every opportunity of making new acquaintances. Not over two months ago I met an individual, being introduced by a relative. Very soon the question was asked: 'You are in the insurance business?' The affirmative reply brought forth the remark: 'Well, I have been thinking of taking some insurance.' In a few minutes the application was signed and an appointment made with the examining physician.

"An employer of a considerable staff gives his employees a cash bonus each year, the amount being determined by the net profits of the company. Would it not be a good idea to suggest to that employer that he use part of that bonus this year to start his employees in the path of thrift by placing a small policy of insurance on all who are insurable and do not now carry an adequate amount.

Duty to Competitors.

"This month I closed a piece of business with three other companies in competition and I was the last man on the ground. My client after signing the application volunteered to tell me why I got the business. He said he did not believe I had any better proposition than some of the others, but because I had not criticized the others when he enquired about them, but had remarked they were all good and then passed on to show my goods, he decided it was more desirable to do business with a man who had a good word to say about his competitor than with any one of those who declared 'that their proposition had all others backed off the map.'

"The announcement of the engagement or marriage of a man brings to him, as a rule, many representatives of 'the best insurance proposition on earth.' The time to solicit business from the young man is before he has committed himself to the expense of marriage and the fitting up of a home. There are exceptions to every rule.

"The announcement of a promotion of a prominent business man in his business brings to him the propositions of many representatives not only of insurance companies but of every kind of gold brick investment. For instance, I have a friend who is in the employ of a large public utility corporation. When it was announced that he had been given the distinction of being called manager, he told me he must have had the representative of every insurance company in his city call on him. I happen to know that the formality of calling him manager did not bring with it any change in his duties or any immediate increase in salary.

"Beware of depending too much on your relatives for business. Such a procedure often proves a cause of misunderstanding and disappointment that takes years to eradicate.

How Service Counted.

"Soon after entering the profession I called on a business acquaintance who in talking of his insurance which for him was absolutely inadequate, said he had a twenty-payment life policy at a very low rate. After some discussion I concluded the agent who sold him that policy had told him that if he allowed his profits to accumulate he would have sufficient profits in twenty years to give him a paid-up insurance equal to the face of the policy. I took the trouble to not only explain to him his own contract, but I also gave him an insight into life insurance that he never had before. I did not knock the other company nor the agent who sold the contract, for I have a high regard for both the agent and the company. The result was that while my prospect was more satisfied with his contract than when I started with him, and had intended placing more business with the original company, I secured his application for $10,000. There are two points I wish to emphasize from the above illustration. First, it pays to go out of your way to render some small service. Second, it pays to keep closely in touch with your policyholders. The agent to whom I referred might just as well have had $25,000 on that client as only the original $5,000 which he secured."

Thirty Dollars for a Smile.

Following Mr. Hassard's remarks, Mr. W. G. Keddie, Ottawa, suggested that in calling upon every man, it is possible to get not only his age but his date of birth. The man might not be in the insurance market at the present time, but having these data, gave the insurance salesman a decided advantage.

Mr. T. E. Burke, North American Life, Montreal, thought inspiration was the great selling point for the agent. He did not believe in relying on set rules and regulations for getting business. He was on the boat on his way to business one morning and a young man smiled at him. He did not know him but the young man striking up a conversation said, "I do not know you but I know your daughter." Then the conversation turned to insurance. An appointment was made at the parents' home, for, said Mr. Burke, I always believe in taking the father and mother into confidence in such a case. He wrote the young fellow for a policy. "It cost that young man an annual premium of $30 to smile at me," concluded Mr. Burke.

Mr. Lucier, of the Monarch Life, told of calling on an automobile agent. "If you will give me a good prospect for insurance I will give you a good prospect for a car," he said. This was done. "I wrote my prospect for $2,000. The auto man called on the prospect whose name I had handed him, gave him a ride, and he is still working on him."

Mr. Ralph Ripley, Sun Life, Hamilton, thought it was impracticable to drive into another man a system for writing insurance. Every agent has an entirely different personality. There were three primary requisites for a good insurance man, first, a common school education; second, ability and a desire to work; third, absolute honesty.

Mr. L'Esperance, Imperial Life, Montreal, did not believe in what he termed inspiration talk. He agreed with the man who had said that nine-tenths of Edison's inspiration was perspiration.

NEW OFFICERS OF UNDERWRITERS' ASSOCIATION

The following officers of the Dominion Life Underwriters' Association will carry on the important work of that organization during the coming year:—President, J. T. Wilson, Halifax; vice-presidents, British Columbia, J. H. Campbell, Vancouver; Manitoba and Saskatchewan, E. S. Miller, Regina; Ontario and Quebec, T. J. Parkes, Sherbrooke; maritime provinces, G. W. Merritt, St. John; secretary, G. J. Hunt, Toronto; treasurer, J. H. Castle Graham, Toronto.

Executive committee:—Guelph, R. H. Brydon; Kingston, Thomas Mills; London, T. B. Parkinson; Moose Jaw, W. S. Newman; Peterborough, P. A. Ferguson; Quebec, V. A. Lemieux and Hector Morin; Regina, J. H. Wright; Saskatoon, W. B. Crawley; Stratford, J. A. Quarry; Victoria, J. C. Wilson; Winnipeg, C. M. Twiss and D. J. Scott; Belleville, S. Burrows; Brandon, Mr. Leaney; Brantford, F. J. Ritchie; Brockville, C. E. Bissell; Calgary, F. E. Pedlar; Charlottetown, J. O. Hyndman; Edmonton, W. W. Hutton; Fort William, F. W. Atkinson; Halifax, W. R. C. Hewitt; Hamilton, C. L. Goodrow and T. E. Holmes; Medicine Hat, Wilson Lang; Montreal, George E. Williams, C. A. Butler, and C. C. Gauvin; North Bay, President of Association; Ottawa, W. G. Keddie and A. S. Wickware; Prince Albert, R. E. Williams; Eastern Townships, G. J. Alexander; St. Catharines, President of Association; St. John, President of Association; Sydney, George E. Archibald; Toronto, F. G. Hassard, M. H. Bingeman and Wm. May, junior; Vancouver, Mr. Alexander.

CHANGING THE BENEFICIARY OF POLICIES

Underwriters' Association Want Legislation—Educational Work—Insurance and the War

That the membership of the Dominion Life Underwriters' Association is 1,386, was the statement of Mr. J. Burtt Morgan, president of the association, at the annual convention of the organization, held at Winnipeg last week. The western membership, he said, was 647. Mr. Morgan, in an excellent presidential address, reviewed his work during the past year, including a membership campaign.

Discussing life insurance in relation to educational institutions, Mr. Morgan said:—

"Considering the rapid increase of life insurance in Canada and the important part which, as an institution, it has come to play in the business economy of the country, it seems only reasonable that the teaching of its fundamental principles should be accorded some adequate place in our system of public education. Imbued with this idea I undertook to investigate the situation, and as occasion permitted on my trip through the Dominion I conferred with the educational authorities in the several provinces as well as with the executive heads of our leading universities and colleges. So far as I have been able to learn, it appears at the present time that, aside from an actuarial course provided by Toronto University, incidental treatment of the economic phases of the subject in the course on economics provided by several universities and a brief explanatory text contained in the high school arithmetic authorized by the Province of British Columbia, no place whatever is given to instruction upon this important subject in the public schools and universities of Canada. Obviously the life underwriters in co-operation with the Life Officers' Association, should undertake to remedy this undesirable situation. Two lines of action suggest themselves.

J. Burtt Morgan, Victoria.

Suitable Treatment of Insurance.

"In the first place we should keep in close touch with the educational authorities in each province and see to it that suitable treatment of the subject of life insurance is incorporated in new editions of advanced arithmetics as they are brought out from time to time. Through the courtesy of High School Inspector J. A. Houston, of Toronto, I was able to secure the insertion of a brief explanatory text, accompanied by appropriate problems, into a new high school arithmetic being issued by the Ontario Department of Education. I also have a standing promise from a text-book committee representing the departments of education of the four western provinces, to the effect that they will give suitable place to the subject of life insurance in a new advanced arithmetic soon to be issued by them. None of the other provinces contemplate the issuance of new arithmetic in the near future, but in every case the educational authorities acknowledge the importance of the subject, expressed appreciation of having their attention called to the omission and promised to incorporate suitable treatment of life insurance in the next editions of their high school text books.

"The problem of providing more elaborate instruction in the science and practice of life insurance in our colleges and universities presents much greater difficulties. To establish chairs of life insurance, as has been done in certain institutions to the south of us, is for the present out of the question. In a few of our larger universities, departments of commerce, now in contemplation or in the process of development, should when instituted afford facilities for the proper treatment of life insurance in its individual, legal, technical and economic aspects.

"Many years, however, are likely to elapse before our smaller institutions can afford to undertake the establishment of such departments, and in the meantime some attempt should be made to meet the situation.

British Columbia's Action.

"We are indebted to President Westbrook of the University of British Columbia, for the only practical suggestion of promise. Stated briefly, it is that a peripatetic lectureship of life insurance be established, the incumbent of which should during the college year visit those institutions throughout Canada which endorse the plan, and deliver at each a brief course of lectures covering the desired ground. These lectures would probably require to be of a semi-popular and semi-technical character and might be thrown open to the general public in addition to the college constituency. Attendance by the student body could be made compulsory and credit given for the work done. The lecturer might also visit other centres of population. This plan has been submitted to the president of every college and university in Canada, and has been very generally approved of by them. I also laid it before the Life Officers' Association at a special meeting called for the purpose in Toronto last February, and at the same time suggested that the companies provide the necessary funds. Those present gave the proposal sympathetic attention and seemed convinced that it was worthy of serious consideration. Since, however, the claims of institutional advertising were about to be pressed vigorously upon the attention of the latter officers, the time did not seem opportune for urging the matter further. While nothing, therefore, of a definite character has been achieved I am satisfied that the scheme is well worth further attention and would earnestly recommend that it be pressed to an issue by the new executive when the proper time comes.

"Before passing from the discussion of educational matter I desire to call special attention to the very excellent suggestion made by Past President Meiklejohn, chairman of the educational department, in a letter addressed to the local associations early in the year, to the effect that arrangements be made wherever possible with high school and collegiate institutes for the delivery of a series of lectures upon various life assurance topics by capable local men. This suggestion was adopted by a number of associations with gratifying results."

As to Insurance Legislation.

Referring to the standardization of provincial laws with respect to the licensing of agents, Mr. Morgan said: "I maintain that the resident clause at present contained in certain provincial acts is illogical, iniquitous and unjust, and should in every case be expunged. The eligibility of an agent to secure a certificate of authority anywhere in Canada, irrespective of domicile, is the necessary corollary to a Dominion-wide license held by the company of which he is an accredited representative. Consultation with provincial insurance authorities convinces me that there will be no difficulty in wiping out this anomaly as soon as the life men of the Dominion are prepared to endorse the principle above enunciated. In the meantime a recent press despatch from Ottawa announces that a bill has been introduced into Parliament which provides that it shall be an indictable offense punishable by fine or imprisonment for anyone to solicit or carry on a business of insurance unless duly licensed by the Minister of Finance. Should this bill become law and prove intra vires of the Parliament of Canada, it may solve the difficulty by wiping out provincial licenses altogether.

"As to the desirability of securing uniformity in the laws governing change of beneficiary there is no room for difference of opinion. I would strongly urge that this convention make a definite pronouncement upon the subject and instruct its legislative committee to forthwith take such steps as may be necessary to secure the enactment of standard provisions in all the provinces of the Dominion. (This action was duly taken at the convention).

"It is a noteworthy and significant fact," said Mr. Morgan, "that there never was a time when the institution of life insurance stood as high in the confidence and regard of the Canadian people as it does to-day. Nor are the reasons for this condition far to seek."

Scarcely had the ominous word gone forth three years ago that Britain was at war, when the life insurance companies operating in Canada flashed to their remotest agencies the message that all existing policyholders would be permitted to go to the front without extra charge notwithstanding anything in their policies to the contrary. Liberal provisions were likewise early made for the protection of the dependants of those who might later decide to enlist. When funds were needed for carrying on the war, the great reserves of capital accumulated by these same companies were freely placed at the disposal of the government. Millions in war claims have been paid with the utmost promptness, and such is the soundness of our life insurance system that, despite these unusual demands, I have yet to learn of a single company which has suffered any impairment of surplus or been compelled to lower the scale of dividend disbursements to policyholders. Is it any wonder, therefore, that the Canadian citizen is fast coming to a new appreciation of his great life insurance institution and regards it with both profound confidence and genuine affection not only as the protector of his home and loved ones, but as one of the bulwarks of our young nation?"

Mr. Morgan suggested that the annual conventions of the Dominion Life Underwriters' Association should be held more frequently in Western Canada. He paid a tribute to the "abounding energy, sound judgment and fine spirit of enthusiasm" which Mr. G. H. Castle Graham, general secretary of the association, had put into his work during the past year. Mr. Morgan reported the forces of the association as being in a healthy position. He also suggested the appointment of a field secretary and complimented Mr. George Hunt for the preparation of the convention program.

TOTEM POLE FOR BRANDON ASSOCIATION

The president of the Dominion Life Underwriters' Association, Mr. J. Burtt Morgan, offered a genuine Pacific Coast totem pole as a trophy for international competition among associations in Canada and the United States. The trophy was to be awarded for increased membership computed on a twofold basis: First, the increase in current membership over the preceding year, and second, the increase in the current year over the average of the five preceding years. The result was determined by averaging these two findings.

This competition was won by the Brandon Association. The totem pole stands about 18 inches high, and is a facsimile of the pole which stands at the entrance of the museum of British Columbia at Victoria, that pole being 15 feet high. The trophy won by Brandon was entirely a product of British Columbia, the base being of British Columbia oak, the gold and silver being mined in the province, and the copper for the alloy. The pole was the handiwork of a resident of Victoria. Mr. J. A. Wilson, Canada Life, is president of the Brandon Life Underwriters' Association.—*Photo by British & Colonial Press.*)

Totem Pole, awarded to Brandon Life Underwriters' Association (J. A. Wilson, president.)

TAXATION OF INSURANCE PREMIUMS

Governments Should Consider Seriously the Unfairness of Further Tax on Thrift

"During the last three years the life insurance companies have borne the burden of the extra mortality they have experienced as a result of the war in a way which furnishes fresh evidence—if that were necessary—of their stability and strength," said Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto, in an address to the Convention of the Life Underwriters' Association at Winnipeg last week. Mr. Weston spoke as the representative of the Canadian Life Officers' Association. "For some years previous to the outbreak of the war," he continued, "the policies of the majority of our companies contained no restrictions as to military or naval service. When the war broke upon us it was decided to go further and to extend free rights to engage in such service to all policyholders of standing at that date irrespective of any restrictive clauses which their policies might contain and for the first few months of the war we charged new insurers only a moderate extra; this our experience has compelled us to increase from time to time. It has been our aim throughout to grant the protection of life insurance so far as safety to the companies permitted, to the dependants of those who have so heroically defended our rights. This of necessity has involved us in heavier death claims than we would have experienced under normal conditions and out of proportion to the amount of extra premiums we have collected, but not enough in the case of any company to affect its solvency or ability to meet its full liabilities.

J. F. Weston, Managing Director of the Imperial Life Assurance Company, Toronto.

Increase Cost of Business.

"The only effect it has had is to increase the cost of the business by the amount of the increased mortality, and by that much it affects the profits or dividends to living policyholders. Our Federal government has recognized this fact, and because of it, has exempted life insurance from the application of the income tax which applies to other corporations. I have no sympathy with any corporation or individual who attempts to evade tax on profits, or any tax they can reasonably be expected to pay, in the emergency through which we are passing, but in the case of life insurance, where the profits of the policyholders are adversely affected, as they are by the extra cost of this higher mortality, they certainly are paying their full share by cheerfully and willingly—as I know they are—bearing their portion of the expense of paying the claims upon those of their fellow-policyholders who have fallen at the front, so that it certainly is no time for provincial governments to increase the tax on life insurance as one of our

provinces has seriously contemplated doing if it has not already done so. I think the needs of our various governments are so great that this is not the time for us to discuss the principle of taxation of insurance companies as it existed before the war, but I do believe it is in the interests of the policyholders, the public, and the governments themselves, that we should do all that we can to prevent any fresh imposts which may add to the already very heavy expense which our policyholders are now carrying, as a result of the war, and must continue to carry long after the war ceases as a result of impairment of lives because of the war. This is a very serious question with us and might prove an actual danger to some of the smaller companies.

"It often seems impossible for the average man to consider the great aggregates of assets held by the companies in relation to the many thousands of small individual claims they serve to cover or to understand how a tax on the large totals of premium income can affect the man who pays the small amount of the average premium. It is your business to instruct them and to do all in your power in this and all other directions to prevent any increase in the cost of the protection which life insurance alone can give and which, as it is reduced to the small average amount carried by the individual, is so pitifully inadequate to meet the needs of the average family. You have done the State some service and they know it, or some of them do, and it is your business to teach those who do not.

For the Politicians.

"I refer to our politicians, and if they will not learn, then instruct the people that such a tax is in no sense a tax upon a profit they are making, but an increase in the actual cost of the protection they carry. If once you arouse their interest in this question, the fact is so plain and palpable, you can trust them to look after the rest and ultimately we may have the matter treated on something like the broad lines which have been followed in England for over half a century. Whatever the result may be, you by following this course, will have discharged your duty to your clients, who trust you in this vital matter.

"Apart altogether from the advantage it is to the State to have the life values of its citizens insured, with the stabilizing influence on society, financially, morally and intellectually, which that implies, you perform an immediate service in every intelligent canvass you make, for in each case you are teaching the importance of thrift and your united action constitutes the greatest thrift campaign that has ever been carried on throughout the country. Every premium collected contributes to the national strength. This was never more clearly demonstrated than it has been in the financing of the present war. When England needed securities to use as collateral in connection with foreign loans, she got them to the amount of several hundred millions of dollars from her insurance companies in exchange for government bonds. This was in addition to the very heavy additional purchases of government issues which the companies were able to take up.

Investments in War Bonds.

"In Canada our Federal government requires us to invest one-half the annual increase in our assets in Dominion war bonds. We have been able to subscribe very much in excess of this requirement and are preparing to absorb as much as we can of future issues. This is our first and paramount duty, to throw our utmost strength into the struggle we are making to protect our liberty and all the advances in civilization we have made through centuries of struggle and sacrifice, against the attempt to force us back to a condition of medieval despotism."

Mr. G. J. Lovell, who some years ago established the Annuity Company of Canada, which ceased business when the Dominion government started its annuity department, was a delegate to the underwriters' convention at Winnipeg last week.

Mr. J. B. McKechnie, general manager and actuary, and Mr. R. Junkin, superintendent of agents, of the Manufacturers Life, Toronto, arrived in Winnipeg last week on their way back to Toronto after a lengthy business trip to the prairie provinces and to British Columbia as far as Prince Rupert. Mr. McKechnie, who attended some of the underwriters' convention sessions at Winnipeg, told *The Monetary Times* that he had found conditions fairly good throughout the country. In some of the cities things were a little dull, and a readjustment would be found necessary in municipal debts in many cases.

REVOLUTION IN SALESMANSHIP METHODS

Proper Selection and Training is Necessary — Some Striking Figures

There is a revolution going on, on the whole question of salesmanship, especially life insurance salesmanship, said Mr. Winslow Russell, agency manager of the Phoenix Mutual, of Hartford, Conn., and president of the World's Salesmanship Congress, at the life insurance convention last week.

He illustrated an interesting address with charts, dividing the necessary factors in the selection and training of salesmen as follows:

Selection.	Training.
1. Study	1. Books
2. Eliminate waste	2. Special courses
3. Advertise	3. Group education methods
4. Stand by approved methods	4. Head office school
5. Co-operative service	5. Experience

Books and Courses.

Three books recommended by Mr. Russell for the life insurance manager and general agent were Dr. Blackford's "The Job, the Man and the Boss," and "Analysing Character," and Dr. Scott's book "Commencing Men in Business."

With regard to courses in salesmanship and business, Mr. Russell said many insurance companies were using their own courses. He specially recommended the Alexander Hamilton Institute course. "I mention this," he said, "because I know of much good that has come from such courses."

Figures of Producers.

Mr. Russell gave some interesting figures as to what he termed "the cost of hire and fire." In his own company of 1,600 licensed agents in one year about 600 of them had not written an insurance application. Of 1,054 of these men 725 produced less than $2,500 of business during the year. The cost of equipping with rate books, etc., 419 men who produced less than $100 of premiums in the year was 3 3-10 per cent. of the amount they produced.

A New York company had 9,500 licensed agents in 1915. Five hundred of these men produced 50 per cent. of the company's large total business. The other 9,000 men produced the other half of the business.

Eighty-one companies have 168,000 agents in the United States. They talked life insurance to 17,000,000 people last year if each agent called on one prospect a day for 11 months of the year. How important, therefore, said Mr. Russell, was the selection and training of the insurance salesmen. Mr. Russell's company had reduced its selling force from 1,600 to 423. "Yet," he said, "we are putting on our books 100 per cent. more business with the 423 men than we did with the 1,600."

Types of Salesmen.

Mr. Russell then showed some charts illustrating the various classes of men which made good life insurance salesmen and how they were graded. He mentioned the prejudice of many first-class salesmen in other lines, to the selling of life insurance. Here is briefly what one good salesman had said: "I am not prejudiced against selling life insurance but I rather would not sell it. I have always classed insurance agents with book agents and failures. They are not good salesmen. They are not the equals mentally or morally of the men whom they try to interest in their proposition. If the insurance companies want to get and keep high-grade salesmen they must offer equal or better salaries and commissions than are paid by industrial and other corporations. I know of one industrial corporation which discharged four salesmen for heavy drinking. Within a week three of the four men had been engaged as salesmen by two life insurance companies." That sort of thing has changed and such opinions were changing, said Mr. Russell.

"The day has gone," he concluded, "when you can put a man into the life insurance business with only a rate book and a desk. He must be properly selected, trained and he should have a standard contract."

The forest fire losses in Ontario, Quebec, New Brunswick and Nova Scotia this season so far have been light, owing to wet weather and more vigilant patrol. British Columbia and western Alberta have been the chief losers. July weather was blazing hot with practically no rain in the mountain sections of the two provinces.

SERVICE TO INSURANCE POLICYHOLDERS

How Life Underwriters Can Give It With the Help of Enthusiasm

"Every life insurance writer has a right to be enthusiastic for service," said Mr. R. G. McCuish, Canada Life, in a carefully prepared and able address on "Enthusiasm." "Enthusiasm therefore," he continued, "should dominate every man who carries a rate book. I have yet to see the man who does not like to see enthusiasm. Enthusiasm begets enthusiasm. Demonstrate your determination and the co-operation of your friends follows. The public will help the man who helps himself. If you have not been successful, is it because of a lack of earnestness on your part in your work? It goes without saying, that if you are not in love with your work you cannot be enthusiastic in it. If this is the trouble, then a readjustment of your conditions should be brought about at once.

R. G. McCuish, Regina.

"Let the entire conduct of every detail of our life insurance agency affairs live, move and have its being in that one idea of service, and that means that each one of us as individual members of the agencies shall live and breathe that ideal, think and act that ideal of service—true enthusiasts in the fixed idea of service—service to prospects, service to policyholders, service to company, service to family, and last of all, service to self. Let us never forget for an instant that we are living forces for good and that every time we open the rate book we are doing somebody, somewhere, some good. Let every application that is taken be written in the spirit of service and when the applicant becomes the policyholder, let this be only the beginning of our service. Let it be our bounden duty to see that he clings firmly to that mantle of protection once you have thrown it over him. Let us gain the name of unselfish, disinterested counsellors and advisors of the insuring public.

Service to Policyholders.

"Service to prospects and service to policyholders means service to company. If we are true enthusiasts for insurance, we will never lose sight of the fact that back of us loom those great powerful institutions which we and men like us have made possible and in our capacity as the acting, living link between them and their policyholders our every thought and every act, as true representatives of both, should be in the spirit of service for their best interest. View every prospect in the same light that you would if you personally were going to assume the risk. Guard the company's pocketbook as you would your own.

"Imbued with these ideals of enthusiastic service to our profession and through it to those we serve, whether it be those to whom we sell or those for whom we sell we shall inevitably carry this same ideal of enthusiastic, unselfish service into every phase of our life. It will make better men of us. it will make far more than mere material success for us. It will have a daily and hourly reflection in our habits and conduct as men and in our home and family relation. We will be the happier for it. We will be truer men for it. We will be better brothers or husbands or fathers for it. We will be enthusiasts—men of the fixed idea of service—men of vision, blind to all else than the genuine, unselfish eagerness to grasp every precious moment of time as it so swiftly flees past, never to return, as an opportunity for some form of service. We will be men ready and eager to lay out and adhere to the daily and hourly program, in order that each passing day and hour shall be constructive—something good done—a service, possibly only a mite but a service.

"It has been said that the best card of introduction that a salesman can have is a pleasant smile and a hearty hand shake. No man can reasonably refuse to shake hands with you and you know the old saying about the mile of smiles. It is contagious and once you can get your man in a good humor you have made a mighty fine start.

"Your interest in your work must impress not only your prospects but your fellow workers. If you become recognized as a man who is a worker of the enthusiastic sort, your channels for business connections open appreciably wider and other lines become of interest to you, from all of which insurance can be produced. Take, for example, the names of the five leading life men of your district, the real big men, and you will find every one of them actively and enthusiastically connected with other organizations, social, religious, fraternal or athletic. They get a lot of enjoyment out of their interests and associations in these things, but under it all, the primary reason of their activity there is on account of the men they meet and get to know in a free and enthusiastic manner. They can never tell when it may mean business to them, and the mere idea that they are thus widening their circle with friends who are in the same business world should be worth all the time and money expended. Make yourself known as a man of the enthusiastic type—one who will put his shoulder to the wheel for any good cause—and you will be surprised how many things will come your way of their own accord, mainly on account of this.

Work is Not Drudgery.

"Some agents speak of their work being drudgery. While politics makes strange bedfellows, enthusiasm and drudgery are bedfellows of the impossible kind. One writer has said that 'Drudgery is a near relative of Slavery.' Elimination by substitution! Hopefulness, buoyancy, optimism, assurance, these will make you magnanimous. Turn your clouds inside out and a likeable fellow will be found wearing your clothes. Try it. Every day provides new opportunities. Some are golden. Embrace them. Get your share of the good things that are being handed out. The oft quoted phrase, 'Nothing succeeds like Success,' is only too true. To him that hath shall be given."

And again, the same writer says, 'It is a most beneficient work. You are food and raiment of widow and orphan. You are a philanthropist. The dignity of your calling is second to none. You are the exponent of high ideals. You try to make them more thoughtful with dependent ones, and you do make possible the conservation of their best business interests. You have a sacred heritage. Those who have preceded you have done a mighty work. They have overcome obstacles mountainous in size, and they have broken down barriers that make your path a path of roses in comparison. This, though, in itself, should cause unbounded enthusiasm. Appreciate this. It is God given. Make the most of it. Your own honest convictions this moment should determine your course for a larger service in your chosen profession. If you put your heart and soul into this great ministry your cup of joy will be persistently filled."

More than $7,500,000 are paid annually into the provincial and federal treasuries of Canada as timber and pulp-wood dues by commercial companies. British Columbia receives the largest amount, over two million dollars a year.

Mr. E. M. Saunders, treasurer of the Canada Life, was in Port Arthur and Winnipeg last week on his annual business trip to the prairie provinces and Pacific coast. Mr. Saunders is examining investment conditions throughout the country.

Why Burden Your Wife?

If you wish to appoint your wife as executrix or trustee under your will, why not assist her to carry the heavy burden by appointing this Corporation as co-executor?

Your estate will thus have the advantage of the personal direction which she can give, and she will be relieved of the burdensome details necessarily involved in the management of any estate. Also she will receive invaluable assistance in regard to investments.

Our officers will be glad to confer with you in regard to the making of your will or any trust business you may have in mind.

HOW TO SELL INSURANCE TO FARMERS

Some Arguments That Appeal to the Agricultural Worker

How to sell life insurance to farmers was a topic dealt with by Mr. P. A. Wintemute, Manufacturers Life, Calgary, in an instructive address at the Life Underwriters' Association Convention, Winnipeg, last week.

"One reads often of the man," he said, "who, when he goes to canvass a farmer, puts on his overalls and goes out prepared to talk anything but life insurance for an hour, or even half a day and, possibly, goes so far as to assist with some work that may be under way. I have in the past, and more particularly in the earlier part of my insurance career, and where there were two of us working together, presented my proposition, while my partner took the fork or drove the seeder; or, I have done the labor and let him sell the goods. In fact, one of my best cases was written after helping a man pick twenty bags of potatoes, which had already been ploughed out, and were lying above ground. It was late in the fall, the air was full of frost, and it was absolutely necessary if these potatoes were to be saved, that they should be under cover that night. By assisting him to do this I secured an invitation to supper—and, by the way, after supper is always a good time to approach a prospect—and had no difficulty in closing the case.

"I have worked this way with varying success, but, with my longer and larger experience in selling, today I approach a farmer, in nine cases out of ten, just as I would a business man in his office. When I get to him, whether in his house, his barn or his field, I approach him with hand extended, smile as broadly as possible, and say, 'Mr. Jones, my name is Wintemute. I represent the Manufacturers Life Insurance Company.' In most cases I introduce myself, as I find very few men have the ability to introduce you and give you the proper send-off.

After the Introduction.

"After the formal introduction circumstances play a great part as to what my words are to follow. If I happen to be with a local man, who is well and favorably known, and, providing the local man has approached the prospect before, I make some remark such as, 'Mr. Smith intimated to me that you and he had been discussing life insurance, and he had only been waiting for me to come around, so that we might advise together as to which plan would suit your needs the best.' I invariably try to impress my prospect with the fact that my experience and knowledge of life insurance is at his disposal, and it is my privilege to advise him.

"Keep away from the word 'sell'. Few men like to be sold. They much prefer to 'buy'. Before reaching his place, we have, of course, discussed his financial position and particular need for what I have to sell; decide on a plan to suit that need and then enlarge on its many advantages. In every case I find it advisable to talk one plan only to each prospect, and while it is good business always to suit the plan to the need of the particular individual, still, I find, unless there is a great variance in their ages it is wise to sell pretty much the one plan in a particular district. This avoids comparisons and possibly misunderstandings.

Price of Hogs and Insurance.

"After such an introduction I have had men say, after a few minutes' explanation, 'Well, I will buy so much of that.' But, generally, I find, especially if in the open, it is hard to get them to concentrate. In that case I use a pad and pencil, bringing figures into play, the premium required written very small, and the amount of the policy written in large figures, generally using some saying, such as, 'Mr. Jones, for this small addition to your liability you can have a large addition to your assets.' Sometimes I show him what the price of one or more hogs—if he is a hog man—will do in the way of paying the premium, or one colt—if a horse man, or one steer—if a cattle man. If a grain farmer, what one load of grain each fall will purchase. I find it pays, if possible, to meet the farmer in his own environment. That is, if his hobby is hogs, see his hogs, know something about hogs, be wised up to the price of hogs for the day, discuss the possibilities of an increase in price, and if possible, meet him when the price is on the up-grade. This applies to the cattle man, or grain man.

"As farmers, more particularly in the west, are increasing their holdings in lands, one of my stock arguments, and one from which a reasonable man can hardly get away, is, 'Mr. Jones, would you be interested in buying this most desirable half section near you if the terms could be arranged to suit you. For instance, if I could arrange for you to pay $150 this year and then $150 each year for the next nineteen, without interest, you would at least be interested enough to discuss it with your good wife, and I can imagine I see you getting your heads together and finding ways and means to raise that first $150. Now, Mr. Jones, you know if you bought this property and promised to pay for it that way, if you had made the first payment, and anything unfortunately happened to you—the bread-winner—Mrs. Jones would be required to make the other nineteen payments before she could secure the title to the land. Our proposition is practically the same, except that it is this much better—if you died prematurely the full value of the property you bought is paid to her in full within a short time, or, at most, as soon as the company receives proof of your demise. There will be no road work to do or taxes to pay on this property, Mr. Jones. If necessary, I continue: 'Of course, Mr. Jones, we are discussing this proposition when after all we may not be able to do business at all, as more than the price has to be taken into consideration. In fact, the biggest consideration in the closing of our contract is the condition of the health of the purchaser.

Passing Medical Examination.

"'Last year's statistics prove that one in every nine or eleven per cent. of those who applied for life insurance in Canada were for various reasons, declined. I venture, Mr. Jones, that at least 95 per cent. of these applicants could at one time have had insurance but deferred applying until something happened, possibly only in the family history. Possibly typhoid, pneumonia, pleurisy, or any of several diseases I might mention, have left them with health impaired, heart weakened, lungs unsound. Most of these men may live as long as you or I, but they cannot have the supreme satisfaction of the protection provided by a life insurance policy. And, believe me, to these men the price is no consideration. I have had men say to me after the doctor had said, "Sorry, old chap, but I do not believe there is any use in sending this in," "Do not you suppose they will give me some kind of a policy?" And the fact that men are accepting high premium policies, and, in some cases these even liened, is proof that it behoves us to get it when we can. This is the form. We complete this, photograph the same, and attach it to the inside of the policy. The doctor's examination is handled in the same way. Of course, we pay the cost of the examination, and, if by any chance you are not accepted, any money which you have paid in settlement of the premium will be refunded to you. This photographic copy, I might say, precludes the possibility of any dispute, and shows your signature as it is signed here. Kindly sign.'

"I find, too, that very often if you can secure answers to a few of the leading questions on the application, by showing him the same, partly completed, he will give you the necessary information to finish it and then sign.

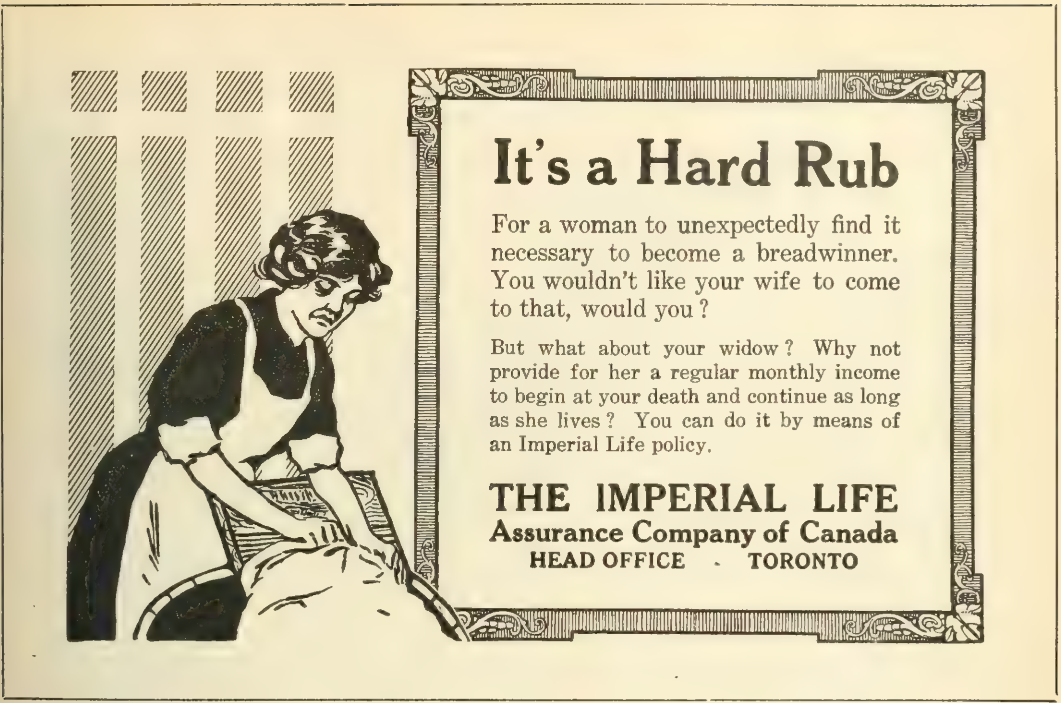
Providing a Bank Account.

"In some cases I find it good business to leave out the words life insurance as far as possible, discussing it more as providing a bank account which, after all, it really is, being a larger one than could be provided in any other way, if the insured dies early in life.

"If I have been fortunate enough to have secured an application in a district, I get the names of at least three friends or neighbors, call on these gentlemen and after introductions, address them in some such manner as this: 'Your neighbor, Mr. Smith, has very kindly allowed us to present his name in the form of an application to our company for some life insurance. It is necessary that we should have some further information than that disclosed by the application or medical examination. He has given us your name as reference. Will you kindly answer the following questions.' I invariably complete the questions and have the party sign. Very often this paves the way for an interview, which might otherwise have been hard to obtain. In a community where I have a number of policyholders I always carry a list of the same, and find the displaying of this list or reading the names has a great influence on the average prospect.

"If a claim has been paid in the district lately, either by your company or another, know the facts. Localize your talk as much as possible—not necessarily entering into the community gossip—but know some of the things worth while of the district in which you work. To sell life insurance to farmers, see farmers, and several each day."

Quebec sold the United States last year more than sixteen million dollars worth of lumber, laths, shingles, and pulp products.



It's a Hard Rub

For a woman to unexpectedly find it necessary to become a breadwinner. You wouldn't like your wife to come to that, would you?

But what about your widow? Why not provide for her a regular monthly income to begin at your death and continue as long as she lives? You can do it by means of an Imperial Life policy.

By order of the Board.
JOHN T. F. KEENE,
Secretary-Treasurer.

Montreal, August 17th, 1917.

HOW THE DELEGATES CAME

Five hundred and sixty life insurance men attended the eleventh annual convention of the Dominion Life Underwriters' Association last week. From Port Arthur and points east 132 men came, and from western Canada, 158. Forty-five delegates motored from Regina and Brandon. The Winnipeg Life Underwriters' Association sent 225 delegates to the convention.

CAN PAY THE WAR DEBT

That Canada will have no trouble in paying its war debt was the statement of Hon. T. C. Norris, premier of Manitoba, addressing the life underwriters at a banquet held in Winnipeg last week. Mr. Norris described the vast natural resources of the Dominion, and showed how their development would help pay the debt incurred by our participation in the war. He said that the people of Winnipeg alone could be relied upon to contribute $20,000,000 to the next war loan.

Discussing the growth of Western Canada, Mr. Norris paid particular tribute to the importance of Winnipeg. "Our city," he said, "is the centre of the British Empire. To live at the hub of the Empire is something of which to be proud."

Mr. Norris pleaded for unity between East and West. "The only thing which will bring the people of the East and West together is to call the people of both sections to consult with one another. We will break down by degrees the division—if there is a division—between the East and the West by such consultation.

Referring to the "great business of life insurance," the premier said it was a business which had become universal. "I have never been in any city, village or hamlet in Canada where there was not a life insurance agent. Life insurance salesmen are too frequently put in the same class as politicians," he said, humorously. "There was once a politician who was asked by an old chap what his business was. 'I am a professional man,' was the reply. 'Well, you do not look like a lawyer, or a doctor, or a minister. What are you?' 'I am a politician,' was the reply. 'Oh,' came the response; 'that's not a profession, it's a disease.' While the life insurance agent of olden days was often classed as a misfit and a failure, this was no longer the case, for they were to-day among the foremost business men of the country."

CONDENSED ADVERTISEMENTS

Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

YOUNG CHARTERED ACCOUNTANT, at present employed, desires change. Unusually broad experience, specialty designing and installation of accounting systems, accustomed to handling assistants, rejected for military service, first in order of merit on Final. Please state probable commencing salary, future prospects, duties, responsibilities and amount of travelling required. Box 101, *The Monetary Times*, Toronto.

YOUNG MAN WANTED for municipal bond house. Apply in own hand-writing stating references. Box 103, *The Monetary Times*, Toronto.

I OFFER for sale the Canadian Patent Rights to an exceedingly valuable invention in the auto tire accessory line. The article is now being profitably manufactured in the States. It has been a demonstrated success from the start and the factory is now behind on orders. Is easily sold, as every car owner is a prospective customer. The article is easily manufactured. Only a small amount of inexpensive and easily secured machinery required. Nothing but standard materials used.

ARMORED TIRE CO.,
143-145 West Austin Ave.,
CHICAGO, ILL.

EXHIBITION'S TRACTOR DISPLAY

The greatest display of tractors and other perfected mechanisms, heralded as the possible solution of the manless land problem, is being made at the Canadian National Exhibition, Toronto, and every known device obtainable that has found favor with the new era agriculturist, who is farming with brain and science rather than muscle, will be there. The spirit of the times has seized the big agricultural machinery firms, and a number which have not exhibited at Toronto for several years have applied for space, together with a host of others new to the Canadian field. Never before was so much space devoted to agricultural machinery. Following the Exhibition, there will be a tractor display near Toronto, in which forty manufacturers of tractors and twenty-four plough makers from all over the continent will be represented. A special effort is being made to induce these manufacturers to display their gasoline horses at the Exhibition. The majority have already agreed to do so, and as a result Toronto will have the greatest tractor and farm power equipment display ever seen in Canada.

Investing by Small Payments

The growth of the periodical payment plan for making safe investments is one of the most notable features of recent years in finance on this continent.

The plan was introduced to Canada by this firm, which is now helping investors throughout the country to invest while they save.

Our circular will be sent to anyone interested on request.

CHARTERED ACCOUNTANTS IN CONVENTION

Dominion-wide Gathering Held at Banff—New Officers of Association

By Bryan Pontifex.

A convention of Canada's chartered accountants was held at Banff, Alberta, last week. This convention is held annually—each provincial institute in rotation acting as hosts. As was to have been expected, owing to the war, the attendance this year was practically limited to the executive and the members of the Alberta Institute. The total attendance was therefore only 33—many chartered accountants being at the front, engaged in war work, or shorthanded owing to their assistants being at the front. In pre-war days about 150 members attended the convention.

The seven provincial institutes reported an aggregate membership of about 600, or, deducting those not resident in Canada, and therefore not members of the Dominion Association, 480, namely, Montreal Institute, 68; Ontario, 141; Manitoba, 76; Nova Scotia, 30; British Columbia, 66; Saskatchewan, 52; Alberta, 43, and members at large, 4. This total of 480 compares with 255 in 1910, when the Provincial Institutes were "confederated" under the Dominion Association.

Papers Were Handed Around.

The convention opened by an address of welcome from the Lieutenant-Governor of Alberta, after which the address of the president, Mr. D. A. McCannel, was heard and debated. Mr. John Parton, of the Manitoba Institute, read a paper on "Merchandise Inventories and the Auditor's Responsibilities Therefor." The discussion was opened by Mr. O. J. Godfrey, of the Saskatchewan Institute, and participated in by a dozen members—the relating of diverse experiences and the interchange of viewpoints being most instructive.

On another day Mr. J. B. Sutherland, of the Alberta Institute, presented a paper on "Reserves and Sinking Funds," on which discussion and criticism was opened by Mr. Bryan Pontifex, of the Ontario Institute. At this convention, with the idea of conserving time as much as possible, the papers prepared were printed and handed round to members on the day before their presentation, in order that they could read and consider them "in their own time," so that when the meeting was called to order discussion could be at once proceeded with.

An address was given by Mr. F. M. Black, a member of the Public Utilities Commission of Alberta, on the natural resources of the province. The speaker took his audience from the original land settlements and divisions and in dealing with the natural resources of the province emphasized that these were not "boundless" as frequently described by perorating after-dinner eloquence, but had very distinct limitations and should not therefore be overrated or squandered. Alberta was stated to be larger than any state in the United States of America excepting Texas, and as the population was only some 550,000, there were great possibilities of development, although less than two-thirds of its area of 162,000,000 acres were suitable for cultivation. The particular matters of interest to the convention were the systems of financing—provincial and municipal, the public assets and the public debt and its amortization.

Business of the Convention.

The real business of the convention was, as usual, in the council meetings, in the reception of reports of the provincial institutes and in the consideration of matters affecting the welfare of the profession brought up by the different delegates. Altogether much useful business was transacted The official delegates from the provincial institutes, who form the council of the Dominion Association, were:—Montreal, Mr. John Hyde; Ontario, Mr. Bryan Pontifex; Manitoba, Mr. John Parton; Nova Scotia, Colonel Oxley; British Columbia, Mr. H. D. Christie; Saskatchewan, Mr. W. E. Hodge, and Alberta, Mr. D. A. McCannel.

At the final meeting of the council Mr. John Hyde, of Montreal, was elected president for the ensuing year, and it was decided to hold the next convention at Montreal in September, 1918.

BOND ISSUE OF SHIPBUILDING COMPANY

Credit Canadien, Incorporated, of Montreal, is underwriting the bonds of the Three Rivers Shipyards, Limited, for $100,000. The bonds are guaranteed as to payment and interest by the city of Three Rivers, and the proceeds are to be applied for the establishment of shipyards in Three Rivers, Que. The company has contracted with the Imperial Munitions Board for wooden ships 250 feet in length.

REGULAR DIVIDEND ON DOMINION IRON

The regular quarterly dividend of 1 per cent. on the common stock was declared at a meeting of the directors of the Dominion Steel Corporation, held at Montreal this week.

In addition to the regular quarterly dividend on the common stock, which is payable October 1st to shareholders of record September 5th, there was also declared the regular half-yearly dividend of 3½ per cent. on the preferred stock of the Dominion Iron and Steel Company, payable October 1st to shareholders of record September 15th.

PAYING THE PRICE

The Canadian Forestry Association, of Ottawa, discussing the devastation of forest fires due to the careless throwing of a match or badly-extinguished camp fires, says, in a recent bulletin, that ninety out of a hundred tragic holocausts could be avoided if every Canadian camper and fisherman kept vigilant watch on his own pair of hands and every settler kept a tight rein on his clearing fires.

A man dropped a lighted match on the shore of Kalamalka Lake, British Columbia, on July 8th. Within an hour, a hot fire was racing through the underbrush. For three weeks after that there raged a series of forest fires, defying the organized efforts of hundreds of men. At one time, twenty-six fire-fighters were ringed about with flames, while their relatives, shut off from them and helpless to aid, awaited news in terrorized suspense. Only after severe suffering from exhaustion, thirst and hunger did the band of workers force their way through to safety.

That experience is a big price to pay for one person's foolish act in handling matches in a forest. The court fined the careless man $50, but that does not help the province to bear the enormous loss. The lighted match dropped on one inch of inflammable ground expanded into fifteen miles of ruin.

In the Spruce Valley fire of British Columbia of the same month eleven men lost their lives, most of them tortured to death as they struggled over the mountain tops. The fuse to that disaster was supplied by a small piece of lighted tobacco carelessly thrown on the grassy floor of a tent. It does not cost five minutes to put out a camp fire or a cigarette or a match, but it costs the people of Canada four or five million dollars a year to partially overtake the timber damage caused by runaway flames.

Mr. A. E. Fisher, insurance superintendent of Saskatchewan, paid a well-deserved tribute to the good work of the various life underwriters' associations in Canada, at the life insurance convention at Winnipeg last week. "I can say without hesitation," he said, "that the standard of life insurance in our province has improved to a marked degree during the last few years, and this improvement is largely to be attributed to the good work which, in a direct and indirect way, has been accomplished by the various life organizations among us. I always make it a point, in discussing questions pertaining to life insurance with a man new to the insurance business, to suggest to him the advisability of becoming a member of a life underwriters' association. During the last few years the number of complaints which have reached my office relative to misrepresentation, twisting and other practices which are not in accordance with proper methods of life underwriting, have been reduced almost to a minimum, and [illegible] that there is respect on the part of agents for the provincial laws, due to the establishment of an insurance department and the consequent supervision of the business, but also to the beneficial influence exerted by your association and the esprit de corps which follows membership in such bodies."

WORK OF LIFE UNDERWRITERS' ASSOCIATION

Life Insurance is Being Made an Ideal Profession—Criticism is Self-destructive

How to obtain attendance and maintain interest in meetings of the local life underwriters' associations, was the subject of an address given by Mr. G. J. A. Reany, Edmonton, manager of the Mutual Life Assurance Company of Canada, at the convention of the Life Underwriters' Association at Winnipeg last week. Mr. Reany took as his introductory speech the history and purpose of the organization of the Dominion Life Underwriters' Association. He referred to the men in the life insurance business who had no knowledge of the former evil days and what the association had done for the business. There were two classes who were non-supporters of the association and they must be appealed to, namely, the ignorant, those who did not know of the benefits of the organization; and the selfish, those who did not care. "The work of the association is not completed," said Mr. Reany; "withdrawals and evils return. To obtain the best conditions the association must be propagated and all life men should be enlisted." Mr. Reany suggested that all should co-operate to bring the meetings up to a first-class standard; the meetings should have presiding officers who should know the rules of order.

Policy of Being Prepared.

"If they accept office," said Mr. Reany, "then let them qualify. One of the best presiding officers I ever knew prepared himself before he was elected, that he might be ready. There is less room for criticism in that than for the man who accepts the position and then spoils the meeting." He suggested good papers and addresses, illustrating by a short story the folly of a man accepting office unless fully prepared with his subject. Some of the subjects suggested were: Insurance and economics, history of life insurance, story of life underwriters' association and incidents, meaning of reserve, psychology of salesmanship, law re beneficiaries, debates, etc. The aims of meetings should be constructive. The main purpose should be not the settlement of disputes, not to discover crookedness, but to prevent. Neither should it be the place for discussing personal grievances. A bickering association cheapens business. "Don't knock your neighbor, the effect will react on yourself," said Mr. Reany. "Dr. Guillotine is said to have been put to death by the machine of his own invention. The prime minister of one of the French monarchies died in the instrument of torture made for the persecution of others—a cage too short to lie down in and too low to stand up in."

Cannot Afford to Criticize.

He pointed out that the man who is persistently searching for evil in his competitor will naturally develop traits of character that will bring upon him the condemnation of others. The association that makes criticism its chief aim will be self-destructive. The importance of holding high ideals was touched upon. Life insurance business ought to be conducted on high business standards. It was a great economic factor. The importance of constructive work was mentioned.

Finally, Mr. Reany took up the relation of the association to business methods. "Boost life insurance," said Mr. Reany. "Engage only men mentally and morally fit, thus encouraging fair dealing and promoting confidence. Refuse to contract with agents under contract with another company unless honorably released. Eliminate part-time agents. Make the business a profession until life insurance makes a man's work and brokers are eliminated, who never would make the association a real force. Make association members safe from quacks. Protect your members and obtain confidence and co-operation, then the life association will be a body of men who represent in total the business in their constituency and the law of self-preservation will enter in. This is necessary to business progress."

Ontario's woodworking industries use thirty-four different kinds of wood. Ontario is a great producer of railway ties; more than 5,700,000 were taken out of the forests last year.

FOURTH WAR LOAN COMING SOON

Issue Will Probably be $150,000,000 to Yield About 5.70 Per Cent.

The following interview given in Winnipeg last week to The Winnipeg Telegram by a representative of *The Monetary Times*, will prove of interest to our readers:—

"Active preparations will be in hand shortly for the fourth domestic war loan. War loan financing is almost monopolizing the world's money markets and the trials and tribulations of other borrowers will probably increase during the coming autumn. Those who can borrow now at prevailing rates will likely find it wise to do so.

"The finance minister, Sir Thomas White, has already begun to figure seriously on his next war loan. While he has made no announcement of any kind regarding the matter, the government will apparently need from $250,000,000 to $300,000,000 of war funds between say September and early summer. That will probably be raised by means of two loans of $150,000,000 each, one during the coming fall when the western crop movement has been financed and one during the coming spring.

Rate of Interest.

"The rate of interest on our next war loan is likely to be slightly higher than that of the previous loan, which yielded the investor about 5.40 per cent. The new loan will perhaps give the investor a yield of from 5.50 to 5.65 per cent. If the term of the next loan is for 20 years or more all the previous war loans will be convertible into the new loan. That is to say, the holders of the $350,000,000 of war loans issued to date, will have the privilege of converting their bonds into the coming loan (which will most likely give them a higher yield). This right, however, can be exercised only if the next loan is a long-term issue, and it probably will be.

"To ensure success of the coming loan, every citizen in Canada will have to do his bit. Many industrial corporations, financial institutions and individuals have subscribed to the three war loans and while some will have the funds for the fourth loan, some will not be able to invest. We must reach a number of small investors who have not yet bought any war bonds; we must try and get again as many as possible of those who have bought the previous issues.

Will Test Patriotism.

"The last loan was absorbed slowly. Indeed, only recently has it really been entirely marketed with the ultimate investor. That means, under normal circumstances, there is not a real market for the coming war loan. In other words, this next issue will be the greatest test of our patriotism, so far as war loans are concerned. No matter what rate of interest the loan pays, the government must have the money to carry on the war, our share of which is costing $850,000 every day.

"It is more than ever up to the people this time to work hard and invest freely to make the issue a success. Financial men are pretty well agreed that to raise $150,000,000 this fall will prove a big task. Besides travelling over old war loan ground, we will have to strike new ground to make the loan successful. While the organization generally for our previous issues were fairly satisfactory, the nation, co-operating with the finance department, cannot organize too much or work too hard to see that the fourth war loan is fully subscribed and properly distributed throughout the length and breadth of the land."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended August 24th, 1917:—

Beaver Mine, 85,159; McKinley-Darragh-Savage, 86,346; La Rose, 87,650; Kerr Lake, 61,474; Hudson Bay, 87,044; Buffalo Mine, 58,852; Nipissing Mine, 430,060. Total, 898,344 pounds, or 449.17 tons.

The total shipments since January 1st, 1917, now amount to 19,328,147 pounds, or 9,664 tons.

If all the pit props used in Nova Scotia's coal mines in one year were placed end to end they would join Halifax with the coast of Ireland.

way, op
ket is to increas not a ny limit—its capacity.

* * *

BUSINESS AND SENTIMENT

PERHAPS in no other purchase which a man can make are business and sentiment combined so essentially as in the taking out of a life insurance policy. There are instances—and in growing number—where insurance is taken out for strictly business reasons. There are others—and these are greatly in the majority—where sentiment is the compelling motive. But more and more it is coming to be recognized that these too are "good business" for the insured himself as well as exceedingly necessary from the viewpoint of his dependents.

The business instincts that prompted a multi-millionaire like J. P. Morgan to secure for his estate $2,500,000 of ready funds, or which led a Winnipeg railroad contractor the other day to take out a $250,000 policy, are no different in kind from those which should prompt, say, the Western farmer to make sure of a substantial nest egg in cash for those who must carry on his business in the event of death

From "Canadian Finance."

The Canada Life issued a policy to J. Pierpont Morgan for $200,000.

The other policy mentioned ($250,000) was also issued by The Canada Life.

CANADA LIFE
ASSURANCE CO.
Head Office, Toronto
Established 1847

ALWAYS A PLACE FOR DEPENDABLE AGENTS

Those who can not only write applications but deliver policies, and are energetic in their methods. Good positions are ready for such men.

Union Mutual Life Insurance Co.
Portland, Maine

ARTHUR L. BATES, PRESIDENT. HENRI E. MORIN, SUPERVISOR

For Agencies in the Western Division, Province of Quebec and Eastern Ontario, apply to WALTER I. JOSEPH, Manager, 502 McGill Building, Montreal.

For Agencies in Western Ontario, apply to E. J. ATKINSON, Manager, 107 Manning Chambers, 72 Queen St. West, Toronto

EQUITABLE ADVANTAGES

The holder of an Equitable agency contract benefits not only by the impregnable strength and prestige of the Society, but also through being able to offer a variety of policies that meet with precision the requirements of the insuring public. Profitable openings at various points in Canada for men of character and ability, with or without experience in life insurance.

Net earnings	904,900	1,197,400	— 292,500

EAGLE AND BRITISH DOMINIONS COMPANY

One of the largest and strongest insurance corporations, the Eagle and British Dominions, with headquarters in London, England, has made rapid progress, especially during the past few years. The following table gives an indication of this at a glance:—

Year.	Premiums.	Assets.	Reserves.
1905	$ [illegible]	$ [illegible]	$ [illegible]
1906	581,255	[illegible]	[illegible]
1907	[illegible]	[illegible]	[illegible]
1908	[illegible]	[illegible]	[illegible]
1909	777,711	[illegible]	[illegible]
1910	1,332,572	1,867,142	866,043
1911	[illegible]	[illegible]	[illegible]
1912	1,714,407	[illegible]	[illegible]
1913	[illegible]	[illegible]	[illegible]
1914	3,050,712	4,360,560	2,475,955
1915	6,483,385	7,063,390	5,021,581
1916	8,803,862	18,037,574	14,959,027

The annual report for 1916 of the Eagle and British Dominions Insurance Company, Limited, which is the name under which the Eagle (established in 1807) and the British Dominions General were recently amalgamated, shows a very satisfactory position. The joint company has assets exceeding $18,000,000 and cash reserves and surplus of over $14,000,000. Briefly, the assets and liabilities are as follow: Assets—Investments, $15,873,350; cash in banks, $1,134,922; balances due company, $899,558; interest accrued, $129,744; total, $18,037,574. Liabilities—Capital authorized, $12,857,640; capital subscribed, $11,777,707; capital paid up, $2,631,168; claims due, etc., $447,379; reserves, $14,959,027; total, $18,037,574.

Mr. E. M. Mountain, the managing director of the British Dominions, has been appointed managing director of the joint company, and the staffs of both concerns have been retained in their various capacities. The business transacted in Canada is fire, sprinkler leakage, and marine insurance under the management of the well-known insurance firm of Dale and Company, Limited, of Montreal, with branches at Halifax, Toronto, Winnipeg and Vancouver.

At the company's recent annual meeting in London, an excellent report was presented. Mr. E. M. Mountain, presiding, reviewed the year's results, which were very creditable to the management. He made an interesting reference to the company's war loan scheme in the United Kingdom, which enabled many people who, from financial and patriotic reasons wished to support the war loan, to subscribe, who could not possibly otherwise have done so. "Instead of anyone borrowing money to buy the war loan," he said, "in which case if they lost their position, or died, they would leave their dependants in debt, our scheme provided in case of such a misfortune occurring, and the subscriber discontinuing the payment of the instalments, for a paid-up policy free from any further payments to be granted for such a proportion of the original amount of stock as the number of annual payments made bears to the total number payable under the policy, the subscriber becoming entitled to this stock on the maturity of this policy, and in the event of death they leave their dependants a considerable asset instead of a liability. Under this scheme we insured 30,000 new lives, and, in spite of the fact that our company had already subscribed for £1,250,000 war loan for their own account, we were able to subscribe for a further £4,000,000, which was entirely new money, which would not otherwise have been obtained."

TO BOSTON NEXT YEAR

The life underwriters of Canada will meet in annual convention at Boston next year, at the same time and place as the National Association of Life Underwriters of the United States. The Calgary association desired the convention in the Alberta city, and had a great deal of support on the floor of the convention. However, they gracefully withdrew, and it was finally decided to hold the convention in Boston next year and in Calgary in 1919. The Calgary delegates were a special attraction at the banquet on Thursday, appearing in cowboy togs.

NEW INCORPORATIONS

Canadian Hession Tillers and Tractors, Limited, a $5,000,000 Company, Incorporated at Toronto

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital and the persons named are provisional directors:—

ONTARIO CROPS ARE GOOD

Statistics of the Principal Field Crops Show Satisfactory Yields

The Ontario Bureau of Industries report the following crop conditions to *The Monetary Times*:

Fall wheat: 585,946 acres will produce 13,548,267 bushels or 23.1 per acre, as against 704,867 acres, 14,942,050 bushels or 21.2 in 1916 and 24,747,011 bushels in 1915. The annual average for the 35 years, 1882-1916, was 21.3. Spring wheat: 182,957 acres, 3,879,954 bushels or 21.2 per acre, as against 144,305 acres, 2,213,961 bushels or 15.3 per acre in 1916 and 3,439,949 bushels in 1915. Annual average, 16.1. Barley: 551,298 acres, 19,363,329 bushels or 35.1 per acre, as against 527,886 acres, 12,388,969 bushels or 23.5 per acre in 1916 and 19,893,129 bushels in 1915. Annual average, 28.0. Oats: 2,763,355 acres, 118,949,213 bushels or 43.0 per acre, as against 2,689,762 acres, 71,297,528 bushels or 26.5 per acre in 1916 and 120,217,952 bushels in 1915. Annual average, 35.6.

Rye Production Shows Decrease.

Rye: 133,077 acres, 2,305,601 bushels or 17.3 per acre, as against 148,738 acres, 2,354,410 bushels or 15.8 per acre in 1916 and 3,210,512 bushels in 1915. Annual average, 16.5. Peas: 90,322 acres, 1,635,963 bushels or 18.1 per acre, as against 95,542 acres, 1,243,979 bushels or 13.4 per acre in 1916 and 2,043,049 bushels in 1915. Annual average, 19.1. Beans: 114,785 acres, 1,535,683 bushels or 13.4 per acre, as against 53,999 acres, 583,105 bushels or 10.8 per acre in 1916 and 882,619 bushels in 1915. Annual average, 16.7.

3,509,045 Acres Devoted to Pasture.

Hay and clover: (not including alfalfa) 3,358,570 acres, 6,156,340 tons or 1.833 per acre, as against 3,294,419 acres, 6,739,259 tons or 2.046 per acre in 1916 and 3,825,026 tons in 1915. Annual average, 1.45. The acreages in other crops for which no estimates to yield have been made at this date are as follow:—Buckwheat, 153,457 against 229,205 in 1916; corn for husking, 258,935 against 258,332; corn for silo, 511,329 against 439,411; potatoes, 146,481 against 139,523; mangels, 49,148 against 42,793; sugar beets, 22,039 against 22,482; carrots, 2,920 against 2,391; turnips, 93,034 against 91,670; mixed grains, 515,593 against 485,986; alfalfa, 189,109 against 177,565. There are 3,509,945 acres of cleared land devoted to pasture; 232,679 in summer fallow against 331,736 in 1916; 280,326 in orchard; 21,964 in small fruits; 9,882 in vineyard; 58,297 in farm gardens; 37,732 in rape; 5,242 in tobacco; 7,372 in flax.

APPRECIATION

The Monetary Times,
Toronto, Ont.

Dear Sirs,

Replying to yours of the 25th. We have inadvertently paid you our subscription for two years. That need not matter very much. According to the writer's recollection we have always been a subscriber to The Monetary Times, and as far as the writer knows we always expect to be, so you will simply extend the date of our subscription to June 30, 1919.

Yours truly,

THE WATEROUS ENGINE WORKS CO.
Limited

Walter T. Mair,
Treasurer.

Brantford, Aug. 27, 1917.

PART-TIME LIFE INSURANCE AGENTS

Winnipeg Convention of Five Hundred Men Condemn the System

A decided antipathy to the employment by life insurance companies of men who devote only part of their time to the business was in evidence at the life underwriters' convention at Winnipeg last week, where 500 delegates registered. Mr. G. J. A. Reany, manager (Edmonton), Mutual Life of Canada, referred to the matter in his address, vigorously denouncing the practice of some companies in keeping part-time agents on their pay-roll. He characterized this system as "stealing the bread and butter from men who earn their livelihood by selling life insurance."

"It is harmful both to the regular agents and to the company that employs these men," Mr. Reany declared. "These part-time agents destroy the confidence that is being built up by specialists. A doctor does not allow a quack to look after his business, even for two or three hours a day. A lawyer, would not allow an uncalled practitioner to plead his case even for 15 seconds. Companies which employ these men will inevitably lose in the end."

In the discussion which followed, Mr. Franklin said he "had no sympathy whatever with the part-time man. He had met a clergyman in Winnipeg who was working also as a licensed life insurance agent. He had met, too, a bank manager who was writing insurance. "Men who are paid for the special work in which they are engaged, should not be permitted to rob the man whose time, thought and energy are directed entirely to the writing of life insurance.

To Write a Few Men.

Mr. O'Grady, Great-West Life, Winnipeg, was also opposed to the system, which had become a serious thing in the cities especially. He knew of companies which had appointed part-time men simply because the new agent would be able to write one or two men in his own office. Such a part-time agent was a pirate.

Mr. L'Esperance, Imperial Life, Montreal, said that the part-time man was the only thing in the life insurance business of which he was ashamed. In his inimitable style, he labeled the part-time men as "minnows, little fishes, gum shoe artists, back alley men," and a few other such designations.

How Do They Slip In?

Mr. T. E. Burke, North American Life, Montreal, said: "I know of many instances in which the head office has opened the door to these men to slip in their business in some way we do not understand. In Quebec province, we have to pay $10 for a license before we write business. There are hosts of part-time men in that province writing life insurance, many of them without even a license."

WELCOME WEEKLY VISITOR

"*The Monetary Times* is the leading financial journal in Canada and is a welcome weekly visitor wherever it goes."—Hamilton Times.

HOWARD KELLEY IS GRAND TRUNK'S PRESIDENT

Mr. Howard G. Kelley was elected at directors' meetings this week to succeed Mr. E. J. Chamberlin as president of the Grand Trunk and Grand Trunk Pacific companies. Mr. Chamberlin will remain a member of the board of directors. The following directors were present at the meetings: Messrs. W. H. Biggar, K.C., Howard G. Kelley, J. F. [illegible], [illegible], W. H. [illegible], Hon. R. Dandurand, Montreal; Wm. M. Macpherson, Quebec; including J. B. Fraser, of Ottawa; Peter McAra, of Regina; and Jules Hone, of Montreal, directors on the board representing the Dominion government

Ideal War-time Policies

Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt edged investment and perfect home protection.

SECURE AN ENDOWMENT WITH

American Newsprint Paper Industry

CANADIAN and United States Producers Have Intimate Relations—Costs of Production — Proposal of Manufacturers — Findings of United States Federal Trade Commission as to Fair Prices—Recommendations of Commission.

NEWSPRINT paper is produced in North America by approximately 80 manufacturing plants, of which, in 1916, 63 were located in the United States and 17 in Canada. Approximately 75 per cent. of the Canadian production is consumed in the United States.

These figures are contained in the summary of facts, with conclusions and recommendations, printed in the report of the Federal Trade Commission of the United States on the newsprint paper industry. Officials of the Dominion government are at present investigating conditions in regard to the Canadian paper industry and have conferred with the United States authorities. The report continues:—

The costs of producing newsprint paper depend upon varying factors, to wit, the size and integration of the plant, its access to supplies of wood, the character and cost of its water power, and the efficiency of equipment and management. The large mills, which generally are the most efficient, usually make contracts for their entire output for a year in advance with the large metropolitan papers for the bulk of their tonnage. Some large contracts have been made for periods of from three to five years. The smaller mills, and those which are operating at higher costs, usually supply the smaller publishers and sell a larger proportion of their output in the open market, through jobbers, at higher prices.

For the first six months of the year 1916 average costs of production had not increased over the last half of the year preceding. For the next four months, up to October 1st, 1916, the average increase of costs in the chief American mills was about $1.50 per ton. By December of 1916 and January of 1917 average costs in these mills had increased $5.52 per ton over the costs of the first six months of 1916, the increase in particular mills ranging from $1 to $19 per ton. It has been estimated that the average advance for the first half of 1917 would be between $5 and $10 per ton. Informal estimates made by the officials of the Canadian government placed the maximum increase in cost of production at $10 per ton for Canadian mills, and prices were agreed upon with the Canadian government by which publishers were furnished with newsprint paper at the following prices: $2.50 per 100 pounds for rolls and $3.25 for sheets in car lots and $3.50 per 100 pounds for sheets in less than car lots. These prices are subject to revision after June 1st, 1917.

Conditions in the newspaper publishing business were reported by the commission in March as serious and they continue to be serious. Within the year prices to large consumers of print paper have been advanced from about $40 per ton to over $60 and $70 per ton, and in some cases even up to $90 per ton. Also, by concerted action the terms of contracts have been so changed as to shift a considerable financial burden from the manufacturers to the publishers. To some of the larger newspapers of the country this price increase means, in some instances, an increase in paper cost of hundreds of thousands of dollars. This, in many cases, will not only cause the loss of profits for the year, but a serious financial embarrassment of the publication itself.

The smaller publishers have been forced to pay prices as high as $150 and $180 per ton. In addition to the above increase of prices among publishers of minor dailies and weeklies, it is complained that they found great difficulty in getting paper at any price, and to a large number of such publishers in the country the increase in the price means the difference between a living margin and the complete ruin of their business and the suspension of their publications.

The financial strength of great daily publications may enable them to survive; it is the smaller newspapers that will probably suffer the most seriously if these conditions continue. The small weekly and daily publications of the country particularly serve a great and useful purpose in the dissemination of facts and in the creation of an intelligent public opinion, and such disaster as impends by reason of this increase in the price of newsprint paper makes the question one of great public concern.

The existing situation is partly due to conditions of supply and demand. On account of the increase in advertising and news matter, there has been an increase in the demand for newsprint paper. The supply of newsprint paper available for domestic consumption increased from 1,644,000 tons in 1915 to 1,816,000 tons in 1916, an increase of 172,000 tons for the year 1916 over the year 1915. On January 1st, 1916, the stocks of newsprint paper carried by manufacturers were about 69,000 tons. At the end of 1916 these stocks were reduced to approximately 42,000 tons. While during 1916 prices advanced to an extraordinarily high level and there were difficulties in procuring paper, it is nevertheless a fact that newspapers were generally able to secure newsprint paper for their reasonable requirements if they would pay very high prices. The quantity manufactured during the year was equal, therefore, to that needed for reasonable requirements of newspapers within approximately 27,000 tons, which quantity was taken from the reserve stocks. It is probable that if publishers will exercise the strictest economy the supply will be equal to the requirements for the year 1917.

The close balance between supply and demand inevitably tended to create general uneasiness. There is much evidence that manufacturers, instead of attempting to allay this natural fear on the part of the publishers, played upon it deliberately. A panic market was the result. While there was approximately enough paper to go around, publishers were fearful that they could not get their supply. They tried to place orders with many mills and duplicated the placing of their orders for the purpose of being assured of a supply. Newspapers which had difficulty in closing contracts or which were fearful lest their supply under contract would prove inadequate went into the open market. The result was that requirements were made to appear many times greater than they actually were, and a fictitious demand was thus created, which produced a condition of panic with panic prices.

Prices Made Arbitrarily.

While these conditions obtained and would naturally have some influence upon price, it is the opinion of the commission that the prices were actually made in the industry without the operation of free competitive influences in their determination. By means of a trade association, organized ostensibly for a lawful purpose, conditions in the market were substantially influenced in a manner which would not be possible under conditions of free competition. Concert of action was made possible through this association in the matter of discouraging new production of newsprint paper, in the allotment of customers, in the promotion of fear that the supply would not be equal to the demand, in disseminating propaganda justifying higher prices because of alleged higher costs, and in other ways. The increase in the prices charged are not justified by the increased costs of production.

From the facts disclosed during the investigation, the commission submits the following conclusions:—

1. The increases in the selling prices of newsprint paper for the year 1917 in most cases were greater than could be justified by the increases in cost.

2. There is not now, and has not been, such a serious shortage of newsprint paper as to warrant the extremely high prices generally charged. The commission finds that there is enough newsprint paper to meet all the strictly necessary demands of publishers during 1917. There is, however, a close balance between supply and demand, so that the strictest economy in the use of newsprint paper is necessary.

Distribution System is Faulty.

3. The system of distribution of newsprint paper is faulty. By reason of this fact this close balance between supply and demand could easily be developed into local shortage, and this condition was taken advantage of and exaggerated by artificial means. Reports of alleged shortage were widely circulated for the purpose of justifying high prices. Keen competition among the comparatively unorganized publishers, who, in their anxiety to assure themselves of their necessary supplies of paper, bid feverishly in the open market, helped to make the situation more acute.

4. The increase in prices has been due in part to the fact that free competition has been seriously restricted in the newsprint paper industry. Important manufacturers in the United States and Canada were banded together to secure unreasonable profits.

5. Some small publishers have already been put out of business and more are likely to suffer the same fate, and some large publishers will be financially ruined and many others will be unable to make any profits unless conditions are remedied.

6. While jobbers have been severely criticized in respect to the prices charged by them, the commission has found many instances in which the mills have compelled the jobbers to pay exceedingly high prices, and in those instances it has been necessary for the jobbers in turn to charge extremely high prices to their customers. In some instances, however, it was found that jobbers who bought paper at reasonably low prices took advantage of their opportunity to sell at unreasonably high prices.

Efforts of the Commission.

The commission, while directing its efforts to a discovery of the facts affecting the economic and legal sides of the question, sought also, within the limitations of its power, to restore competitive conditions in the industry and at the same time to bring such immediate practical relief as would prevent serious financial distress and injury to publishers while the processes of competition were being restored. Public hearings were held, at which these several interests appeared, and many conferences were had with them. The efforts of the commission were made in the public interest, but some of them without express authority of law. Its aim was to act as arbiter in the situation for the purpose of securing prompt relief. It was particularly desired to provide some means whereby the smaller publishers could be relieved with respect to their most pressing necessities. The various interested parties, however, failed to come to any agreement among themselves. But, largely as a result of the commission's activities, some substantial relief was obtained for smaller publishers in various sections of the country through the co-operation of certain manufacturers, jobbers and publishers.

Proposal of Manufacturers.

Following the activities of the commission, certain manufacturers producing in the aggregate about one-third of the total tonnage of newsprint paper in the United States and Canada submitted a proposal to the commission, offering to sell at prices fixed by the commission under certain conditions.

When the proposal of the manufacturers was made known to newspaper publishers a number of the larger of them agreed that if the price in their contracts made for the purchase of paper should be reduced to the maximum price to be determined by the commission for the period of six months from March 1st, 1917, they would release each month up to 5 per cent. of their tonnage under contract, it being understood that such released paper would be used in the manner to be determined by the commission to help publishers without contracts.

Action of Jobbers.

As the needs of the smaller publishers, widely scattered throughout the country, were most urgent, and since they were largely dependent upon the paper jobbers for their supplies, and as such jobbers appeared to be the only means at hand for supplying these small publishers promptly, the commission deemed it advisable to call the jobbers for a conference. The result was that the leading jobbers entered into an agreement to handle and distribute such newsprint paper as the commission might place at their disposal at fair and reasonable maximum rates of compensation as follow:—

Single car lots direct from mill, not to exceed 5 per cent. on f.o.b. mill price.

Less than carload lots, but not less than ton lots, delivered from warehouse, not to exceed 12½ per cent. on cost in warehouse.

Less than ton lots, delivered from warehouse, not to exceed 20 per cent. on cost in warehouse.

The agreement also provided that the jobbers during the period covered by it would handle all their newsprint tonnage sold to publishers on the above rates of gross profit figured on current replacement value, and also that they would sell for cash or on approved credit in carload lots to the representative of any association of publishers at the same prices as to individuals.

Findings of the Commission.

Two specific phases of relief were presented in the proposal of the manufacturers set out above, (1) the matter of price reduction directly effecting the saving of millions to publishers, and (2) a more equitable distribution of paper supply directly benefiting the smaller publishers, not only saving them money, but preserving many of them from suspension and bankruptcy.

The second phase, that relating to the distribution of paper to the smaller publishers, while requiring a relatively small quantity of paper, was the most difficult of accomplishment. It was hoped that this paper would be obtained in part by the proposal of the larger publishers indicated above.

The proposal of the manufacturers and the action of jobbers and publishers having been defined, the commission decided to accept the difficult task of arbiter. In so doing it did not purport to act as an agency of government to fix prices, but, on the contrary, to serve only as an arbitrator.

The commission's findings were as follow:—

(1) That a fair and reasonable price for the sale of standard newsprint paper in rolls by each of the aforesaid signatory manufacturers for use in the United States during the six months period of time beginning March 1st, 1917, and ending August 31st, 1917, is the sum of $2.50 per 100 pounds f.o.b. at the mill in carload lots and is the sum of $2.75 per 100 pounds f.o.b. at the mill in less than carload lots.

(2) That a fair and reasonable price for the sale of standard newsprint paper in sheets by each of the aforesaid signatory manufacturers for use in the United States during the aforesaid six months period of time is the sum of $3.25 per 100 pounds f.o.b. at the mill in carload lots and is the sum of $3.50 per 100 pounds f.o.b. at the mill in less than carload lots.

(3) That no publisher or jobber who has an existing contract with any of the aforesaid signatory manufacturers for standard newsprint paper at a higher price or prices than is hereby found to be fair and reasonable shall be entitled to receive or be given the benefit of such reduced prices unless he files with this commission prior to March 20th, 1917, his written agreement to waive and release for sale and distribution to publishers only, who have no contracts, 5 per cent. of the total amount of tonnage specified in such contract.

(4) That if any extraordinary new conditions hereafter arise which make it unjust to the aforesaid signatory manufacturers to continue the aforesaid prices during the full period of said six months, this commission will re-adjust the same for the whole or any remaining part of the three months commencing June 1st and ending August 31st, 1917; provided that said signatory manufacturers file with this commission their written request so to do; and provided further that, in the opinion of this commission, the facts presented in such petition requires such action in order to prevent plain injustice.

Fair for Others, Too.

In making this award the commission stated that it was of the opinion that the foregoing prices for newsprint paper would not produce a fair and reasonable profit for some of the smaller mills under the unusual conditions now existing as to the cost of ground wood and sulphite. They produce not over 18 per cent. of the tonnage of the North American continent.

Further, it was of the opinion that on the basis of their respective costs of production, the foregoing prices were also fair and reasonable for each and all of the following manufacturers who did not join in this proposal: Minnesota & Ontario Power Company, including its subsidiary, the Fort Frances Pulp and Paper Company, Limited; Gould Paper Company; Finch, Pruyn & Company; Great Northern Paper Company; Pejepscot Paper Company; Crown Willamette Paper Company; St. Croix Paper Company; Price Brothers & Company, Limited; Donnacona Paper Company, Limited; Powell River Company.

In addition to the above companies, the Consolidated Water Power and Paper Company and the Wisconsin River Pulp and Paper Company could sell at a slight advance over the prices named and make a fair profit. It should also be stated that the Great Northern Paper Company, appearing in the above list, is and has been selling most of its output at prices as low or lower than those named; and it should be further stated that the Powell River Company and the Crown Willamette Paper Company have much tonnage under long-time contracts at lower prices.

Award was Announced.

As soon as this award was announced a majority of the contract customers of the signatory manufacturers signed the agreement with the commission to release 5 per cent. of their tonnage and to eliminate returns. Some of the customers of the International Paper Company found it impossible to sign this agreement, because they had already been reduced in their tonnage from 10 to 20 per cent. below what they consumed during the preceding year. Other customers of the International Paper Company refrained from signing the agreement fearing that it would cancel their contracts and leave them in the open market at the end of the period covered by the arbitration. This fear was incited in some instances by the activities of the International's sales agents.

In order to reach a satisfactory settlement of this and other doubtful matters connected with the arbitration, negotiations were continued with the signatory manufacturers during the month of March, 1917. Efforts were also made during this period to induce several other large manufacturers to join in the agreement. Before these matters were disposed of the commission was notified by the department of justice that it intended to continue proceedings against the newsprint manufacturers.

On April 11th, 1917, the federal grand jury for the southern district of New York brought indictments against the following newsprint manufacturers for violation of the Sherman law: Philip T. Dodge, International Paper Company; George H. Mead, Spanish River Pulp and Paper Mills, Limited; Alexander Smith, Abitibi

Power and Paper Company; George Chahoon, Jr., Laurentide Company; G. H. P. Gould, Gould and Donnacona Paper Companies; E. W. Backus, Minnesota and Ontario Paper Company; Frank J. Sensenbrenner, Kimberly-Clark Company.

The first four of the indicted manufacturers were signatories to the arbitration agreement.

Having heard nothing from these manufacturers after the indictments were brought, the commission on April 21st, 1917, sent them a list of their contract customers who had signed up and requested them to state what means they had taken to give these publishers the benefits of the arbitration agreement, and what disposition they were prepared to make of the 5 per cent. of contract tonnage of paper surrendered by these publishers.

To this letter the manufacturers replied that in view of the indictments, which were unexpected when the agreement was entered into, they desired to give the matter further consideration. During the last week of May, 1917, counsel for two of the indicted manufacturers notified the commission that his clients had decided to withdraw from the arbitration submission of February 15th, 1916.

Recommendations of Commission.

The withdrawal of the largest manufacturers from the arbitration arrangement resulted in the failure of the effort of the commission to bring relief to the situation by voluntary co-operation of the interested parties. It, therefore, has decided to recommend as a war emergency measure that Congress by appropriate legislation provide:

(1) That all mills producing and all agencies distributing print paper and mechanical and chemical pulp in the United States be operated on government account; that these products be pooled in the hands of a government agency and equitably distributed at a price based upon the cost of production and distribution, plus a fair profit per ton.

(2) That pursuant thereto some federal agency be empowered and directed to assume the supervision and control thereof during the pendency of the war.

(3) That, by reason of the fact that approximately 75 per cent. of the production of newsprint paper in Canada comes into the United States, proper action be taken to secure the co-operation of the Canadian government in the creation of a similar governmental agency for the same function, which shall be clothed with power and authority to act jointly with the governmental agency of the United States for the protection of the consumers and manufacturers of print paper and the public of the United States and Canada.

(4) That in case the Canadian government shall not join in such a co-operative enterprise, then importation of paper and mechanical and chemical pulp into the United States shall be made only on government account to or through the federal agency charged with such supervision and distribution.

NEXT WAR LOAN IN NOVEMBER

The next Canadian war loan will be issued in November. This will give ample time for everybody to get ready for it and to complete the nation-wide organization to make it a success. The demands upon the treasury at this time are of a two-fold nature; first, to provide Canada's war expenditure, and secondly to establish credits out of which the Imperial government may purchase not only munitions, but essential foodstuffs such as cheese, bacon, flour, grain, canned goods, for the army in the field and the civil population at home.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Alberta.—The Manufacturers' Life Insurance Company of Toronto have purchased $18,650 7 per cent. 10-year school debentures at 100.00, and $1,[illegible] 7 per cent. 10-year school debentures at 100.25.

Courtenay, B.C.—The following certificate has been issued by the Municipal Department of the Province of British Columbia:—By-law No. 29, electric light, $20,000, 20-years, interest 6 per cent., payable half-yearly. Date of certificate, August 20th, 1917.

Saskatchewan.—The following is a list of authorizations granted by the local government board during the week August 20th to 25th, 1917:—

School Districts.—Middagh, $1,800 10-years not ex. 8 per cent. annuity. J. H. Middagh, Elbow; Sully, $1,600 10-years interest at 8 per cent. annuity. J. H. Farnsworth, Expanse; Brook Hill, $1,800 10-years not ex. 8 per cent. annuity. Mick Karaloff, Blaine Lake; Atwater, $5,500 15-years not ex. 8 per cent. annuity. D. R. Williams, Atwater.

Rural Telephone Companies.—Downing, $2,300 15-years not ex. 8 per cent. annuity. J. A. Reinhardt, Lajord; Kent, $1,400 15-years not ex. 8 per cent. annuity. August Heinrich, Davidson; Walpole, $500 15-years not ex. 8 per cent. annuity. H. B. Witts, Walpole; Budapest, $7,000 15-years not ex. 8 per cent. annuity. Geo. Iszak, Bender; Swanson, $13,500 15-years not ex. 8 per cent. annuity. J. Orville, Clark, Govan; Maple Bush, $10,500 15-years not ex. 8 per cent. annuity. Robt. O. Coghlan, Maple Bush; Elfros, $24,500 15-years not ex. 7 per cent. annuity. P. J. Green, Elfros; Wheat Valley, $3,600 15-years not ex. 8 per cent. annuity. W. B. Jones, Success.

The following is a list of debentures reported sold during the week August 20th to 25th:—

School Districts.—Valley City, $7,000. Great-West Life Assurance Company, Winnipeg; Chippewa Hill, $1,200. Goldman & Company, Regina; Baupaume Park, $1,800. Goldman & Company, Regina; Winton Hill, $2,000. Goldman & Company, Regina; Irvin, $2,000. Canada Landed and National Investment Company. Border Line, $2,000. Nay & James, Regina; Upper Wakefield, $350. Jos. Perras & Company, Montmartre.

Rural Telephone Companies.—Smiley Western, $600 Regina Public School District Sinking Fund; North Prairie, $600. H. A. Tubby, Souris; Holdfast, $10,300. C. F. Williams, Balgonie; North Brock, $8,700. W. L. McKinnon & Company; Dinsmore, $7,900. W. L. McKinnon & Company; Linden Valley, $9,700. W. L. McKinnon & Company; Pizarro, $11,900. W. L. McKinnon & Company; Warren, $5,400. Nay & James; Noremac, $20,200. Nay & James; town of Radisson, $2,969.12. G. A. Bennett.

BONDS AWARDED

The following bonds have been awarded to Messrs. W. L. McKinnon Company, Toronto:—

Radisson, Sask.—$7,991 7 per cent. 20-year.

Riverhurst, Sask.—$2,500 8 per cent. 10-year.

Winslow, Sask.—$6,000 6½ per cent. 10-year.

This company has also been awarded several issues of rural telephone debentures.

CANADIAN MARCONI

Principal figures of the company for 1916 compare with the previous year as follows:—

	1916.	1915.
Operating profit	$104,929	$110,226
Previous balance	80,816	5,728
	$185,745	$115,954
Deductions	44,640	35,138
Balance	$141,105	$ 80,816

It was reported the output of the plant in Montreal was somewhat less than during the previous year, due to the fact that a smaller number of installations was required for naval purposes.

The company has been awarded further important orders for the purchase of a considerable number of wireless sets of various types.

IMPORTANT COMPANIES ACT JUDGMENT

In view of its importance there is published on another page the full text of the judgment of Mr. Justice Masten in Currie v. Harris Lithographing Company, Limited, and Attorney-General of Ontario v. Harris Lithographing Company, Limited. The first of these cases was brought before the courts at the instance of the Canadian Manufacturers' Association in order to test the validity of the Extra-Provincial Corporations Act of the province of Ontario in relation to trading companies incorporated by the Dominion. The Attorney-General of Ontario intervened in the first case and also brought a second action on behalf of the province in order to insure the right to appeal. The decision is to the effect that the act in question is *ultra vires* of the provincial legislature and that it is not necessary for a Dominion trading company to take out a license under the act before carrying on business in Ontario. It is also held that a Dominion company cannot hold land in the province without a license from the provincial authorities. No reasons are given for this latter decision but it is stated that the incapacity arises, not because of the Extra-Provincial Corporations Act, but because of the Mortmain and Charitable Uses Act. This latter act is a consolidation of some old English statutes aimed originally at the practice of religious corporations of holding lands in Mortmain (dead hand), whereby the feudal lord was deprived of the ordinary dues which were payable on the succession of the property to the heir. By an old Canadian decision these acts were declared to be in force in Canada but they have never been taken seriously by Canadian lawyers and have not been practically operative.

The decision does not necessarily apply to all companies incorporated by the Dominion. The objects of the company in question in this case clearly identified it as a "trading" company. It may be that every manufacturing company can be similarly identified but this should not be too implicitly assumed.

Mr. Justice Masten had before him the decisions of the courts of Saskatchewan and Manitoba on similar legislation in those provinces and that his decision is unequivocally contrary to the decisions in those cases.

In a letter to *The Monetary Times*, Mr. F. W. Wegenast, acting for the defendant in both cases, points out that there is a rather important question as to the word "acquiring" in the answer to the fourth question in the Currie case. The original copy of the judgment had the word "occupying" but the registrar changed it to "acquiring," to correspond with the answer to the fourth question in the attorney-general's case. The claims, however, in the two cases were different. In the Currie case the plaintiff claimed an injunction to restrain the defendant company from "occupying and holding" certain lands. The judge has been asked to settle the wording.

LICENSING INSURANCE AGENTS

Those who are selling insurance, or propose to do so, must obtain a license. That is the case in several provinces and may one day be so throughout Canada. In Dauphin, Manitoba, recently, Herman Finnen, of Gilbert Plains, was prosecuted for soliciting life insurance without first obtaining a license. The prosecution was conducted by Crown Prosecutor Simpson on behalf of the department of insurance of Manitoba. The accused was arraigned on three charges, pleaded guilty, and was fined the minimum fine of $20 on each charge, or in default, to 20 days' imprisonment. The various departments of insurance are determined to enforce the provisions of the insurance act. The licensing of insurance salesmen protects the public, the insurance companies, and the salesmen themselves.

WORKING AT INSURANCE

The life insurance profession is attracting excellent men to its ranks. During the past fifteen years especially, life insurance salesmen as a group have improved their calibre to a remarkable extent. At a recent convention of Canadian life underwriters, it was stated that, other things being equal, the man entering the underwriting profession who already has a large connection, whether business or social, will obtain more business than the man who has a limited connection or no connection at all. One man discovered the value of a business connection when in the second month of his work selling insurance he closed as much business as some men do after several years of underwriting.

Mr. F. G. Hassard, of Toronto, at a gathering of life insurance salesmen at Winnipeg two weeks ago, said that ever since he entered the profession of life insurance salesmanship the one idea that had proven the motive power of his business activities had been efficiency of service. More than once he had remarked to the prospects solicited, "If I cannot render you the service you require, or in other words, if I cannot provide you the insurance contract that meets your needs, I do not want your business." That typifies the new spirit in Canadian life insurance. Every company is anxious to sell their prospective clients the insurance policy best suited to their individual requirements. Life insurance is a necessity. Men do not seek it often because it is human nature to dodge the inevitable. Life insurance must therefore be sold by salesmen. The men who are selling it to-day can justly demand a hearing of the high and lowly, because they have to sell something which every citizen should have, and because they are salesmen of whom the life insurance business and the country may well feel proud.

SELLING IN CANADA

Now that preparations are being made for post-bellum trade, up to date commercial information is exceptionally valuable. In his report to the British government's Board of Trade, on the trade of Canada for 1916, Mr. C. H. Wickes, H.M. trade commissioner in this Dominion and Newfoundland, not only discusses economic conditions here and analyzes, statistically, United Kingdom trade with Canada, but he gives also some important hints to traders with Canada. He notes that many of our wholesale dealers insist that cheapness is by no means the determining factor in the Canadian market. It gives place to selling capacity and to the tastes and requirements of the ultimate purchaser. "They also complain," says the commissioner, "that United Kingdom travellers are often so engrossed in the superiority of the article they carry as not to realize that intrinsic value is only one factor in the popularity of a commodity; and while the Canadian wholesaler is ready to acknowledge superiority where it exists, he is more concerned to find goods that will sell themselves, and entail little or no education of his selling staff or the general public. Manufacturers should make the article the public require, and follow this by organized distributive effort. It should be understood that United States firms send well-trained salesmen into Canada in large numbers, and, salesmanship being highly developed in the United States, it must be met by selling ability of an equal or higher calibre on the part of United Kingdom manufacturers, particularly by firms wishful to introduce their goods, and also by those who desire to maintain and develop their existing trade."

This is a point upon which too much emphasis cannot be placed. The business of selling on this continent, especially in the United States which does a very large trade with Canada, has been given much expert attention. The art of salesmanship is being taught in practical courses to their men by a large number of companies. When an American salesman goes out, he is thoroughly posted on his firm's products, having in many cases an intimate knowledge of the factory process. He knows what competition will be met and has a good idea of how to meet it. He is acquainted with objections which may be raised by prospective buyers, and he has excellent replies ready. He knows the methods of doing business in the market in which he sells. He is posted on the financial condition, and the general reputation and even peculiar personal traits of his prospect, before he tries to sell. His head office supports him with adequate office and travelling expenses, and in other ways, an important factor which many United Kingdom firms have not yet recognized. If the American salesman meets an unexpected obstacle, he will do everything possible to remove it. If difficulties are experienced with financing the purchase of a plant by a municipality, for example, the salesman will frequently arrange a conference with his head office, his prospects and a financial house. While salesmanship is now highly developed in the United States and in Canada, still further progress will be made in the next few years. The World's Salesmanship Congress held in the United States every year is a revelation of the time, money and labor expended by business interests of this continent to train and produce the best type of salesmen for this market. Moreover, the training has repaid many times the effort and expense involved.

CANADIAN NORTHERN DEAL

The proposal to acquire the Canadian Northern Railway on behalf of the country does not seem to please anyone particularly. Advocates of government ownership and operation are disappointed because the government will purchase only the Canadian Northern and not the Grand Trunk system as well. Their disappointment is well founded. They are satisfied with the deal only because it is what is vaguely termed "the first step" to the nationalization of railways, the next step not being mentioned. Those who have objected to bond guarantees and other assistance to the Canadian Northern are satisfied only to the extent that such assistance has apparently ended although they are left to speculate as to what will be paid for this privilege, after the arbitration. None of the benefits of nationalization which were pictured in the Drayton-Acworth report will be achieved by the purchase by the government of the Canadian Northern Railway. The newly acquired government road will compete with the Canadian Pacific Railway, admittedly one of the best-managed and operated railway systems on this continent. It will compete also with the Grand Trunk system whose management has just been reorganized. The economies and avoidance of duplications proposed in the Drayton-Acworth plan, will not be effected by the present Canadian Northern proposal.

Lord Shaughnessy stated this week that the Canadian Northern and the Canadian Pacific companies had discussed the acquisition of the former company by the latter. The country, we think, would be better off with the business-like management of the combined roads by the Canadian Pacific Railway than it would with the management of the Canadian Northern as a government institution. Sir Thomas White states that the negotiations for the purchase of the Canadian Northern by the Canadian Pacific were initiated by the two companies and not by the government. Lord Shaughnessy, however, did not say that these negotiations were instituted by the government but that the discussion was at the suggestion "of members" of the Dominion Cabinet. Whoever instituted the proposal, it is unfortunate, we think, that it did not materialize. The Canadian Northern deal, in its isolation, is a poor expedient and under the circumstances will likely prove an expensive experiment in government ownership.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended August 31st, 1917:—

Dominion Reduction Company, 255,300; Kerr Lake, 119,212; Nipissing Mine, 107,630; La Rose Mines, 87,375; Crown Reserve, 40,000. Total, 609,517 pounds, or 304.75 tons.

The total shipments since January 1st, 1917, now amount to 20,027,664 pounds, or 10,013 tons.

PERSONAL NOTES

MR. HOWARD G. KELLEY, vice-president of the Grand Trunk Railway, has been appointed president, succeeding MR. E. J. CHAMBERLIN. Mr. Kelley began his railway career in 1881 on the Northern Pacific Railway where he was engaged as assistant engineer on location, construction and bridge building. In 1887 he accepted the position of resident engineer and superintendent of bridges and buildings on the St. Louis Southwestern Railway System, including the St. Louis Southwestern Railway of Texas and the Tyler Southeastern Railway. Three years later, in 1890, he was appointed chief engineer of the St. Louis Southwestern System, a position which he held until March, 1898, when he became consulting engineer of the same road, holding at that time the position of chief engineer of the Minneapolis and St. Louis Railroad System, and having charge of the construction, maintenance and real estate departments. In 1900 his responsibilities were further added to by his appointment to have jurisdiction as chief engineer of the Iowa Central Railway. In 1907 Mr. Kelley joined the Grand Trunk Railway System as chief engineer, four years later being promoted to the position of vice-president. The American Railway, Engineering and Maintenance of Way Association elected him president in 1905, and he presided over deliberations of that body until March, 1907. Mr. Kelley has occupied the position of vice-president in charge of operating, maintenance and construction departments of the Grand Trunk Railway System, from October, 1911, to the date of his appointment as president of the combined Grand Trunk Railway System, Grand Trunk Pacific Railway and subsidiary lines. He takes to his new position the best wishes of a host of friends.

Mr. Howard G. Kelley.

MR. WILFRID H. CUNNINGHAM, of the banking firm of Kurtz Brothers, of Philadelphia, has been elected president of the Lake Superior Corporation.

MESSRS. T. GEDDES GRANT, of Port of Spain, Trinidad, with a view to meet expeditious handling of Canadian shipments, have opened a branch at Bedford Chambers, Halifax. Mr. T. Geddes Grant has been devoting his attention to the development of business between Canada and the British West Indies for nearly seventeen years, and has travellers visiting all the colonies included in the Preferential Trade Agreement with Canada.

MR. S. E. SALLS, who has again taken up his connection with the Toronto branch of the Canada Life Assurance Company, first commenced work in Toronto under Messrs. Geo. A. and E. W. Cox in July, 1891. In a year's time he became district agent for East York and Ontario County, afterwards taking in the counties of Durham, Victoria, Haliburton and Peterborough, of which he was district manager for eighteen years. In 1910 he became branch manager for the company at southern Ontario, which office he held for four years. In August, 1914, when the southern and central Ontario fields amalgamated, Mr. Salls accepted the position of inspector of agencies for the western Ontario branch, where he remained until his return to Toronto in January last, when he became connected again with the city work and to some extent with the outside districts.

MR. FISHER, insurance superintendent of Saskatchewan, attended the recent annual convention of American Insurance Commissioners at St. Paul.

MR. GEO. J. STEELE has been appointed general manager of the Canadian Export Paper Company, Limited. Mr. Steele was formerly secretary of the American Newsprint Manufacturers' Association.

MR. M. J. HANEY, president of the Home Bank of Canada, has just completed an inspection tour of several weeks throughout the western provinces. "The people of British Columbia," he said in a recent interview, "have simply found themselves again and everywhere there are signs of industrial activity and expansion."

MR. F. T. WALKER, who has been appointed manager of the New York agency of the Royal Bank of Canada, will be succeeded by Mr. R. L. Ritchie, as manager of the main branch of the bank in Montreal. Mr. Ritchie has been branch manager for the Royal at Regina, Winnipeg, and Halifax comes from the last-named centre to take up his new duties here. He will be succeeded at Halifax by Mr. F. St. Clair Harris, assistant manager of the Royal Bank at Vancouver.

MR. R. S. MCLAUGHLIN, president of the McLaughlin Motor Car Company, Limited, of Oshawa, Ont., has been elected a director of the Dominion Bank of Canada, Toronto. Mr. McLaughlin was born in Durham County, Ont., and educated at Oshawa public and high schools. In 1887 he entered his father's business, a few years later being taken into partnership. In 1900 when the company was incorporated he was elected treasurer and director. When the McLaughlin Motor Car Company was formed in 1908 he was appointed president and director, he was also made treasurer and director of the Chevrolet Motor Company of Canada. Mr. McLaughlin is a member of the Canadian Manufacturers' Association, and the Canadian National exhibition Committee.—(*Photo by British and Colonial Press.*)

Mr. R. S. McLaughlin.

MR. DANIEL F. COYLE, formerly private secretary to the late Sir William Whyte, and latterly Industrial Commissioner of the Canadian Northern Railway, has been appointed superintendent of western offices of the Home Bank of Canada. This institution has a close working arrangement with the Grain Growers' Grain Company, Limited, and in this way has been brought in touch with the financing of considerable portions of the wheat crops in the western provinces.

MR. FRANK H. REID has been appointed manager at the Winnipeg office of the Home Bank of Canada. Mr. Reid has been [illegible] in banking. In [illegible] he entered the services of the Union Bank of Canada at Minnedosa. In 1904 he joined the Bank of British North America. In 1907 he entered the service of the Home Bank of Canada as accountant, Winnipeg office. In May, 1915, he was made superintendent of [illegible] and now he receives the appointment of manager of the Winnipeg office.

The Bank of British North America

INCORPORATED BY ROYAL CHARTER

The Court of Directors hereby give notice that an interim dividend, for the half-year ended 31st May last, of 40 shillings per share, less Income Tax, being at the rate of 8 per cent. per annum, will be paid on the 5th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the legal par of exchange on the 5th day of October next.

No transfer can be made between the 21st inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

By order of the Court of Directors.

PROPOSED BANKRUPTCY ACT

Draft Prepared by Mr. H. P. Grundy, Winnipeg, is Explained

The draft of a bankruptcy act for Canada was recently prepared by Mr. H. P. Grundy, barrister, Winnipeg. Mr. H. Detchon, general manager of the Canadian Credit Men's Trust Association, communicated with commercial houses in Great Britain, Australia and the United States for the purpose of acquiring information as to the practical working out of bankruptcy acts in these countries and it was evident from the replies received by him that there was considerable dissatisfaction as to the results obtained from winding up insolvent estates under such acts.

The chief grounds of complaint were the expense and delay, and these were common to the three countries, while a further serious objection existed in the United States by reason of the laxity which existed, not only in the act itself, but also with judges in granting discharges to bankrupts.

At a meeting of the Canadian Credit Men's Trust Association, the four defects or omissions in our present insolvency laws were also discussed, and these were shortly as follow:—

Firstly, the lack of uniformity relating to insolvency laws in Canada; secondly, the absence of machinery for compelling an insolvent debtor under certain circumstances to turn over to a trustee for creditors his property for pro rata distribution among creditors (involuntary bankruptcy); thirdly, the ratification by the court of composition and extension agreements when approved by a certain majority of creditors (say 75 per cent.) thereby binding the minority, and fourthly, the right of an honest but unfortunate debtor to obtain his discharge.

Mr. Grundy was asked at this meeting to draft an act which would be simple and inexpensive in its operation and which would make provision for the above omissions or defects and carefully guard the granting of discharges. Generally speaking, the draft act is based upon the English act and at the end of each section taken from such act he has noted the corresponding number of the English section for the purpose of reference. Commenting upon the proposed act for Canada, Mr. Grundy says: "There is one important variation in principle, namely, the English act is drawn on the assumption that every estate should come before and be under the supervision of the court, its judges and officers, whereas I have adopted the principle that the administration of insolvent estates is a matter that should be kept out of the court so far as possible and that better results, less delay and expense could be obtained if the trustee deal direct with the debtor and creditors without the intervention of the court, care being taken in the appointment and bonding of trustees. In explaining the details of the draft act I will commence at part one thereof and refer shortly only to general principles and the sections which I think require explanation and discussion.

"Part one refers to courts and procedure and you will note that jurisdiction is proposed to be given only to the high courts in each province. The reason for this is that it is not expected that very many bankruptcy matters (outside of the granting of discharges) will come before bankruptcy judges and it is thought that greater care would be exercised by the high court judges in the granting of discharges. This is an important matter, and one which commercial and financial interests fear might be subject to some abuse if not under the control of the judges of the high courts. Section ten of part one provides for general rules to be made by the court in each province. This follows the English act and it would be especially convenient in Canada for the particular practice and procedure of each province could thereby be retained. Sections twenty-six and twenty-seven provide for appeals and you will note that the decision of the appellate court is to be final, unless special leave is given to appeal to the supreme court of Canada.

In Voluntary Bankruptcy.

"Part two refers to involuntary bankruptcy and is restricted in its application by paragraph thirty-nine, which provides that part two shall not apply to corporations, wage earners or farmers. It was thought that the involuntary procedure should not apply to corporations as this might conflict with the winding-up act; and as to wage-earners—the interpretation clause on page sixty defines a wage earner as an individual who works for wages, etc., not exceeding $1,500 per annum. The reasons why farmers should not be subject to involuntary bankruptcy are quite obvious.

"In this part there is a slight departure from the English practice for the official referee provided for in the English act has been dispensed with and section thirty-two of the draft act provides that on the making of a receiving order one of the trustees appointed in the manner provided by the act shall be constituted receiver. Section twenty-eight, relating to 'acts of bankruptcy,' should be given careful consideration for this has been made somewhat wider than the English act. See particularly sub-sections 'F,' 'G' and 'H.' Section thirty-eight, providing for the 'administration of insolvent estates of deceased debtors,' is taken from the English act and although these provisions would be new in Canada, it is thought that the English act should be followed by adopting the same or similar provisions.

Assignments, Compositions and Extensions.

"Part three refers to assignments, compositions and extensions and it is in this portion of the act that the departure in principle from the English act referred to in the former part of this letter is sought to be effected.

"Under the English practice a debtor would file a voluntary petition in bankruptcy, asking the court to declare him bankrupt and to make a receiving order. I propose to eliminate the expense and delay of the procedure in England by adopting the procedure established in most of the provinces under the various assignments acts, that is—making an assignment direct to a trustee. There seems to be no real reason why a debtor who wishes to turn over his property to his creditors for pro rata distribution should have to incur the expense of making an application to the court. A simple assignment for the benefit of creditors should be sufficien This portion of the act will no doubt conflict with the provincial assignment acts, but I assume that if public opinion is in favor of a uniform federal bankruptcy act the various provinces will have no objection to repealing any conflicting legislation. It may, of course, be necessary for the provincial governments to retain some legislation providing for assignments by persons who are not insolvent under the proposed Dominion act but such assignments would no doubt rarely occur.

By section forty-two of part three, the general principle recognized by the English and American acts, namely, that the creditors should have control of insolvent estates, is followed by giving the right to the majority of the creditors to nominate and control the trustees. Paragraphs fifty-four and fifty-seven deal with compositions and schemes of arrangement and follow closely the provisions of the English act. The difficulties and litigation that are attendant upon extension and composition agreements at the present time have persuaded me that legislation providing for the ratification of extension and composition agreements is urgently needed.

Trustees and their Duties.

"Part four refers to trustees, their appointment and to the administration of estates by them. One of the chief difficulties which I have heard discussed in connection with trustees is the danger of party politics entering into their appointment and section fifty-eight has been framed with the object of giving each community an opportunity of nominating to the governor-general-in-council suitable persons to be

To a Salesman who prefers the Coast:

This is an invitation to communicate with the Canada Life Assurance Company, Vancouver, for information as to general conditions and possibilities in the interesting Province of British Columbia.

appointed as trustees. Under section fifty-nine other trustees may be appointed by the governor-general-in-council.

"Sections sixty and sixty-one provide for the bonding of these trustees. This question has been discussed at meetings of the legislative committee of the association and the feeling expressed at these meetings was that a substantial general bond should be prescribed and that in addition the creditors should have the power to compel the trustees to give additional security for the administration of any particular estate. Sections sixty-two and sixty-three give power to the majority of creditors to change the trustee.

"Sections sixty-six to seventy-two as to the duties and powers of trustee follow substantially the English provisions, which are not materially different from the existing laws of the different provinces. Section seventy-three should be given careful consideration for by sub-section 'C' the principle contained in the English act as to 'reputed ownership' is followed and there are certainly very strong reasons why this should be done. Sections seventy-nine to eighty-two deal with settlements and preferences; some of these sections have been taken from the English act and others have been taken from the Ontario and Manitoba assignments act. These sections will require further careful consideration.

"The remuneration of trustee is dealt with by sections ninety-two and ninety-three and your attention is drawn to subsection 2 of section ninety-three which provides for the taxation of the trustee's fees, remuneration and disbursements unless waived by the creditors. Sections ninety-four to one hundred and nine refer to meetings of creditors and some of these sections are taken from the English act and the others from the Ontario and Manitoba acts. Section one hundred and ten refers to the appointment of inspectors and it is suggested that no remuneration or fees be paid to them unless authorized by resolution passed at a duly called meeting of creditors.

"Sections one hundred and thirteen to one hundred and twenty-one should be given careful consideration for the practice now in force in most of the provinces as to the valuation of security is varied and the English act followed. Paragraph one of subsection one hundred and sixteen provides that the trustee may redeem the security upon payment of its assessed value. There seems to be no real reason why a secured creditor should obtain practically a bonus of 10 per cent. on his security, when taken over by the trustee, as is the present practice in most of the provinces.

"Subsection two providing that a trustee may have the security offered for sale, is also a good provision. Sections one hundred and twenty-four to one hundred and twenty-seven contain new provisions so far as Canada is concerned. Sections one hundred and twenty-four and one hundred and twenty-five providing that a husband or wife (as the case may be) shall not be entitled to claim any dividend for money lent or for wages until the claims of the other creditors have been paid in full, are in part taken from section 36 of the English act, the addition being in respect of wages.

"Sections one hundred and twenty-six and one hundred and twenty-seven follow the same principle and the object of the two last mentioned is to prevent fraudulent claims for wages being made against bankrupt or insolvent estates by relatives of an insolvent person or by shareholders or officers of an insolvent corporation. The experience in the past has been that it is very difficult to contest such wage claims in cases where the creditors have felt that the claims were not just and there can be no hardship on the parties affected by these provisions if it becomes generally known that claims for moneys lent and for wages are restricted and postponed to the claims of the general creditors, for the parties interested can then decline to make loans and see that their wages are paid promptly. Sections one hundred and thirty-one and one hundred and thirty-two refer to 'rights of landlord,' and these sections will no doubt require more mature consideration as this is a subject in respect of which a great deal of uncertainty and litigation has occurred."

Debtors and Bankruptcy.

Part six refers to debtors, their duties, examination of debtors, disqualification of bankrupt and discharge of bankrupt or assignor. The provisions of section one hundred and forty-two providing for disqualification of a bankrupt follows a similar English provision and it is thought that legislation of this sort will help to make involuntary proceedings in bankruptcy unpopular for debtors who should really make an assignment. Sections one hundred and forty-four to one hundred and fifty-six, referring to the discharge of a bankrupt or assignor follow closely the provisions of the English act and it is thought that if the judges follow the same conservative course which has been adopted by the English bankruptcy judges very few abuses will arise. One change from the English act occurs in subsection "D" of section one hundred and fifty-six, which provides that an order of discharge shall not release the bankrupt or assignor from any debt for necessaries. It has been suggested that such debts should be paid in full or that the court should make some arrangement for the due payment thereof.

A number of the sections in part seven have been taken from the English act and some of the sections of the criminal code of Canada have also been incorporated therein. Part eight deals with supplemental provisions which have been taken from the English act.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first four weeks in August:—

Canadian Pacific Railway.

	1916.	1917.	Increase or decrease.
August 7	$2,985,000	$2,559,000	— $426,000
August 14	2,943,000	2,746,000	— 197,000
August 21	2,860,000	2,700,000	— 160,000
August 31	4,092,000	4,018,000	— 74,000

Grand Trunk Railway.

	1916.	1917.	Increase or decrease.
August 7	$1,256,376	$1,320,706	+ $ 64,330
August 14	1,236,989	1,320,753	+ 83,764
August 21	1,304,848	1,371 233	+ 66,385
August 31	1,952,163	2,008,128	+ 55,965

Canadian Northern Railway.

	1916.	1917.	Increase or decrease.
August 7	$ 868,000	$ 775,500	— $ 92,500
August 14	841,500	746,800	— 94,700
August 21	846,300	748,500	— 97,800
August 31	1,129,100	1,134,400	— 5,300

BANK CLEARINGS

The following are the bank clearings for the weeks of August 31st, 1916, and September 1st, 1917, respectively, with changes:—

	Week ended Sept. 1, '17.	Week ended Aug. 31, '16.	Changes.
Montreal	$ 74,969,187	$ 54,554,604	+ $20,414,583
Toronto	53,782,798	43,438,409	+ 10,344,389
Winnipeg	29,437,148	40,132,678	— 10,695,530
Vancouver	8,316,809	6,815,502	+ 1,501,307
Ottawa	4,833,726	3,982,030	+ 851,696
Calgary	5,056,353	4,070,172	+ 986,181
Hamilton	4,405,881	3,236,516	+ 1,169,365
Quebec	3,347,586	3,331,991	+ 15,595
Edmonton	2,292,985	1,690,226	+ 602,759
Halifax	2,524,601	1,754,498	+ 770,103
London	1,654,636	1,452,059	+ 202,577
Regina	2,433,804	2,042,802	+ 391,002
St John	1,881,007	1,535,385	+ 345,622
Victoria	1,593,937	1,848,070	— 254,133
Saskatoon	1,398,094	1,091,820	+ 306,274
Moose Jaw	849,176	874,024	— 24,848
Brandon	445,327	469,152	— 23,825
Brantford	687,588	523,193	+ 164,395
Fort William	568,671	643,387	— 74,716
Lethbridge	675,640	569,745	+ 105,895
Medicine Hat	488,917	321,594	+ 167,323
New Westminster	319,087	271,870	+ 47,217
Peterboro	529,082	444,559	+ 84,523
Sherbrooke	583,017	484,775	+ 98,242
Kitchener	458,441	341,326	+ 117,115
Total	$203,533,768	$175,020,507	+ $27,613,261

Toronto's bank clearings for the month of August were $244,647,685; for August, 1916, $187,511,224; and for August, 1915, $140,624,050.

The Molsons Bank

148th DIVIDEND

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the

FIRST DAY OF OCTOBER NEXT,

to Shareholders of record on 15th September, 1917.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City, on MONDAY, the 5th of NOVEMBER next, at three o'clock in the afternoon.

By the order of the Board,
EDWARD C. PRATT,
General Manager.

Montreal, 21st August, 1917.

SUCCESSFUL LIFE INSURANCE AGENTS

What Are Their Qualifications?—Duty to the Public and to the Insurance Company

The following is the greater part of the essay, declared to be the winning one, in the competition of the Dominion Life Underwriters' Association, for the best essay on life insurance. It was written by Mr. J. E. Matthews, of the Brandon agency of the North American Life Insurance Company, Toronto.

In the past, the average life insurance agent has done his duty to himself to a smaller degree than to either his client or his company. What is an agent's duty to himself? Years ago it was said and with a degree of truth, that only those who were failures in other lines of work took up the business of life insurance. But this idea has been steadily dispelled, until to-day in most communities few men on the average stand higher in public esteem than the men engaged in our business. This happy change has been inaugurated, because more and more the agent has been doing his duty to himself.

We asked what is that duty. First and greatest I would say it is to maintain his honor, next his dignity, and next his income. For an agent to maintain his honor,—that is for him to be known as a strictly honorable man,—is to my mind one of the most valuable assets in the insurance business.

Be Fair to Your Competitor.

No man is regarded by the public as an honorable man who is in the habit of saying mean things about a competitor Nor is he regarded as an honorable man who in any way misrepresents a policy to a client. It is gratifying to think that the dawn of a brighter day has broken, and that more and more we are beginning to speak of the other man as we would like to have the other men speak of us. In few lines of business are a man's habits of life more in the limelight than in that of insurance. The life insurance agent stands always in "that fierce light which beats upon one's work and blackens every blot." He meets temptations of every kind and on every hand, and woe to him who stumbles or who falls.

In no business perhaps does a man require so much to have incorporated into the very fibre of his being the strict habits of truthful speaking. We hear a good deal about persistence, but for my own part I have scant sympathy with the practice followed by some agents of hounding a man's footsteps day after day, month after month, in an endeavor to force insurance upon him. It is not gentlemanly, and if the agent in the end is insulted, he has only himself to blame. It is not business, for it is a waste of time and energy and in most cases the agent could have reaped better results elsewhere. And it is degrading to the work and to those engaged in it for the agent thus to make himself a nuisance in the quest for new business. Better when we meet an obstinate prospect of that calibre for us to stand on our dignity.

Enthusiasm a Great Asset.

And now let us see how he should maintain his income. To do this, first and above all else he must work, work, work, and work not after a humdrum monotonous manner, but after the fashion of a man who is charged with enthusiasm. It is said that nine out of every ten men who fail in insurance do so because of a lack of enthusiasm. If you have confidence in the goods you offer for sale, then you should have enthusiasm, and having it, the heart will be right, and the brains and the body will work in unison.

Let us make no mistake about it, the life insurance business is one of hard work. It has been well said that the man who does not work violates the first law of equity and destroys his place in the social and economic system.

Although it has been truly remarked that "the life insurnace agent has no ten-minute whistle to call him from his half-finished breakfast, no boss to keep check on his time, no foreman's eccentricities or whims to cater to, no one to dock him for idleness, no cutting off a half hour's pay for not reporting on time, yet it is because of these very conditions that so many fail. Many men have not the character, the stamina, the backbone to boss themselves, the enthusiasm to get up early, the energy to work and work hard eight or ten hours a day without a driver. For after all, are not work and enthusiasm the two foundation stones on which we should build our hopes, if our hopes are to be realized. "Blessed is he who has found his work," wrote Carlyle, "for he needs no other blessedness." I cannot understand why any man possessed of ordinary qualifications who persistently and regularly day after day, month after month, has four solid interviews daily on insurance,—I say I cannot understand why such a man should make a failure of the business. Therefore, if the agent is to maintain his income he must work. So much for the agent's duty to himself.

Sink all Self-Interest.

Next, his duty to his client. Here again the Golden Rule should apply. In many cases the client leaves the selection of the plan of insurance almost entirely to the agent. And right here is, I believe, one of the strongest tests of the agent's integrity. Will he do his duty to his client? That is to say, will he recommend the plan which he conscientiously believes is the best suited to the man's circumstances. Will he have the manhood to sink all self-interest in the matter. The agent blunders when he chooses any lower object than his client's good. Life insurance is worthy of our best endeavor. It needs no misrepresentation. As has been aptly said "It will stand the whole truth just as it demands nothing but the truth." The agent who insures his client aright, does the client a real and beneficent service. So my obligation to my client is to obligate him to me, to bind him to me by a dealing so fair, so upright, that he will forever after be my friend. That client has done business with me, he has confided in my judgment, he has trusted in my honesty. Therefore, he is entitled to the best that I have in return. When I give him this conscientiously and unreservedly, I have fulfilled my duty to my client.

In proof of this contention it will not be amiss to quote from a prominent insurance man who gave utterance to the following timely remarks:—

Make Your Client Your Friend.

Make a friend of every man you insure. Let him feel that you have done your best for him, have placed him in a good company, have given him the plan most adapted to his needs, have studied his convenience and wishes at every turn; in short, that you have acted throughout with a tact, friendliness and consideration which did not have their origin in a purely mercenary motive.

Don't let the acquaintanceship fall to the ground after you have written him up and delivered the policy. Cultivate his friendship. When you meet him on the street, stop for a handshake and a brief conversation. Be interested in the welfare and success of his family, his business, and himself. If you see a chance to do him a good turn, seize it, even at some inconvenience and trouble to yourself.

It helps in many ways to make your client your friend. He will keep up his insurance, because he is in the company you represent. He will be a satisfied policyholder—your best advertisement.

Lastly, what is the agent's duty to his company. Clearly, it is to guard the company's interests as carefully as if they were his own, for in many respects their interests and his are synonymous. It is an admitted fact that in many communities the public rate the company by the man the company has in the field. To them he is the embodiment of all that is good or bad in the company he represents. And that man owes it to his company to be true to it, true to it in every sense of the word. If we have doubts regarding our company, we had better cut the cable.

Success of the Institution is the Individual.

But while we continue to represent an organization, it is each man's duty to give that organization his whole-hearted allegiance. Let our company be able to count on us to the very limit of our loyalty. Otherwise, we ourselves are at a disadvantage—we cannot do our best.

Think of the dependence of a company on its agents—the confidence necessarily reposed on the men in the field, the reliance placed on their word, the trust felt in their judgment, the immense interest at times placed in the hands of agents. All that is in a man should respond to this. He should study to know his company, its officers, its policies, its history. He should keep constantly in mind that great truth, that the success of an institution is the sum of the successes of the individuals comprising that institution. Then there will be a right understanding all the way round. An agent will be better fitted to command public esteem, and there will result a further uplift in the tone of our business and an improvement in its grade. In a word, let each man be what he expects his company and its officers to be.

CONSIDERATIONS AS TO PRICE FIXING

Effects Upon Production — Distribution of Wealth — Prices for Coal

The problem of price-fixing upon purchases for our own and foreign governments and for the general market has continued to be one of acute interest. Prices upon steel and copper for the United States government's use have been referred to the Federal Trade Commission. An agreement to hold the price of bituminous coal at $3 per ton was made by the association of operators in conference with United States Secretary Lane and a member of the Federal Trade Commission, but other government officials have disapproved of this figure as too high. The agreement is being generally observed so far as prices to the public are concerned.

The Canadian government has fixed a maximum price for wheat on the basis of $2.40 for No. 1 Northern at Fort William. Discussing price regulation, supply and demand, the distribution of wealth and allied matters, the National City Bank of New York, in its interesting letter for August, recently received by *The Monetary Times*, says,—

It is easy to agree to the abstract proposition that war should not be made the occasion for money-making, and that the public interests are paramount to the right of individuals to unusual profits. The situation, however, is so chaotic and extraordinary that it is not only difficult to say off hand what prices are fair to producers, but what prices will best serve the public interest. An illustration is afforded by the following extract from a statement by Mr. Daniel Willard, chairman of the committee on transportation of the council of defense:—

"Twenty-nine per cent. more bituminous coal was handled in April, 1917, than in the same month of 1916," Mr. Willard said. "The exact figures for 85 of the principal coal-carrying roads show that in 1917 there were 659,000 cars handled, as compared with 508,000 in 1916, for an equal number of days.

"There are literally hundreds of new mines. On one road there have been more than one hundred new mines opened during the last six months."

High Prices for Coal.

Mr. Willard was discussing the coal situation solely with relation to the increasing traffic, but his statements show the extraordinary efforts that are being made to increase production, and that after all is the matter of largest consequence. The industries of the country are consuming enormous quantities of coal, and our allies, France and Italy, are in desperate need of coal. Dr. Nansen says that coal is costing over $60 per ton in Norway, and the branch of the National City Bank at Genoa reports it selling above $100 per ton in Italy, "with few transactions." The price of coal, within fifty cents or a dollar a ton, is a secondary consideration with consumers, compared with having their wants supplied, and they can only be supplied by enlarging the output. It would be no simple task to regulate profits on present production, with costs varying as widely as they do in coal mining, but there is the further question of securing an increased production.

Price of Spelter.

A somewhat similar situation has existed in spelter, or zinc. When the war began the market price of spelter was about 5 cents per pound. Under the pressure of the new demands the price rose until at the crest of the movement the price was about 27 cents per pound. The influence of rising prices, however, caused great activity in the zinc-producing districts. Prospecting was stimulated, new mines were opened, smelters were enlarged and new ones built, production was increased until the price began to fall. Spelter is now selling at about 10 cents per pound, which, considering the general rise of costs and of other prices, is scarcely higher relatively than 5 cents was before the war. That problem has worked itself out. The new production was both induced and financed by the high prices, and could not have been obtained without them, as there is quite certain to be an excess of producing capacity after the war.

The United States Senate in providing for the regulation of food supplies, while giving large powers to the President and his advisers to fix prices, has proposed to safeguard the production of wheat by establishing a minimum price of $2 per bushel. This is a high price as compared with normal prices, and there is no maximum price; the farmers can have more if the market goes higher, but reliance is placed upon the stimulus afforded by the guaranteed price to produce an ample supply. For the farmer who is already equipped for wheat-growing, and who continues to sow only his usual acreage, there is doubtless a large profit at $2 per bushel. But the price is fixed to induce thousands of new producers to undertake the expense, at high cost, of putting new acreage into wheat, and that will undoubtedly be the result. This is a reversal of the policy of restriction and discipline. The intention is still to get the best results for the public, but the emphasis is put in another place.

Lasting Effects Upon Production.

There is a silver lining to this cloud of high prices which ought not to be overlooked. Under the enormous stimulus which is being given to production in so many important lines it is certain that when the war comes to an end the productive capacity of the country will be far beyond what it has been in the past, and there is good reason to believe that permanent benefits will be realized and widely distributed. It is true that producers instinctively fear a period of overproduction and of unprofitable prices following such an expansion as is now occurring, but while prices will fall enough to greatly relieve domestic consumers the foreign outlet will probably be sufficient to take our surplus at fair prices, provided we are organized to promote and finance a development of our foreign trade.

Agriculture is being stimulated and permanently benefited by this period of high prices. The country is being awakened as never before to a realization of the fact that all other industries are dependent upon agriculture, and that the welfare and progress of the people require more comprehensive and intelligent attention to the production and distribution of foodstuffs.

Meanwhile those who are inclined to pessimism as regards the lot of the wage-earning class should remember that every great period of industrial expansion in the past has resulted, when conditions settled down, in the workingman occupying a higher position than he held before. Wages do not go up like potatoes, but they hold their gains better than potatoes do.

Real Distribution of Wealth.

These complicated questions of price regulation, taxation, etc., all hark back to the big, main question in which society is interested, to wit: the final distribution of the fruits of industry with relation to the average man's share. We have often endeavored to point out that at the very beginning of any discussion of this subject, it is important to determine what is real distribution. In current discussion there is but slight recognition of the value to the community of capital accumulations, taking form as they must in improved and enlarged facilities for general production and public service. This community value of private wealth is understood by economists, and it is understood by everybody in concrete cases; every new community appreciates the gain from having a railway built into it, or a water power developed, but in general discussion it is usually assumed that all the benefits of wealth accumulations, even in these forms, go to the owners. There is little analysis of actual distribution. The emphasis is placed on the ownership of equipment, rather than upon the distribution of the goods produced. Mere ownership of productive property, however, only gives the right to go ahead and produce something. All the benefits from productive properties come out in the stream of products that issue from them, and the real distribution of the national income takes place at the point of consumption, where these products are finally absorbed by individuals and disappear from the common store.

Laborer or Millionaire.

Whether a man is a day laborer or a millionaire, he actually gets as his share of current production what he consumes or withdraws from the common supply to his own exclusive use and benefit and no more. If he occupies a seat in a railway car, he has taken that much; if he keeps a servant, he has taken that much; if he owns a motor car, he has taken that much; if he keeps a costly estate, he has taken that much—but he gets nothing which remains in the use or service of others.

If he allows the profits of his business to remain in the business for its expansion, they have not been realized and may never be. Every town in the country can tell of business houses that have prospered, grown by means of their profits, and then gone into decay and finally into bankruptcy. The proprietors realized only such profits as they withdrew from the business and devoted to themselves. If they withdrew profits from one business for investment in another, there was no distribution to themselves, merely a shift to another public employment.

Your Investment Safe at 5 Per Cent.

To invest your money and receive a cheque every three months or six months, with no concern in the management or collection, and to know the principal and interest are absolutely safe, is an ideal investment. Such is our

NOT OPPOSING CANADIAN NORTHERN BILL

Up to Present Time No Effort Has Been Made to Influence Votes, Says Shaughnessy

Regarding the proposed acquisition of the Canadian Northern Railway by the Canadian government, Lord Shaughnessy, president of the Canadian Pacific Railway, made the following statement this week:—

"I wish to deny most emphatically the statement published in a number of newspapers, and evidently inspired, that the Canadian Pacific Company is offering organized opposition to the government proposals about the Canadian Northern. Up to the present time no effort of any kind has been made by the company to influence the vote of a single member of the House of Commons or the Senate upon the measure now before parliament.

"This reference to the Canadian Pacific is the same old threadbare ruse to which resort has been had on more than one occasion during the past thirty years when railway schemes of one character or another were being considered by parliament.

"It is true that the acquisition of the Canadian Northern by the Canadian Pacific was discussed by representatives of the parties concerned, but the discussion was at the suggestion of members of the Dominion Cabinet.

"After a time it was evident that no transaction was possible, and negotiations were dropped.

Apprehensive of Excessive Price.

"The fate, or destiny, of the Canadian Northern is not a matter of special moment to our company as a common carrier, but the company, having enormous interests in Canada, naturally views with apprehension the possibility of the payment of an excessive price for the alleged equity of the holders of the majority stock, and feels that some less speculative and more direct means should have been used to fix the amount than the very uncertain process of arbitration.

"It is to be hoped that if the transaction is carried out the country will not, in consequence, be saddled with heavy liabilities heretofore undisclosed, and that in fixing the amount to be paid under the arbitration proceedings no consideration whatever shall be given to personal investments in unfortunate ventures, such as coal mines, lumber mills, blast furnaces and other works alleged to have been undertaken for the advantage of the Canadian Northern enterprise, but being in fact private speculations of the promoters of the railway company.

Attitude on Conscription.

"The references to my own attitude on conscription are offensive and unwarranted. On this subject and on every other question or work connected with the prosecution of the war I require no advice or inspiration from that little coterie of men who are engaged in fixing standards of patriotism, and whose catechism fails to distinguish between loyalty to the King and loyalty to their particular projects or interests."

AREA AND YIELD OF FALL WHEAT

The preliminary government estimate of the average yield per acre of fall sown wheat for 1917 is 22 bushels as compared with 21½ bushels in 1916, 29.41 bushels in 1915 and 21.70 bushels, the average of the seven years 1910 to 1916. The total yield of fall wheat for 1917 is therefore now estimated at 17,816,000 bushels, from 809,250 harvested acres, as compared with 20,060,000 bushels from 932,500 acres in 1916. In Ontario, the chief fall wheat province, the total yield is 14,515,000 bushels from 656,500 acres, as compared with 16,465,000 bushels from 774,800 acres in 1916, the average yields per acre being 22.11 bushels in 1917 and 21¾ bushels in 1916. Saskatchewan now ranks as the second fall wheat province with 2,220,000 bushels from 105,700 acres and Alberta is third with 836,000 bushels from 38,000 acres. The total yield of hay and clover is placed at 13,379,000 tons from 7,824,000 acres, as compared with 14,637,000 tons, the record crop, from 7,892,900 acres in 1916. This year's total yield of hay and clover has only twice been exceeded—viz., last year and in 1911, when the yield was 13,989,000 tons. The average yield per acre this year is 1.70 tons as compared with 1.85 tons in 1916 and 1.62 tons in 1911. The yield from alfalfa is 152,200 tons from 86,500 acres, as compared with 260,500 tons from 89,470 acres last year, the average yields per acre being 1.76 tons as compared with 2.91 tons.

DEAL PROPOSED BY COMPANIES

Finance Minister Says Lord Shaughnessy is Under Misapprehension

Sir Thomas White handed out the following typewritten statement in reply to the statement from Lord Shaughnessy:

My attention has been called to a statement, appearing in to-day's press, by Lord Shaughnessy, president of the Canadian Pacific Railway Company, respecting the proposed acquisition by the government of the capital stock of the Canadian Northern Railway. In the course of his remarks Lord Shaughnessy makes the following assertions:—

"It is true that the acquisition of the Canadian Northern by the Canadian Pacific was discussed by representatives of the parties concerned, but the discussion was at the suggestion of members of the Dominion Cabinet.

"After a time it was evident that no transaction was possible, and negotiations were dropped."

Initiated by Companies.

I desire to say that Lord Shaughnessy is under a complete misapprehension as to the origin of the negotiations referred to, which were initiated by the two companies themselves, and not by the government. We became aware that such negotiations had been initiated, and that they involved as a part of the transaction the surrender of the forty million dollars of stock of the Canadian Northern Railway Company held by the Dominion government. In one or more interviews I discussed the matter informally with Mr. Beatty, vice-president of the Canadian Pacific Railway Company. My conclusion was that the transaction was impracticable, and I so informed Mr. Beatty, suggesting at the same time that nothing further should be done in the matter pending a full consideration by the government of the report of the Railway Commission, which had come to hand some time before, but which had not yet been taken under deliberate review. After giving the report its best consideration the government determined to acquire the capital stock of the Canadian Northern Railway Company, and introduced to parliament the necessary legislation to that end.

Mines, etc., Not Owned.

Lord Shaughnessy refers to "personal investments in unfortunate ventures, such as coal mines, lumber mills, blast furnaces and other works, alleged to have been undertaken for the advantage of the Canadian Northern enterprises, but being in fact private speculations of the promoters of the railway company." As the mines, lumber mills, furnaces and other works referred to are not owned by the Canadian Northern Railway Company, it is to be pointed out that they are not within the scope of the arbitration for determining the value of the Canadian Northern Railway shares which are to be acquired by the government.

PROTESTS CANADIAN NORTHERN DEAL.

Editor, *The Monetary Times*.

Sir,—I am not a public man, and never will be. In this time of stress I have no politics or religion, but I protest against the purchase of Canadian Northern Railroad common stock by the government for the benefit of Mackenzie and Mann, and the Canadian Bank of Commerce.

I am an old-time Liberal, a free trader, or rather a believer in a tariff for revenue only. Nothing could change my views if we lived in normal times, but times are abnormal.

Sir Wilfrid Laurier, a great statesman and a great Canadian, to whom every Canadian must pay respect and honour, has failed in his efforts to weld the two million French-Canadians of Quebec into our national life. The only leader that we have is Sir Robert Borden.

Sir Robert Borden has the respect of and represents all English-speaking Canadians who are not playing politics and want to win the war. To him all Canadians ought to turn and demand that the raiding of the Dominion treasury by Canadian Northern interests should stop.

God knows we will have enough to pay after this war is over without paying tribute to Mackenzie and Mann and the Canadian Bank of Commerce.

Yours, etc.,

MICHAEL DWYER.

Leaving Your Problems To Your Family

Have you made your will?

It may be hard for you to face so far in advance decisions which would at any time be difficult.

But it will be harder for your family to face the same problems without your special knowledge, and with lessened legal freedom to deal with them.

In making your will, remember that the recognised instrument for dealing with estates is the modern trust company. By having your lawyer write this Company into your will as executor, you make certain that your wishes will be effectively carried out at a cost no larger than your estate would have to meet under the control of a personal executor.

IMPORTANT COMPANIES ACT JUDGMENT

Justice Masten Finds Against Ontario Province—Full Text of Judgment

The following is the full text of the judgment of Mr. Justice Masten in Currie v. Harris Lithographing Company, Limited, and Attorney-General of Ontario v. Harris Lithographing Company, Limited. The judgment is referred to in our editorial columns:—

These actions were heard before me at the non-jury sittings at Toronto on March 26th and 27th, 1917. They are friendly actions, brought for the purpose of determining as the principal question the constitutionality of the Ontario statute, known as "The Extra-Provincial Corporations Act," in its relation to companies incorporated by Dominion authority under the Canada Companies Act; and secondly, but as an independent question, the right of a company incorporated under federal authority to hold lands in Ontario without a license.

Each action was heard on a special case agreed between the parties, and the two actions were argued together.

At the opening of the argument, Mr. Wegenast, for the defendant in the second action, moved summarily to dismiss it, or for a perpetual stay on the ground that no such action is maintainable under Ontario procedure; in the alternative he moved by way of demurrer, or to strike out the endorsement on the writ.

I am of opinion that section 16 (h) and section 20 of the Ontario Judicature Act are applicable, and authorize such an action as the present, and I overrule the objection.

It was also noted by consent of counsel that while the second action is in form for penalties, the plaintiff does not seek a money recovery, but consents to remit the penalties if he is found entitled, the sole purpose being to raise in a concrete and effective form the main question as noted above.

Powers of Ontario.

On the main question, namely, Is the act in question in its relation to companies incorporated under Dominion authority within the powers of the province of Ontario? I am of opinion that the answer must be in the negative.

The Harris Lithographing Company, Limited, is incorporated by letters patent under the Canada Companies Act. The letters patent purport to authorize it to carry on throughout Canada the business of dealers in stationery, and also the business of lithographing, printing, engraving, embossing and manufacturing.

Under section 5 of the Canada Companies Act the company in question is constituted by virtue of its incorporation a body corporate and politic, and there is thereby vested in it power to sue and be sued, to contract by its corporate name, and to acquire and hold personal property for the purposes for which the corporation is created. (See Interpretation Act, Canada, 1906, section 30.)

Section 29 of the Canada Companies Act provides that on incorporation the company is to be vested with (among other things) all the powers, privileges and immunities, requisite or incidental, to the carrying on of its undertaking.

Business Throughout Canada.

It thus appears that there purports to be vested in the company in question power to carry on throughout Canada the business of stationers and lithographers, and I think that such power has been validly and effectively conferred on this company, because "the power to regulate trade and commerce at all events entitles the parliament of Canada to prescribe to what extent the powers of companies, the objects of which extend to the entire Dominion, should be exercisable." (John Deere Plough Company v. Wharton (1915), A.C. 330.) The Dominion possesses the exclusive authority to confer such powers on a company of this class, and, having so conferred them, the province of Ontario has no jurisdiction to destroy them, or by legislation directed at this Dominion company as such to deprive it of its status and powers.

Turning now to the Ontario act here in question, section 7 provides as follows:—

"(1) No extra-provincial corporation coming within class 7 or 8 or 9 shall carry on within Ontario any of its business unless and until a license under this act so to do has been granted to it, and unless such license is in force; and no company, firm, broker, agent or other person shall, as the representative or agent of, or acting in any other capacity for any such extra-provincial corporation, carry on any of its business in Ontario unless and until such corporation has received such license and unless such license is in force.

"(2) Taking orders for or buying or selling goods, wares and merchandise by travellers or by correspondence, if the corporation has no resident agent or representative or no office or place of business in Ontario, shall not be deemed a carrying on of business within the meaning of this act."

Class 8 is defined as: "Corporations created by or under the authority of an act of the Dominion of Canada, and authorized to carry on business in Ontario."

In my opinion this section gives the keynote of the act. Its "pith and substance," and its purpose as applied to the defendant company, is to preclude it from the exercise of some of its powers, and to deprive it of its status in the province of Ontario unless and until it files certain documents, pays certain fees and takes out a license.

I am of opinion that it was not within the power of the provincial legislature to enact this provision (section 7) in its present form.

However simple may be the process of procuring a license, however slight may be the delay occasioned to the Dominion company, it is yet an illegal interference, which purports or the time being (no matter how short) to prevent the company from exercising its legal powers and to deprive it temporarily of its status.

Support for Legislation.

It is attempted to support the legislation on the following grounds: (1) That it is provincial legislation enacted under section 92 of the British North America Act with respect to licenses in order to the raising of revenue by direct taxation; (2) as legislation dealing with property and civil rights, and particularly from the point of view of mortmain; (3) as legislation dealing with the administration of justice in providing for the appointment of an agent, service of process, etc.; (4) and in providing for the making of returns; (5) as legislation prescribing penalties to enforce these provisions; (6) and generally as legislation affecting property and civil rights and dealing with matters of merely local consequence. (See judgment of Cameron, J., in Davidson v. Great West Saddlery Company at page 15.)

But while all these aspects present themselves in the Ontario statute in substantially the same manner as in the Manitoba act, yet they are, in my opinion, ancillary and supplementary to the provisions of section 7 above quoted. I think that the main purpose of the act here in question is to assert and acquire a direct control over every company before permitting it to carry on its business in the province; and until compliance has been yielded to the provincial license requirements to exclude the company from the exercise within the province of some of the powers conferred upon it by the Dominion authority. Such provisions are effective as against foreign companies, but not as against Dominion companies, who are by their constituting instruments authorized to carry on their operations throughout every province of Canada. I think that the purpose above described permeates the whole of the act in question in such a way as to render it impossible to hold that certain sections of the act are valid and others invalid.

Manitoba and Ontario Acts.

The very full argument that was addressed to me merits perhaps a more extended discussion, but all phases of the question having been elaborately discussed, not only by the Privy Council in the case of the John Deere Company v. Wharton (1915), A.C. 330, but subsequently by the Appellate Courts of Manitoba and Saskatchewan in the cases of Davidson v. Great West Saddlery Company and Harmer v. The McDonald Company, I am unable, after a careful perusal of these judgments to add anything that seems likely to assist the elucidation of the subject. I may, however, state generally that my views accord with those expressed by Mr. Justice Perdue in the Great West Saddlery case. I do not think that the Ontario act differs from the Manitoba act in such a way as to yield any different conclusion from that at which he has arrived. The only difference to which my attention has been directed is the inclusion in the Ontario act of sub-section 2 of section 9, which is as follows:—

"No limitation or conditions shall be included in any such license which would limit the rights of a corporation coming within class 7 or class 8 to carry on in Ontario all such parts of its business, and to exercise in Ontario all such parts of its powers as by its act or charter of incorporation it may be authorized to carry on and exercise therein."

I do not find any corresponding section in the Manitoba act, and, while the clause above quoted is in some measure palliative, it does not go to the root of the difficulty in such a way as to prevent wholly that which I think to be an illegal interference by the province of Ontario with Dominion legislation. I, therefore, answer the questions submitted as follows:—

(a) In the case of Currie v. Harris Lithographing Company:—

(1) I am of opinion that the provisions of the Extra-Provincial Corporations Act of Ontario, in so far as they purport to apply to the defendant company, are ultra vires of the legislature of the province of Ontario.

(2) I am of opinion that the defendant company is not precluded by reason of not being licensed under the said Extra-Provincial Corporations Act from carrying out its objects and undertakings in the province of Ontario.

Holding Lands in Ontario.

(3) I am of opinion that the defendant company is not subject to the penalties prescribed by the Extra-Provincial Corporations Act for carrying on business without being licensed.

(4) I am of opinion that the defendant company is incapacitated and prohibited from acquiring (occupying?) and holding lands in the province of Ontario, but that such incapacity and prohibition arises from the provisions of the Mortmain and Charitable Uses Act, ch. 103, R.S.O., 1914. If the defendant obtained a license under the provisions of the Extra-Provincial Corporations Act it would thereby receive authority to hold lands in Ontario in accordance with provisions of section 12 of the act in question. But the Extra-Provincial Corporations Act does not by itself specifically prohibit the defendant company from holding lands, though section 7, above quoted, carries with it a general prohibition.

Provisions are Valid.

(b) In the case of the Attorney-General of the Province of Ontario and the Harris Lithographing Company, Limited:—

(1) I am of opinion that the provisions of the Extra-Provincial Corporations Act, R.S.O., 1914, ch. 179, are ultra vires of the legislature of the province of Ontario, and that none of the provisions of the said act, as now drawn, are valid.

(2) I am of opinion that the defendant company is not precluded from carrying out its objects and undertakings in the province of Ontario unless and until it shall have been licensed under the Extra-Provincial Corporations Act.

(3) I am of opinion that the defendant company is not subject to the penalties prescribed by the said Extra-Provincial Corporations Act for carrying on business without being licensed.

(4) I am of opinion that the defendant company is incapacitated from acquiring and holding lands for the purpose of its business in the province of Ontario by virtue of the act known as the Mortmain and Charitable Uses Act, R.S.O., 1914, ch. 103.

I am further of the opinion that such incapacity and prohibition does not arise by reason of its not being licensed under the said act, though if it were licensed its incapacity would be removed.

Let judgment be entered after thirty days in accordance with the answers contained in my written reasons of judgment. No costs.

SASKATCHEWAN SELLS BONDS

The Saskatchewan government has sold an issue of $1,000,000 15-year 5 per cent. bonds to Messrs. W. A. Mackenzie and Company, Toronto, in association with Messrs. W. Jennings O'Neil and Company, Winnipeg, and the Provident Savings Bank and Trust Company, and Breed, Elliott and Harrison, Cincinnati. The bonds are dated September 1st, 1917, and are due September 1st, 1932. Interest is payable half-yearly. Both principal and interest is payable in Toronto, Montreal and New York. The bonds are being offered to the public at a price to yield 6 per cent.

This is one of the first issues of long maturity to be made in the Canadian market in some time. The bonds are having a good reception in Canada.

MINERAL PRODUCTION OF CANADA

Output Last Year Increased Nearly 30 Per Cent.—Ontario Produces About Half of Total

According to the preliminary report of the department of mines, Ottawa, war has helped largely to stimulate mineral production. The report says that the mineral production in 1916 was $177,357,454, which compares with $137,109,171 in 1915, an increase of $40,248,283, or 29.3 per cent. The previous maximum production was $145,634,812 in 1913.

Tabulation of Returns.

The total value of the non-metallic production including clay and quarry products in 1916 was $70,317,419, as compared with $61,294,330 in 1915, showing an increase of $9,023,089, or 14.7 per cent. The aggregate production of structural materials showed a slight decrease, the value in 1916 being $17,301,726 as against $17,920,759 in 1915. The total of all other non-metallics increased from $43,373,571 to $53,015,603 in 1916.

The following table shows the mineral production by provinces in 1915 and 1916:—

A LIFE INSURANCE MAN'S TRIBUTE

"I have found *The Monetary Times* to be a journal both authentic and up-to-date."—Mr. S. E. Salls, with the Canada Life's Toronto agency.

MACKINTOSH RUBBER COMPANY OFFERING STOCK

An offering of $[illegible] common stock of the Mackintosh Rubber Company of Canada is being made to instal machinery in the company's factory and to provide working capital. The company has a Dominion charter and is authorized to manufacture and sell all kinds of rubber goods.

The factory is located at Belleville, Ontario, and the buildings are nearing completion in accordance with contracts, on a site of about 4½ acres acquired by the company on the Grand Trunk Railway within the city limits of Belleville, Ontario.

Stock has been sold to cover the cost of the erection of the factory. According to the prospectus, the company have secured the services of Mr. W. M. Mackintosh, of Liverpool, England, as managing director. He has had 37 years practical experience in the largest rubber factories in England, Scotland, Germany, Austria, Hungary and Sweden. He is not only a most practical rubber expert, but a trained rubber chemist as well.

Of waterproof clothing and fabrics alone, over $1,600,000 are imported by Canada per year None of the finer grades of this material are waterproofed in Canada, but are imported from England. The company proposes to do this work equally as well as the best English factories.

The company have contracted with Mr. Mackintosh to purchase the sole rights to use and sell galbulose in Canada, in such quantities as they require, and at a price which shall never exceed 80 per cent. of the market price of para rubber f.o.b. Liverpool. Galbulose needs no washing, and as para loses considerably in washing, galbulose will, therefore, always cost about 25 per cent. less to the company than washed para.

Galbulose is a natural product, imported from Africa as raw material, by James Allan and Company, of Liverpool, England, from lands controlled by them, and on which there are said to be unlimited supplies. Mr. Mackintosh is the discoverer of a secret process of purification which renders this material in many respects superior to para rubber.

The company is capitalized at $500,000 divided into 5,000 shares of common stock of the par value of $100 per share.

The following are the officers and directors of the company: Directors—D. A. Atkinson, director, Scott and Walmsley, Limited, Toronto; W. M. Mackintosh, rubber manufacturer, Belleville; H. F. Ketcheson, mayor of Belleville, Ont.; Geo. E. Sine, merchant, Frankfort, Ont.; R. H. Mode, M.A., business broker, Toronto; P. Elvins, bookkeeper, Belleville, Ont. Officers—President, D. A. Atkinson; vice-president, H. F. Ketcheson; secretary, R. H. Mode; treasurer, D. A. Atkinson; managing director, W. M. Mackintosh. Executive committee—W. M. Mackintosh, R. H. Mode, D. A. Atkinson.

There are naturally risks to be met in initiating new industrial enterprises, and these risks the purchaser of stock must share. The Mackintosh Rubber Company has the advantage of the knowledge of a practical rubber man. The company, so far as we can gather, has first-class business and financial management.

Province of Manitoba

5% Gold Bonds

Due 1st April, 1922. Denomination $1,000

Principal and half yearly interest payable in Toronto, Montreal, Winnipeg, and New York.

Manitoba is the oldest of the Prairie Provinces, having an area of over 252,000 square miles, and a population of 578,000. Grain growing, mixed farming, and the raising of dairy products and live stock are important industries in the Province.

These bonds are a direct and primary obligation of the Province, and are payable from its general revenue.

Price, 96.05 and interest, yielding 6%

FEDERAL FARM BOARD LOANS

Loans to Farmers Made at Rate of Nearly $1,000,000 Daily in United States

A recent statement made by the Federal Farm Loan Board of the United States to *The Monetary Times* showed that farmers had filed applications for 5 per cent. long-time loans during July amounting to $34,310,652, or more than a million dollars per day. During the same month the board approved loans amounting to $16,016,853.

The board has just completed its first year of service, the members having been sworn in August 7th, 1916. During the year the co-operative banking system for farmers, established under the Federal Farm Loan Act, has been put into complete operation in every state, and loans to farmers are now being approved at the rate of nearly one million dollars a day. About twenty-five farm loan associations are being chartered daily, each association representing nearly $50,000 of loans.

The greater part of the year of organization has been consumed with the tasks of dividing the country into twelve federal land bank districts according to the farm loan needs of the various sections; the location of the federal land banks; the sale of the capital stock of the banks; the selection of bank directors and officers; the selection of federal land bank appraisers, and the establishment of a flat interest rate of 5 per cent. on farm mortgages in all parts of the United States. The federal land banks began lending money late in the spring, and in the two and a half months just closed more than 800 farm loan associations have been chartered, representing total loans of approximately $40,000,000. The average number of farmer borrowers in each association chartered is eighteen, and the loans average about $2,300 in size. Additional farm loan associations now being organized throughout the country will run the total of loans applied for this year far beyond the $100,000,000 mark.

Lands are Appraised.

After farm loan associations are chartered it is necessary for the lands of their members to be appraised and abstracts of title provided. More than two hundred federal farm loan appraisers are in the field placing valuations on the lands as rapidly as they can get to them. Approximately $5,000,000 of loans have already been closed and the money actually delivered to the farmers.

It is expected that the 5 per cent. capital thus provided will prove of material assistance in aiding the farmers of the United States to meet the increased demands for food occasioned by the world war. Before another crop is planted the federal farm loan system will have been completely organized in every state of the union and its services made available to all the farmers of the country.

According to testimony compiled at the time of the consideration of the federal farm loan act in Congress, the total volume of farm mortgages in the United States is nearly four billion dollars, and the average interest rate 7.4 per cent. If all of these mortgages are transferred to the federal farm loan system at 5 per cent. the result will be an annual saving in interest charges to the farmer of nearly $100,000,000 annually.

Mortgages on Amortization Plan.

Under the act farmers are permitted to borrow for the purpose of land purchase; refunding existing indebtedness; live stock purchase; clearing and draining land; construction of improvements and the purchase of fertilizer and any equipment necessary in the cultivation of the land. The loans are limited to 50 per cent. of the appraised value of the land, plus 20 per cent. of the appraised value of the permanent insured improvements.

All mortgages under this act are made on the amortization plan, and run generally for thirty-six years. The farmers make annual payments equal to 6 per cent., 5 per cent. paying interest and 1 per cent. being applied on the principal. The 1 per cent. applied on the principal annually wipes it out at the end of thirty-six years. The borrower has the right to pay all or any part of the mortgage after it has run five years.

Farmers and prospective farmers may borrow. Land leased to tenants cannot be mortgaged under this act. This cheap capital cannot be used for land speculation and land monopoly, because loans are limited to $10,000 each. This great volume of capital which is being loaned to farmers is procured by the sale of bonds to investors. As banks lend money and take farm mortgages in return they issue bonds against the mortgages and sell the bonds to investors. These bonds bear 4½ per cent. and are free of all taxation, being declared by the law "instrumentalities of the government." The bonds of any one federal land bank are endorsed by all of the banks, and consequently all bonds issued have behind them the resources of all of the twelve federal land banks and all of the mortgages representing land appraised at twice the amount of the obligation against it.

Bonds Sold at 101⅛.

These bonds are being disposed of rapidly at 101⅛. It is expected that the issue of these bonds within a year will exceed $100,000,000, and may reach $150,000,000.

The margin between the 4½ per cent. which the bonds yield and the 5 per cent. paid by the farmer is used to defray the expenses of the federal land banks. The law permits 1 per cent. to be employed for this purpose, but the federal farm loan board believes they can be operated on half that amount.

The loans being made by the federal farm loan system are very evenly distributed throughout the nation. Farmers in states of high land values where interest rates have been low in the past are making use of the new system to an extent greater than was expected.

SCOTTISH BANKERS

The forty-second annual report of the Institute of Bankers of Scotland reaches *The Monetary Times* by the courtesy of the secretary-treasurer, Mr. Wm. Baird, F.S.A. (Scot.), Clydesdale Bank, Portobello, Scotland. In moving the adoption of the report at the annual meeting held in Glasgow, the president stated that despite the greater number of deaths, consequent upon the members who had fallen in the battles of the terrible world war, the membership stands higher than at any former time. The war was also responsible for the decrease in the number of candidates for examination. The important question of the proposed "Decimalization of the Coinage," which had been engaging the attention of the Institute of Bankers in London, was dealt with by a committee and the report sent to the institute in London, but no indication of the findings are stated. With regard to the projected "British Trade Corporation," Mr. Adam Tait (Royal Bank) gave his individual view that no benefit or advantage can accrue to Scotland or to Scotch traders and manufacturers through such a corporation. The Scottish traders, in his opinion, will require to establish a channel and medium for themselves through the existing banks or otherwise, if they are to secure the advantages in regard to new openings for business which are expected to present themselves after the war. With regret it was reported that the secretary-treasurer had intimated the desire to resign after 20 years' service to the institute during which period the membership had grown from 1,045 to 2,801. The abstract of accounts gave the last annual receipts, £1,363 and expenditure, £1,187. The funds of the institute, invested chiefly in war loan, totalled £3,336. The candidates for examination numbered 650, a decrease of 209 of the total of the 1916 entrants. In passing it might interest examiners to note the relative proportion of failures in the following professional subjects: Laws of bills and banking and currency, 26 per cent.; Scots law and conveyancing and political economy, 24; mercantile law, 19; stocks and stock exchanges, 15; law of bankruptcy, 13; practical banking, 12; foreign exchanges, 10. The council reported that while the scarcity of paper rendered difficult the publication of The Scottish Bankers' Magazine, over 10,000 copies have been distributed gratuitously and the standard of efficiency maintained. We find by the list of members attached to the annual report that the institute has more members domiciled in the Dominion of Canada than elsewhere out of Great Britain, as follows: Toronto, 7; Montreal, 6; Winnipeg, 5; Hamilton (Ont.), 2; Victoria, B.C., 2; and one member respectively in Norwood, Man., Calgary, Edmonton, Gadsby, Gleichen and Youngston, Alta., Briercrest, Foam Lake, North Battleford, Prince Albert and Swift Current, Sask., and Whitehorse, B.C.

The Southern Alberta Wool Growers' Association has accepted a bid of 63.83 cents a pound from a Toronto firm for 645,000 pounds of wool.

TRAINING OF A LIFE INSURANCE AGENT

How a Man May Qualify as a First-class Salesman—Persuasiveness a Great Asset

The following is the greater part of the essay declared to be the winning one in the competition of the Dominion Life Underwriters' Association for the best essay on salesmanship. It was written by Mr. D. H. Shortell, of the Montreal agency of the Confederation Life Assurance Company, Toronto:—

Salesmanship is the art exemplified in properly adjusting demand and supply. Viewed thus, its importance to society may be readily seen. It serves as the balance-wheel of modern economic life, preventing waste and preventing want. Again, looking at it from the point of view of the individual, since every man has something to sell which some other man wishes to buy, salesmanship enters, whether we will it or not, into the lives of each and every one of us. But only those men are known as salesmen whose efforts are openly devoted to the disposal of goods or other values. Their duties vary much—some have duties comparatively simple, others comparatively complex. Some so-called salesmen are mere order-takers—their work is vital.

In grading the duties of salesmen according to the difficulties they meet, it will be found that few have duties more difficult than those of the life insurance agent. For the very same reason none has more opportunity for the exercise of outstanding talent. For his market or buyers must be sought from unknown sources, and his wares at first sight are not attractive. He must, therefore, discover a buyer, educate him to the advantages of a contract apparently presenting no immediate gain, and persuade him of the necessity of entering the contract at once. His appeal must be to the intellect, to the emotions and to the will—in short, to the whole man.

A Sound Proposition.

How, then, is this almost impossible looking feat of skilful salesmanship to be accomplished? And how varied to suit the millions of individual buyers? Evidently there must be some unity in the variety of method as there is variety in the unity—and this characterizes all great art. The very elusive character of the proposition affords scope for salesmanship of a high order, and then the problem becomes quite simple.

For (1) the proposition is absolutely sound. Nothing bigger, nothing more stable, nothing more philanthropic, nothing more safely guarded and wisely administered exists in modern economic life than life insurance. Its coldly logical truth is based on extensive experience and pure mathematics. Its warmth of charity is measured not in terms of present needs, but of future safeguards. It is the counterpart of religion itself. The latter lays up spiritual treasures for the life beyond the grave, while the former stores temporal ones for the here or the hereafter.

And (2) it will inevitably mature. For what more certain than time and death? Endowment policies are based on the first, life policies on the second. Still, men are prone to buy a luxury and let a necessity wait: to buy an auto on credit and fail to provide a winter's supply of coal.

Persuasiveness, a Great Quality.

From this very weakness of human nature springs the need of the greatest quality in a life insurance salesman, viz., persuasiveness. There is little difficulty in convincing the average man of his personal need of insurance (if he has anything insurable), but to persuade him to act now—there's the question. And to do it gracefully, artfully and forcefully in order to compel immediate action will tax the best efforts of the best salesman. Here can easily be seen the room for indefinite advancement in the art of selling. Each policy sold may accumulate a certain momentum for selling, but may be absolutely no guide in selling the next; so different are individuals that each case must be handled on its own merits. This infinite variety lends not only attractiveness to the work, but impetus. Further, it lends security, for prospects will never be wanting. The agent must select his own, and in so doing display another phase of his art. No trusts or corporations can ever corner the market.

Another stimulus to action and progressive methods is the amount of good done. For few buy insurance without being canvassed. Hence the salesman is not only doing philanthropic work, but also doing some work which would remain undone if he failed to do it.

Finally, no line of selling will be long continued if permanent satisfaction and pleasure do not arise from the work. Now, in selling certain lines of goods it might appear at times that the salesman and the firm he represents would realize most by disposing of the goods. Styles in wearing apparel, and even in breakfast foods, change quickly, and the failure to sell old goods results in a loss. But in selling life insurance the interests of the company, of the salesman and of the buyer are all identical; the sale benefits all alike according as it is wisely made. This is what raises the work into the rank of a profession. So the insurance salesman has all the monetary advantages offered to the business man which are seldom offered to the professional man, while he possesses in his work, on the other hand, the philanthropic character of the professional man seldom offered to the business man.

Thus glancing over the whole field of salesmen, it will be seen that none has greater difficulties and none has greater opportunities than the life insurance salesman. Like the doctor, he is at every man's service at any hour; his whole work is philanthropic service. Like that of the teacher and the preacher, his work is always educative, always beneficial. Like the lawyer and the judge, he has ever knotty questions to decide. Like the business man, the harder he works the more he sees to do. He is all salesman combined—the very essence of salesmanship.

POWER COMPANIES WARNED

"So rapidly is the demand for hydro-electric power increasing in the Niagara zone that more than 83,000 additional horse-power will be required within a very short time." This was the statement made by Sir Adam Beck in addressing the Union of Canadian Municipalities at the recent convention. Sir Adam Beck issued a warning to the power generating companies which now export 140,000 horse-power from Niagara to the American side, that unless they deal fairly with the people, the Hydro-Electric Power Commission will avail itself of the machinery to end such exportation. The commission, he said, is prepared to make use of the machinery provided by the legislation under which expropriation proceedings may be undertaken.

He intimated that an order-in-council is now pending to expropriate the whole of the energy generated on the Canadian side, for the use of the people of Ontario. Sir Adam declared that no objection can be raised to such action when the purpose is to conserve the power for the people of Canada.

INSTITUTIONAL ADVERTISING FOR LIFE COMPANIES

At the recent annual convention at Winnipeg of the life underwriters, Mr. B. W. N. Grigg, publicity manager of the Mutual Life Assurance Company of Canada, Waterloo, Ont., pointed out that institutional advertising would certainly create a very much enlarged market and those companies would capture the market who did the most attractive individual advertising. Thus, if the companies provided the funds, there would be a heavy contribution required for the "pool," and also a big additional outlay in order to take advantage of the increased demand. The speaker suggested that the expense might be borne by the agents and the companies jointly—the agents contributing either directly or by a reduced commission. Mr. Grigg maintained that an agent could afford to work at a lower commission for a well-advertised company, than for one that did not advertise. Similarly, if the co-operative advertising were paid for by the companies it would be fair to expect a reduction of commissions. It was hoped the new movement would increase the amount of business produced for the same money and at the same time the agent's income would not suffer because he would more than make up in the number of applications for the reduced commission on the individual policy.

It will be seen from the above what a complex problem is presented by institutional advertising and in view of the heavy expense the speaker suggested that the project be held over until after the war when the strain of the extra mortality incident to the war would be relaxed. In any event, if adopted, it would be a great success if properly done and while increasing the amount of the new business would effect an economy which to-day is so vital to the interests of life insurance.

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

AUGUST FIRE LOSSES

With Substantial Waste Last Month, Fire Losses This Year to Date Are Nearly $12,000,000

The Monetary Times' estimate of Canada's fire loss during August is $1,230,183, as compared with July loss of $1,101,734 and $1,057,109 for August of last year. The following is the estimate of the August losses:—

Fires exceeding $10,000 . .	$ 978,500
Small fires reported	91,225
Estimates for all unreported fires	160,458
	$1,230,183

The Monetary Times' record of the first six months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January	$ 2,796,312	$1,240,886	$ 1,640,217	$ [illegible]
February	2,020,740	1,010,550	3,275,000	2,000,953
March . .	2,000,000	1,631,696	1,409,501	2,350,650
April . .	1,916,235	1,406,747	1,469,437	1,317,714
May	1,035,516	881,855	1,850,205	1,103,110
June	1,267,410	1,157,150	404,557	1,184,627
July . . .	2,033,130	773,200	1,150,285	1,101,734
August	2,021,370	403,603	1,057,109	1,230,183
Totals ...	$18,451,412	$8,811,188	$12,322,911	$11,976,631

The fires reported in August at which the losses amounted to $10,000 and over were:—

Kingston, Ont., August 2, W. L. Kelley Oil Company's plant, $16,000.

Millardville, B.C., August 3, Lamont Brothers' shingle mill, $10,000.

Niagara Falls, Ont., August 9, Clifton House ice-making plant, $20,000.

Alton, Ont., August 20, Alton Knitting Mills, $110,000.

Montreal, Que., August 20, H. Gray & Company's building, $40,000.

Trail, B.C., August 9, business section, $22,500.

Estuary, Sask., August 20, business section, $400,000.

Pipestone, Man., August 2, business section, $50,000.

Strathroy, Ont., August 4, Strathroy basket factory, $10,000.

Winnipeg, Man., August 6, Macdonald's wholesale grocery house, $300,000.

Goderich, Ont., August 29, Goderich Manufacturing Company, $100,000.

Among the reported causes in August were:—Lightning, 21; children playing with matches, 1; defective stove, 1; fire started in oil, 1; sparks from chimney, 1; coal oil stove explosion, 4; defective wiring, 5; incendiarism, 2; spontaneous combustion, 3.

The structures damaged and destroyed last month included:—Dwelling houses, 32; barns, 46; theatres, 1; plants and factories, 11; town hall, 1; business sections, 3; autos, 3; railway station, 1; stores, 11; hotel, 1; rock house, 1; stables, 7; laundry, 1; oil house, 1; mills, 5; freight car, 1; oil well, 1; garage, 1; coal premises, 1.

The fires at which fatalities occurred were:—

Marblehead, Aug. 1	Suicide by fire	1
Picton, Ont., Aug. 8	Trapped in house fire	3
Montreal, Que., Aug. 1.....	Using coal oil to light fire..	1
Quebec, Que., Aug. 22	Trapped in burning house ..	3
Montreal, Que., Aug. 24 ...	Oil stove explosion	1
Moncton, N.B., August 23......	....	1
Sarnia, Ont., August 28....	Trapped in burning oil plant	2
		12

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first eight months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.
January ...	27	27	27	14	26	3	10	21
February .	15	12	11	21	18	11	23	19
March	20	18	24	22	27	23	23	20
April	37	20	15	11	22	14	6	15
May	15	28	18	33	8	5	14	12
June .	52	13	6	18	12	2	6	9
July	15	110	9	9	8	13	213	19
August ...	11	22	10	29	3	14	30	12
Totals ..	192	250	120	157	124	85	325	127

The fire losses in Toronto during August totalled $15,746, or an average of $52 a day. The damage to buildings amounted to $6,261, and to contents, $9,485. The firemen answered 128 alarms. Twenty were false. Children playing with matches caused seventeen outbreaks, sixteen fires were attributed to unknown causes. The firemen also had two runs outside of the city.

An estimate made by an expert forester who has travelled through the British Columbia region affected by the forest fires last month is that $5,000,000 worth of timber was destroyed in Southern British Columbia alone. The loss by reason of the forest fires which have burned in the Alberta forest reserves is not nearly so great, in fact, would be covered, perhaps, by an estimate of $200,000, and this loss was principally in the one great fire which swept the slopes of Crow's Nest mountain in the Crow's Nest Pass country.

TWO CONNECTICUT INSURANCE COMPANIES HERE

The Ætna Casualty and Surety Company and the Automobile Insurance Company of Hartford, the two companies of Connecticut, organized by and affiliated with the Ætna Life Insurance Company—writing all lines of casualty and fire insurance, are applying for license in Canada. The Ætna Life has been transacting life insurance in the Dominion for more than half of a century, being represented in Montreal by T. H. Christmas and Sons, who have been managers for the company since its entry in Canada, and by Johnson and Orr in Toronto. These gentlemen will materially assist in development of the general casualty business.

The Ætna Life is in its 68th year and has paid out in claims more than 300 millions of dollars. The statement of the Ætna Casualty and Surety Company, as of June 30th, shows assets of $9,190,190.32; liabilities of $4,529,420.61; and surplus to policyholders of $4,660,769.71. The capital of the company is $2,000,000 It wrote in premiums in the United States last year $6,279,778.27, and it is believed that it will pass the $10,000,000 mark this year.

The figures of the Automobile Insurance Company as of June 30th show assets of $5.862,861.46; liabilities, except capital, $2,039,342.79; surplus to policyholders, $3,823,518.67. The capital is $2,000,000. The amount of premiums written by the company last year was $2,252,328.33.

A central branch office will be located either in Montreal or Toronto, in charge of the Canadian manager, who has yet to be appointed.

LUMBERING AND SHIPBUILDING

The value of the lumber, lath and shingles cut in 1916 was slightly less than in 1915, and amounted to $66,072,222; of this $58,365,349 represents lumber, of which 3,490,550 thousand feet board measure were cut as compared with 3,842,676 in 1915, says the monthly commercial letter of the Canadian Bank of Commerce. In eastern Canada the prospects for the lumber industry have been improved by the partial removal of the British embargo placed on shipments on private account. Canadian shipments are now permitted without licenses from the British controller of timber supplies, when forwarded as deck cargoes. Purchases by the Imperial authorities have been insignificant in amount. Production has been limited by the enlistment of large numbers of men in forestry battalions for service in Great Britain and France. In spite of this decided handicap and the resulting decline in quantity, the value of the output for the current year will probably be about the same as for last year.

In British Columbia the mills continue to operate as fully as the labor supply will permit. There is some increase in the local demand arising out of the improvement in general conditions, but the prevailing activity is sustained chiefly by orders from other provinces and from abroad.

The steel and wooden craft in course of construction at the present time in British Columbia yards are valued at $20,000,000. Among the vessels being built are two for the Dominion government, eight for the Imperial government, four for Norwegian shipping houses and seven wooden schooners for the lumber trade. This activity had its inception not more than a year ago and its development has had a very inspiriting effect upon the business of the entire province. The traffic of the port of Vancouver during the 12 months ending March 31st last, was the heaviest on record, the vessels entered inwards and outwards numbering 21,301, and registering 11,735,984 tons, as compared with 9,942,197 tons in 1916, and 10,347,563 tons in 1915.

AUGUST MUNICIPAL BOND SALES

Total was $4,637,836—Several Large Issues Were Marketed

The municipal bond sales in Canada for August, as compiled by *The Monetary Times*, amounted to $4,637,836, compared with $3,814,489 for July and $1,521,525 for August of last year. Comparing the record of August, 1916, with that of the month just ended, the bond sales are as follow:—

Sold in	1917.	1916.
Canada	$4,637,836	$1,521,525
United States	......	3,631,200
Total	$4,637,836	$5,152,725

The municipal bond sales in Canada for the first eight months of the year, according to *The Monetary Times'* bond record, were as follow:—

	1913. $	1914. $	1915. $	1916. $	1917. $
January	1,337,500	1,953,137	1,784,947	1,909,441	1,969,256
February	1,038,806	5,995,336	3,047,011	1,419,909	458,874
March	335,492	5,123,176	2,572,357	2,027,741	229,013
April	3,693,857	2,847,953	8,603,094	1,979,852	430,974
May	880,630	6,400,755	3,464,281	2,649,000	1,375,039
June	2,435,726	4,617,857	2,395,744	4,428,100	1,642,003
July	1,591,924	2,180,758	1,618,422	1,485,225	3,814,489
August	526,300	395,395	1,087,415	807,297	4,637,836
Totals	11,840,235	29,514,367	24,573,271	16,706,565	14,557,484

There were no Canadian bond sales in the United States for the month of August. Sales for the first eight months of 1914, 1915, 1916 and 1917, were as follow:—

	1914.	1915.	1916.	1917.
January	......	$ 340,000	$ 3,183,215	$2,285,000
February	$ 50,000	6,471,000	899,506	485,752
March	18,000	6,543,947	595,000	95,000

"If there are no courts that men can trust, there can be no credits or contracts. If these are not, neither capital nor wages come."

"A clear and wise economic picture of Mexico, beyond any others that I have read."
Dr. Talcott Williams of Columbia University.

The Mexican Problem

By

C. W. BARRON

Author of "THE AUDACIOUS WAR."

A business solution, based on first hand investigation, Mr. Barron's vivid and illuminating portrayal of Mexican unrest, casts a shaft of light over the whole field of international affairs and throws into sharp relief the fundamental causes of all wars.

With Map and Illustrations, $1.00 net.

THOMAS ALLEN, TORONTO
HOUGHTON MIFFLIN CO., BOSTON

"This is the need of Mexico to-day—opportunity to labor, opportunity for the family, opportunity for food, clothing, better shelter, and better social conditions.

"And this is exactly what Canadian, American and European capital and organization have brought to Tampico, attracted by its underground wealth, and this is what will ultimately redeem Mexico and forward her people by industrial opportunity."

The amount of foodstuffs which Great Britain can purchase in Canada depends upon the amount of money which the Canadian government can supply to the Imperial treasury for the purpose, and this again depends upon the savings of the people of Canada and their willingness to place their savings at the disposal of the government by subscribing to war loan issues. It is clear that from this time forward the continued prosperity of Canada during the war will depend upon the thrift of the people and the success of government war loan issues. Canada, it is learned, can get all the business she can finance, and no more. The minister of finance has no doubt that the necessary credits for all purposes will be established.

DIVIDENDS AND NOTICES

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 122.

(2½%) on the paid-up Capital Stock of the Company for the quarter ending Sept. 30th, 1917, being at the rate of ten per cent. per annum, has this day been declared, payable Oct. 1st, 1917, to shareholders of record at the close of business on the 10th day of September, 1917.

By Order of the Board.
J. KITTO,
Secretary.

Toronto, Aug. 31st, 1917.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over **$5,000.00,** and he has built up a future income of over **$3,000.00 a year** on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. **W. A. Peace,** Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

WANTED.—By an experienced insurance man position as Inspector for a Board Fire Insurance Company for British Columbia and Alberta. Can furnish the best of references. Apply Box 105, *The Monetary Times*, Toronto.

I OFFER for sale the Canadian Patent Rights to an exceedingly valuable invention in the auto tire accessory line. The article is now being profitably manufactured in the States. It has been a demonstrated success from the start and the factory is now behind on orders. Is easily sold, as every car owner is a prospective customer. The article is easily manufactured. Only a small amount of inexpensive and easily secured machinery required. Nothing but standard materials used.

R. M. MACNISH, Pres.,
ARMORED TIRE CO.,
143-145 West Austin Ave.,
CHICAGO, ILL.

C.P.R. and C.N.R. TRACKAGE

St. Boniface - Man.

A Sacrifice for Cash

If interested in a valuable manufacturing site of one fourth of one acre to one acre, write for particulars of an excellent location—one mile from Winnipeg Post Office.

Owner must sell on account of war-time pressure.

APPRECIATION

The Monetary Times,
Toronto, Ont.

Dear Sirs,

Replying to yours of the 25th. We have inadvertently paid you our subscription for two years. That need not matter very much. According to the writer's recollection we have always been a subscriber to The Monetary Times, and as far as the writer knows we always expect to be, so you will simply extend the date of our subscription to June 30, 1919.

Yours truly,

THE WATEROUS ENGINE WORKS CO.
Limited

Walter T. Mair,
Treasurer.

Brantford, Aug. 27, 1917.

The London City & Midland Bank Limited

HOW THEY DO IT NEXT DOOR

The Liberty Loan committee of New England is inviting suggestions from bankers regarding methods to be employed in the next campaign. The manager of a prominent house makes the following suggestions:—

"The Liberty Loan committee in New England should place in the hands of each local chairman, at the earliest possible date, a complete plan for an effective organization of the resources of that community. Each chairman should be impressed with the importance of completing this organization at once, so that when full details of the next loan are announced, there will be no time lost in completing organization and other preliminary work.

"Each committee should select voluntary solicitors, who preferably should be under the supervision and direction of trained bond salesmen. The energy of the workers should be concentrated upon those people in the community who did not subscribe for the last loan. So far as possible a competitive element should be introduced into the work of the solicitors.

"The work of each Liberty Loan committee should be under the direct personal supervision of a representative of the Liberty Loan committee of New England. Effective supervision of this kind is eminently superior to telegrams, form letters and other communications issued from headquarters."

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Estuary, Sask.—R. H. Street and Company's office building. Estimated damage, $1,100. Insurance on stock, $50; on buildings, $700; total insurance, $750, carried in the Glens Falls Insurance Company.

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, were: imports 1915, $133,113,099; 1916, $33,717,992; 1917, $30,678,253; and exports 1915, $90,555,512; 1916, $81,392,217; 1917, $39,315,820. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Cavan, Ont.—Mr. Wm. McLaren's barn and contents. No insurance carried.

Collingwood, Ont.—August 27—Mr. Wesley Neil's stable and contents destroyed and house badly damaged. Insurance carried on stable and contents $150, on house $1,000. Cause, spontaneous combustion.

Collingwood, Ont.—August 25—Mr. Jas. Reid's dwelling-house. Estimated loss, several thousand dollars. Insurance carried as follows: $2,000 on building in the British-American and Lancashire and $1,000 on contents in the North British.

Bellevue, Alta.—August 28—Business section of town destroyed. Estimated loss, $200,000.

Denfield, Ont.—August 27—Mr. Hardy's residence destroyed. Cause, oil stove setting fire to curtains.

Essex, Ont.—August 29—Mr. W. Lampman's barn and contents destroyed. Estimated loss, $3,000. No insurance carried. Cause, spark from threshing machine.

Glace Bay, N.S.—August 25—Mr. Kenneth Tilley's dwelling house badly damaged. Cause, overturned oil lamp.

Goderich, Ont.—August 29—The Goderich Manufacturing Company's factory almost completely destroyed. Insurance was carried.

New Liskeard, Ont.—August 26—Wm. Sheperdson Company's sawmill destroyed, with 20,000 feet of lumber.

Parry Sound, Ont.—August 27—Mr. Gluckstein's house destroyed.

Ripley, Ont.—August 23—Mr. Thos. Harris' barn destroyed. Cause, lightning.

Salmo, B.C.—August 26—Kootenay Shingle Company lost 3,000 cords of shingle bolts.

Saskatoon, Sask.—August 26—Western Distributors Company's barns and contents destroyed.

Truro, N.S.—August 26—Mr. George Craig's barn with several tons of hay destroyed. Small insurance carried.

Vancouver, B.C.—August 26—Mr. P. Leisk's residence badly damaged. Cause, defective flue.

Winnipeg, Man.—August 26—The Oribo Manufacturing Company's premises badly damaged. Estimated loss $3,000, fully covered by insurance in the Hartford Insurance Company.

August 28—Gold Medal Furniture Company's building and stock totally destroyed. Estimated loss, $50,000.

DISPOSAL OF CANADIAN NORTHERN BONDS

Sir Thomas White, in reply to a question in the House of Commons as to the disposition of the $45,000,000 Canadian Northern Railway 4 per cent. bonds, guaranteed by the Dominion of Canada in 1914, said that, as far as he was aware, none of them, with the exception of those held by the Dominion government, were held in Canada. He presented a statement showing that, of those bonds, $12,500,000 par value were pledged to the Dominion government as security against advances of Dominion notes to the amount of $10,000,000 in 1914. There were sold in London through Messrs. Lazard Brothers and Company in July, 1914, £3,000,000 at a net price to the company of 91½, that is to say, for $14,600,000. There were sold in London through Messrs. Lazard Brothers and Company in February, 1915, £500,000 at a net price to the company of 91, plus accrued interest, making $2,433,333.33. There were pledged to the Columbia Trust Company, New York, as security for a note issue of the Canadian Northern Railway Company of $11,500,000, $15,333,333.34, making the total amount of the issue disposed of $44,8[illegible]666.47, leaving a balance of $133,333.33 still at the disposal of the company. All the bonds were sold outside of Canada.

CANADIAN TRADE LAST YEAR

United Kingdom's Share of Our Import Trade in 1916

The trade of Canada for 1916 is analysed and reviewed in a report just published, to the British government's board of trade, by Mr. C. H. Wickes, British trade commissioner in Canada and Newfoundland. After reviewing the general economic conditions in Canada in 1916, with special reference to crops, minerals, immigration, census of manufactures, etc., Mr. Wickes proceeds to deal with imports into Canada of selected articles in which the United Kingdom is in a position to compete, and points out that the value of the United Kingdom's share in this trade in "competitive merchandise" declined from 29.2 per cent. in 1915 to 27 per cent. in the year under review. He has compiled a table (printed at the foot of this page), showing the value of imports for consumption into Canada of certain selected articles in which United Kingdom manufacturers compete with those of foreign countries for the years 1915 and 1916, together with the percentage proportion of each import from the United Kingdom, as well as the gross amount of imports into Canada during those years.

The report gives the following notes on the trade in some of the principal articles of import:

Some of Principal Items.

There was a noticeable increase in the arrivals of cocoa preparations, chiefly from the United States.

The falling off in imports of tea during 1916 was considerable. Although imports from the United Kingdom increased, there was a great decrease in direct arrivals from the British East Indies.

The increase in imports of manufactured tobacco came almost entirely from the United Kingdom, but in pipes and smokers' sundries the bulk of the increase was from the United States.

The United States increased its lead considerably in imports of bricks and tiles, especially fire bricks.

There was an advance in the value of the imports of drugs and chemicals of over $11,000,000, or 82 per cent. in excess of 1915—the United States, under present conditions, easily obtaining the major portion of the additional trade.

As regards imports of earthenware, china and glass, the United States also obtained the bulk of the increased business, especially in plate and window glass.

The value of the total imports of manufactures of metal and machinery increased by 37 per cent. Imports of British goods have remained practically stationary, the additional trade being from the United States. In 1915 the relative proportion of the trade from the United Kingdom was 7.7 per cent.; in 1916 it has fallen to 6.1 per cent.

The trade in paints and colors in 1916 increased by nearly 70 per cent. in value, while the imports from the United Kingdom increased by 37 per cent.

The position as regards manufactures of paper, books and stationery is less favorable, total imports having increased in value by about 20 per cent., while United Kingdom figures show a decrease of 4 per cent.

It is worthy of note that the entire increase in value of imports of precious stones, etc., is traceable to imports of unset diamonds from the United Kingdom.

It will be noted that a slight improvement is shown in the value of settlers' effects entered from the United Kingdom during 1916. The bulk of the increase during the year is, of course, traceable to arrivals from the United States.

PUBLICATIONS RECEIVED

Banking.—Monthly financial letter of the National City Bank of Chicago.

Trade and Finance.—Monthly letter of the First National Bank of Boston, Boston.

Finance.—Mr. Charles Wallace Collins has supplied much needed information in his book on the budget system. There are many vague and hazy ideas as to the real meaning of the word, and its use in connection with the financial affairs of a nation. Mr. Collins has eliminated all doubts in his clear and comprehensive work. "The National Budget System and American Finance." By Charles Wallace Collins. Published by the Macmillan Company of Canada, St. Martin's House, Toronto. Price, $1.25.

Trade of Canada.—Report of the trade of the Dominion of Canada for the year 1916, by Mr. C. Hamilton Wickes (His Majesty's trade commissioner in the Dominion of Canada and Newfoundland). To be purchased through any bookseller or directly from H.M. Stationery Office at the following addresses:—Imperial House, Kingsway, London, W.C.2, and 28 Abingdon Street, London, S.W.1; 37 Peter Street, Manchester; 1 St. Andrew's Crescent, Cardiff; 23 Forth Street, Edinburgh; or from E. Ponsonby, Limited, 116 Grafton Street, Dublin; or from the agencies in the British Colonies and Dependencies, the United States of America, and other foreign countries, of T. Fisher Unwin, Limited, London, W.C. [Cd. 8679.] Price 3d. net.

MANY SHIPBUILDING CONTRACTS

Particulars of Orders Being Filled in British Columbia—Work of Munitions Board

(From our own Correspondent.)

Vancouver, B.C., September 3rd.

Shipbuilding in British Columbia, which was started on a modern scale only a few months ago, is now an important industry, and contracts for the construction of ships are in hand, the aggregate value of which is $27,500,000. These comprise iron steamers and wooden auxiliary vessels, and the yards are located at Vancouver, Victoria, Port Coquitlam, New Westminster and at Quatsino.

Six steel steamers of 8,800 tons dead weight are to be built by J. Coughlan and Sons, Vancouver, three of which are under construction, the first to be ready about the end of this year. Five are for British account and one for Norwegian, the value of each to be $1,250,000.

The original programme at the Wallace shipyards, North Vancouver, was for six auxiliary power schooners, valued at $150,000 each. Four of these are finished. In addition, one steel ship has already been built and a second is started, while a third is to be built. These ships will cost $650,000 each. The No. 2 yard of this company has been taken over by the Lyall interests of Montreal, which will build six steamers for the Imperial Munitions Board, at a cost of $350,000 each.

Small Ships in Demand.

The Western Canada Shipyards, on False Creek, will build six wooden steamers for the Imperial Munitions Board, two having been started. The aggregate value of these will be $4,500,000. The British Pacific Engineering Company, Vancouver, has a ship construction programme of about $1,500,000. The Taylor Engineering Company, Vancouver, has taken up the designing of ships, and is constructing small ships of a total value of $300,000.

The Vancouver Shipyards and Engine Works, a new concern, has located a yard on Burrard Inlet and will build ships for sale instead of on contract. The Whalen Pulp and Paper Company, which has its offices in Vancouver, with pulp plants at Mill Bay on Howe Sound, Swanson Bay and Quatsino, west coast Vancouver Island, will build ships at Quatsino for its own uses, and will lay two keels immediately.

The Cameron-Genoa Mills, Shipbuilders, Limited, Victoria, has launched four wooden auxiliary power schooners, and two more are to be built. These cost $150,000 each. It will also build four wooden steamers for the Imperial Munitions Board, of a total value of $1,400,000.

Draught Steamers for India.

The Foundation Company has leased Turpel's shipyard, Victoria, and is constructing five ships for the Imperial Munitions Board, approximate value, $1,750,000. Yarrows, Limited, Victoria, is building four shallow draught steamers for river navigation in India. The British Columbia Construction and Engineering Company is establishing yards on Poplar Island, New Westminster, and will build four steamers for the Imperial Munitions Board, at a cost of $1,400,000.

The Pacific Construction Company has taken over the yard of the Coquitlam Shipbuilding Company, at Port Coquitlam, and will build two wooden steamers for the Imperial Munitions Board, to cost $700,000.

Harrison and Lamond, South Vancouver, have a contract to build an auxiliary schooner for the Dominion government for the trade between the Pacific and the Atlantic, the cost to be $150,000. Other concerns having shipbuilding plans are the British Columbia Marine, Sound Construction Company, Victoria Machinery Depot and the Westminster Marine Ways.—R.B.B.

The value of the exports of pulp, pulpwood and paper for the 12 months ending March 31st was $52,075,457, or 31.0 per cent. more than in the previous 12 months. The increase is due partly to the advance in price and partly to the increased output. In 1916, 2,833,119 cords of pulpwood were produced, as compared with 2,355,550 cords in 1915. A noteworthy development of the past decade has been the steady gain in the quantity of wood manufactured into pulp, while the quantity of pulpwood exported has remained stationary.

FIRE LOSSES AND INVESTIGATIONS

Inquiries Seldom Bring Out the Facts as to Origin of Fires

By Henry Lye.

In 1765, only two years after the cession of Canada to Great Britain, one-fourth part of the city of Montreal was consumed and about a third of its value. The loss amounted to £87,500 sterling. In 1768 upwards of ninety houses and two churches were burned. On June 6th, 1852, a great number of buildings were destroyed at the time when the merchants had completed their spring importations, the loss being estimated at £144,000.

The Monetary Times of August 3rd, 1917, has an estimate of fire losses in Canada during July, 1917, amounting to $1,101,734, comparing this with the losses in June, 1917, of $1,184,627, and in July, 1916, of $1,159,285, so Canadians have experiences in fire losses from which they have learned nothing as to precautionary measures. It is altogether unnecessary that so great values should be destroyed month by month

Investigations and Facts.

It has not been practicable to reduce the fire losses by any system of post-mortem investigations, as these investigations seldom bring out the facts as to the origin of fires, most of which are caused by ill-construction, carelessness or design; therefore, those who are responsible for their occurrence are interested in making excuses or false statements whilst withholding information. When, however, the facts are obtained they are not utilized for the prevention of fires from similar causes, because there is no machinery for the enforcement of precautions. We were led to hope for great things from the Board of Conservation, but have been grievously disappointed, because it appears to be a scheme of compilations instead of correctives, although all classes, from the minister of finance to the laborer on the highway, suffer from the effects of every fire. You cannot bound the co-ordinate consequences of any fire in losses of income and increase of taxes.

Overwhelmed with Afterthoughts.

We are overwhelmed with afterthoughts. The municipal authorities decree that in case of repairs and reconstruction certain substitution shall take place, which, being applied in time, would either have prevented the fire or decreased the possible damage therefrom. The provinces have appointed fire marshals and the Dominion has a Board of Conservation, yet our fire losses average more than a million of dollars per month, not including conflagrations.

I have adjusted fire losses over a large portion of this continent, and have seen that nothing is learned from the happening of fires. In most towns the rears of the stores are encumbered with piles of old boxes, crates, straw and paper. In one of them after a fire I told the mayor that if these were not at once removed I would wire all the fire insurance companies to cancel their policies. I had no authority to enforce a cleaning up, but I got it done. Of course, I made myself unpopular, but there have been no more conflagrations in that town, because the whole situation was considered.

Fifty Thousand for Inspections.

I told the fire insurance companies some years ago that if they would place $50,000 to my credit, to be used in inspection, with authority to enforce precaution, I would guarantee to reduce the fire losses for the following year by $500,000. I knew of efficient assistants, but it was everybody's business, so nothing was done.

I was at a seaside resort a few days ago. There was a new pier about a quarter of a mile long. On each side were recesses for barrels of sea water for the extinguishment of fires, but the barrels were empty and were so dried out as to prevent any liquid contents. There were a lot of men smoking, throwing down half-extinguished matches and cigarettes. It was everybody's business, with nobody to do it, as usual.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Power and Transmission Company. The company has declared a dividend of 1 per cent., payable September 15th to shareholders of record August 31st, for the quarter ending August 31st. During the last three years dividends on the common have been paid semi-annually. The earnings of the company are showing very fair increases over last year.

Canadian Locomotive Company.—An excellent report for the company's past fiscal year will be mailed to shareholders next week. The net profits are considerably higher than last year, and show an unusually substantial increase over the profits of two years ago. The company has contracts in hand which will keep the plant fully occupied for some time to come. The impression of those in close touch with the company's methods and achievements is that the shareholders are well satisfied with the work of the present management and director, and that there will be no changes in this connection at the annual meeting, to be held on September 20th.

Montreal Tramways Company.—Although the company has suffered from the rising costs of operation, the gross earnings for the past year show a substantial growth. The total gross earnings from all sources expanded $1,115,733, or 16.9 per cent.; the increase in the passenger business proper is given as $930,986, or 14.5 per cent. Operating costs, however, increased $894,718, or 24.1 per cent. The gain in net earnings was, therefore, reduced to $221,015, or 7.6 per cent., and when increased charges had been met the gain in net income available for dividends had been reduced to $91,047.

Comparisons of the main features of the income accounts of the past three years follow:—

	1917.	1916.	1915.
Gross	$7,725,498	$6,609,765	$6,525,231
Expenditure	4,601,771	3,707,053	3,713,996
Net earnings	$3,123,727	$2,902,712	$2,811,235
Less:			
City's percentage	$ 491,431	$ 418,084	$ 414,149
Bond interest	858,542	806,721	825,415
Debenture interest	800,000	800,000	800,000
Taxes	98,400	93,600	92,800
Total deductions	$2,248,373	$2,118,405	$2,132,364

	$[illegible]	$215,874

Assets and liabilities show:—

Assets.

	1917.	1916.
Property account	$[illegible]	$1,435,394
Current assets	887,355	811,501
Investments	[illegible]	1,250,000

Liabilities.

	1917.	1916.
Capital	$[illegible]	$[illegible]
Current liabilities	700,043	508,295
Contingent liabilities	[illegible]	..

The annual report presented to the shareholders shows improved trade conditions in the cotton industry in Canada. It is pointed out in the report that while the profit and loss statement may not appear as satisfactory as might have been expected, the statement has been prepared on a conservative basis, keeping in view the existing conditions of the raw cotton market and the uncertain immediate future outlook of business generally.

Cape Breton Electric Company, Limited.—The following is a record of the company's gross earnings for the year ending June 30th, 1917:—

	June 30, 1917.	June 30, 1916.	Increase.
Gross earnings	$425,543	$381,700	$43,842
Operating expenses and taxes	253,057	223,401	29,655
Net earnings	$172,486	$158,299	$14,187
Interest charges	63,381	63,299	82
Balance	$109,105	$ 95,000	$14,105
Sinking fund requirements	15,360	15,311	48
Balance (for reserves, replacements and dividends)	$ 93,745	$ 79,689	$14,057

*Decrease.

The balance sheet shows:—

Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

You Look for Security

Whether with the intention of taking out insurance or associating yourself with some Company, you look for security.

The latest figures emphasize the unexcelled financial position of this Company.

Business in Force over......	$59,600,000
Assets over.................	16,400,000
Net Surplus.................	2,600,000

These are reasons why the Company is known as

"SOLID AS THE CONTINENT"

North American Life Assurance Co.

HEAD OFFICE - TORONTO, ONT.

IT HAS BEEN SAID

that "wives sometimes object to Life Insurance—but widows never do!"

Life Insurance is the surest of investments—no possibility of loss. Either dependent ones or the Insured himself benefits. The Great-West Life Policies are issued at low rates—on liberal and clearly-worded conditions—returning profits that add the attractions of a good investment to the benefits of protection for dependent ones.

Ask for information.

GREAT NORTH INSURANCE Co

ADVANCES FOR MUNITIONS, $385,000,000

Canada's Loans for British Purchases Here—Decrease in Shell Production

Sir Thomas White, finance minister, read the following statement of the chairman of the Imperial Munitions Board, in the House at Ottawa last week:—

"Ottawa, 21st August, 1917.

"Towards the close of 1916 the capacity for producing munitions in Great Britain had so increased that the minister of munitions advised that it was unnecessary to continue the production of munitions in the United States for British account, except for a few special lines. The production in Canada, however, was continued as before.

"The minister has now advised that it is unnecessary to continue production in Canada on the present scale. He has directed that certain lines shall be discontinued; that other lines shall be produced in lessened quantities; while some lines are to be continued as at present.

"The effect of this will be to stop the production of shells and components at some plants which are now producing sizes no longer required.

"In other plants, where shells are made of sizes of which a reduced output only is required, it will mean working during the day only, thus stopping night work. In other plants, however, where sustained production is required, operations will be continued night as well as day.

"These changes have been anticipated by several important firms, who have already resumed, or are planning to resume, their pre-war activities in their own lines, while others are engaged in the production or preparation for production, of equipment needed for ships now under construction or to be built during 1918."

Advances to Munitions Board.

Sir Thomas White stated that the Dominion government had advanced to date to the Imperial Munitions Board, for the purchase of munitions in Canada, the sum of $285,000,000. "There has also been advanced to the Imperial Munitions Board by the chartered banks of Canada in the same connection the sum of $100,000,000. The Dominion government, during many months past, has been advancing to the Imperial treasury, for the purchase of munitions in Canada, the sum of $25,000,000 per month. During July, we advanced $35,000,000; during August we are advancing $35,000,000, and we have arranged to continue the advances of $25,000,000 a month, during September, October, November and December, so that the Dominion government will continue to make the advances which we have been making in the past. During July and August we increased the amount of our advances by $10,000,000 each month.

"The government arranged in July, in addition to undertaking the programme mentioned, that is to say, of furnishing $35,000,000 in July, $35,000,000 in August and $25,000,000 per month for the balance of the year, to furnish the sum of $50,000,000 for the purchase of cheese, hay, oats and flour in Canada. The British government can purchase on this side of the Atlantic only to the extent that they can raise money on this side of the Atlantic. In order to provide the farmers of Canada with an export market for their cheese, we arranged to provide $40,000,000, which is the export value at the prices fixed of the cheese production of Canada, that $40,000,000 to be paid out during July, August, September and October. In addition to that sum, $10,000,000 was supplied for the purchase of hay, oats and flour. The House will thus get an idea of the magnitude of our financial transactions in connection with the purchase of these supplies in Canada.

Anglo-Canadian Finance.

"So far as concerns our expenditure in Great Britain and upon the continent, we borrow money from the Imperial government. The reason for that is obvious. That expenditure has to be paid in sterling money or in the currency of France or Belgium. We, therefore, borrow from Great Britain all money necessary for our expenditures in Great Britain and on the continent in respect of our overseas forces. As a set-off to that expenditure, the Imperial government asks us here to furnish them with credit from which they may purchase munitions, cheese, hay, oats and other products. The Imperial Munitions Board was created by the Imperial government. It takes its instructions from the Imperial government and gives orders to Canadian manufacturers according to instructions which it receives from the Imperial government. The Imperial government ask us to place the Imperial Munitions Board in funds from month to month to the amount mentioned. So far as our transactions are concerned, therefore, they are with the Imperial government which furnish us with money in Great Britain and on the continent, we supplying them with money here with which to pay for their commitments for munitions and other supplies."

NEW INCORPORATIONS

Mineral and Oil Companies Were the Largest Chartered Last Week

The largest companies incorporated last week were:—

Bennett Martin Asbestos and Chrome Mines, Limited, Thetford Mines, Que.	$1,500,000
The Progressive Gas and Oil Company, Limited (no personal liability), Hamilton, Ont.	1,000,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital and the persons named are provisional directors:—

Prince George, B.C.—Hansard Lake Lumber Company, Limited, $25,000.

Victoria, B.C.—The British Columbia Hardware and Paint Company, Limited, $10,000.

Midland, Ont.—Midland Free Press, Limited, $40,000. N. L. Playfair, T. C. Luke, E. R. Abbey.

Fort William, Ont.—Thunder Bay Store Company, Limited, $40,000. O. Larson, P. S. Larson, H. Karjala.

London, Ont.—W. E. Saunders and Company, Limited, $40,000. W. E. Saunders, C. O. Smith, N. Douglas.

Timmins, Ont.—The Boivin Tie and Lumber Company, Limited, $40,000. F. A. Day, W. A. Gordon, M. C. Ratchford.

Sault Ste. Marie, Ont.—Greenwood Telephone Association, Limited, $1,000. A. M. Fischer, J. Fleming, K. M. Wright.

Collingwood, Ont.—The Collingwood Steamship Company, Limited, $40,000. G. C. Coles, F. G. Moles, M. P. Byrnes.

Montreal, Que.—The Canadian Skirt and Manufacturing Company, Limited, $19,500. M. M. Popliger, O. Desroches, M. Kunin.

Thetford Mines, Que.—Bennett Martin Asbestos and Chrome Mines, Limited, $1,500,000. B. J. Bennett, A. R. Martin, F. Bennett.

Hamilton, Ont.—Mutual Motors, Limited, $25,000. J. M. McGill, H. E. Phillips, W. F. Roney; the Progressive Gas and Oil Company, Limited (no personal liability), $1,000,000. F. L. Snively, J. F. Green, T. G. Moore.

Toronto, Ont.—Pickering Sand and Gravel Company, Limited, $100,000. W. F. Curran, D. J. Gibson, R. E. Grass; Ridgeville Canning Company, Limited, $100,000. W. H. Irving, H. H. Davis, L. A. Landriau; Trenton Gas and Oil Company, Limited, $40,000. M. Macdonald, B. Williams, E. Smily.

Our Credits to Britain to be Increased

IMMEDIATE *Future of Our Export Trade Depends on this Action, Says Finance Minister—War Loans Are an Important Factor—The Problem Can Be Solved If Canadians Will Save Their Money and Invest in Dominion War Bonds.*

SIR THOMAS WHITE is taking active steps, say Ottawa dispatches, to increase the large credits which the Canadian finance department has already established for the Imperial Treasury to be availed of for the purchase of munitions, cheese, bacon and other Canadian food products. Exchange conditions between Great Britain and America are now such that Great Britain's capacity to purchase munitions and our manufactured food products is measured by the amount of money which can be loaned the Imperial Treasury by Canada for this purpose.

The question concerns not only the pressing need of Great Britain for these products, but the commercial and industrial welfare of Canada as well, as Britain has been the great export market for our cheese, bacon and other foodstuffs and the trade in these commodities has been built up only after years of untiring effort and the expenditure of much private and public money. The prosperity of our agricultural interests, particularly the live stock and dairying industries, is immediately involved, as our cheese and meat products have practically no export market save Great Britain. The fact that the Canadian farmer is able to sell his cheese to the Imperial cheese commission is due directly to the fact that the minister of finance in July last provided a credit of $40,000,000 from which the purchases of this cheese are being made. Without this credit the Canadian farmer could not have found a market.

At present the Dominion Treasury is furnishing over $25,000,000 per month to the Imperial Treasury to pay for munitions, ships, rolling stock and other material under order in Canada, and in addition will supply during July, August, September and October $50,000,000 for the purchase of cheese and other products purchased for the War Office by the department of agriculture. The Dominion government will continue its advance of $25,000,000 a month for the purchase of munitions.

It was to provide these needed credits to the Imperial Treasury and furnish money to purchase the cheese and other products that the minister of finance made the recent $100,000,000 note issue in New York, on which a high rate of interest and commission had to be faced in order that Canada's products might find a market and British needs for shells, cheese and other products might be met.

Up to date the Dominion Treasury has since the outbreak of the war financed the Imperial Treasury in cash and securities to a total amount of $450,000,000. On the other hand, the Imperial Treasury has financed Canada in connection with the maintenance of our forces in Great Britain and on the continent to a total of about $320,000,000.

The question of establishing further credits to enable Great Britain to purchase more Canadian foodstuffs is now engaging the attention of the minister. It is undoubtedly one of the most important questions in Canada to-day. It can be successfully met if the people of Canada will save their money and invest in Dominion war loan issues. The minister is now about to organize for the next of the issues which is to be made in November. A nation-wide effort will be put forth to obtain 150,000 or more subscribers. The minister is asking a committee of the Canadian Press Association to co-operate with him in developing the publicity campaign. This will start next month. The success of the loan will ensure credits from which Canada's food products and munition output can be financed and the present prosperity of the Dominion maintained.

If Canada is to secure a reasonable share of the business that is offering, it is obvious that something approaching a parity with the credit facilities offered in the United States must be forthcoming. That in the final analysis depends on whether government bond offerings here can be supported relatively as well as in the United States. Hence the new effort that is to be made to bring about a national campaign which will impress upon Canadians that the success of the government's loans is essential not only to the carrying on of the war, but also to maintaining the export business on which the country's prosperity in the past two years was founded.

Canadian banking opinion, in the matter of new British credits, is understood to favor aggressive campaigns in the selling of Dominion war bonds as the best, virtually the only, means of meeting a situation that threatens a considerable curtailment of our export trade. Thus far credits have been provided in two ways, partly through direct advances out of the Dominion government's funds, and partly through the banks' purchase of British treasury bills.

LOAN AND TRUST COMPANY BUSINESS

Ontario Companies' Receipts Increased Last Year—Various Changes Compared

How the operations of loan and trust companies were affected last year by existing conditions in Canada is shown in the loan corporation statements issued by the Ontario registrar of loan corporations.

The grand total receipts of the loan companies (with permanent and with terminating stock), of loaning land companies and trust companies, doing business in Ontario which in 1913 were $370,908,467, and in 1914 $305,604,414, dropped in 1915 to $241,729,473, with an increase in 1916 to $314,134,283. Of these $164,030,776 was received as corporate, trustee representative, guardian or agent in trust, while $150,103,506 was received by the corporations for their own use. The largest item in the receipts is the amount received from borrowers and investments. This totalled $67,603,719 in 1914 and in 1915 was less than $50,000,000, the correct figure being $49,845,811, increasing in 1916 to $62,495,677. The next largest receipts are the moneys received from depositors during the year. These aggregated $54,291,148. Debentures issued during the year 1914 totalled $13,238,537, while $10,775,149 were issued in 1915 and $11,406,895 in 1916, which is satisfactory in view of British Treasury restrictions. The loan companies having only permanent stock took by far the greatest proportion of deposits—namely, $44,376,681 out of $45,298,798 in 1915, and $53,202,203 out of $54,291,148 in 1916. The deposits of trust companies which previously increased considerably, having changed from $322,490 in 1912 to $4,141,398 in 1913 and to $8,107,786 in 1914, were nil in 1915 with $3,117,594 being received for guaranteed investments, last year $1,819,677 was received for guaranteed investments. Bank advances of all the four classes of companies in 1915 amounted to $1,495,368, while other borrowed money totalled $134,579, against $3,619,579 and $1,503,799 respectively in 1916. According to the report of the provincial department all these amounts were received by the corporations for their own use.

Trust companies in their trustee and similar capacities, received from borrowers during the year 1914 a sum of $47,677,268. In 1915 the sum received was $39,997,661, and last year $47,823,464. Their real estate rents totalled $1,569,783 and their real estate sales, $3,490,607. Money received for investment amounted to $57,672,785 in 1915, as compared with $50,851,125 last year.

Loaned on Mortgages.

In 1915, the four classes of companies under review loaned on mortgages $13,149,583, against $14,466,758 in 1916, and on other securities $18,176,325, as compared with $38,155,075 in 1916. The companies repaid their banks $6,102,245 in 1914, $7,111,766 in 1915 and $3,235,177 last year. They repaid other borrowed money amounting to $369,238 in 1914, $287,928 in 1915 and $2,069,365 last year. The cost of management of all the companies was $3,640,008. The expenses on corporation account aggregated $150,103,506 and on trust and agency account $164,030,776, a grand total expenditure of $314,134,283. Details of these receipts and expenditures appear in the accompanying table.

A total of $16,916,327 of debentures of all these classes of companies mature during 1916-17, the greater portion of these are the debentures of loan companies having only permanent stock, the amount credited to them being $15,816,501. Loan companies having terminating stock as well as permanent stock, or having terminating stock only, have $857,496, and loaning land companies have $242,329.

Interest Rates Paid.

It is interesting to examine the records of interest paid on the companies' deposits and various securities. Averaging the interest paid by the four classes of companies under review, we get the following result:—

Interest paid on	Rate per cent.			
	1915.	1916.	1913.	1912.
Deposits	3.69	3.68	3.750	3.7385
Debentures	4.683	4.760	4.500	4.4350
Debenture stock ..	4.0	4.25	4.0	4.0

The permanent stock loan companies paid in 1916 3.5457 per cent. on deposits, 4.6990 per cent. on debentures and 4.25 per cent. on debenture stock, compared with 4 per cent. on deposits and 5 per cent. on debentures paid by terminating stock loan companies. On the same accounts, the loaning land companies paid 3.50 per cent. on deposits and 4.583 per cent. on debentures.

The average rate of interest received on realty mortgages and other securities owned beneficially, may be summarized as follows:—

	Rate per cent. on			
	Mortgages of realty.		Other securities.	
	1915.	1916.	1915.	1916.
Loan companies (permanent stock	7.107	7.116	5.823	5.815
Loan companies (terminating stock)	6.64	6.96	6.70	6.30
Loaning land companies	6.28	6.10	5.66	5.66
Trust companies	6.913	6.873	5.872	6.523

The average rate of interest received by the trust companies on realty mortgages, not owned beneficially, was 5.867 per cent. and on other securities not owned beneficially, 5.909 per cent. The number and amount of mortgages enforced by the two classes of loan companies and by the trust companies may be tabulated as follows:—

	Owned beneficially.		Not so owned.	
	No.	Amount.	No.	Amount.
Loan companies (permanent stock)	954	$2,003,624	..	....
Loan companies (terminating stock)	..	....	..	....
Trust companies	130	405,100	322	$879,605

Changes in Debenture Holdings.

Commenting particularly on the changes in the debenture position, Mr. Victor Ross, Toronto, says:—"Pressure upon the investors of the United Kingdom is evidenced in the report issued by the Registrar of Loan Corporations in Ontario. Debentures payable abroad, chiefly in Scotland, declined during 1916 from $76,000,000 to $72,000,000. This means that many holders have had to call in their money. It is not a question altogether of the yield. The rate has been advanced generally to 5½ per cent. At such rates as are at present obtainable for mortgage money, either on city or farm property, there is but a slim margin of profit where such a price as 5½ per cent., plus commissions, has to be paid for funds.

"Of course the bulk of the funds which the corporations registered in Ontario are handling for the public, about $136,000,000, were obtained when rates were very much lower. Last year—that is, 1916—the average rate of interest paid on debentures was 4.760 per cent., and in the year previously 4.68. About ten years ago the average was below four per cent. For the time being the upward trend is very rapid. If high rates persist for a few years it is therefore quite probable that borrowers on mortgage security will have to pay more. At any rate the prospect of easier terms is bleak.

British and Domestic.

"As the British debenture holders call in their money there is obtained from domestic purchasers and deposits a steady supply of funds. The returns referred to show a fair increase, as comparisons of the corporations' liabilities in that respect in 1915 and 1916, as follows, show:—

	1915.	1916.
Deposits	$23,180,899	$24,545,532
Currency debentures	26,642,486	26,963,698

"It would thus appear that the Canadian investor in loan corporation securities is not as yet suffering the same pressure as Britishers are doing. The domestic supply of funds is not sufficient to satisfy a normal demand, for mortgage money. If therefore the corporations have to retire at each half-yearly term a considerable proportion of maturing sterling debentures it will be necessary for them to either call in mortgage money as it falls due or liquidate part of their security holdings, which represent about 25 per cent. of their liabilities to the public of $136,000,000. A margin of that extent is desirable, and any serious decline in that proportion would necessitate more mortgages being paid at maturity."

RECEIPTS AND EXPENDITURE OF ONTARIO LOAN COMPANIES

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Avonton, Ont.—September 4—Mr. Alex. Davidson's blacksmith's shop, also garage and stable nearby.

Brantford Township, Ont.—September 2—Mr. Robert Greenwood's barn burned to the ground. Cause, lightning.

Brantford, Ont.—September 6—Mr. J. Pate's two barns. Estimated loss, $7,000.

Burford, Ont.—September 3—The South Brant fair buildings gutted out. Estimated loss, $3,000. Insured for $1,500. Cause, defective wiring.

Dufferin, Ont.—September 2—Mr. Robinson Greenwood's barn burned to the ground. Small insurance carried in the Brant Mutual. Cause, lightning.

Esquimalt, B.C.—September 2—Ah-Jame's laundry burned to the ground. Estimated damage to building, $3,000; to machinery, $12,000. Most of the property was uninsured.

Fernie, B.C.—September 6—Steadman and Lockhart's wholesale liquor store, also the Venazia Hotel and gents' furnishing store, entirely destroyed.

Grey Township, Ont.—September 6—Mr. John Kirkconnell's residence destroyed. Insurance carried for $800 on house and $200 on contents in Howick Mutual Insurance Company. Cause, spark from kitchen stove.

Grey Township, Ont.—September 6—Mr. Fraser's barn and driving-shed, containing the season's crops, entirely destroyed. Insurance carried on building, $1,000; on contents, $1,000, in the Elma Mutual Insurance Company. Cause, lightning.

Haileybury, Ont.—September 8—Mr. E. Lyttle's house destroyed. Total insurance carried, $500. Cause, defective stovepipe.

Hamilton, Ont.—September 4—Mr. C. Ginino's frame barn. Partly covered by insurance.

Harriston, Ont.—September 5—Mr. Thomas Kittmer's barn and contents destroyed. Cause, lightning.

Harwich Township, Ont.—September 4—Mr. Wm. Pell's barns, containing large crop of wheat, hay and oats, completely destroyed. Estimated loss, $7,000. Cause, lightning.

King, Ont.—September 2—Mr. John Black's horse stable and barn, containing the season's crops, destroyed. Estimated loss, $5,000. Partly covered by insurance. Cause, lightning.

Lac-la-Biche, Alta.—September 3—Business section of town destroyed. Estimated loss, $25,000.

Manvers, Ont.—September 4—Mr. David Vanatto's barn, containing the season's crops, completely destroyed. Cause, lightning.

Moosomin, Sask.—September 7—Mr. J. E. Howe's blacksmith shop destroyed. Estimated loss to contents, $2,000, which were not insured. Building carried insurance.

Molesworth, Ont.—September 2—Mr. Wm. Fraser's barn, containing the season's crops, destroyed. Partly covered by insurance. Cause, lightning.

Natal, B.C.—September 5—Business section destroyed.

Neelin, Man.—September 4—Mr. Robert Bramwell's barn and lean-to, containing forty tons of hay, destroyed. Partly covered by insurance.

Oxford, N.S.—September 5—Hill's livery stable, barber shop and bowling alley, owned by Mr. Hennessey Burke, and apartment house, also owned by Mr. Hill, destroyed. Estimated damage, $6,000. Partly covered by insurance.

Preston, Ont.—September 2—Mr. Charles Ludwig's barn burned to the ground. Partly covered by insurance. Cause, lightning.

Prescott, Ont.—September 3—Mr. G. McRea's dwelling considerably damaged. Estimated loss, $500, covered by insurance.

Quebec, Que.—September 9—Mr. A. Couture's house badly damaged. Insured for $2,000.

Rockton, Ont.—September 2—Mr. J. Stewart's barn, containing the year's crops, destroyed. Cause, lightning.

Smith Township, Ont.—September 2—Mr. Wm. Mann's barns, containing the season's crops, destroyed. Cause, lightning.

Smith Township, Ont.—September 2—Mr. Samuel McKibbon's barn destroyed. Estimated value, $3,800. Northey Brothers, tenants, lost their season's crops, valued at $2,500. Small insurance carried. Cause, lightning.

Stony Plain, Alta.—September—Alberta Grain Company's elevator, containing half a carload of grain, totally destroyed. Estimated loss, $9,000.

Toronto, Ont.—September 2—Pedians, Limited, automobile badly damaged. Cause, lighted match.

Wainfleet, Ont.—September 2—Mr. John Hill's barns, containing the season's crops, destroyed.

Yarmouth, N.S.—September 4—Mr. M. Helkia's barn, containing 200 bushels of oats and a quantity of hay, destroyed. Estimated loss, $2,000. Amount of insurance, $600, carried in the Yarmouth Mutual Insurance Company. Cause, lightning.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Quebec, Que.—July 22—Rock City Tobacco Company's building and contents. Damage to stock, $23,915; total loss, $26,061. Insurance on stock, $515,000; on building and machinery, $120,000; total insurance, $635,000. The insurance is divided as follows: On stock—American Lloyds, $25,000; Empire Liability, $20,000; Boston, $10,000; Cornhill, $7,500; Excess, $7,500; Knickerbocker, $21,650; Lloyds, $253,750; Motor Union, $30,000; Provincial of England, $26,400; Pacific, $23,200; Stuyvesant, $60,000. Insurance on building and machinery—Globe and Rutgers, $25,000; Commercial Union, $20,000; Caledonian, $15,000; Fidelity Underwriters, $13,000; Home, $10,000; Scottish Union, $10,000; General of Paris, $5,000; National Ben Franklin, $2,000. Insurance was carried in the Guardian for $30,000 on stock and $20,000 on buildings.

Vancouver, B.C.—Fire Chief Carlisle reports the following fire losses for the month of August to *The Monetary Times*.

The fire department responded to 66 alarms during the month of August as follows: Fires where damage occurred, 14; fires where no loss resulted, 19; false alarms, 9; chimney fires (no loss), 2; bush fires (no loss), 10; smoke scares, 2; out of city limits, 2; and services not required, 8. The estimated loss by fire for the month was $2,183, of which $1,598 was covered by insurance, leaving the property loss above insurance at $585. The total value of the property involved was $396,427. On August 8th, at 1.58 p.m., a fire occurred at the residence of Mr. Geo. Dixon, 565 Homer Street. The cause was due to flying sparks from the chimney setting fire to the building, and resulted in a loss of $765. The loss was fully covered by insurance. Another fire, resutling in a loss of $660, occurred on August 13th, at 1.55 p.m., in the premises occupied by the Restmore Mattress Company, Parker and George Streets, due to sparks caused by a nail getting into the picking machine. The following list shows the cause of fires or alarms occurring during the month: Bush fires, 10; carelessness with cigarettes, matches, etc., 5; chimney fires, 2; children playing with matches, 4; electric heater and iron left on switch, 2; electrical origin, defective wiring, etc., 4; false alarms, 9; flying sparks, 10; hot ashes left in wooden pail, 1; nail in picking machine, 1; calls out of city limits, 2; rubbish fires, 3; services not required, 8; smoke scares, 2; spark igniting gasoline fumes, 1; unknown origin, 2. Total number of alarms, 66; false alarms, 9; total value of property involved, $396,427; total loss (estimated), $2,183; insurance paid (estimated), $1,598; loss above insurance, $585.

Victoria, B.C.—August—Fire Chief Davis reports the following monthly fire losses for August to *The Monetary Times*: Loss on buildings, $988; on contents, $40; total, $1,028. Insurance on buildings, $31,750; on contents nil; total, $31,750. The fire station responded to four box alarms and 31 telephone calls; total, 35.

NEXT WAR LOAN

All statements at present as to the amount or interest yield of the next war loan are unauthentic. These questions will not be determined until shortly before the loan is made in November. The story, widely printed last week, that the loan would yield the investor 6 per cent., was obviously incorrect. The third loan yielded 5.40 per cent. To be consistent with the proper mixture of patriotic motives and respect for money market considerations, the fourth loan may give the investor a little better than 5½ per cent. At that rate, the purchaser of the fourth Canadian war loan would have an income 2 per cent. greater than that of the 4,000,000 subscribers to the Liberty Loan of the United States, who received only 3½ per cent.

Sir Thomas White has pointed out that from this time forward the continued prosperity of Canada during the war will depend largely upon the thrift of the people and the success of the government's war loan issues. Canada can get all the export business she can finance and no more. He reminded us that the demands upon the Dominion treasury at this time are of a two-fold nature; first to provide Canada's war expenditure here, and secondly to establish credits out of which the Imperial government may purchase, not only munitions, but essential foodstuffs such as cheese, bacon, flour, grain and canned goods for the army in the field and the civilian population at home. The amount of foodstuffs which Great Britain can purchase in Canada depends upon the amount of money which the Canadian government can supply the Imperial treasury for the purpose, and this again depends upon the savings of the people of Canada and their willingness to place these savings at the disposal of the government by subscribing to war loan issues.

The coming loan will probably be one of $100,000,000 or $150,000,000. The Canadian government recently extended to the holders of the second and third loans, the privilege of converting their bonds into future loans, should such future issues be for a twenty years' term or longer. This privilege was already held by holders of the first war loan. Until the finance department announces the terms of the fourth loan, it will not be known whether conversion of the second and third loans will be possible, as such conversion depends upon the term of the next loan. It would, however, materially help the marketing of the next loan were it made in a form which permits conversion of the previous issues. This could be done by making the entire issue one for twenty years or of splitting the loan into various maturities, including one maturity of twenty years. Some observers state that if the government does not allow conversion it will be tantamount to a breach of faith. While this is not legally so, there is something to be said for that contention on what we may term sentimental investment grounds.

The reported statement of Sir Thomas White last week that between now and November, a nation-wide organization will be instituted to make the loan a success, is encouraging. Such action, it is generally agreed, is absolutely necessary to ensure the over-subscription of Canada's fourth domestic war loan.

SHIPBUILDING IN CANADA

In a discussion in the House at Ottawa last week as to shipbuilding in Canada, Hon. Dr. Pugsley stated that the government had failed in this matter. The minister of trade and commerce, for some reason or other, he said, seemed to have been entrusted with shipbuilding in Canada, and he promised something big after the war. To-day, said Dr. Pugsley, Canadian shipping had practically disappeared from the sea, so far as the maritime provinces were concerned. People there were compelled to pay three times what they should for coal because of lack of ships. The Imperial Munitions Board was doing a little shipbuilding, but still hundreds of shipyards where the government could build ships were idle.

This is lamentably loose talk for a member of Parliament. We doubt whether Mr. Pugsley could name even one hundred idle shipyards in Canada or, for that matter, one score. Were the facts known, it would probably be found that shipbuilding has become one of our most important industries and that few, if any, available yards are unoccupied. What we need just now is a clear statement by the government as to exactly what is being done in regard to shipbuilding, how, and by whom.

SOME TRADING HINTS

If the United Kingdom trader is to regain the Canadian trade which has been partly lost during the war, he must ascertain the terms and be prepared to allow equal terms, as regards credit, with manufacturers of similar goods in the United States. This is the advice given by Mr. C. H. Wickes, H.M. Trade Commissioner in Canada. In his report on Canadian trade for 1916, just published, he points out that the majority of Canadian importers, in goods handled directly or indirectly through the retailer, look for credit of 30, 60 or 90 days, customarily extended by the established American manufacturers. It is vain for British manufacturers of such goods to insist on "cash against documents," much less as some do, "cash before shipment."

The commissioner also points out that the use of the cables, when business is being put through, is important. It is to be remembered that the principal centres of industry in the United States are only 12 to 24 hours distant from Montreal and Toronto, and that business can be closed up by a personal interview, between the seller in Chicago and the buyer in Montreal, weeks before a letter on the same subject can go back and forth to the United Kingdom.

British shippers should make themselves familiar with Canadian customs regulations and tariffs. This is another hint which Mr. Wickes gives to United Kingdom traders. Invoices must always be made out in triplicate and attached to bill of lading, and each invoice must contain the necessary clauses on the back in accordance with customs regulations. Failure to forward these documents prevents the removal of goods from bond, causing great inconvenience and expense. This is a point on which *The Monetary Times* has heard frequent complaints from importers here.

The commissioner says also that in making prices to possible customers, it is a great advantage to quote in Canadian currency, giving the fullest possible details as to terms, discounts, packing (how many in a case, etc.). Such terms as "c.i.f.," "f.o.b.," etc., are used very loosely on this side, and it is advisable—at the risk of what may appear redundancy—to make one's meaning perfectly clear. For instance, "f.o.b. Liverpool" might be rendered free of all possible chance of mistake by saying "free on board steamer at Liverpool, ocean freight and insurance to be paid by the buyer," or "c.i.f. Montreal" might be made more specific by saying "cost, insurance, freight to Montreal, delivered ex ship." While this advice is given to United Kingdom traders, we in Canada may also profit from the suggestion that we use very loosely such terms as "c.i.f."

MORTALITY IN THIS WAR

Canadian insurance companies have done business with safety and generosity for three years of the Great War. The companies, their shareholders and policyholders will be interested in figures obtained from official sources by the United States committee on public information as to the percentage of fatalities in relation to casualties on the western front. These figures, taken when the casualties were greatest in proportion to mobilized strength and combined with the highest proportion of deaths, show losses due to deaths from wounds and killed in action to be approximately 11 in every 1,000 of mobilized strength.

According to the figures presented by the French High Commissioner in a letter to the United States Secretary of War, the high-water mark of casualties in the French army was reached early in the war—at the battles of Charleroi and the Marne. The casualties in that period were 5.41 per cent. of the mobilized strength, or 541 men in every 10,000 with the colors.

Military experts in this country agree that the killed in action and died of wounds have never at any time in this war exceeded 20 per cent. of the total casualties. This gives a figure of 108.2 fatalities from these causes in every 10,000 mobilized strength, or practically 11 men killed in action or died of wounds for every 1,000 men with the colors.

WHY UNITED STATES MARKETS CLOSED TO US

Neighboring Republic Has Big War Finance Tasks—

Why the total cost of our recent $100,000,000 loan in the United States was about 7 per cent., and why it is practically impossible to float other Canadian loans there at present, is explained in an analysis of the war loan position of the United States. The credits of $100,000,000 each to Great Britain and France last week constitute the first of the loans to be extended to the allied governments under the contemplated issue of liberty loan bonds in October. Prior to the last of August the United States treasury had loaned the allied governments $2,226,400,000 from the proceeds of the first issue of war bonds.

In view of the fact that the money raised by the first sale of bonds had been exhausted, the treasury two weeks ago sold $300,000,000 of certificates of indebtedness, and last week offered for sale a similar amount of certificates.

These $600,000,000 certificates of indebtedness will be retired when the next issue of bonds is sold on November 1. In the meantime the United States treasury will extend credit loans to the Allies from the money raised by the certificates.

Balance of Half Billion.

Last week's loans are the first made this month, and probably will be followed shortly by loans to other powers. The total thus far advanced to entente governments is as follows:—

Great Britain	$1,105,000,000
France	690,000,000
Russia	275,000,000
Italy	255,000,000
Belgium	53,400,000
Serbia	3,000,000

When the $200,000,000 of credits were extended last week, the United States treasury had a net balance of $540,352,324.23, according to the daily treasury statement.

The credit loans are increasing the amounts which the government is carrying on deposit with the Federal Reserve banks. The daily treasury statement shows that the deposits in national banks total about $46,900,000. On the other hand, the deposits in the Federal Reserve banks total $112,200,000. This latter figure does not include the deposits made under the allied credit bond act.

Party Criticism of Loans?

Criticism by Republican members of the United States House of Representatives of Secretary McAdoo for alleged loose methods in making loans to foreign governments delayed consideration of the eleven billion dollars bond bill in that House last week, and prevented its final passage.

Representative Cooper, Republican, of Wisconsin, insisted that Secretary McAdoo had not complied with the plain provisions of the bond law enacted last April, which required foreign bonds to be deposited with the United States government in exchange for its bonds. Representative Stafford, Republican, of Wisconsin, precipitated a three-hour wrangle over the manner of making the loans by introducing an amendment, providing that no loans should be made to the Allies until a special board consisting of the secretaries of the treasury, interior, commerce and state departments and the chairman of the Federal Reserve board had approved them. A point of order made against it was sustained.

United States War Appropriations.

The war appropriations already made amount to $9,124,433,000. The contemplated appropriations for this fiscal year are $9,891,150,000, making a total of $19,015,583,000.

In answer to a question in the United States House committee, it was explained that while the rate of interest for the government bonds formerly was 3½ per cent. the committee thought it best not to put a limit on the interest to be charged or to be paid on the certificates of indebtedness for the reason that the more bonds the United States put on the market and the more taxes imposed, the tighter money would become.

In response to a query from Representative Towner about the amount to be loaned to Russia, the reply was that that was a matter to be determined by the administration. It is estimated by Secretary McAdoo that it will require $500,000,000 a month for the United States to finance its allies.

CANADA'S FIELD CROPS

Reports from Coast to Coast—Improvement Has Occurred Recently

The Census and Statistics office, Ottawa, has issued the following special report on the condition of field crops throughout Canada, [illegible] compiled from telegraphic [illegible] at the end of August.

Atlantic Provinces.—In Prince Edward Island the hay crop was heavier than anticipated. Pests have reduced wheat 20 per cent. below average. Other grains are full crop. Potatoes except for a few blighted areas, should yield above average. Full crop of roots, vegetables and corn. In Nova Scotia all crops made excellent growth. Labor scarce. Haying slow, but hay being stored in good condition. Flax ripening nicely. Hemp, fair growth; considerable rust. In New Brunswick August weather too wet and warm or best crop yields. Wheat and oats below average. Potatoes going down with late blight, reducing crop prospects to about 60 per cent. of average yields. Roots promise well. Very heavy hay crop. Pastures good.

Quebec.—Rimouski—Abundant yield of hay. Grain and potatoes have fine appearance. Plums good. Apples small and a month late. Lennoxville—Considerable hay not cut and much grain ripe, but in bad shape through excessive rainfall. Cap Rouge—Hay crop heaviest in years, but not yet all in and quality not good owing to frequent rains. All grain much below normal from same cause. Silage corn and potatoes poor. Apples only half a crop.

Ontario's Grain Crops Fair.

Ontario.—Ottawa—Harvesting is almost completed, and grain crops are giving a very fair yield. Potatoes, roots and corn are doing well. Pastures are short. Peterborough—Wheat, barley and oats yielding high. Grain extra good sample. Mangolds, turnips and potatoes doing well. Corn, large acreage and heavy crop. Pastures good. Apple crop light. Oshawa—Yield of wheat and oats above average. Lodged oats decrease crop and double labor, otherwise a record crop. Barley average crop. Root crops good. Corn fair. Hyde Park—Wheat yielding 25 bushels per acre. Oats in stock. Grain light. Barley grain small. Corn late and may not mature. Potatoes and roots good. Large acreage of fall wheat will be sown if possible. Petrolea—Ideal harvest weather. All grain crops harvested except 10 per cent. of oats. Best season for years. Increased acreage being sown to fall wheat.

Manitoba.—Brandon—Dry weather has continued throughout August. Cutting completed, thrashing begun. Yield better than was feared and quality excellent. Franklin—Conditions much improved during month. Wheat will yield very fair, good sample. Oats and barley a little light. No damage by frost. Harrowby—Wheat harvest well along; 15 bushels per acre. Oats and barley, 40 per cent cut for feed; will thrash 25 bushels. Potatoes, 30 per cent. of average.

Saskatchewan and Alberta.

Saskatchewan.—Rosthern—Most wheat will grade 1 and 2. Yield, 20 to 30 bushels. Scott—Wheat will probably average 16 bushels, barley 30, oats 30 to 45. Sucifient laborers for immediate requirements at $4 per day. More help wanted for thrashing.

Alberta.—The Alberta Department of Agriculture reports that crops have greatly improved on account of general rains, frequent showers and favorable weather conditions. It is now estimated that the yields will be a good average, if not a little better, although the previous dry weather premanently reduced average over a considerable area. With the exception of a number of destructive hailstorms there has been no damage to crops by frost or otherwise. Harvest operations are now general. In the lighter districts 50 to 75 per cent. of grain has been cut. Thrashing will be general latter part of next week. No frost yet. All cereals will grade higher than usual. Roots and live stock in excellent condition. Lethbridge—Harvest well advanced in southern Alberta. Yields generally are somewhat lighter than anticipated. Oats and barley rather poor. Serious hailstorms. Hyde Park—No frost recorded. Lacombe—Harvesting in central Alberta further advanced than for any previous season for ten years. Yield of grain below average, but superior in quality.

British Columbia.—Agassiz—August dry and hot. Grain medium crop. No damage from rain in stook. Root crops and pastures badly need moisture. Summerland—Apples 10 per cent. more than last year and of best quality. Grain not [illegible] Invermere—Good [illegible] cuts of alfalfa and clover under irrigation. Roots and corn have made good growth. Sydney—All grain harvested in excellent weather. Yield not heavy. Forage crops, roots and [illegible] average. Pastures very short and rain much needed.

BANK CLEARINGS

The following are the bank clearings for the weeks of September 5, 1916 and September 6, 1917, respectively, with changes:—

	Week ended Sept. 6, '17.	Week ended Sept. 5, '16.		Changes.
Montreal	$ [illegible]	$ [illegible]	+	$ [illegible]
Toronto	[illegible]	[illegible]	+	[illegible]
Winnipeg	[illegible]	[illegible]		[illegible]
Vancouver	8,067,512	6,181,547	+	1,885,965

OUR RAILROADS IN LONDON

How Canadian Government's Proposals Affected Prices Overseas

Commenting upon the Canadian government's proposal to acquire the Canadian Northern Railway and to make a loan of $7,500,000 to the Grand Trunk Pacific, The London Statist (of August 11th), referring particularly to the prices of these companies' securities in London, says:—

The announcement by the Canadian finance minister that the Canadian Northern Railway is to be taken over by the Dominion government did not come altogether as a surprise. Still, until some definite statement was forthcoming, the prices of the various securities whose interest and principal were not already guaranteed either by the Dominion or provincial governments were allowed to remain at the very low level to which they had fallen. Immediately upon the statement of Sir Thomas White as to the government's proposals a sharp rise took place in all those securities of the Canadian Northern which were dependent for their interest and principal upon the credit of the Canadian Northern itself. The position of the securities will not be changed further than that the government will be the owners of the common stock, which, of course, strengthens the position of the security-holders.

How Prices Compare.

We set out below a comparison of the movements that have occurred in the prices of the Canadian Northern system's securities that have been affected by the announcement of the government's intentions by giving last night's closing prices and those of the day before the finance minister made his statement. In some cases prices have receded, owing to profit-taking. Still, it will be seen that, although the upward movement in some instances has been very considerable, various of the 4 per cent. perpetual debenture stocks give a return of fully 6 per cent.:—

	Closing price.		
	Aug. 10.	Aug. 1.	Rise.
C.N. Ontario 4% perp. cons. deb. stock	64½	57	7½
C.N. Quebec 4% perp. deb. stock ..	68½	55½	13
C.N. 4% perp. cons. deb. stock	65½	55½	10
C.N. 5% land grant mort. bonds	86	75½	10½
C.N. 5% income charge convertible deb. stock	48½	39½	9
Dul. Winnipeg & Pacific 4% 1st mort. deb. stock	68½	62	6½
Gt. N. Ry. of Canada (now C.N. Quebec) 1st mort. 4% gold bonds ..	72½	60½	12
Quebec & Lake St. John 4% 1st mort. deb. stock	65½	55½	10
C.N. 5% notes due 1918	100½	94	6½

Grand Trunk's Position.

There has also been improvement in the non-guaranteed securities of the Grand Trunk Pacific and in the various junior stocks of the Grand Trunk proper. The movements in the former have been due to the statement of Sir Thomas White that subsequently the government intends to take over that line also; but the rise in the prices of the Grand Trunk Pacific's securities has been less marked than in those of the Canadian Northern, probably for two reasons. First, the acquisition of the Pacific line is deferred for an unknown time, and, secondly, the prices of the Pacific non-guaranteed stocks and bonds had not fallen to so low a level as had those of the Canadian Northern. The improvement in prices of the parent company's stocks has been due to the feeling that eventually the company will be relieved of its obligations towards the Pacific line, and that the majority report of the Royal Commission on Canadian railways will not be adopted so far as the parent road is concerned. The position is, however, still obscure, for no one can tell upon what terms the government proposes subsequently to acquire the Pacific line from the Grand Trunk proper. Still, according to private advices received in the city, the speech of Sir Thomas White to some extent has cleared the air, and has counteracted the effect of the commission's majority report, which, if acted upon, it had been felt would have affected the credit of the Dominion abroad. It would appear that the Canadian government realizes this, and means to treat the railways with justice and liberality. Further, although press summaries of the finance minister's speech made no reference to the matter, we learn that Sir Thomas White in his speech referred sympathetically to the Grand Trunk proper, and his remarks are understood to have met with general approval in Canada.

Prices of Securities.

Prices, after falling back owing to profit taking, compare thus:—

	Closing price.		
	Aug. 10.	Aug. 1.	Rise.

PRICES FIXED FOR WHEAT

Official announcement was made in Winnipeg on Tuesday of the prices fixed on the 1917 crop of wheat by the Board of Grain Supervisors of Canada, on a basis of Fort William and Port Arthur, which are identical with those set by the United States for the same grades on a basis of Minneapolis and Duluth.

Following are the prices: No. 1 Manitoba Northern, $2.21; No. 2 Manitoba Northern, $2.18; No. 3 Manitoba Northern, $2.15; No. 1 Alberta Red Winter, $2.21; No. 2 Alberta Red Winter, $2.18; No. 3 Alberta Red Winter, $2.15.

Prices on the other grades of wheat will be fixed as soon as sufficient information about quality of new crop has been secured by the committee.

Flour millers in the interior west of Fort William and Port Arthur will be permitted to pay in excess of the fixed prices a maximum of one cent per bushel diversion charges.

MUNITION FACTORY FIRES

The Ontario fire marshal, in a recent statement on fire losses, says: "Investigation into the cause of recent fires that have destroyed several of the large ammunition factories in the province have resulted in the adoption of important preventive measures. Lack of proper supervision over the unskilled alien workmen who were employed in some of the most important, and certainly the most hazardous (as regards fire) operations of shell-making, together with gross carelessness, appears, from the evidence adduced, to have been the cause of this enormous fire waste.

"Foreigners, some of whom could not speak English, were employed in washing shells in gasoline. As a result of competition in the labor market, smoking has been permitted in ammunition factories at night. In the case of the Cluff Ammunition Company's fire in Toronto, the evidence showed that a foreigner who was washing shells in gasoline dropped a match on the bench where the shells were drained, and the fire spread throughout the plant very quickly.

"The buildings that were completely gutted had a frontage of about 200 feet by a depth of 170 feet. The fire was fanned by a strong north wind, and, although the fire department had sixteen lines of hose playing on the conflagration, they were unable to more than prevent the fire spreading to the surrounding property.

"The Imperial Munitions Board recently prohibited the use of gasoline, etc., for washing shells. If the management of the various ammunition factories exercised more care and forethought with regard to fire prevention, as well as a more strict supervision, especially over foreigners, a great many fires would be prevented.

"The investigation in connection with the fire at the plant of the Copp Stove Company, Limited, Fort William, ammunition manufacturers, disclosed conditions of a somewhat similar character to those already outlined."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Verdun, Que.—The by-law to issue $200,000 bonds has been defeated.

Bridgeburg, Ont.—An issue of $30,000 5½ per cent. 30-year debentures has been awarded to Messrs. A. E. Ames and Company, Toronto.

Ville St. Pierre, Que.—An issue of $110,000 6 per cent. serial civic improvement bonds has been awarded to Credit Canadien Incorporé, Montreal.

Saskatchewan.—Mr. J. A. Thompson, bond dealer, Winnipeg, has purchased the following: Maple Bush Rural Telephone Company, $10,500 7½ per cent. 15-years; Alpha Rural Telephone Company, $2,900 7½ per cent. 15-years.

Manitoba.—Mr. J. A. Thompson, bond dealer, Winnipeg, has purchased the following: King George S.D., $2,000 7 per cent. 20-years; North Lakeland S.D., $2,000 7 per cent. 20-years; Germania S.D., $2,000 7 per cent. 20-years; Cory S.D., $2,000 7 per cent. 15-years.

York Township, Ont.—An issue of $8,000 2 per cent. 20-year school bonds has been awarded to Messrs. Geo. A. Stimson and Company, Toronto, at $7,682. There were six other bids as follow:—

C. H. Burgess and Company	$7,628	95.35
Bank of Commerce	7,600	95.01
Canada Bond Corporation	7,590	94.88
Brent, Noxon and Company	7,579	94.74
A. E. Ames and Company	7,568	94.60
Imperial Bank	7,566	94.58

Alberta.—The following are details of four blocks of school district debentures amounting to $20,100, for which tenders will be received by the debenture branch of the department of education until September 19th. Separate tenders are to be made as follows: Block No. 1—Finn's Lake S.D., No. 2089, $400 5-years 7 per cent.; Block No. 2—Wayne S.D., No. 3467, $2,500 10-years 7 per cent. (Village district for assessment purposes.); Block No. 3—Lamont S.D., No. 641, $4,500 15-years 6½ per cent. (Village school district.); Block No. 4—Swan S.D., No. 3441, $1,800 10-years 7 per cent., Leaman S.D., No. 3434, $1,200 10-years 7 per cent., Cache Lake S.D., No. 3285, $1,200 10-years 7 per cent., Pipe Line S.D., No. 2383, $1,200 10-years 7 per cent., Sterling S.D., No. 3483, $1,500 10-years 7 per cent., Heath Creek S.D., No. 3481, $1,200 10-years 7 per cent., Underwood S.D., No. 3396, $1,400 10-years 7 per cent., Endon S.D., No. 3379, $1,700 10-years 7 per cent., Inglis S.D., No. 3433, $1,500 10-years 7 per cent.—$12,700. The above debentures (with the exception of Pipe Line and Underwood) are dated September 15th, 1917, with the first coupons maturing on January 15th, 1919. The debentures of the other two districts are dated July 2nd, 1917, with the first coupons maturing on January 2nd, 1919. M. C. Elliott, manager of the debenture branch, department of education, Edmonton.

Tenders were called up to August 28th for three blocks of school district debentures drawn for ten years with interest at 7 per cent. per annum, amounting to $19,850. Debentures in blocks No. 1 and 2 are issues of rural districts. Debenture in block No. 3 is an issue of a village district: Block No. 1—Crosslynde S.D., No. 3363, $1,200, Princess Springs S.D., No. 3129, $2,000, Claysmore S.D., No. 2425, $1,500, Over S.D., No. 3414, $1,200, Marby S.D., No. 2410, $1,200, Clairmont Lake S.D., No. 3303, $1,200, Wild Horse Lake S.D., No. 2691, $1,350—$9,650. (Coupons of debentures in Block No. 1 mature December 1, 1918.); Block No. 2—Long Beach S.D., No. 3391, $1,800, Red Cross S.D., No. 3446, $1,800, Ralstin S.D., No. 3241, $1,200, Laconia S.D., No. 3407, $1,500, Scales S.D., No. 1339, $1,200, Sprucedale S.D., No. 314, $1,500—$9,000. (Coupons of debentures of Block No. 2 mature January 2, 1919.); Block No. 3—Airdrie S.D., No. 918, $1,200. (Coupons of this debenture mature December 1, 1918.)

The Royal Trust Company has removed its Toronto office from the corner of Queen and Yonge Streets to 50 Yonge Street, Toronto.

TORONTO HARBOR BOARD WILL SELL NOTES

The Toronto Harbor Commission will probably make an issue of 3-year notes in the United States in the near future. A special meeting of the Toronto city council was held on Wednesday, and authorized the hypothecation of bonds of the Harbor Commissioners to the amount of $4,000,000. The Commissioners require $2,000,000 for their work next year.

On July 5th, the Commission obtained sanction by by-law to sell $4,000,000 of its bonds. The by-law passed this week gave authority to sell or to hypothecate. The sales of the notes will be undertaken by Mr. T. Bradshaw, city treasurer, and Mr. Home Smith, one of the harbor commissioners.

POSITION OF WESTERN LIFE ASSURANCE COMPANY

Of the capital stock of the Western Life Assurance Company, with head office at Winnipeg, $963,100 has been subscribed. Upon this cash of $249,581 has been paid. There remains to be paid $100,000, of which $38,000 is past due, but on account of which the company have already received $25,448. The stock, therefore, has been well paid for and the company appears to be in good financial position. The increase in new business to date over the same period of 1916 amounts to 335 per cent.; the increase in cash premiums is 46 per cent., and in interest, 150 per cent. The company have already paid for $500,000 of new business, and expect to pay for, at least, $1,000,000 of new business this year.

A shareholders' meeting for the purpose of organizing as a Dominion chartered company will be held on October 16th. As soon afterwards as the routine business can be attended to, the Dominion license will be taken.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first week in September:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
Sept. 7	$2,679,000	$2,666,000	— $ 13,000

Grand Trunk Railway.

Sept. 7	$1,276,061	$1,317,980	+ $ 41,919

Canadian Northern Railway.

Sept. 7	$ 708,000	$ 715,800	+ $ 6,700

Gross earnings of the three principal Canadian railroads amounted to $21,449,020 in August, a decrease of $866,256, or 3.9 per cent., as compared with the corresponding month a year ago, and the first contraction shown in the monthly returns of the systems over a long period.

The decrease was not as heavy, however, as had been anticipated, owing to the fact that, while the returns for the first three weeks of the month had been exceptional, there was quite a recovery during the last week. The decrease was 9 per cent. during the first week, but in the second and third shrank to 4 per cent., while in the last quarter of the month was only one-fifth of 1 per cent.

Grand Trunk came through the month with an increase, but decreases were reported by both Canadian Pacific and Canadian Northern, a direct reflection of the smaller tonnage of grain remaining to be moved in the west as compared with August a year ago.

Aggregate gross earnings of the three systems month by month this year, with the change from 1916 in each case, are tabulated below:—

Month.	Total gross, 1917.	Increase.	%
January	$17,450,888	$2,726,672	18.5
February	15,043,606	375,691	2.5
March	19,967,437	2,623,104	15.1
April	20,230,111	2,158,306	11.9
May	23,739,303	3,755,497	18.8
June	23,281,710	3,441,540	17.4
July	22,771,680	1,825,119	8.7
August	21,449,020	*866,256	3.9

*Decrease.

The Molsons Bank

148th DIVIDEND

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the

FIRST DAY OF OCTOBER NEXT,

to Shareholders of record on 15th September, 1917.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City, on MONDAY, the 5th of NOVEMBER next, at three o'clock in the afternoon.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies--Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Winnipeg Electric Railway.—For the first time in the history of the corporation, it has [illegible] a monthly statement showing a deficit. It amounted to $29,879.20. Gross earnings for July were $242,797. The net earnings, after deducting operating expenses, was cut to $11,346.51, and the deficit, less fixed charges, was $29,879.20.

Canada Copper Corporation.—Stockholders of the company at a recent meeting voted to increase the capital stock to $10,000,000, and also to issue $2,500,000 ten-year 6 per cent. first mortgage, sinking fund, convertible bonds. Authorized capitalization at present is 1,000,000 shares, par $5, of which 945,454 shares are outstanding. The new capitalization will be 2,000,000 shares, par $5, part of which will be held for the conversion of said bonds. The bond issue is to cover the development of the property, and include erection of a 3,000-ton mill and to supply working capital.

Duluth-Superior Traction Company.—The directors have just declared a dividend of 1 per cent. for the quarter ending September 30th, 1917, payable October 1st to shareholders of record September 15th. This is the first declaration on the common since July 1st, 1915, the last dividend being payable to shareholders of record June 15th, 1915. Heretofore, the stock has been on a 2 per cent. per annum basis. Although the declaration just made does not bind them to any permanent dividend basis, the announcement that the dividend is for the quarter would seem to imply a basis of 4 per cent. per annum.

The company has been showing steady increases in its earnings recently, and the outlook is very encouraging.

In 1914 the dividend on the common was at the rate of 4 per cent. per annum, but in March, 1915, the directors deemed it advisable to cut the dividend in half, by declaring 1 per cent. for the half-year.

Nova Scotia Steel and Coal Company.—The company for the six months ended June 30th, 1917, earned after interest on bonds and debenture stock, $1,596,469. This compares with net of $2,104,478 for the entire 1916 year, and is a little in excess of the $1,576,743 earned in the whole of 1915.

After deducting the 4 per cent. dividend for the six months on the $1,000,000 preferred, there is left a balance applicable to the common stock of $20.75 per share. This is an annual rate of $41.50. Of course this is counting the common stock issue as $7,500,000, which will be increased to $15,000,000, when the pending financing is completed and the proposed 20 per cent. stock dividend is paid. On the enlarged capital, therefore, Nova Scotia earned in the six months at the annual rate of $20.75 per share.

This compares with three previous years as follows:—

6 months.	Net after charges.	Preferred dividend.	Balance for common.	% on common.
1917	$1,596,469	$40,000	$1,556,469	x20.75
1916	2,104,478	80,000	2,024,478	27.0
1915	1,576,743	123,600	1,453,143	19.3
1914	*308,0[illegible]	41,200	....	

*Deficit. x On $7,500,000.

Granby Copper Company.—Results of the company for the past fiscal year will be known to stockholders during the coming month, says a Boston dispatch, when the annual report for the year ended June 30th last will have been prepared for presentation at the annual meeting in October. It will show earnings of about $35 per share, against $9 paid in dividends, as compared with $25 earned in the previous fiscal period.

Construction and improvement expenditures were heavy during the past year, and these will be continued during the present year. It is not improbable that the fiscal year will be changed to end December 31st.

The main ore supply comes from the Hidden Creek mines, which were secured several years ago from Thomas M. Hodgens, formerly an active factor in Butte mining affairs. With reserves of over 20,000,000 tons developed in a comparatively small portion of its territory, this mine has become one of the most important in the far northwest. The old property at Phoenix, which ships to the Grand Forks smelter, constitutes the next largest factor in the company's operations, but only under existing high metal prices can it be made to show a profit.

Nipissing Mines Company, Limited.—The company has been incorporated in Ontario, Canada, with $6,000,000 capital, to own and control the Nipissing Mining Company, and to exercise the functions of the Nipissing Mines Company, of Maine. Within a fortnight it is expected that the Maine corporation will have dissolved after all its business and assets have been transferred to the newly organized company, says the Wall Street Journal. The new Ontario concern will issue its certificates, share for share, for those of the existing company, and so far as the stockholder is concerned, nothing will transpire except for him to send in his certificates for exchange, at a time to be designated by the management.

It is understood that Nipissing has shared handsomely in the advance in silver through sales made at top prices. Many of these transactions have taken place on a basis of Vancouver prices, or several cents an ounce over the New York quotation. Part of the premium would be needed to cover extra cost of transportation across the continent, but much of it would accrue to profits. Dollar silver means that Nipissing has in reserve $9,000,000 in gross values against $4,500,000 when silver was at 50 cents an ounce. At a cost of 30 cents an ounce the maintenance of dollar silver would add $6,300,000 to net profits from the 9,000,000 ounces now known to be below ground.

British America Nickel Corporation.—The power problem of the British America Corporation has been settled, says the "Canadian Mining Journal" in a recent issue.

From now on, rapid progress may be expected at the property at Murray Mine, Sudbury district, Ontario. During the past several months exploration has been carried on with considerable success and additional ore located by diamond drilling. Plans made for the construction of smelter and refinery have not been carried out, pending arrangements being made for power. Satisfactory arrangements have now been made for power. The plans have been approved by Sir Adam Beck and will be acted upon as soon as the Ontario Government passes on them.

The British America Nickel Corporation is to be a big factor in the nickel industry. It owns good orebodies and a proved process for treating the ore; it has arranged for the sale of its product; and it has employed a manager who has a reputation for getting things done. The men in charge of the corporation's affairs have during the past year encountered and overcome several difficulties and are now only awaiting approval of the Ontario Government before proceeding with construction work.

The demand for nickel is so great that the entry of a third big company into the Sudbury district has long been expected. It seems likely that there will be a ready market, during and after the war, for much larger quantities of nickel than can be produced at present. The two present producers will, of course, be somewhat affected by the new producer; but there is plenty of business in view for all.

Marconi Wireless Telegraph Company of Canada, Limited.—The balance sheet for the year ending December 31st, 1916, shows assets and liabilities as follows:—

Assets—Property, stations, rights and patents, titles, contracts, etc., $5,444,914; apparatus and stores on hand, $158,185; furniture at head office and branch offices, $1,880; French national defence bonds, $2,889; cash at bankers and [illegible] $[illegible]. Accounts receivable—sundry, $111,150; due by affiliated companies, $15,056; less reserve against accounts receivable, $10,000; unexpired insurance premium, $[illegible] [illegible] $[illegible].

[illegible] stock, $5,[illegible]; accounts payable, [illegible] balance on hand at 1st January,

179 St. James St. - Montreal

1916, $80,815; operating profit for year ending 31st December, 1916, $104,929; less interest on advances for year ending December 31st, 1916, $32,351; reserve against accounts receivable, $5,000; reserve for depreciation of ship stations, etc., $7,287. Total, $5,836,240.

The output of the company's plant in Montreal was somewhat less than during the previous year, due to the fact that a smaller number of installations was required for naval purposes.

As a further step in the company's policy for increasing the facilities of its service to shipowners a divisional office for the maritime provinces has been established at Halifax, thus completing the plan of maintaining stores and offices at the important divisional points of Vancouver, Toronto, Montreal, Halifax and St. John's, Newfoundland. The number of wireless telegraph stations has shown an increase during the year notwithstanding the fact that several installations had been lost or transferred to other routes. The same difficult conditions had prevailed with regard to message traffic to and from ships, due not only to general dislocation of sailing schedules, but also to strict censorship and other limitations imposed on commercial messages, nor can any improvement in these adverse conditions be looked for during the period of the war.

Hudson's Bay Company.—During the year ended March last the company sold 254,901 acres of farm lands, that being, with the exception of 1910-11, the largest area sold in the past ten years; it cantrasts with 79,309 acres sold in 1915-16, 16,400 acres in 1914-15, and 26,292 acres in 1913-14, the year before the war, which was a period of depression and crisis in Canada.

Though the area sold in the past year was surpassed in 1910-11, a higher price was realized for the lands sold. Previously it has been the practice to give the price at which the lands sold in Canadian currency, but this price is now given in the report of the Governor and committee in sterling. The price realized was £870,050 in 1916-17, compared with £261,605 for 1915-16 and $3,747,768 for 1910-11; it averaged £3 8s. 3d. per acre against £3 5s. 11d. per acre in 1915-16, but better average prices were realized in the three years preceding the commencement of the war. The sale of town lots produced £9,700 against £4,739 in the year before.

At the close of the financial year the company still possessed 3,861,500 acres, which with the unpaid instalments on sales already made, are given no value in the balance sheet. All receipts from land sales are therefore clear profit or would be except for the large sums that are payable in municipal and other taxes, for the sums carried to the capital reserve account, and the expenditure incurred in improving and disposing of the property. In municipal and other taxes the company had to pay £176,310—an increase of £12,000 on 1915-16 and of £76,000 on the amount paid in 1912-13. This heavy charge suggests that the company has still a large area of town lots to dispose of, and the annual charge to the land account for grading streets at Edmonton bears out this view; in the past year's accounts the grading of streets at Lac la Biche also is included. The total sales in the year amounted to £879,750, but the cash received for sales was but £295,632, while interest on unpaid instalments and rents amounted to £92,758. It is proposed to pay a dividend of 15 per cent. from the land account to the holders of the ordinary shares; this dividend absorbs £150,000, and income tax is not payable on that sum.

The profit from saleshops and other trading did not reach in 1916-17 the high level of the previous year, the decrease being £33,000 to £214,433. The profit from the fur trade was £14,000 more, and increases in investment revenue, etc., brought the total credits on profit and loss account to £232,373, that being £10,000 less than in the previous twelve months. London expenses are higher, but no charge is made for income tax, which in 1915-16 amounted to £23,803. The dividends on the preference shares are charged against profits from trading, and an interim dividend of 10 per cent. on the ordinary shares was paid in January, a further dividend of 5 per cent., less income tax, is to be paid, making the total distribution on the ordinary shares for the year 30 per cent. The balance to be carried forward on trade account is given in the report as £168,017, but this does not make provision for the half-year's dividend of £50,000 payable to the preference shareholders on July 1st. The balance carried forward on the land account is £20,055.

The company lost a director by the death of Sir Richard Burbidge, Bart.; the directors have elected Mr. F. S. Oliver, of Debenhams, Limited, to the vacancy, the election being subject to the shareholders' confirmation.

Lake Superior Corporation. A marked improvement in the assets of the company is disclosed in the annual report, and while the actual revenue of the corporation for the year ending June 30th was entirely absorbed by interest on the mortgage bonds, interest on the income bonds and general expenses, there was not taken into the accounts of the parent concern a large proportion of the earnings of its subsidiaries. The net earnings from operations of all these companies (except the Algoma Central & Hudson Bay Railway and Trans-St. Mary's Traction Company) in the year ending June 30th were $5,300,000. In the 1916 year these earnings were $3,503,000, an increase of $1,800,000 in twelve months.

Much of this increase of 71 per cent. in earnings came from the operations of the Algoma Steel Corporation, and it is to be remembered that the Steel Corporation, under the terms of the voting trust agreement, which terminates March 1st next, is temporarily debarred from paying dividends. It is possible that when the voting trust dissolves, surplus earnings of the Steel Corporation will be taken into the Lake Superior Corporation accounts in the form of dividends, and that a corresponding change will occur in the "Soo" income statement.

The balance sheet of the Soo Company compares with the previous year as follows, the amounts being in thousands:—

	Year ending June 30, 1917.	1916.
Assets	Amounts in 1,000's	
Investments	$48,198	$47,974
Real estate	246	98
Due by subsidiaries	308	545
Cash	82	[illegible]
Cash to meet unpaid coupons	58	24
Funds in trustees' hands	..	136

Relief association	7	7
Reserve, for depreciation of investments	710	710
Income account balance	4	10

Contingent Liabilities—

Bonds of subsidiary companies guaranteed by the corporation of which there were issued and outstanding at June 30th, 1917:—

Algoma Central and Hudson Bay Railway	$10,080	$10,080
Algoma East Railway	2,500	2,500
Algoma Central Terminal	4,999	4,999
Algoma Steel Corporation first and refunding bonds	15,691	14,000
Three-year notes	......	2,432
Total liabilities	$49,275	$49,252

Laurentide Company.—Net earnings, including returns from the company's investments, amounted to $2,220,660, against the previous record of $1,244,283, reported for the year ended June 30th, 1916. That is, the gain amounted to $976,377, or about 78 per cent. over the best previous performance of the company.

The company has reserved the large sum of $268,181 as reserve against the business profits tax for the year 1916-17. If the earnings on the common stock are estimated after the usual charges for interest, depreciation, etc., then the balance

We Serve as Trustee

We act as Trustee for funds set apart to provide life income, or for the endowment of religious, educational or philanthropical institutions. Our wide facilities, our responsibility and our permanence as a Trust Company are forceful reasons for appointing us as Trustees for such funds.

Dividends	864,000	672,000	576,000
Surplus	$ 856,011	$ 265,822	$ 231,191
Depreciation reserve	....	20,000	20,000
	$ 856,011	$ 245,822	$ 211,191

Combined with the fine showing in respect to profits is a strong financial position. At the close of the year ended June 30th, 1916, the company was borrowing from its bankers $2,195,080, while for the year ended with June 30th, 1917, bank loans were down to $44,201. Cash on hand and in the banks more than offsets that.

A comparison of the balance sheets of the past two years shows:—

Assets.

	1917.	1916.
Plant, etc.	$5,005,718	$5,372,500
Realty	680,573	585,137

Miscellaneous	201,792	47,411
Surplus	1,783,458	927,446
Total	$13,819,307	$14,013,761

LUCKY CROSS MINES SOLD

The Lucky Cross Mines, of Swastika, Northern Ontario, were offered for sale last week by order of the mortgagees. The sale was held on the premises of Mr. Walter Ward Price, auctioneer and valuator, Toronto. The property was sold to Mr. Frank Huth on behalf of the bondholders for $56,400.

The Royal Bank of Canada has opened a branch at Chamberlain, Sask.

BRITISH COLUMBIA STEAM RAILWAY IN TROUBLE

The future of the Victoria and Sydney Railway, a subsidiary of the Great Northern, operating on the Saanich Peninsula of Vancouver, between Victoria and Sydney, is uncertain owing to $200,000 worth of bonds maturing on September 8th not having been taken up. In the event of the Great Northern Railway not coming to the relief of the company, it will pass into the hands of a receiver. The company is losing money at the rate of $15,000 a year. The building of a parallel line by the Canadian Northern Railway and the installation of an inter-suburban service by the British Columbia Electric Railway four years ago have proved to be too keen a competition for the Victoria and Sydney Railway. The interests of the bondholders are represented by a trust company in Montreal.

TREATISE ON TRADE ACCEPTANCES

Trade acceptances have been considered, heretofore, almost exclusively in the light of commercial and banking conveniences. They have not received the attention they merit as one of the most potent available factors in reducing actual living expenses. Their employment in business transactions throughout the country enhances the buying power of every dollar in the pay envelope. The greater use of trade acceptances, therefore, is a national economic necessity.

For the purpose of widely disseminating information about trade acceptances and to promote their general adoption, Robert H. Treman, Deputy Governor of the Federal Reserve Bank of New York, has published a booklet entitled "Trade Acceptances." The booklet deals with this form of commercial paper, in an exhaustive and comprehensive manner, but so lucidly that anyone can readily understand the subject.

The booklet defines a trade acceptance as "a time draft or bill of exchange drawn by the seller of merchandise on the buyer, for the purchase price of the goods, and accepted by the buyer, payable on a certain date, at a certain place designated on its face."

The booklet sets forth how the use of trade acceptances will do more to increase American financial efficiency than almost any other element. The practice will reduce costs and inaugurate economies, and thus lessen the expense of conducting business. It will decrease business losses and commercial failure; enable the seller of merchandise to make a quick turn-over of his capital; secure an early profit, and make his capital available for increasing his business. The use of trade acceptances will also reduce the losses of interest and the losses from bad debts. It will permit a more economical distribution of merchandise and food products, through obtaining low rates of interest, as trade acceptances can be rediscounted at a lower rate than any other form of mercantile paper.

Experts have estimated that from two to three times the present volume of business under the prevailing "open book accounts" system can be done safely and conservatively on the same capital by the use of trade acceptances. The use of trade acceptances will put the small retailer, especially the one with limited capital, in a better position to compete with those who have larger capital. The trade acceptance converts into available live assets the "dead" capital which is practically unavailable, because it is tied up in book accounts. The trade acceptance has aptly been described as the second line of defense in our banking system, and has been declared the best assurance against panic.

The general adoption by our leading merchants of the trade acceptance plan would doubtless be sufficient to make our open discount market pre-eminent, and would attract to that market the brains, ability and capital required for its full and successful development.

The United States is certain to have greater demands made upon it than ever before for extension of credit, not only for our domestic trade, but also to furnish credit to other nations, both during the war and in the period of reconstruction following it, which makes it essential that all of our credit resources be fully understood and developed without delay. Through resort to trade acceptance, the credits of the entire country will be placed upon a safer and sounder basis, for it will tend to eliminate one of our national vices—that of trying to do business on inadequate capital and giving too long credit.

No. 22	26,250.00	
		105,000.00
		$815,577.32
Transferred to Reserve for Special Replacements	$25,000.00	
Transferred to Reserve for General Depreciation	100,000.00	
		125,000.00
Balance at credit at 30th June, 1917, carried forward		$690,577.32

To the Shareholders.

Your Directors submit herewith statement of the Assets and Liabilities and Profit and Loss Account as at the 30th June, 1917.

Manufacturing Profits from Operations for the year ending 30th June, 1917, after charging Profits War Tax		$721,254.90
Deduct: Interest on First Mortgage Bonds	$90,000.00	90,000.00
		$631,254.90
Add: Balance at credit at 30th June, 1916, brought forward		304,322.42
		$935,577.32
Appropriated as follows:—		
Dividends on Preference Shares for year:—		
No. 10	$26,250.00	
No. 20	26,250.00	
No. 21	26,250.00	
No. 22	26,250.00	$105,000.00
		$830,577.32

Transferred to Reserve for Special Replacements	$25,000.00	
Transferred to Reserve for General Depreciation	100,000.00	
Sinking Fund Provision	15,000.00	140,000.00
		$690,577.32

The increase in our profits for the year under review is due entirely to the extra production of our plant, both in locomotives and munitions.

The increase in the property account of $59,742.63 is the normal increase necessary to keep pace with the growing business.

We have taken the sum of $125,000 from our profits and added $100,000 to Depreciation Reserve Account, and the sum of $25,000 for Special Replacement.

The result of this year's operations is most gratifying, the net profits on our business being 25 6/10% in excess of those of any previous year since the organization of the Company.

Following the precedent of reviewing the profits year by year, commenced in our last year's report, we again repeat it:—

For the year ending 30th June,	1912 ..	$ 326,080.43
" " " " " "	1913 ..	396,886.02
" " " " " "	1914 ..	342,057.25
" " " " " "	1915 ..	134,913.89
" " " " " "	1916 ..	574,211.78
" " " " " "	1917 ..	721,254.90
which you will observe makes an aggregate sum of		$2,495,404.27

or an average net earning of $415,900.71 per annum.

This year the labor problem has not been a serious one with us, as we have been able to secure all the labor required, and our employees have backed up the efforts of our management in a most loyal and satisfactory manner, the result of which is shown in the large increase in our output and profits, with comparatively little addition to the plant account.

The prospects for the coming year are most encouraging. We have contracts for locomotives and locomotive parts amounting to $3,925,400, and contracts for munitions amounting to $199,600, thus showing a total amount of work ahead of $4,125,000, all placed at satisfactory prices.

The class of work we have been turning out has been most satisfactory, and we feel assured, from the present outlook of the locomotive situation in Canada, that our plant will be kept fully occupied for some years to come.

Yours faithfully,
ÆMILIUS JARVIS, President.

CONCERNING THE "PORTUGAL TREATY"

Canada Will Reap Benefit of British Treaty with Portugal —Important Provisions Summarized

The government of Canada, says the Department of Trade and Commerce, in its weekly bulletin, has received notice from the colonial office that Canada's adhesion to the treaty of commerce and navigation between the United Kingdom and Portugal, signed at Lisbon, August 12, 1914, has been accepted by Portugal, with the understanding that article 6 of the treaty (prohibiting the importation or sale of any wine or liquor to which the description "Port of Maderia" is applied other than the produce of Portugal and the island of Maderia shall apply only to the United Kingdom.

The most important provisions of this treaty may be summarized as follows:—

The citizens of contracting parties shall enjoy full freedom of navigation in each other's territories.

The citizens of each shall be exempt from all personal service in the army, navy and national militia in the territory of the other.

Each country shall grant to the other most-favored-nation treatment in all respects as regards tariff, commerce, navigation and industry.

The citizens of each of the contracting parties shall be at full liberty to acquire and possess every description of property in the territory of the other which the laws of the country permit citizens of the state to acquire and possess, and they shall not be subject to any taxes or imposts other or higher than those applicable to citizens of the state.

Merchandise of all kinds the produce or manufacture of one of the contracting parties passing through the territories of the other shall be reciprocally free from all transit duties.

Goods of all kinds the produce or manufacture of one of the contracting parties imported into the territories of the other shall not be subject to excise, octroi or consumption dues levied on account of the state or of the municipalities higher than those payable on similar articles of native origin.

As to Commercial Travellers.

The stipulations of the present treaty with regard to the mutual accord of the treatment of the most favored nation apply unconditionally to the treatment of commercial travellers and their samples. The chambers of commerce, as well as other trade associations and other recognized commercial associations in the contracting states as may be authorized in this behalf shall be mutually accepted as competent authorities for issuing any certificates that may be required for commercial travellers.

Articles imported by commercial travellers as samples shall, in each country, be temporarily admitted free of duty on compliance with the customs regulations and formalities established to assure their re-exportation or the payment of the prescribed customs duties if not re-exported within the period allowed by law. But the foregoing privilege shall not extend to articles which, owing to their quantity or value, cannot be considered as samples, or which, owing to their nature, could not be identified upon re-exportation.

In order to facilitate the clearance of samples of goods brought by commercial travellers of one of the two states into the territories of the other to be used as samples or patterns for the purpose of obtaining orders and not for sale, the marks, stamps, or seals affixed by the customs authorities of one country to commercial samples at the time of exportation, and the list of such samples drawn up in proper form and certified by the competent authority, such list containing an exact description of the samples, shall form sufficient evidence, so far as the respective customs authorities are concerned, of their nature, and shall entitle them to exemption from all customs examination except in so far as may be necessary to establish that the samples produced are identical with those enumerated in the list. The customs authorities of either country are, however, at liberty to affix a supplementary mark to such samples, should this precaution in particular cases be considered necessary.

Trading Between Points.

Notwithstanding anything in this treaty, either of the contracting parties reserves the right to confine to national vessels the trade between any ports within its territories. Limited liability and other companies and associations, commercial, industrial and financial, already or hereafter to be organized in accordance with the laws of either contracting party and registered in the territories of such party, are authorized in the territories of the other to exercise their rights and appear in the courts either as plaintiffs or defendants, subject to the laws of such other party. The subjects or citizens of each of the high contracting parties shall have, in the territories of the other, the same rights as subjects or citizens of that state in regard to patents for inventions, trade-marks and designs, upon fulfilment of the formalities prescribed by law.

ALBERTA INSURANCE AGENTS ORGANIZE

At a meeting of country insurance men held last week at Lacombe, an organization, to be known as the Alberta Insurance Agents' Association, was formed. The following officers were elected: President, John McKenty, Lacombe; vice-president, E. B. Tainter, Taber; secretary-treasurer, A. J. Cameron, Lacombe. Executive—Arthur Mitchell, Vulcan; Arthur Young, Macleod; John Percival, Red Deer; J. P. Johnson, Wetaskiwin; H. W. Moffat, New Norway.

UNIVERSITIES AND PRACTICAL WORK

How These Institutions Can Help Business Professions—Unregulated Competition is Old-fashioned

Introducing his address at the Life Underwriters' convention at Winnipeg recently, on the teaching of life insurance in our higher institutions of learning, Prof. Theodore H. Boggs, of the University of British Columbia, stated that all are coming to recognize the peril of leaving our political and economic destiny to be worked out by the haphazard and oftentimes ill-advised process of individual inspiration. "The policy of laissez-faire, which for decades had been slowly dying," he continued, "has been quite suddenly put out of its misery by the exigencies of the past three years. No longer does the Anglo-Saxon cling to his old distrust of method and system. He is being forced to a recognition of the greater efficiency inherent in deliberate, conscious and purposeful action. Accordingly collective or state control has been widely extended during the war and it would appear that the impetus once given is far from being exhausted. Reforms which for decades have been violently championed or piously prayed for, according to the temper of the reformer, seem now, of a sudden, to command the respectful audience of most of us.

"In commandeering the shipping resources of the realm, in taking over control of railway facilities and coal mines, in mobilizing the banking resources, in regulating the gastronomic destinies of the people through food laws, and, in short, in exercising a general supervisory control over the lives of the British people, the government of Great Britain has taken action which cannot but be interpreted as an efficiency remedy dictated by the necessity of the crisis.

"Few probably will withhold their approval of the broad generalization that increasingly in the future should conscious and deliberate co-operative effort supplant our hitherto ill-directed and at times criminally wasteful methods of production. In the future, as during the present war-period, production, exchange and distribution should be viewed in general from the standpoint of society as a whole rather than from that of a relatively small group of privileged classes.

Old-Fashioned System.

"We are all aware of the tendency of unregulated competition to lead to competitive waste and to the adulteration of goods. Thanks to collective or government supervision, the zeal of the adulterator has been somewhat curbed. Similarly, in the field of education, no less than in the political and economic, the old-fashioned system of laissez-faire, which is to say, the trusting to individual initiative, must yield to a deliberate and consciously purposeful policy designed to serve the best interests of the greatest number. Far from viewing the educational policy of the country as a thing sacred and immune from change we must treat it as an instrument to the task of developing to the full the citizens of the nation. To the end that education should broaden one's horizon, free one from the domination of specious argument and flighty passion, give one independence of judgment, and withal inculcate discipline it is obvious that education should be developed along such lines as to acquaint the students with actual conditions in the world as it is. No longer should education be treated as a mere mental gymnastic, quite remote from actual life. The system of higher education cannot escape censure unless it seeks among other things to acquaint the student with the actual conditions of social and national progress of the world of which he forms a part. This, I take it, forms the bed rock upon which our discussion to-day must rest.

Indictment of Universities.

"The familiar indictment of our universities and colleges to the effect that provision is not made in the curriculum for instruction in many matters of vital interest to all, such for example, as national and municipal government, taxation, banking and life insurance, is happily less and less deserved.

"Slowly, but none the less surely, we have been throwing off the thraldom of the traditional belief that the process of education should consist of a rigid course of formal mental discipline; quite devoid, all too often, of any but an accidental relation to the actual conditions of real life. One critic of this older theory of education has compared the champions of unrelieved formal mental discipline to the Egyptian priests who planted rows of dead sticks, which, for disciplinary purposes, they watered regularly; had they planted corn instead, the critic adds, they would have derived the same discipline, and something more as well.

"Happily we have proceeded along the path of educational development sufficiently far to feel no longer the necessity of apologizing if perchance some course of study possess a practical bearing on actual life That a subject of instruction is of practical interest or may be of value in the actual everyday life of the student is no longer sufficient reason for condemning it. For supporting evidence it is but necessary to contrast the curricula of many leading universities of to-day with the curricula of the same institutions several decades ago. Not even Oxford and Cambridge, those ancient and honorable shrines of learning are immune from the influence of changing conditions. A century ago, those institutions, open to none but the elect, provided, in the phrase of Dr. H. A. L. Fisher, minister of education in the present British cabinet, 'but a few hasty scraps of elementary Latin, Greek and mathematics.' He adds that while 'a few rare men of learning lurked among the folios in the library, learning was rare, and the English Universities counted little in the march of European intellect. All that however has passed away.

Instruction in Practical Subjects.

"We may safely assume the general acceptance of the premise that instruction in such subjects of practical interest as the theory and practice of government, federal, provincial and municipal, the scientific principles underlying the computation of premium rates in life insurance and a comparative study of rival theories of taxation must involve mental discipline. Indeed the mental discipline incident to a course in the principles of life insurance may be much more severe than that entailed by many of the traditionally so-called disciplinary studies. Accordingly on grounds of intellectual discipline there can be no logical ground against the introduction into the university curriculum of instruction in life insurance and other like subjects of practical value.

"At the same time one oftentimes meets the objection that the function of the university is to provide in its broad outlines a liberal education; and to furnish the basis for a wide culture and acquaintance with the best thought of all ages. In reply we may hasten to give enthusiastic assent to the great value of the classics and modern languages in our system of higher education. While according full homage to the proven worth and honored past of the humanities the suggestion is ventured that room might advantageously be found, in the curriculum, among the elective studies in the last two years of the ordinary arts course for instruction in subjects of practical interest to all students, whatever the subsequent career may be. Indeed courses already are being given as a matter of course in most universities on such subjects of practical application as money and banking, taxation, statistics, labor problems and corporation economics. The foundational training in the more clearly cultural studies enjoys the unquestioned right of way during the first two years of the usual course in arts. It is during the last two years of the course that elective subjects in general make their appearance. Thus the establishment of courses in the principles and practice of life insurance as electives in the junior and senior years would in no esential way alter or disturb the present system of higher education. Such courses would merely take their appropriate place in the group of elective studies.

"That the proneness to cling to generally accepted beliefs is not restricted alone to the field of education is obvious. In all spheres of thought it appears to be natural to look askance upon proposals which depart from the traditional model of opinion.

Practical Business Education.

"That the general public has become interested in a practical form of business education may be inferred from the rapid growth in student enrollment of the various institutions. Thus the New York University School of Commerce, established in 1900 with 60 students, had an enrollment in 1916 of approximately 4,300. The number of graduates of this school in 1916 was 288 and in the present year 349. The instruction offered includes courses in accounting, commercial law, commercial Spanish, corporation finance, economics, foreign exchange, insurance, railroad finance, public utilities, investments, and money and banking. To be sure, be it confessed, the New York University School of Commerce has enjoyed, doubtless by reason of its location, a more rapid growth than any other such institution. The development of the Harvard School of Business Administration is somewhat more typical. Its enrollment of students, increasing from 80 in its

first year, 1908, to 180 in 1916, reveals, not only a healthy growth, but an even more significant national interest. In its first year it had graduates of fourteen colleges from twelve states, whereas in 1916, its students were drawn from seventy-two colleges and thirty-six states.

Instruction in Business.

"To the pertinent query which must inevitably arise as to the advantage or effect of such instruction in business, there is lacking, as yet, complete and wholly convincing data. However it may not be amiss to allude to the evidence, such as it is. From a statistical investigation made in 1917 of the average salaries of the graduates of the New York University School of Commerce certain interesting facts appear. Although the power merely to make money does not prove true success, yet for business men taken together in the mass, there has been found, as yet, no better criterion than their incomes for indicating their own success and their worth to the industrial society of which they form a part. The average yearly income of the graduates of the class of 1902, the first to leave the New York School of Commerce, was found to be (early in 1917) approximately $7,700. It should be noted that the members of this class had been out of school but fifteen years and that their average age was approximately 37 years. The next oldest graduating class, that of 1903, enjoyed, as would be expected, a somewhat lower salary scale. The average for this group was well over $6,000. For the class of 1904, out of college thirteen years and having an average age of thirty-five years, the average salary was approximately $5,100.

"That these results, drawn from the experience of one of the schools, are, however, quite typical for the university school of commerce in general is at once apparent from similar, though less complete, investigations undertaken elsewhere. Thus it would seem that the modern type of business education is abundantly justified. Moreover, it is coming to be recognized, happily, that the career of the business man partakes of the status of a profession and no longer that of a mere occupation as regards both the methods pursued and the quality of the service rendered."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended September 7th, 1917:—

Coniagas Mines, 131,327; La Rose Mines, 87,710; Dominion Reduction Company, 172,600; Nipissing Mines, 274,446; Tretheway Mines, 126,698; National Mines, 54,277; Penn. Canadian Mines, 65,985. Total, 913,043 pounds, or 456.52 tons.

The total shipments since January 1st, 1917, now amount to 20,940,707 pounds, or 10,470 tons.

CO-OPERATING FOR WAR LOANS

Here is an extract from a letter from one of the leading United States houses in the manufacture of clothing, which tells of the steps taken to obtain the co-operation of its employees upon subscriptions to the Liberty Loan:—

"We not only agreed to receive their subscriptions on easy installment payments with interest on credit balances, but increased the attractiveness of such subscriptions by agreeing to complete the payments ourselves for any employee who died before the bonds were fully paid for, and deliver same to his heirs. This feature, together with the oral explanation which I made to all the people in their work shops, resulted in very great enthusiasm, and more than doubled the number of subscriptions anticipated. The full amount from our 8,000 employees was over $200,000. Moreover, care was taken in the talks which were made to them to explain carefully the reasons for the war and the effect of their subscriptions upon the prospects of early peace. There had previously been considerable pro-German propaganda in the shop in the disguise of pacifism, which subsided in the face of the patriotic enthusiasm aroused by the Loan.

"Inasmuch as there may be future need for urging universal participation in the government loan, I commend the life insurance feature and thrift propaganda as means of stimulating interest in the proposition."

FIXING THE PRICE OF WHEAT

"Much is being and will be heard," says the Chicago correspondent of the "New York Post," "of the farmer's discontent at the $2.20-per-bushel price fixed by the Food Board as the official level for this season's wheat crop. But there is this answer to be made: The farmer has to pay much higher prices for what he buys than he had to pay before the war. But he certainly does not have to pay twice as much, and wheat at $2.20 at Chicago is at a level more than double the price which farmers would gladly have taken before the war began.

"The real gist of the matter is that many farmers, who were sharp enough to sell early in the present season, secured $2.50 or better. They want more now, or at least as much. From a trade standpoint, the price as fixed is very high, both for this and next year's crop.

"Were speculation to be turned loose again in the wheat market, and the same class of foreign buying were to come in to take the surplus off the market as it did in the season past, then wheat prices might easily go above $3 per bushel, and possibly to $4. The shortage in the crop, the exhaustion of visible supplies, and the urgent demand, would make a highly sensational market, with very wide swing of prices. Under existing circumstances, there is something else to consider. Even if peace were to be declared, the farmer would not only have his guaranteed $2 price for the next crop, but values would probably stay high for a considerable time to come, as a consequence of the immediately increased world's consumption."

CANADIAN LOCOMOTIVE COMPANY'S REPORT

As a result of operations last year, the Canadian Locomotive Company made profits of $721,254. The company's fiscal year ended on June 30th. This excellent result was obtained after allowing for all special charges other than bond interest and depreciation. Sinking fund provision of $15,000 and interest of $90,000 on first mortgage bonds accounted for $105,000, leaving $616,254, which, with the balance of $304,322 brought forward, gave a sum of $920,577 for distribution. The preferred shareholders were paid $105,000 for the year. The sum of $25,000 was transferred to reserve for special replacements and $100,000 to reserve for general depreciation, a proper and wise provision in view of the nature of the company's plant and work and of the prevailing conditions. The company was then able to carry forward the substantial balance of $690,577 to the credit of profit and loss account, an amount more than twice that of the balance a year ago.

Last year's profits of $721,254 compare very favorably with the records of previous fiscal years as follows: 1912, $326,380; 1913, $396,886; 1914, $342,057; 1915, $134,613; 1916, $574,211. The aggregate profits for the six years are $2,495,404, an average net earning of $415,900, an especially creditable achievement for that particular period. The increase in profits last year was due entirely to the extra production of the company's plant both in locomotives and munitions. The net profits on the business of 1917 was over 25 per cent. in excess of those of any previous year since the organization of the company.

Last year the labor problem was not a serious one with the company, as it was able to secure all the labor required, and the employees have backed up the efforts of the management in a most loyal and satisfactory manner, the result of which is shown in the large increase in output and profits, with comparatively little addition to the plant account.

Referring (in his report to the shareholders) to the prospects for the coming year, Mr. Æmilius Jarvis, president, described them as most encouraging. He added: "We have contracts for locomotives and locomotive parts amounting to $3,925,400, and contracts for munitions amounting to $199,600, thus showing a total amount of work ahead of $4,125,000, all placed at satisfactory prices. The class of work we have been turning out has been most satisfactory, and we feel assured, from the present outlook of the locomotive situation in Canada, that our plant will be kept fully occupied for some years to come." This information will prove gratifying to the shareholders, who will gather at the annual meeting at the company's offices at Kingston on Thursday to consider the report. As is generally known, an attempt is being made to change the control and direction of the company. The general opinion is that any such change is unnecessary and undesirable. The company's current report and the outlook for the future adds considerable strength to that opinion.

HOMESTEAD MAP OF CANADA

A publication which should prove of considerable interest to the prospective settler to Western Canada has just been issued by the Natural Resources Intelligence Branch of the Department of the Interior. It is known as the Homestead Map, and shows graphically the exact location of each quarter-section which is still available for entry under the free government offer of 160 acres.

The map has been published in four separate sheets, one each for Manitoba, Saskatchewan, Northern and Southern Alberta, respectively, and is available for free distribution in individual sheets or in complete sets.

The Homestead Map is one of a number of maps, reports and bulletins with respect to settlement in Western Canada that are available for free distribution upon application to the Natural Resources Intelligence Branch. In view of the arrangement with respect to farm labor in Western Canada counting as residence on a homestead and thereby reducing the period within which residence and cultivation duties must be performed prior to applying for a title to the land, also on account of the impetus which has been given to agriculture by the present world shortage of foodstuffs, the demand for information on the subject of homesteading is showing a marked increase.

Service for Women

IN the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

ONTARIO COMPENSATION AND FIRST AID

Circular Letter of the Ontario Workmen's Compensation Board

The importance of antiseptic treatment of such slight wounds and of other first aid in cases of emergency is now generally recognized, says the Workmen's Compensation Board in a letter to *The Monetary Times*. The many thousands of dollars compensation that the board's statistics show, might be saved by preventing blood poisoning and other serious consequences is only a part of the benefit of a "first-aid" service. Very many employers already have such a service. It is only fair that it should be required to be provided in all cases warranting it.

Under subsection 10 of section 44a of the act, regulation 88, printed herewith, has accordingly been passed, requiring first-aid appliances and service as therein specified. This embodies what is intended generally to be a minimum standard and employers will no doubt desire to odd to the equipment as circumstances suggest. Employers already having an equipment which they feel is satisfactory may apply to the board for approval under paragraph 5 of the regulation.

Efficiency of Service.

The efficiency of the service will depend much upon having it in charge of some person or persons who will take an interest in the work and who will see that the equipment is properly used, and replenished when necessary, and an interest in the matter, should be cultivated among employees so that they will be desirous of making use of the service when occasion arises. The notices which are to be posted up for this purpose will be supplied by the board upon application. Employers are reminded that these first-aid services are distinct from medical aid as defined by the act, and that accidents requiring only first aid service and not disabling the workman need not be reported, and that no medical aid will be payable in such cases. All accidents, however, either disabling the workmen or requiring medical aid are to be reported to the board by the employer. Amended form 5 is to be used for this purpose unless form 7 is filled.

In case of accident requiring medical aid, it is suggested that it will avoid confusion in names and will assist in various ways if the workman be given a memorandum for delivery to the doctor

First-Aid Service.

Pursuant to subsection 10 of section 44a ot the Workmen's Compensation Act, the Workmen's Compensation Board makes the following regulation: 88.—(1) Every employer having more than fifteen and less than 300 workmen usually employed shall provide and maintain in his factory or place of employment, or in each factory or place of employment if he has more than one, a first-aid kit or box containing the following supplies with such additional quantities as may be reasonably necessary to provide first aid to his injured workmen, and shall have the same in charge of some suitable person:—

Instruments.—1 pair scissors, 1 pair tweezers, 2 eye droppers, 1 camel's hair brush, 2 dozen safety pins, assorted, 1 tourniquet, 1 graduated medicine glass, 1 porcelain or white enamel wash basin.

Drugs.—2 oz. 4 per cent. boracic acid for eye wash, 2 oz. aromatic spirits of ammonia, 1 (2 oz.) bottle of boracic tablets, 2 oz. alcoholic iodine, half-strength (for external use), 1 tube vaseline, 4 oz. olive oil (for dressings for burns or eye injuries), 2 oz. pure benzine for cleaning wounds, 1 recognized antiseptic for washing wounds, e.g., 2 oz. Cresol, 2 oz. Eusol (Dakin's Sol.) powder form, or tablet form-100, burn dressing, e.g., bicarbonate of soda mixed with vaseline (3 per cent.). Each of the above must be in bottles or containers plainly labelled and the specific purpose for which the contents are to be used marked thereon.

Dressings.—[illegible] 1 oz. packages absorbent cotton, [illegible] 1 yd. packages sterile gauze, 12 sterile gauze bandages, assorted sizes, 3 triangular bandages, 1 roll ½ in. x 5 yds. adhesive plaster, splints of assorted sizes.

(2) Every employer having 300 or more workmen usually employed shall provide and maintain [illegible] as convenient as possible to his factory or plant an emergency first-aid room, which shall be painted white and kept absolutely sanitary at all times. This shall be in charge of a clerk, workman, nurse, or other person who has taken a recognized course of study in "First Aid to the Injured," and shall be provided with the following equipment and supplies in such quantites as may be reasonably necessary to provide first aid to injured workmen:

Furnishings.—Hot and cold water, 1 porcelain or white enamel wash basin, 1 emergency operating table, 1 sterilizer, 1 cabinet for surgical dressings, 1 porcelain or white enamel foot bath, 1 enamelled refuse pail, 1 metal box fitted with emergency dressings to be used by first-aid man when required to attend injured men in factory who cannot be immediately removed to first-aid room, 1 couch, 1 carrying stretcher.

Instruments.—Scissors, dressing forceps, eye droppers, camel's hair brushes, safety pins, assorted, tourniquet, graduated medicine glass.

Drugs.—Boracic acid for eye wash (4 per cent.), aromatic spirits of ammonia, boracic tablets, alcoholic iodine, half-strength (for external use), vaseline, olive oil (for dressings for burns or eye injuries), pure benzine for cleaning wounds, recognized antiseptic for washing wounds, e.g., bi-chloride of mercury, Cresol, Eusol (Dakin's Sol.) powder or tablet form, burn dressing, e.g., bicarbonate of soda mixed with vaseline (3 per cent.). The above must be in bottles or containers plainly labelled and the specific purpose for which the contents are to be used marked thereon.

What Employer Must Do.

Dressings.—Absorbent cotton, sterile gauze, sterile gauze bandages, assorted sizes, cotton bandages, assorted sizes, triangular bandages, adhesive plaster, splints, assorted sizes.

(3) The employer shall keep posted up throughout the works in every factory or place of employment where more than fifteen workmen are usually employed the following notice, and where non-English speaking workmen are employed such notice shall be posted in their different languages: Notice—It is dangerous to neglect injuries. Without proper care, blood poisoning or infection with serious consequences may result from slight injuries, such as cuts, punctures, scratches, slivers, burns, etc. Workmen are urged to see that proper attention is given to all such injuries, and to report immediately to the office or first-aid officer.

(4) A minimum first-aid kit as above described, or a first-aid equipment satisfactory to the Workmen's Compensation Board, shall accompany the crew in charge of every railway train in transit and every vessel.

(5) The board, where it deems the circumstances justify it, may direct or approve any addition to or reduction, or variation in, the first-aid service or appliances above prescribed, or may in any case not above provided for prescribe such first-aid service and appliances as it deems warranted.

BARN FIRES AND LIGHTNING

"July is usually a month of electric storms, just as June is, but in July of this year we have had an unusual number to record," is the statement of the Ontario fire marshal, Mr. E. P. Heaton. The inauguration of a statement of Causes of Fire, which, for the first time, appears in this issue, obviates the necessity of any detailed reference here. In the early part of June we set out to obtain a special report on as many barn fires as we could which had their origin in lightning as a cause. Up to the day of writing (August 27th) we have received 126 special reports, but only in one case out of the whole 126 was there any pretension to a lightning rod equipment. In this particular case the rod had been installed eight years previously, and it was well known to the farmer that the wires entering the ground had been corroded and were broken. In these circumstances the equipment was, of course, altogether worthless. With this solitary exception all the other barns were devoid of lightning rod protection.

"One instance of outstanding characteristics has just come before us. One of the very best barns in the eastern part of the province, built in 1915, provided with the most modern ventilating system, was struck by lightning on August 20th at about 3.15 in the afternoon. The barn was totally consumed; its value, as determined by the insurance adjuster, was $15,000; the loss was $13,000, and the insurance $10,000. The contents, of a value of approximately $1,500, were totally consumed, but no insurance was carried thereon. This barn, modern in all its details, had no lightning rod protection."

PERSONAL NOTES

MR. RUSSELL D. BELL, of Messrs. Greenshields and Company, investment bankers, Montreal, who has contributed valuable articles to *The Monetary Times Annual* for many years is training at Plattsburg for a commission in the United States Artillery.

MR. EDSON J. CHAMBERLIN'S resignation as chairman of the board of directors of the Central Vermont Railroad was accepted at a special meeting of the directors this week. MR. HOWARD G. KELLEY, recently elected president of the Grand Trunk Railway system in Canada, was elected to succeed Mr. Chamberlin.

MR. WELLINGTON FRANCIS, K.C., formerly vice-president of the Toronto Mortgage Company, Toronto, has been elected president. MR. HERBERT LANGLOIS has been appointed vice-president of the company. MR. WALTER GILLESPIE has been appointed managing director of the company, filling the vacancy caused by the death of Sir Wm. Mortimer.

MESSRS. ROBERT JENKINS and PERCY R. GRINTER at Brantford, Ont., Charles M. McLeod at Calgary, Alta., Charles A. Spaethe at Regina, Sask., John C. McCaig at Edmonton, Alta., Thos. W. Bates at Gleichen, Alta., Roy S. Rudd at Tofield, Alta., Edward Kingsbury at Briercrest, Sask., have recently received, in the Continental Life, the above agency appointments.

MR. K. E. McGREGOR, of Montreal, who has recently been appointed manager for the Continental Life in the province of Quebec, has a number of years of successful salesmanship to his credit. Some years ago he joined forces with the Montreal Agency of the International Correspondence Schools and before long won his way to the position of Montreal manager, which position he held with much success, having a number of championships and record-breaker medals, of which he is naturally very proud. About two years ago he joined the agency force of the Sun Life Montreal agency, and is a member of their $100,000 club.

"If there are no courts that men can trust, there can be no credits or contracts. If these are not, neither capital nor wages come."

"A clear and wise economic picture of Mexico, beyond any others that I have read."
Dr. Talcott Williams of Columbia University.

The Mexican Problem
By
C. W. BARRON
Author of "THE AUDACIOUS WAR."

A business solution, based on first-hand investigation. Mr. Barron's vivid and illuminating portrayal of Mexican unrest, casts a shaft of light over the whole field of international affairs and throws into sharp relief the fundamental causes of all wars.

With Map and Illustrations, $1.00 net.

By Order of the Board.
S. F. DUNCAN,
Secretary-Treasurer.

Dated Toronto, September 6th, 1917.

ONTARIO GOVERNMENT BOND ISSUE

An offering of $1,000,000 4 per cent. coupon gold bonds of the province of Ontario is being made at 87.44 and interest to yield 5.90 per cent. This is the most attractive basis at which Ontario bonds have ever been offered to the public. The issue is part of the block of $8,000,000 allotted to the Seymour Power Company last year in connection with hydro-electric purchases, and is the first lot of these bonds to be offered locally. They are 10-year coupon gold bonds due in 1926. Messrs. A. E. Ames and Company, Toronto, are making the offering.

PENSION SCHEMES FOR INSURANCE OFFICERS

A number of insurance companies are preparing pension schemes for all their employees. The latest is that of the Sun Life Insurance Company of Canada, which announces that it has adopted a pension scheme for all its office help, male and female. The plan has the double merit of simplicity and proved effectiveness. It calls for no contributions whatever from the employees themselves, the entire cost being a charge on the company. Under its terms the age for retirement is set at 60 years for women and 65 for men. At the age indicated an employee can retire on a pension equal to as many 60th's of his average salary for the previous five years as he has seen years in the service of the company. Thus an employee who has reached the retiring age after 30 years of service, retires on a pension equal to one-half of his average salary during his last five years with the company. In no case will the retiring allowance amount to more than 70 per cent. of such average salary.

In addition to the pension scheme they have adopted a scheme of continuous bonuses so that every woman clerk on the completion of her first three years with the company will receive a [illegible] bonus of $150, at the end of her second three years $200, and at the termination of her third three-year period with the company, $250. For each complete year of service thereafter, a bonus of $100 will be awarded.

C.P.R. and C.N.R. TRACKAGE

St. Boniface - Man.

A Sacrifice for Cash

If interested in a valuable manufacturing site of one fourth of one acre to one acre, write for particulars of an excellent location—one mile from Winnipeg Post Office.

Owner must sell on account of war-time pressure.

Cannot Do Without It

Pittsburgh, Pa.,
Sept. 4th, 1917.

The Monetary Times,
62 Church St.,
Toronto, Canada.

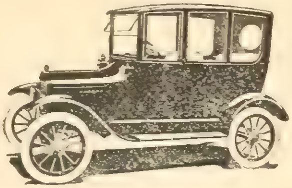
Gentlemen :—

Herewith my check for $3.00, being for a year's subscription to your paper, expiring April, 1918.

As this is not the first bill I have received for this amount, I feel that I owe you an apology for my tardiness, but it has simply been neglect on my part. I certainly could not do without The Monetary Times, as through it I am able to keep in touch with Canadian affairs better than through any other way.

Yours faithfully,

H. S. POTTER,
Manager Pennsylvania
West Division
Sun Life Assurance Co.
of Canada.



For Business Men

The Ford Sedan offers you comfort and protection from the weather, when travelling to and from your home.

At the same time your family will appreciate its quiet dignity and ease of control. The Ford Sedan is a superior combined business and family car.

FORD - ONTARIO M1

A SQUARE DEAL
IN LIFE ASSURANCE

"First in the Northwest."

Do YOU know anything about "loadings"? ? ?

When the average Life Assurance Actuary figures out your premium he first finds the "net" premium, then adds to it a percentage called a "loading" to provide for expenses.

This method has been condemned by world famous actuaries for over half a century.

The Northwestern is the only Canadian Life Company that uses a scientific method of providing for expenses, and this results in

LOWER PREMIUMS

Write for our circular entitled "Life Assurance Rates" exposing the unsound methods generally followed and justifying our claim to be

Canada's only scientific Life Company.

The Northwestern provides the highest reserves of any Canadian Company.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over **$5,000.00**, and he has built up a future income of over **$3,000.00** a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

GENERAL AGENCY WANTED.—By established firm of Insurance Brokers, of Montreal, writing Fire and Accident business. Apply A. B. & Co., care of *Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

COPPER PRODUCTION INCREASED

Total Copper Contents Credited to Canadian Ores, 119,770,814 Pounds

The production of copper has shown large increases during the past three years. In 1916 the total copper contents of smelter products credited to Canadian ores and estimated recoveries from ores exported amounted to 119,770,814 pounds, which would be worth $32,580,057 at the average monthly price of refined copper in New York, 27 cents per pound. The production in 1915 was 100,785,150 pounds, and at 17 cents per pound, the average price for the year, would be worth $17,410,635. There was thus an increase in 1916 of 18,985,664 pounds, or 18.8 per cent. in quantity and $15,169,422, or 87.1 per cent. in total value. An electrolytic copper refinery which has been installed at Trail began active operations about November 1 and has a capacity of 10 tons of refined copper per day. Of the total 1916 production 92,763,603 pounds were contained in blister copper and in matte, and 27,007,211 pounds estimated as recovered from ores exported. In addition to the recoveries from domestic ores there was also recovered in British Columbia smelters 5,551,166 pounds of copper from imported ores.

The production in Quebec from pyrite ores was 5,707,200 pounds as against 4,197,482 pounds in 1915. These are the quantities reported as being paid for; the actual ore contents were much higher.

The Ontario production is derived chiefly from the nickel-copper ores of the Sudbury district and of the Alexo mine in Timiskaming supplemented by a small recovery from the Cobalt district silver ores and by shipments made from six copper properties under development. The total production in 1916 was 44,997,035 pounds, as against 39,361,464 pounds in 1915, an increase of 12.5 per cent. The British Columbia production was somewhat less than early estimates seemed to indicate. The quantity reported being 65,086,119 pounds as compared with 56,692,988 pounds in 1915, an increase of 8,393,131 pounds, or 14.8 per cent. The 1916 production in this province included 47,904,282 pounds recovered in blister and matte and 17,181,837 pounds recovered from ores shipped to United States smelters. The coast mines including the Britannia, Texada Island and Anyox mines together with the shipments from Hazelton are credited with 43,048,065 pounds and the Trail Creek and Boundary mines with 22,038,054 pounds. The increase in 1916 has been entirely from the coast properties.

High Price has Stimulated Production.

The high price of copper has stimulated production from the White Horse district of the Yukon. Complete returns have not yet been received but the ore shipments were approximately 49,000 tons with a recoverable copper content estimated at 3,980,640 pounds. In 1915 the production from this source was 533,216 pounds. The New York price of electrolytic copper increased from a minimum of 22½ cents during the first week of the year to 29¼ cents in May, falling to 22½ cents again about the middle of July. From that the price increased steadily to 33½ cents during the first half of December closing the year at about 30 cents. The average monthly price was 27.202 cents as compared with an average of 17.275 cents in 1915, an increase of 9.927 cents or 57.5 per cent. Higher prices for copper have not been recorded since 1873, when the average for the year was 28 cents.

Copper Imports for 1916, $7,565,377.

Exports of copper, according to customs records, were: Copper fine in ore, matte, regulus, etc., 124,942,400 pounds, valued at $20,776,536; copper in pigs, bars, sheets, etc., 2,430,400 pounds, valued at $581,268. There were also exports of old and scrap copper amounting to 5,846,600 pounds, valued at $1,284,895. The total value of the imports of copper in 1916 are recorded as $7,565,377, as against $3,957,770 in 1915. The imports in 1916 included 25,584,087 pounds of copper in pigs, ingots and manufactures valued at $7,565,377; other manufactures of copper values at $234,437, and copper sulphate 1,803,655 pounds, valued at $108,542. There was also a considerable import of copper contained in brass.

The United States government this week advanced Italy another credit of $55,000,000, bringing the total advanced to that government up to $255,000,000, and the total advanced to the Allies up to $[illegible]

SUBSCRIBER'S LETTER ON TREASURY DEMANDS

If the writer of the letter received this week, and signed "A Subscriber," will send his card as an evidence of good faith but not for publication, his communication to *The Monetary Times* will be printed.

WESTERN CROPS WORTH $575,000,000.

The Manitoba Free Press estimates the western crop of 1917 as follows: Wheat, 214,250,528 bushels; oats, 187,028,065; barley, 38,781,060; flax, 6,611,463.

This estimate is based on an inspection embracing the three prairie provinces made by the commercial editor and the reports of over two hundred local correspondents. The yield of wheat is placed at fifteen bushels for Manitoba, fourteen for Saskatchewan, and twenty-five for Alberta. Oats at twenty-five bushels, barley at twenty, and flax at nine for the three provinces.

The value of the crops is placed roughly at $575,000,000, as against $502,000,000 for the famous crop of 1915, $225,000,000 for the crop of 1913, the year prior to the war, and $136,000,000 for the crop of 1910.

The values are based on $1.95 for wheat, 60 cents for oats, $1 for barley, and $3 for flax. The Free Press feels that the wheat estimate is conservative, and will not be surprised if the final returns show a substantial increase. The reports of local correspondents indicate that thrashing is very general all over the West, while in Manitoba it is about 40 per cent. completed.

PUBLICATIONS RECEIVED

Banking.—Mr. O. Howard Wolfe, of the Philadelphia National Bank, has had a varied experience in the banking world and is well able to handle his subject. In his book on "Practical Banking," he sets forth in a clear manner the internal operations of a bank, explaining the underlying principles of banking and of the every-day transactions that are common to the various kinds of banks. In a recent letter, Mr. Ralph Van Vechten, vice-president, Continental and Commercial National Bank, Chicago, writes: "Mr. Wolfe is an authority, as I discovered some years ago, and I made him secretary of the clearing-house section of the American Bankers' Association, at the time I was chairman of the executive committee. He remained with our section for some years and did most effective work; in fact, when it came to the organization of the Federal Reserve system, he was most useful in working out many of the perplexing problems which came up to the committee at Washington. You certainly showed discrimination in selecting him for this important work." "Practical Banking." By O. Howard Wolfe. Published by La Salle Extension University, Chicago.

Banking.—Foreign Trade Letter of the First National Bank of Boston.

POSITION OF CANADA'S FINANCES

The financial statement of the Dominion covering the period from April 1, the beginning of the fiscal year, to September 10, shows total receipts of $112,000,000, an increase of $22,000,000 over the same period of last year.

The payments on account of ordinary expenditure including interest on war loans are $43,000,000, which is almost identical with the expenditure on this account for the same period of last year.

Capital expenditure is $7,500,000 less than last year. Of this last named reduction public works expenditure shows a decrease of over $1,000,000, while railways and canals expenditures is $3,500,000 less than for the corresponding period of last year.

Taking into account both receipts and expenditures on capital and ordinary accounts, the period in question shows a surplus of receipts over these expenditures to the amount of $62,000,000. The war expenditure in Canada during the period was $57,000,000. It thus appears that so far as receipts and expenditures have been entered in the books of the department of revenues of the Dominion during the present fiscal year, have more than equalled the expenditures on ordinary and capital account, together with the war expenditure in Canada. The greater part of Canada's war expenditure is, of course, overseas. Payment on this account is arranged for with the Imperial treasury in London.

Canadian Government
and
Municipal Bonds

At present prices, yielding 5½% to 6¼%, offer unequalled investment opportunities.

Result of Investigations.

During the month of July there were held and closed 27 investigations, and at the close of the month 24 were still open. As a result of the investigations a number of criminal actions have been instituted, but after full consideration it has been decided not to continue a practice started a few months ago, of publishing the arrests and convictions.

It is, however, perhaps fitting that a case instituted and conducted by the provincial police should receive some note. On the 30th of June last, Wm. Wilkins' house at Blind River was burned. There was a strong suspicion that the house was deliberately set on fire, and provincial police constable Flanagan, of Thessalon, began an investigation on July 1st. On July 2nd, the constable was successful in securing a confession from Nelson Englehart to setting fire to the house. He also arrested John Quinn and Vina Quinn, charging them that they did counsel and procure Nelson Englehart to set fire to the house. On July 3rd, before police magistrate Williams, Englehart was convicted and sentenced to ten years in Kingston Penitentiary. On July 13th, before the same magistrate, the two Quinns were committed for trial on the charge above stated.

TO INVESTIGATE EXPORT OF POWER

Sir Henry Drayton, chairman of the Dominion Railway Commission, has been selected for appointment as a Royal commissioner to conduct an investigation into the exportation of power generated at Niagara Falls to the United States.

The three power companies on the Canadian side of the Niagara River which are developing power at the Falls are allowed to export certain quantities of electric energy under licenses granted annually by the Department of Inland Revenue.

It has recently been asserted on behalf of the Hydro-Electric Power Commission of Ontario, which has acquired one of the plants at Niagara Falls, that of the Ontario Power Company, that electricity required to keep in operation factories in Ontario is being transmitted across the boundary. That condition the federal government has been asked to stop. The power companies have protested that their licenses to export should not be withheld. They have stated that they have contracts with the customers in the United States, and that they should not be placed in such a position that they would not be able to carry out these contracts.

CANADA'S DRY GOODS TRADE

United Kingdom Has Increased Its Business Here, So Has United States

The trade of Canada for 1916 is analysed and reviewed in a report just published, to the British government's board of trade, by Mr. C. H. Wickes, British trade commissioner in Canada and Newfoundland. After reviewing the general economic conditions in Canada in 1916, with special reference to crops, minerals, immigration, census of manufactures, etc., Mr. Wickes proceeds to deal with imports into Canada of selected articles in which the United Kingdom is in a position to compete. The report gives the following notes on the trade in some of the principal articles of import:—

As to Cotton Goods.

In clothing, such as shirts, socks and stockings there is a small increase from the United Kingdom, but a considerable increase from the United States.

In embroideries, Switzerland continues to increase its lead.

Fabrics, printed, dyed or colored.—Imports for 1916 exceed 1915 by four-and-a-half million dollars, the increase from the United Kingdom being one million, and from the United States about three millions and a half.

Duck, weighing over 8 oz. per square yard.—Imports from the United Kingdom rose from a value of $60,000 in 1915 to $155,000 in 1916, but the United States increased its trade from $374,000 to $933,000.

White or bleached cotton fabrics.—There was a slight increase in the value of shipments from the United Kingdom, but imports from the United States rose by $1,200,000, or 162.5 per cent.

Grey or unbleached cottons.—The total imports increased by 90 per cent., those from the United Kingdom declining by 23 per cent., and the United States gaining 340 per cent.

Handkerchiefs.—Total imports nearly doubled during 1916, the United Kingdom preserving practically all the trade.

Velvets, velveteens and plush.—The trade for 1916 increased by $1,600,000, or 45 per cent. above that of 1915, the relative proportions for the United Kingdom and the United States being about maintained. The United Kingdom's share of this trade in 1916 was 78 per cent.

Thread (crochet, knitting and sewing).—Imports nearly doubled in 1916, the United Kingdom maintaining its position, which is about 60 per cent. of the total.

Notes of Woolen Goods.

Knitted goods (not otherwise provided for).—The increase in total imports was about 43 per cent., the United Kingdom increasing its last year's shipments by 40 per cent., and the United States by 50 per cent.

Outside garments.—The volume of trade increased by nearly 60 per cent. above that of the previous year, nearly the whole of the difference coming from the United States.

Socks and stockings increased by nearly 70 per cent. The United Kingdom improved upon its 1915 figures by 35 per cent., but the United States quadrupled the value of its 1915 trade.

Other clothing of wool.—Trade improved by 25 per cent., the United States now taking first place.

Cassimeres.—Imports rose by 131.5 per cent., from $1,250,000 to $2,899,000, the United Kingdom continuing to maintain its share of 80 per cent. of the total trade, the balance going to the United States.

Coatings, overcoatings, dress goods, Italian linings, etc.—There was an increase of 84 per cent. compared with 1915. Here again the business is practically in British hands, the United Kingdom taking 94 per cent. during the past year and the United States the balance.

Tweeds.—Imports in 1916 nearly doubled, the United Kingdom increasing its proportion of the total trade from 79 per cent. to 96 per cent.

Other fabrics (not otherwise provided for).—Imports increased in value from $6,977,000 in 1915 to $12,400,000 in 1916, or nearly 78 per cent. Of this total the United Kingdom supplied 74 per cent., and the balance came from the United States. The relative proportions in 1915 were 80 per cent. and 18 per cent. respectively.

Noils and worsted tops.—The percentage of increase was 45 per cent., the United Kingdom share of the trade being 8[illegible] per cent., as against 80 per cent. last year.

Raw wool.—Total imports decreased 44 per cent. The proportionate shipments from the principal sources of supply were : United Kingdom, 40 per cent.; Australia and New Zealand, 13 per cent.; United States, 36 per cent.; other countries, 11 per cent.

Yarns.—There was an increase of 120 per cent. in the total supply. The United Kingdom's share for 1916 was 72 per cent., and the United States 28 per cent. The proportions of the 1915 import were: United Kingdom, 82 per cent.; United States, 18 per cent.

Purchases of Silk Goods.

Manufactures of Silk.—It is satisfactory to note the large increase compared with 1915, the United Kingdom having more than doubled its share. The United States increased its imports by 50 per cent., and direct shipments from Japan and China were considerably larger than usual.

Ribbons.—The increase of imports in 1916 is traceable solely to the United Kingdom.

NEXT GERMAN WAR LOAN

The seventh German war loan, which the capture by the Germans of Riga is expected to aid materially, will be open for subscriptions September 19th, says a Copenhagen despatch. The loan will be of the same character as the sixth war loan, with five per cent. bonds issued at 98, and 4½ per cent. treasury certificates carrying a bonus for which the holders will have a chance to get from 110 to 120 when they are drawn for redemption.

MONEY MARKETS

Messrs. Glazebrook & Cronyn, Toronto, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	5-64 pm	3-32 pm	¼

Sterling—			
Demand	$4.75.00	$4.76.05	$4.78
Cable transfers	$4.76	$4.77	$4.79

Sterling demand in New York, $2.75½.
Bank of England rate, 5 per cent.

LONDON & LANCASHIRE FIRE COMPANY'S BIG DEAL

The largest insurance deal on record in the United Kingdom is the acquisition of the shares of the Marine Insurance Company by the London and Lancashire Fire Insurance Company. The sum involved is about $12,000,000. Commenting on the transaction, the London Times, says:—

"Since 1899 the management of the London and Lancashire Fire Insurance Company has been in the hands of Mr. F. W. P. Rutter, whose reputation as a business man stands very high in the insurance world, and he is understood to have given prolonged and most careful attention to the present proposed transaction. He joined the company in 1873, when its fortunes were very far from assured, and he has had the satisfaction of seeing its net premium income mount from just over £200,000 to nearly £3,270,000 last year, derived from all the forms of insurance which a great composite office transacts, and its reserve funds from £23,000 to £4,011,000. Even a very strong marine company may be expected to gain in certain directions from having such a progressive organization at its back, and it is obvious that in the case of every amalgamation the terms should be such that each party is able to consider that they are satisfactory."

The London and Lancashire Fire Insurance Company has a splendid organization and business in Canada, in charge of Mr. Alfred Wright, chief agent in Canada, with headquarters at Toronto. The company established its office here in 18[illegible] and has built up a very satisfactory business and reputation. Mr. Wright is also president of the London and Lancashire Guarantee and Accident Company of Canada, which obtained its Dominion license in 1908. This company has made excellent progress under the management of Mr. Alexander Maclean, the manager and secretary. The head office of the corporation is also in Toronto.

Ideal War-time Policies
Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100 00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt edged investment and perfect home protection.

They Shall Not Pass

The Immortal Cry of Canada at the Second Battle of Ypres.

The defence of Ypres following the first ghastly gas attack April 22, 1915, exalts all history. By it our men were transfigured and the undying, Imperishable Soul of Canada revealed.

In the name of these Heroes of Ypres, Festubert, Givenchy, Vimy Ridge, Lens, The Somme, Verdun —aye and the deathless "Old Contemptibles" — we beseech you, Women of Canada, to Dedicate Yourselves and Your Families to War Service by signing the Food Service Pledge.

The sacrifice is not great. We merely want you to substitute other foods for part of the white bread, beef and bacon your family now eat.

"What follows almost defies description. The effect of these poisonous gases was so virulent as to render the whole of the line held by the French Division practically incapable of any action at all.

The Stand of the Canadians

"The left flank of the Canadian Division was thus left dangerously exposed to serious attack in flank, and there appeared to be a prospect of their being overwhelmed and of a successful attempt by the Germans to cut off the British troops occupying the salient to the East.

"In spite of the danger to which they were exposed the Canadians held their ground with a magnificent display of tenacity and courage; and it is not too much to say the bearing and conduct of these splendid troops averted a disaster which might have been attended with the most serious consequences."

From
Sir John French's Seventh Dispatch,
General Headquarters,
15th June, 1915.

Thou Shalt Not Want

The Undying Pledge of Canada's Mothers to Her Sons.

When baking use one-third oatmeal, corn, barley or rye flour. Or, order some brown bread from your baker each day.

Substitute for beef and bacon such equally nutritious foods as fish, peas, lentils, potatoes, nuts, bananas, etc.

Third, and this is most important—positively prevent the waste of a single ounce of food in your home.

A Food Service Pledge and Window Card has been or will be delivered to you. The Pledge is your Dedication to War Service — The Window Card is your Emblem of Honour.

Sign the one and display the other.

Sign and Live Up to Your Food Service Pledge

Woman's Auxiliary, Organization of Resources Committee, in Co-operation with the Hon. W. J. Hanna, Food Controller

Interference With Natural Laws of Trade

SOME *Important Considerations as to Price Fixing—The Case of the Canadian Newsprint Industry—Are We Short Sighted in Taking Washington's Lead in That Industry?*

DISCUSSING the question of price fixing, especially in relation to the Canadian newsprint industry, Mr. F. R. Graham, of the investment house of Ferguson, Sanson and Graham, Toronto, made the following statement to *The Monetary Times*: "I could not help but be struck by the apparent incongruity of two articles, both bearing on the question of 'price fixing,' but arriving at opposite conclusions, that appeared in *The Monetary Times* of the 7th inst. The articles I have reference to are entitled 'American Newsprint Industry' and 'Consideration as to Price Fixing,' which appeared on page 20.

"I agree with the conclusions arrived at by the author of 'Consideration as to Price Fixing' and the specific illustration of the price trend of spelter and the conditions that brought about the recent decline in prices through increased production, would work out in the case of newsprint if the industry were not interfered with by meddling politicians at the dictation of the newspapers. Most of the financial papers, themselves interested parties, have adopted a neutral attitude which is a most unfortunate and short-sighted policy, in my opinion. Less price regulation and more encouragement for increased production, is the cure for shortage of newsprint as well as other commodities—the superficial economic reasoning of the newspapers to the contrary notwithstanding.

"Aside from the question of abandonment of projected new mills there is the question of additions to existing plants and we have the spectacle of a Canadian mill discouraged by governmental (Canadian and United States) interference, coupled with the present abnormal capital cost of installation and with prices for products regulated to a pre-war basis, selling to Japanese mills machinery that would have increased the output 25 per cent. These Japanese mills to-day are reaping the profit to be derived from present market conditions and are more firmly establishing themselves in their own and adjacent markets—all of which are open to the Canadian manufacturer and more especially to our Pacific Coast mills.

"The financing of a pulp and paper proposition to-day is greatly assisted if the mill in question is not a producer of newsprint and in the new mills under construction in this country, no provision is made for the manufacture of that class of paper—for the present time at least. This in no sense represents peevishness on the part of the manufacturer but is the natural outcome of taking the 'cent' out of incentive.

"Perhaps it is needless to point out that we will want all the industries after the war that we can possibly manage to finance if we are to keep employed the large volume of labor which will then be on the market. The possibilities of large expansion in the pulp and paper industry in this country is surely worth the consideration of our leading financial paper. Certainly the industry can expect no support from the daily newspapers who never lose an opportunity of misrepresenting the case of the manufacturer.

"We hear a great deal these days regarding the industrial outlook for Canada after the war, and fears are sometimes expressed as to our ability to make a good showing in the trade war to follow peace. In highly competitive lines of industry we may have a hard time but with a basic industry such as the pulp and paper industry, the world will wear a path to our doors. How many readers of *The Monetary Times* appreciate the fact that the entire North American, South American, and Oriental markets are open to us and will remain so for years to come? Former competition from Sweden and Norway with diminishing supplies may prove a thing of the past as far as this continent, South America, and the East is concerned. Canada should therefore find herself the world centre of the pulp and paper industry in spite of the governmental discouragements of the last year or so.

"In connection with price fixing and price meddling of newsprint, the lead came from Washington, and will any good Canadian inform the writer why we should take the cue from there on a matter so vital to our industrial future? No one will blame the Americans for endeavoring to secure newsprint paper at lowest possible price, but that is no reason why our legislators should fall in with their plans.

"Millions are being lost to Canada through the short-sighted policy of price fixing and price meddling and all for the apparent benefit of Canadian newspapers who do not use more than 10 to 15 per cent. of the output of the Canadian mills. But the possible curtailment of the industry is not the only commercial loss. In the future the exports of the pulp and paper products should prove a large factor in paying our war debts and readjusting balance of trade."

Opinion among business men appeared to be divided regarding the advisability of widespread control of prices on staple commodities, when the question of the referendum proposed by the Chamber of Commerce of the United States was brought to their attention by the New York Journal of Commerce. This referendum has been suggested in the United States to ascertain business opinion on the subject of additional legislation to control prices during the war. It is planned to allow forty-five days in which business men may state their views on the question.

In general, business men are in favor of wartime control of staple commodities. There is a diversity of opinion regarding the limit to be placed upon such control, however, and a strong sentiment was expressed recently in many quarters that this control, if carried too far, might defeat its own ends. In reviewing the situation in a general way, E. H. Outerbridge, president of the Chamber of Commerce, of the State of New York, said: "At the present time there is nothing so dangerous to economic and industrial progress as the arbitrary control of the fixing of prices.

Costs of Production.

"The ramifications which enter into the costs of production and distribution are so complicated, and there are so many factors that are beyond any control, that while it may be, and is essential that the government should regulate and control prices of some great staples, the smaller the control list is kept, the better it will be for industry generally.

"Artificial dams put across the natural currents of economic force are most likely to be swept away by economic necessity, or else to check the progress of industry, which must be stimulated and not checked if war is to be successfully waged and financed.

Endangering Industry and Finance.

"There is no more effective way of endangering the industrial and financial ability than to interfere with the natural laws of trade, except in cases of sherest necessity."

The main features of the proposal are as follow: "After going very thoroughly into this subject, the National Chamber Price Control Committee has recommended that authority to control prices should extend to all articles which have importance in basic industries as well as in war, and which enter into the necessaries of everyday life; that authority to control prices should be extended to raw materials and finished products; that authority to control prices should extend to the prices the public pays as well as those paid by the government; that authority to control prices should be administered by a small executive board appointed by the President.

"Also, that an agency working in harmony with the board controlling prices should have authority to distribute available supplies to those purchasers whose needs are most directly related to the public welfare; and that each leading industry and trade should create a representative committee to represent it in conference and to advise with agencies that control prices and distribution.

"The National Chamber has already gone on record through a referendum vote of its members committing it to the principle that there should not be a profit interest in war. This principle has been reiterated several times by the members of the Chamber since the United States declared a state of war.

"The committee points out that for success in business enterprise stable prices are essential. Every seller of products is a purchaser of materials. No business can be satisfactorily conducted if it cannot ascertain its own costs and prices in advance. When there can be no reasonable certainty about the future course of costs for materials and equipments, it is pointed out by the committee in its report, that business faces unknown elements as soon as it endeavors to determine its scale of operation, the goods it will make, and the prices it should ask for its product."

Uncertainty in Business.

Commenting on price fixing in the United States, the National City Bank of New York says: "Price fixing at the hands of the government authorities and the new measures for taxation are still factors of uncertainty in business calculations. The authorities will closely supervise the movement of the wheat crop out of first hands, through the process of manufacture into flour, and through distribution to consumption, determining the profit of every handler. An elaborate organization has been formed for this purpose, mainly composed of business men who give their services without compensation, and the grain and flour dealers have accepted the plan cheerfully, agreeing to co-operate. The scheme is an emergency one, impracticable as a permanent policy, but it will have the gratuitous aid of the most expert business talent in the country, and it will give assurance to the public that there will be no speculative profits in handling wheat or flour. In the present state of public temper this assurance is worth much, even though it does not follow that the handling will be done with any actual saving to the public over the cost by the ordinary methods. The price of grain fluctuates naturally throughout the year, with prospects for crops in all producing countries, and the carrying of grain for future consumption is necessarily a speculation. When crops are good, prices decline and loss ensues to those who have stocks; when crops are poor, prices advance and gains are realized. The fluctuations are downward as often as they are upward.

As to Wheat Prices.

"The price of wheat to July 1st, 1918, has been fixed at $2.20 per bushel at Chicago for No. 1 Northern Spring, or its equivalent.

"The British government was able to sell wheat for a time last spring lower than it was selling in the United States because it had a stock on hand purchased months before at lower prices. But if it did not take a profit on a rising market, it would have no reserve to save itself from loss on a falling market, and in presenting its plan of operations to parliament the government frankly admitted that it proposed to stabilize the price of bread, meeting any deficit that might arise in its operations from treasury funds.

"The price of coal has now been fixed by an order of the President, varying with different fields. The price of steel is under inquiry and may be authoritatively fixed for government use. There is every reason to believe that the authorities will be guided in this policy by what they conceive to be the best interests of the public, and that they will seek to make prices that are fair to producers, but the whole policy is an experiment, and unless it is carried to extremes and the results are very pronounced it will never be known whether the experiment is successful or not. That is to say, it will never be known whether the net final results are more advantageous than the results that would have followed upon natural prices. It is not by any means certain that prices made artificially low are the most desirable. Prices have an important function in bringing supply and demand into equilibrium, adjusting them to each other."

MUTUAL COMPANIES' UNSURPASSED RESULTS

Mutualization of Canadian Companies Would Not Result in Weakening in Security

Editor, *The Monetary Times*.

Sir,—The leading article in your issue of August 17th, concludes as follows:—

"The question [of mutualization] was prominently before the public in Canada about two years ago, and is not unlikely to be so again after the war, when it is to be hoped that Canadian life policyholders will give very careful thought before yielding the tried security and progress of proprietary companies for the comparative obscurity of mutualization. Communistic as is the basic idea of life assurance, only to a very limited extent can its government in the past be called democratic, while there are many and cogent reasons, too long to set out here, that its best development lies in continued individualistic control."

Relative Position of Companies.

The author of this article could surely not have studied the relative position of mutual and stock life companies on this continent, nor could he be familiar with the financial standing, the progress, and above all, the profit-paying record of the many American mutuals, or he would have paused before making such a statement as the above. It is a fact well known to students of life insurance, that most, if not all, of the American mutuals are conducted by officers of great ability, and with unsurpassed results. But if individualistic control, which Mr. Barton favors, is so much superior to the mutual, why is it that this system is not making the progress to which it ought to be entitled? In the United States, for example, of the $24,618,659,968 of insurance in force, no less than $17,644,160,092, or 72 per cent. is carried by mutual companies! Again, the five leading American mutual companies (including the Equitable now being mutualized) write more than one-third of the entire life insurance business in the United States. The smallest of these five has more business in force than all the home and foreign companies in Canada together! The question of the nature of their control cannot alone account for this great preponderance. In a democracy like the United States, capitalistic control of any business organization is viewed with distrust, and probably this may have some influence in favor of mutual companies; but I think it can easily be shown that a greater reason lies in the fact that American mutual life companies are amongst the best managed in the world. The further fact that the companies which have failed were all of the variety favored by your correspondent contributed to no small extent to the results mentioned. The latest of them was the Pittsburgh Life and Trust, which, but for the Metropolitan (a mutual company) coming to its rescue, by reinsuring its contracts, would have made a sorry spectacle in the hands of a receiver. Mr. Barton will hardly deny that the wrecking of that institution would have been impossible under the mutual system.

Little to Fear.

Your contributor has little to fear from the mutualization of Canadian companies on the score of "tried security," for, as a matter of fact, mutual companies have almost a perfect record in respect of solvency, practically all the failures being failures of stock companies.

As to both progress and security, history completely refutes the assumption that the mutualization of Canadian companies would result in a retrogression or a weakening in security—precisely the opposite would probably be the case.

Yours, etc.,

GEO. WEGENAST, Managing Director.

Mutual Life Assurance Co. of Canada, Waterloo, Ont.
September 12th, 1917.

ALLIANCE OF PHILADELPHIA IN CANADA

The Dominion Insurance Department has granted a license for the transaction of fire insurance to the Alliance Insurance Company of Philadelphia. To avoid, as far as possible, confusion with the old Alliance of London, England, it has been made a condition of granting the license that the company shall always state its full name in all its advertising matter, policies, literature, office signs, letter-heads and publications used in this country.

DANGERS OF MUTUAL PRINCIPLE

Position of the Policyholders—Mutualization of American Companies

Editor, *The Monetary Times*.

Sir,—In reply to Mr. Wegenast's letter, a copy of which you have forwarded me, neither the ability of the present officers of American mutual or stock companies is in question, so far as I am aware, but when Mr. Wegenast states: "that most, if not all, of the American mutuals are conducted . . . with unsurpassed results," I cannot agree with him.

At least two well known stock life companies in the United States can more than hold their own with any mutual company on this continent, while, age for age, there is little difference between existing stock and mutual companies, except the great preponderance in numbers of the stock companies.

Of the five leading American mutual companies (Mr. Wegenast includes with them the Equitable now in process of mutualization) three achieved their success as stock companies. The fact that these companies wrote more than one-third of the entire life business of the United States, adds no force to any argument as to the respective merits of stock or mutual companies, for, until quite recently, they showed much the same results as stock companies.

Two-thirds of Business.

In 1915 (the only blue book at hand at the moment) five domestic stock life companies had written in Canada, not one-third, but nearly two-thirds of all life business written by domestic companies at that date, but this again tells us little as to the merits or demerits of stock or mutual companies per se.

Mr. Wegenast states: "The companies which have failed were all of the variety favored by your correspondent." In the Spectator Year Book, 1917, published in New York, may be read a list of some 50 American mutual life companies which have either failed, retired from business or been reinsured by stronger companies. This, too, in spite of the fact that, owing to legal and practical difficulties, very few mutual ordinary life insurance companies have been organized on the American continent in many years.

The history of fraternal life assurance organizations cannot be said to increase confidence in the mutual principle—in which connection it has had probably its widest and longest test.

The debate on the merits of the respective organizations, has proceeded for at least two centuries, and, while it will be readily admitted that there are to-day mutual life companies as strong and as ably managed as the best stock companies (and no better instance of this can be quoted than the company my critic so ably commands), this does not prove the case one way or the other.

Some of the Dangers.

Some of the chief dangers of the mutual principle are the absence of the personal interest of stock holders to inquire into the "why not," if the dividend falls, and therefore spur the management to success. The difficulty of combination amongst policyholders to change an inefficient or undesirable control and the liability to lack of initiative in an administration, which, under existing circumstances, after once elected, is practically self-controlled. The insurance of life differs from all other classes of insurance, in that its contracts are spread over long terms of years, instead of a few months only.

If a fire, a marine, a casualty, or any other class of insurance company, shows signs of weakness, policyholders have only to transfer to a company more suited to their requirements and the incident is at an end, so far as they are concerned. With a life policyholder this is not so. Each year of life increases the premium rate and usually decreases the eligibility as a standard risk. The older the policy the greater the sacrifice if the venture prove a failure.

Control of a Life Office.

The great importance of being able to change the control of a life office and of preparing for events of the distant future, are therefore peculiar to life companies.

If individualistic control in life insurance is not making the headway it should do, in my opinion, it must be accounted for by the drastic legislative enactments affecting life companies, which, in effect, have reduced the powers of administrative officers merely to those of government auditors, and the men who "do" things are therefore seeking a less restricted sphere of action.

To this reason, also, may probably be attributed the recent mutualization of the great American companies.

Yours, etc.,

R. W. BARTON, A.I.A.

St. Louis, Mo., September 18th, 1917.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Aurora, Ont.—A block of $8,000 of waterworks bonds has been sold at par.

Alberta.—Messrs. G. A. Stimson & Company, Toronto, were the highest bidders for $12,700 7 per cent. ten annual instalment rural school bonds of the province of Alberta, securing them at a slight premium.

London, Ont.—Applications from citizens of London will be received at the city treasurer's office for the purchase of city of London debentures, to mature in five years, and to yield 6 per cent. interest, payable half-yearly.

Stratford, Ont.—The council has adopted the plan of five-year debentures for $50,000 for the Canadian patriotic fund and have given the final reading to the by-law for $30,000 for extensions and improvements to the local electric distribution station.

British Columbia.—The following certificate has been issued by the municipal department of the province: Rossland—Debentures Nos. 1 to 60, $30,000 20-years, interest 6 per cent., payable half-yearly, issued under By-law No. 181, school purposes. (By-law certified May 8th, 1917.) Date of certificate, September 4th, 1917.

Sarnia, Ont.—Approval has been given to the request of the local hydro-electric commission for $35,000. This money will be raised at once, it is proposed, by an overdraft from the bank, and will later be covered by the issue of debentures. It is to cover the costs of extensions made necessary by the increase in the business of the local department.

Bridgeburg, Ont.—The following bids for $30,000 5½ per cent. 30-year school debentures were received:—

Ames and Company	$26,800
C. H. Burgess and Company	26,101
McDonald, Bullock and Company	26,050

The first-named firm received the award, as noted in *The Monetary Times* last week.

Montreal, Que.—If consent can be secured from the minister of finance at Ottawa it is likely that a popular loan for $7,000,000 will be submitted to the citizens of Montreal. In 1914 a three years' loan for about $7,000,000 was floated and is now about due. Five per cent. was paid, and it is most unlikely that the amount will be renewed at that figure. The scheme to be submitted to the finance minister is to give the city permission to offer this loan to the Montreal public. It will be explained that such a move is a practical necessity in view of the fact that the banks and bond houses recently refused to tender on a $1,400,000 loan.

Cornwall, Ont.—The finance committee has submitted the following statement for 1917: Estimated general expenditure, $58,054.40; debentures, $29,388.34; total, $87,442.74; estimated revenue, $26,579.58; amount to be provided, $60,863.16. The total assessments and levies are as follows: General purposes assessment, $2,340,891; expenditure, $60,863.16; rate, 26 mills. Public school assessment, $1,835,417; expenditure, $14,683.33; rate, 8 mills. Separate school assessment, $665,274; expenditure, $6,652.74; rate, 10 mills. The report was adopted. D. G. McDonell, collector of taxes, reported that $75,216.66 had been deposited, that $427.96 was unpaid, and $71.26 was uncollectable.

Mr. Duperow has been appointed general passenger agent of the Grand Trunk Pacific Railway, Grand Trunk Pacific Coast Steamship Company and Canadian government railways, with headquarters at Winnipeg. Mr. Duperow's jurisdiction on the Canadian government lines will extend from Winnipeg to Armstrong and Fort William, Ont., and on the Grand Trunk Pacific rail and water lines from Winnipeg to Alaska. He is a well-known and capable railroad man.

WHEAT, 249 MILLION BUSHELS

Government's Preliminary Estimates of Grain Crop Yields —Production of Prairie Provinces

The preliminary estimate of the census and statistics office, Ottawa, of this year's wheat crop in Canada is for a total of 249,164,700 bushels from 14,755,800 acres, an average yield per acre of 16.88 bushels, as compared with 17 bushels in 1916 and 29 bushels in 1915. The estimated yield of wheat in 1916 was 229,313,000 bushels from 13,448,250 acres, so that the estimated total for 1917 represents an increase of 19,851,700 bushels, or 8 per cent. The total yield of oats in 1917 is estimated at 399,843,000 bushels from 12,052,000 acres harvested, as compared with 365,553,000 bushels from 10,178,000 acres harvested in 1916. For the prairie provinces it has been necessary to deduct from the sown areas percentages of 10 in Manitoba and 17 in Saskatchewan and Alberta for crops not ripened into grain. The yield per acre on the harvested area is therefore for all Canada 33.18 bushels, as compared with 35.91 bushels in 1916 and 45.84 bushels in 1915. For rye the estimate is 4,194,950 bushels from 211,870 acres, as compared with 2,967,400 bushels from 148,620 acres in 1916, the yields per acre being nearly 20 bushels in both years. Barley yields 59,318,400 bushels from 2,392,200 acres, as against 42,647,000 bushels from 1,703,700 acres in 1916, the yields per acre being 24.80 and 25 bushels respectively. The total yield of flaxseed is placed at 10,067,500 bushels from 1,242,000 acres, as compared with 7,316,300 bushels from 622,000 harvested acres in 1916, the average yields per acre being 8.11 bushels in 1917 and 11.7 bushels in 1916.

Grain Yields of the Prairie Provinces.

The estimated total production of wheat in the three prairie provinces (Manitoba, Saskatchewan and Alberta) is 225,778,700 bushels from 13,619,370 acres, as compared with 208,846,000 bushels from 12,441,350 acres in 1916. In Manitoba the total yield of wheat for 1917 is 41,642,200 bushels, as compared with 27,943,000 bushels in 1916, in Saskatchewan 130,356,000 bushels, as against 131,765,000 bushels and in Alberta 53,780,500 bushels, against 49,138,000 bushels. Oats yield 224,199,000 bushels in the three prairie provinces, as compared with 269,258,000 bushels in 1916, barley 43,168,400 bushels, against 33,296,000 bushels, rye, 2,498,850 bushels, against 1,636,000 bushels and flaxseed 9,951,500 bushels, as against 7,269,000 bushels.

Condition of Field Crops.

At the end of August the condition of field crops for Canada, expressed in percentage of a standard representing a full crop, was as follows: Spring wheat, 73; oats, 76; barley, 75; rye, 82; peas, 76; beans, 81; buckwheat, 85; mixed grains, 88; flax, 63; corn for husking, 73; potatoes, 77; turnips, 84; mangolds, etc., 83; alfalfa, 87; corn for fodder, 81; sugar beets, 89; pasture, 87; and hay and clover, 95. The Saskatchewan department of agriculture telegraphed September 11, that wheat cutting was completed and that some oats were still too green and were ripening slowly. Threshing had commenced and wheat was turning out a good sample, with the yield higher than was expected. Labor was scarce and prices were high. Frost in some parts would injure late crops. Potatoes were a fair crop. The Alberta department telegraphed September 8 that frosts had done more or less damage to vegetables, but that all grain except late barley and oats had been saved.

CANADIANS AT LIFE INSURANCE CONVENTION

The annual convention of the National Life Underwriters' Association of the United States will be held at New Orleans next week on Wednesday, Thursday and Friday. Canada will be represented there by Mr. J. T. Wilson (Canada Life, Halifax), president of the Life Underwriters' Association of Canada, Mr. John A. Tory (Sun Life, Toronto), past president of the Life Underwriters' Association of Canada, and Mr. J. Castle Graham, secretary of the Life Underwriters' Association of Canada, and editor of The Life Underwriters' News.

Mr. D. I. McLeod, manager of the New York office of Messrs. A. E. Ames and Company, is spending a few days at the head office in Toronto

FOOD CONTROL

One would judge from the loose criticism of the work of the Canadian food controller that his is an easy task. He has an unusually difficult one. While we may expect the regulation of prices of certain commodities in Canada in due course, that is not the principal duty of the food controller. It is, we assume, to regulate consumption in Canada in order that the pressing needs of the allied nations may be satisfied. It is easy to talk glibly of the abolition of the law of supply and demand, but that law is the reason for the appointments of food controllers by the belligerent nations. The country is pretty well agreed that it will prevent profiteering and the undue enhancement of prices. The law of supply and demand, however, has increased the price of steel billets, for example, from $20 per ton before the war to $100 per ton.

The food controller has first to deal with a world-wide food situation, and to see that Canada fits in the most useful place with the greatest advantage to the Allied cause. As pointed out by the controller recently, there is a world famine of wheat and a world shortage of beef and bacon. These are the commodities most required for overseas. It is to ensure supplies of these foods and other non-perishable and easily storable commodities that every housewife is being asked to sign the food pledge. Canada has abundance of other foodstuffs. By reducing domestic consumption of wheat, beef and bacon and by using substitutes, the Dominion can give vital war service. All that is asked at present is that we do not use beef and bacon on two days a week or at more than one meal on any other day, that we reduce consumption of wheat bread by one-quarter, and that we use perishable and non-exportable products to the greatest possible extent as substitutes for the staple foods required for export.

As to cheaper prices of commodities in Canada, they are necessarily affected by the swinging pendulum of supply and demand, a movement which has gone to extremes entirely because of conditions created by the war. An analysis of the domestic situation would probably show that we are paying dearly for many kinds of food because our marketing system is imperfect. A study of the price gap between the food producer and consumer would be a useful work for the food controller's office, and would help to cope successfully with the larger task of helping to maintain the food supplies of the Allied nations overseas.

ANOTHER GERMAN IDEA

A typical example of the foolish stories circulated in the United States to discourage war effort, is the canned goods myth. A statement has recently been widely circulated that the United States government expects to take food supplies from any family. Both the United States Food Administration and the Department of Agriculture have joined in a statement to counteract what seems to be a deliberate propaganda to the effect that the government intends to take from every family all canned goods put up in excess of one hundred quarts.

This is only one of the variations of the rumor, which has been widely circulated. Another statement is that the government has been urging the canning, drying and preserving of fruits and vegetables so that they will be in a convenient form for the government to handle and transport when it takes them away from the people. Further elaboration is that these goods are to be taken away from the United States homes and shipped to England. The circulation of such a story looks suspiciously like the clumsy handiwork of the German trouble-maker. It is difficult to believe that such stories should be credited at all.

MONTREAL'S LOAN

According to Montreal despatches, that city proposes to raise $7,000,000 by means of a popular loan. The civic board of control is visiting Ottawa to consult Sir Thomas White, the finance minister, regarding the project. We have not heard the result of the interview. While it is somewhat unfortunate that it is necessary to raise a popular loan in Montreal, now that active preparations are in hand for the fourth Dominion war loan of, probably, $150,000,000, it is of national importance that the city of Montreal should meet its obligations promptly at maturity. Bond market conditions make a popular loan the only process practicable.

COST OF WHEAT PRODUCTION

How much does a bushel of wheat cost to produce in western Canada? The farmer is very sensitive regarding estimates of this cost. In discussing western Canadian agriculture in its fifth interim report, the Dominions Royal Commission said: "Nothing excites the western farmer so much as any discussion of the cost of production of wheat, and we shall not attempt to enter into the controversy" The report added: "We need only say that the distance of the Canadian wheat centre from tide water is a handicap offsetting their undoubted advantages in fertility of soil and excellence of climate. Increasing attention will need to be paid to the problems of rail and water transportation."

The Canadian Credit Men's Journal recently published an estimate showing the cost at Fort William of various yields as follows: 25 bushels to the acre, 57 18/25 cents; 20 bushels, 65 13/20 cents; 15 bushels, 78 13/15 cents; 10 bushels, $1.05 3/10; 17½ bushels, 71 1/10 cents. Mr. Norman Lambert, western correspondent of the Toronto Globe, states it is fair to say that the average cost of producing a bushel of wheat in the west in 1917 would range between 75 cents and $1.25, according to yield. "Any farmer working for himself would be able to keep well within these amounts," he adds. The Grain Growers' Guide, of Winnipeg, disputes these figures, especially the estimate of 75 cents. "If he has discovered a method of producing wheat at any such figure," says that journal, "his services should be commandeered by the national service board and made available to the western farmers. They can be relied upon to give a respectful hearing to anyone who can tell them how to cut production costs to 75 cents a bushel." The question, therefore, remains, "How much does it cost to produce a bushel of wheat in western Canada "

COLD STORAGE INVESTIGATION

Commission's Accountant and Company's Manager Differ as to Surplus

At the resumed inquiry of the Dominion government commission into the affairs of the William Davies Company and the Matthews Blackwell Company, Toronto, with the object of ascertaining whether excessive profits have been made by the companies, the chief witness was Mr. E. C. Fox, general manager of the William Davies Company. He stated that the widest publicity was courted, as all the transactions of the firm would bear investigation. He stated that Canadian hogs were superior to the United States product, and that they cost more to raise. It was impossible to compare bacon prices in Canada with those obtaining in England. Joints were cut differently in England and in the States to what they were in Canada, and that would make a difference in values. Mr. Fox stated that the overhead charges in England were considerably lower than in Canada, which would account for the difference in prices, but apart from that the English market was much larger owing to the density of population.

Assets, Liabilities and Surplus.

The assets, liabilities and surpluses of the William Davies Company from 1913 to date as shown in a statement of Mr. W. D. Taylor, of the accounting firm of Clarkson, Gordon and Dilworth, were as follow:—

	Assets.	Liabilities.	Surplus.
1913	$ 4,600,478	$2,182,350	$2,012,882
1914	5,754,812	3,010,007	2,[illegible],420
1915	6,20[illegible],533	2,032,151	2,[illegible]01,434
1916	[illegible],582,173	4,820,717	3,02[illegible],065
1917	13,384,048	7,330,357	5,008,161

Mr. Fox objected to these figures, because the surplus column included capital, rest fund, dividends, insurance, profit and loss. He said the real surpluses for the years mentioned were:—

1913	$ 340,905
1914	373,350
1915	908,428
1916	1,757,180
1917	1,23[illegible],600

Company's Controlling Interests.

Mr. Taylor, when on the stand, said the Davies Company owned 40 per cent. of the shares of the Harris Abattoir Company and 60 per cent. of the shares of the Sheathe-Thompson Company, the British agents of the firm in London. In 1914 the Davies Company owned 3,522 shares of the value of $472,250 in the Harris Abattoir The present holding was 2,521 shares, or 40 per cent. of the total.

In 1913 the company held 12,000 shares valued at $58,400 in the Sheathe-Thompson Company, which were increased to 15,[illegible] shares valued at $[illegible] in 1914, which [illegible] a stock dividend of 25 per cent. In 1916 the company held 30,000 shares valued at $146,000 in the London concern, and still continued to do so, and according to the books the value was unchanged.

Mr. Taylor said the dividends paid were as follows: 1913, $112,500, or 7½ per cent.; 1914, $150,000, or [illegible] per cent.; 1915, $225,000, or 15 per cent.; 1916, $500,000, or 33⅓ per cent.; 1917, $250,000, or 12½ per cent.

The Davies Company owned shares to the value of $33,014 in the Artificial Casing Company last year, but which had now been written down to $1. The gross profits of the Davies Company for 1916 were $1,639,482, but the company did not admit it as $100,000 had been paid in bonuses to employees. The profits for 1917 were $1,827,494.71, from which had been deducted $447,591, including depreciation, bonus to employees, $125,000 and $50,000 to pension fund, and $500,000 was transferred to the reserve account. Only $60,000 was transferred to the latter account in 1916.

The list of the company's shareholders, with the number of shares they own, is shown in a statement filed with the commission, dated May 12, 1917, as follows: Edward Adie, 505; John T. Agar, 100; H. W. Bernson, 350; J. W. Cringar, 80; Miss Mary E. Davies, 221; R. H. Davies, 920; Wm. Davies, sen., 408; estate of Wm. Davies, jun., 451; Wm. H. Davies, 147; J. E. Flavelle, 100; J. W. Flavelle, 10,067; J. W. Flavelle and E. Adie, in trust, 268; E. C. Fox, 1,809; E. C. Fox and W. S. Fox, in trust, 210; W. S. Fox, 96; Mrs. E. Fox, 654; Harris Abattoir Company, Limited, 500; Wm. Harris' estate, 500; F. O. Mitchell, 402; H. Moyle, 172; R. D. Moyle, 229; W. D. Moyle, 1; National Trust Company, Limited, 171; J. A. Nelson, 152; A. F. Park, 372; R. B. Park, 60; J. S. Porter, 372; C. G. Vanstone, 133; C. H. Vinnels, 200; R. V. Watt, 200; J. F. White, 150; total, 20,000.

Depreciation Account.

Mr. Fox emphatically denied that large amounts had been written off on depreciation account in order to evade payment of war taxes. The principal directors of the Davies Company were also the principal directors of the Harris Abattoir Company and the Sheathe-Thompson Company, he said. Large amounts of stock were held by them in those concerns, Mr. Fox declared there was no interlocking or collusion and no concerted effort to fix prices. Each of the concerns were operated as an independent unit. Although a director of the Harris Abattoir Company, he had no knowledge of its business, and only attended a directors' meeting once a year. Mr. Fox was followed by Mr. J. W. Cringan, auditor of the company, and his evidence was largely of a technical character regarding the methods of bookkeeping and accounting.

Mr. Fox said that his firm were guaranteed against loss on all products shipped to England for the British government; that as the shipments increased in volume the prices of live hogs increased in Canada, and that when the War Office cancelled the contract of the firm for the supply of bacon, prices immediately dropped and had not advanced since. The accumulation of large stocks to enable the company to fill war orders enabled it to make larger profits. Mr. Fox said he knew prices would advance, but he took no undue advantage of that knowledge. The stocks of bacon were increased to meet the growing demands, and not to secure larger profits.

The insurance carried by the company was discussed. Mr. Fox said a blanket insurance policy for $1,055,000 was carried, of which $505,000 was on buildings and the balance on machinery and contents. Mr. Frank Molson produced the policy, and pointed out that one of the clauses provided that the company must keep the buildings insured to at least 90 per cent. of their present value.

A further adjournment was made on Wednesday until October 4th.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Aylmer, Ont.—September 9—Mr. [illegible] barn and contents destroyed. The barn was partly covered by insurance, there was no insurance on the contents. Cause, spontaneous combustion.

Black River Lake, Winnipeg, Man.—September 12—The Northern Fish Company's plant destroyed. Estimated loss, $50,000.

Brockville, Ont.—September 11—Mr. Elwood Jackson's barn destroyed. Partly covered by insurance. Cause, spark from engine.

Carnduff, Sask.—September—Mr. Mort. Naylor's house destroyed.

Charing Cross, Raleigh Township, Ont.—September 12—Mr. F. Dolson's barn and outbuildings, containing about 2,100 bushels of grain destroyed. Loss will run into thousands. Partly covered by insurance. Cause, spark from traction engine.

Charlottetown, P.E.I.—September 8—Business section of town destroyed, including Robin's livery stable, H. C. Connolly's warehouse, the Doyle estate warehouse, and the Union Hotel. Estimated damage, $25,000; insurance carried, $20,000.

Edmonton, Alta.—September 7—Mr. J. A. Lockerbie's buildings, consisting of two houses and a garage, burned to the ground. Estimated loss, $1,200.

Fredericton, N.B.—September 10—Mr. Jas. Forbes' residence and farm buildings destroyed. Some insurance carried.

Hamilton, Ont.—Barn and 100 tons hay, owned by McKittrick Syndicate, tenanted by John Green. Estimated loss, $2,500.

Hamilton, Ont.—September 11—Hamilton Sand & Gravel Company's buildings considerably damaged. Estimated loss, $4,000. Cause, overheated motor.

Keeler, Sask.—September 5—Keeler livery barn; tenant, Mr. McLean. Estimated loss, $600. No insurance.

Kelliher, Sask.—September 9—Rabinovitch store, Mr. Malone's drug store, Mr. Pollard's harness shop and two dwelling-houses totally destroyed. Estimated loss, $30,000. Insurance carried, $3,000.

Moncton, N.B.—September 10—Mr. George Gibson's dwelling house destroyed. Estimated loss, $2,000.

Oakville, Ont.—September 9—Mr. Arthur Orr's residence destroyed; owner, Miss Lena Cote. Insurance on building, $1,200.

Parry Sound, Ont.—September 11—Parry Sound Lumber Company's saw mill burned to the ground.

Seley's Bay, Ont.—September 11—Mr. D. Warner's cheese factory destroyed. Insurance carried, $1,500.

Ste. Anne de Bellevue, Que.—September 12—The Clarendon Hotel burned to the ground. Estimated loss, $50,000.

Swan River, Man.—September 11—Commercial Hotel, Ford garage, and Mr. R. G. Taylor's real estate office totally destroyed. Estimated loss, $25,000; partly covered by insurance.

Sydney, N.S.—September 9—Bankhead at Dominion No. 1 colliery destroyed.

Tara, Ont.—September 12—Business section of town destroyed. Estimated loss, $18,000.

Trenton, N.S.—Eastern Steel Company machine shop (steel and concrete construction) totally destroyed. Estimated loss, $125,000; almost covered by insurance.

Wallacetown, Ont.—Barns, crops, implements and 5 horses of James Leitch. Loss, $5,000; partly covered by insurance. Supposed cause, incendiarism.

Windsor, Ont.—September 14—Dry goods store of A. G. and W. E. Bellinger. Stock destroyed; estimated damage, $35,000. Adjoining business places also damaged. Cause, blast of natural gas.

Windsor, Ont.—September 14—Mr. A. G. Bellinger's store badly damaged. Cause, flame from torch used to connect gas pipes with meter.

Wolfe Island, Ont.—A Kingston dispatch reports loss of barn, outbuildings and crops of W. Keely. Partly covered by insurance.

Woodstock, Ont.—September 18—Oil house and lumber of Eureka Planter Company. Supposed cause, spark from passing engine.

PERSONAL NOTES

Mr. H. L. [illegible] has been appointed manager of the bond department of Messrs. Æmilius Jarvis and Company, Toronto, to succeed Mr. H. B. Housser, who has severed his connection with the firm,

Mr. George W. Allan, Winnipeg, has been appointed by Premier T. C. Norris as assistant to Mr. C. A. Magrath, the federal fuel controller. He will watch Manitoba and advise the fuel controller. Mr. Allan is a member of the legal firm of Munson, Allan, Laird and Davis, and is one of the best-known barristers of Winnipeg. He has had a long residence in that city.

Mr. Æmilius Jarvis, Toronto, has been awarded the special service decoration for his patriotic services since the outbreak of war. Mr. Jarvis, who is head of the well-known banking and investment firm, placed his Toronto offices at the disposal of the Admiralty at the outbreak of war to facilitate the return of British naval reservists, and followed this up with active participation in the recruiting campaign for men for all branches of the British navy. The only other decoration of this order conferred upon a Canadian was awarded to Sir John Eaton.

Mr. E. L. Pease, managing director of the Royal Bank of Canada, who recently returned from a business trip to the Pacific, says that conditions in the west are prosperous. The wheat crop is much better than was expected in midsummer, present estimates being that the yield will reach 250,000,000 bushels, with a large percentage of high grade. Immigration of a desirable class continues to come from the United States, mostly into the Peace River district. The number this year is expected to exceed 75,000, nearly double that of last year. Chiefly as a result of the revival in the lumber industry, there has been a marked improvement in general business conditions in British Columbia, says Mr. Pease.

Mr. W. H. Biggar, K.C., general counsel, has been appointed vice-president and general counsel in charge of all legal matters pertaining to the Grand Trunk Railway system. Mr. Biggar is well known in legal and general business circles throughout the Dominion, and his appointment to the rank of vice-president will be a popular one. In addition to being vice-president of the Grand Trunk Railway he is also vice-president and director of the Grand Trunk Pacific Railway and other associated companies. He won scholastic and athletic honors at Upper Canada College, was called to the Ontario Bar in 1880, was mayor of Belleville in 1888-9, elected to the Ontario legislature in 1890, and created King's Counsel in 1899. Mr. Biggar was a partner of Mr. John Bell, K.C., of Belleville, the solicitor for the Grand Trunk Railway System, and was appointed general counsel of the road in 1910, after holding the position of general solicitor for some years.

CANADIANS OPPOSE MUTUALIZATION OF EQUITABLE

The Equitable Life Assurance Society has been ordered by Judge Charles M. Hough, in the district court of the United States, N.Y., to show cause why the society should not be restrained from putting into effect the plan of mutualization. The order was issued on the complaint of the Royal Trust Company, Lucy Adaline, Hurd Van Horne, Adaline Van Horne and Richard Benedict Van Horne, all of Quebec, as executors and trustees under the will of Sir William C. Van Horne. The court further restrained the society from calling or holding any meeting of its policyholders for the purpose of voting on the plan. The order is returnable on Thursday [illegible].

The order also restrains, until after the hearing the fulfilment of the transaction arranged between the society and T. Coleman du Pont, who, through the Equitable Office Building Corporation, has already given a mortgage to the society as part of the purchase price for the building owned by the society at 120 Broadway. Henry de Forest Baldwin appeared for the plaintiffs in the case. He made affidavit that he had been informed that the society had planned to issue a notice to policyholders at an expense of $50,000 for the meeting at which the plan was to be voted upon.

The Bank of British North America

INCORPORATED BY ROYAL CHARTER

The Court of Directors hereby give notice that an interim dividend, for the half-year ended 31st May last, of 40 shillings per share, less Income Tax, being at the rate of 8 per cent. per annum, will be paid on the 5th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the legal par of exchange on the 5th day of October next.

No transfer can be made between the 21st inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

JACKSON DODDS,
Secretary.

FIRE LOSSES IN SASKATCHEWAN

Total Last Year was $1,558,191—Insurance Companies' Trust Fund

The following is a record of fire losses in Saskatchewan last year, according to the report of Mr. A. E. Fisher, insurance superintendent and fire commissioner of that province:—

January	$ [illegible]
February	[illegible]
March	105,42[illegible].21
April	[illegible].17
May	77,4[illegible].19
June	41,[illegible].01
July	162,4[illegible].93
August	140,[illegible]
September	94,[illegible].14
October	55,904.73
November	241,182.94
December	152,272.68
	$1,364,329.60

In addition 17 elevators were destroyed by fire involving an adjusted loss of $193,862.06, making a total fire loss for the year of $1,558,191.66.

Inspection of Risks.

The inspector of the fire commissioner's office has been assigned the duty of the inspection of risks and properties which are considered hazardous and especially liable to fire, confining his attention principally to towns, villages and hamlets. Many such inspections have been made at the request of the local municipal authorities and, in other cases, at the request of the insurance companies, the hazardous conditions about which complaints have been made having been reported by the field men of the insurance companies. There has been an appreciable readiness and willingness on the part of our citizens to comply with the inspector's orders and in the places visited by him there has been an improvement from a fire prevention standpoint.

Fifteen lives were lost during the year through fire. Of this number 11 were due to the careless handling of gasoline.

Much credit is due the local assistants to the fire commissioner for their individual efforts in reporting losses and inspecting property, as well as for the kindly co-operation with the officials of the fire commissioner's office in the discharge of their duties.

To the deputy fire commissioner has been assigned the duty of the investigation of the origin and circumstances of fires which are of a suspicious nature, his years of training in this particular work having fitted him for the position. Between June 1, and December 31, 1916, 21 suspicious fires were investigated.

On June 1, 1916, when the recently enacted fire prevention act came into force in Saskatchewan, the insurance branch and the office of the fire commissioner were consolidated, the following officials being in charge of the administration of the act: Fire commissioner, Arthur E. Fisher; deputy fire commissioner, James G. Feltus; inspector, John K. Wilson.

By the provisions of the act an assessment of one-third of 1 per cent. of the premium income for the preceding year was levied on the fire insurance companies, the amount thus obtained being set aside as a special trust fund under government audit and control, and being known as the fire insurance companies trust fund.

The following is a statement of the receipts and expenditures in connection with this special fund as at February 28, 1917: Receipts—Assessment of levy, $7,611.06; less outstanding levy, $[illegible]—$7,[illegible]; bank interest, $6[illegible].

Expenditures—Salaries, $2,087.02; fire report allowances, $200.80; travelling expenses, $[illegible]; office expenses, $489.11; incidentals, $160.28—$4,720.58—$7,678.11.

Balance receipts over expenditures—Merchants Bank, $2,782.53; accounts receivable, $175—$2,957.53; $7,678.11 $7,678.11.

The lieutenant-governor has determined that the rate of assessment for the fiscal year 1917-1918 under section 18 of the fire prevention act of Saskatchewan shall be one-third of 1 per cent.

A statement was recently issued by the office of the superintendent of insurance showing the fire losses in Saskatchewan for the first six months of the current year. The [illegible] $[illegible].047. The figures show that 234 residences were destroyed. Approximately 40 per cent. were burnt through exposure fires, about 3 per cent. through prairie fires, and in [illegible] per cent. of the cases the cause is unknown, but the remainder were due to a very large extent to carelessness in looking after defects in flues, chimneys, stoves and furnaces.

Approximately 80 stores were burnt in the six months prior to July 1. Not only is there a deplorable loss here, but in many of the cases there is a large food loss. Elevator fires also are getting to be a serious problem, involving as they generally do the loss of quantities of grain which the country can ill afford. Steps are now being taken to cope with this question.

The following is a summary of the losses for the first six months of 1917: Value of buildings affected, $1,259,058.15; damage to buildings, $276,038.38; insurance on buildings, $805,929.99; value of contents affected, $838,241.58; damage to contents, $359,008.66; insurance on contents, $427,678.64; livestock destroyed, $5,630.

CHAMP CLARK ON INSURANCE

In discussing the soldiers' and sailors' insurance bill, in the United States House of Representatives, Speaker Champ Clark said:—"I believe in insurance. I carry every kind of life insurance that human ingenuity ever devised—term insurance, endowment insurance, straight insurance, assessment insurance, accident insurance. I have $10,000 accident insurance.

"Insurance keeps the widows and orphans from suffering and keeps the crippled in the various dangerous occupations of life from coming to want, and I believe if there has ever been a bill introduced in this House that all right-thinking Americans without respect to political or religious affiliations will indorse, it is this insurance bill."

PUBLICATIONS RECEIVED

Crops and Business.—Crop reports and general business conditions for 1917. Compiled by the Continental and Commercial National Bank of Chicago.

Insurance.—Third annual report of the Insurance Branch of the Province of Saskatchewan, 1915 and 1916. Department of Insurance, Regina, Sask.

Business.—Monthly bulletin of the National City Bank of New York, September, concerning economic conditions, governmental finance and United States securities.

Politics.—Quarterly review of the politics of the British Empire. "The Round Table," published by Macmillan & Company, Limited, London, England. Price 2/6.

Business and the War.—A pamphlet issued by the Alexander Hamilton Institute, Aston Place, N.Y., containing reference to the situation in Canada as well as the United States.

Neutrality.—"The Neutralization of States" is the title of a bulletin, dated July, by F. W. Baumgartner, issued by the departments of history and of political and economic science, in Queen's University, Kingston.

Public Affairs.—In his annual review, Mr. Castell Hopkins, has again given us a veritable budget of compact, useful, and interesting information on subjects prominent in the public mind. The value of the book is increased by chronological tables, financial statements, and numerous excellent cuts of leading men of the times. The author covers a wide field of public interest. The first part of the book is devoted to a careful study of the war, its causes and effect on the other nations of the world. Bi-lingualism, conscription and the women's suffrage questions are also discussed, and extracts from the speeches of public men quoted. The latter half of the volume deals with parliamentary matters, several chapters being devoted to the discussion of important public issues, such as the nickel question, and prohibition. The book contains valuable information and is well within the scope of the average reader. The volume is dedicated to Mr. G. Frank Beer, Toronto, "in admiration of his earnest efforts for the better organization of Canadian life and the development of a higher plane of Canadian thought," a well deserved tribute. "The Canadian Annual Review of Public Affairs," by J. Castell Hopkins, F.SS., F.R.G.S. Published by the Annual Review Company, Limited, Toronto.

The Molsons Bank

War Finance Dominates The Money Markets

We Should Have at Least 150,000 Subscribers to Our Next War Loan—Credits Here For Great Britain One of The Most Important Matters in Canada To-Day—Finance Minister at Washington

"ONLY by saving money, instead of spending on extravagances, which we do not need at the time, can we establish credits here for Great Britain. Save money and lend it to the government! There never was a time when there was so much money abounding within the province, because of the great war industries and magnificent harvests. We must economize and invest our money in government securities, not only to maintain our industrial activities at high pitch but also to win the war. We can rely upon the courage and patriotism of the Canadian people, if they only know the facts."

This was the advice of Mr. N. W. Rowell, Toronto, in a timely speech at the Canadian National Exhibition in that city. He reminded us that exchange conditions between Great Britain and America are now such that Great Britain's capacity to purchase is measured by the amount of money which can be loaned the Imperial Treasury by Canada for this purpose.

"Great Britain," he continued, "is facing a financial burden unprecedented in history. The advent of the United States into the war has greatly helped us. In Canada the financial situation is becoming increasingly difficult. The amount of foodstuffs Great Britain can purchase in Canada depends upon the amount of money she can find.

"The situation is this: In view of financial burdens Britain has incurred up to date, Britain must purchase on credit if she cannot get the gold. She is giving munitions orders in the United States because she can get them on credit. Are we going to make arrangements to provide necessary credit in Canada? We must provide the government with the necessary money."

The next Canadian war loan, to be offered in November, should be subscribed by at least 150,000 people. Even if that is accomplished, we shall not have equalled the achievement of the United States in getting 4,000,000 of its citizens to subscribe the first block of $2,000,000,000 of the Liberty Loan. To equal that record, the next Canadian war loan should have 400,000 subscribers. The establishment of further credits to enable Great Britain to purchase more Canada foodstuffs and manufactures is one of the most important matters in Canada to-day. We cannot continue the purchase of luxuries and buy also the proper amount of war bonds. Every citizen should hold the greatest possible amount of the fourth Canadian war loan.

MUST DEPEND ON INTERNAL LOANS

London Comment Suggests Less Reliance on Imperial Exchequer

"The situation of Canadian and other Dominions finance is being much discussed in financial and political circles in London," says a "Windermere" dispatch to the Montreal Star. "The organ of the Royal Colonial Institute reiterates its warning against undue reliance upon the Imperial Exchequer, and urges on political grounds, that the Dominions be wise and stand on their own feet in Lombard Street, even though they occasionally pay more and risk their loans not being fully subscribed, rather than rely on loans from the Imperial government. Moreover, as must be inferred from Bonar Law's frank speech on Wednesday the British government must watch extension of its loans to the Allies and the Dominions with studied care.

British Investors and Loan.

"Information supplied by the Agent General of New South Wales confirms the belief in a high degree of the popularity of Dominion issues among the British investing public. The last New South Wales loan of three millions sterling, nearly two-thirds of which was left in the underwriters' hands has, within a month been wholly absorbed by the British investing public. The stock has already reached par, and indeed has stood at a slight premium.

No Loans in London.

"Obviously, however, any large number of successful public issues of the Dominions loans are quite impossible at this period. In London there is, therefore, widespread support for the contention that Canada, and the other Dominions, are most wise in meeting their obligations as far as possible by internal loans. New Zealand is taking this course. The official organ of the Royal Colonial Institute says:—

"Nothing will do more to keep the credit of the Dominions in the money market high than knowledge that they are partly able to finance themselves in the construction of public works and the development of resources."

"[illegible]

United States brings a series of entirely new factors into consideration."

WAR SAVINGS STAMPS TO BE ISSUED

The Canadian government has in preparation the issue of war savings stamps. They will be used in connection with a plan to interest those who are able to save only in small amounts in the purchase of war savings. Special war savings cards will be issued with squares upon which the stamps purchased from time to time may be placed. When all the squares are filled, the card will be taken to the post office and exchanged for a war savings certificate. The stamps will be in the denomination of 25 cents and the cards will contain spaces for 34 of them and one 10 cent postage stamp, (making altogether $8.60) and when filled will be exchanged for a certificate entitling the holder to $10.00 at the end of three years. A similar idea was in practice in the United Kingdom many years ago in peace times, and was used particularly by the working classes and school children. Forms were issued with 12 squares upon which penny stamps were affixed. The completed forms were turned into post offices and the amount credited to post office savings bank account.

WAR LOAN IN NOVEMBER

In the House at Ottawa last week, Mr. G. H. Boivin (Shefford), asked the minister of finance, Sir Thomas White, when he would be in a position to give an official statement to the House concerning the new Canadian war loan, "which, it is rumoured in the press, will be placed on the market in October."

Sir Thomas White replied: "It is not my intention to make a statement to the House as to the forthcoming war loan. The terms and conditions of such a loan can only be determined shortly before the date of issue and it would not be possible for me, no matter how much I might desire to give the House the information, to make a statement at the present time. I may say, however, that the intention is that the loan shall be offered in November. Further than that I am unable to give any information."

ORGANIZATION TO SELL WAR BONDS

How New York District Will Help Sell Liberty Loan Issues

Canada has begun organization for the issue of its fourth war loan. Much greater preparation than on previous occasions is necessary to ensure its success. What is being done in the United States to make successful the next Liberty loan is therefore of considerable interest to us. An organization much larger and more extensive than that which, hastily constructed in the spring of this year, sold more than $1,000,000,000 of the first Liberty loan, has been built up in preparation for the second Liberty loan campaign in the New York Federal Reserve district, as a result of the planning that has been quietly going on for weeks, according to the New York Journal of Commerce.

Three Hundred Committees.

This fact became plain last week when Arthur M. Anderson, of the bond department of J. P. Morgan and Company, who is executive secretary of the distribution committee, announced the selling plans for the coming government bond campaign in that district. More than 300 committees, comprising thousands of workers, are in process of formation for the big task of selling the allotment of Liberty loan bonds that will be apportioned to the district by the United States secretary of the treasury. In addition, the promise of cooperation of thousands of organizations throughout the district has already been obtained.

The committees and the division of work have been developed with the aim of reaching practically every one of the 13,000,000 persons in the district, with an appeal to them to buy Liberty loan bonds, and they have been worked out with the aim of the greatest possible efficiency and co-operation. The plans involve utilization of the most effective selling and publicity forces ever assembled for a single piece of work in this district, the committee says. More extensively and intensively developed, the campaign will enlist the services of bankers, laborers, clerks, merchants and representatives of every class and occupation. The Liberty loan organization in this district seeks to reach every one of these people by newspaper and magazine, by canvasser or salesman, by advertisement or other form of publicity.

Basis of Organization.

The division of work and the assignment of committees differ in many details from the first campaign, although the foundation remains the same. It is pointed out that behind every activity is the authority that emanates from the secretary of the treasury, who, in behalf of the government, offers the bonds to the people. Secretary McAdoo already has announced his intention of dividing the sales task among the Federal Reserve banks. Therefore, it has devolved upon Benjamin Strong, governor of the Federal Reserve Bank of New York, to direct the campaign once more in that district. To co-operate with him Governor Strong has the Liberty loan committee, whose members are bankers of national and international repute.

The Liberty loan committee will have working under it three great committees which will cover respectively the fields of the State banks, the national banks and the trust companies. The distribution committee, to which is entrusted the detailed work of the campaign, will have an executive committee. To the distribution committee is given the double task of organizing every possible kind of publicity for the bonds, and of selling them. This Federal Reserve district, taking in New York State, and parts of Connecticut and New Jersey, has been divided into eight parts, and a sub-committee in each of these divisions will direct every phase of the work in that district. The eight district committees will look after the activities of other minor committees, of which there probably will be one in every community of five hundred or more. Just how many of these local committees there will be has not been determined as yet, although the ground has been prepared for them most thoroughly.

WHAT NAME FOR WAR LOAN?

Great Britain's last big war issue was the Victory loan and that of the United States the Liberty loan. What shall we name Canada's next war loan?

DOMINION WAR LOANS

Suggested Conscription of Investments at Four Per Cent.

Editor, *The Monetary Times.*

Sir,—A conscription act has recently been passed by the Dominion government because it was found to be the only means of maintaining, up to full strength, our army at the front. In order to finance the army and war expenditure another large Dominion loan must be floated, and to entice those who have not gone to the front to loan their money to the country a high rate of interest must be offered. It is satirical to appeal to the "patriotism" of the people to invest in a war loan which will yield nearly 6 per cent., and it is hypocracy on the part of the people to say that they are investing their money in such a loan for "patriotic" purposes.

If it is admitted by the government that it cannot get the money without offering a high rate of interest, then the time has also come for passing a conscription of investments act. It is suggested that the next Dominion loan be issued at par to yield 5 per cent. and if the total amount of the loan is not subscribed within one month the deficit should be levied upon persons and businesses according to ability to pay and having regard to any sum voluntarily subscribed. For the amount so levied the government would only pay interest at a rate of 4 per cent.

Over Seven per Cent.

Recently, the Dominion government has found it necessary to pay over 7 per cent. for the loan of $100,000,000 from financiers in New York. This issue was offered to the public to yield an interest rate of over 6 per cent., and the comparative failure of the issue is indicated by the fact that the securities have fallen in the market to from 1¾ per cent. to 1⅜ per cent. discount, now yielding the investor 6¾ per cent.

The 1921 Dominion of Canada loan is now being offered to yield over 6¼ per cent. and the new loan to be successful, according to the present mercenary view of the "patriotic" investor, will require to be made at a rate to yield at least 6 per cent.

As a result of the high interest yield of Dominion war loans the financing of municipal expenditure is becoming almost impossible and cities which a short while ago could sell their securities to yield approximately 5 per cent., are now selling at a rate to yield between 6 and 7 per cent.

By making it compulsory to invest in a Dominion loan at 4 per cent., the condition of the market will be considerably improved and the cost of financing to the Dominion, provincial and municipal governments will be very much reduced and the ultimate burden of taxation considerably lessened.

Should Invest Sinking Funds.

Every municipality throughout the Dominion is raising by way of taxation each year, a considerable sum representing sinking fund levies and as a rule these amounts are invested to the best advantage. Why not compel all local authorities to invest these sinking funds in Dominion loans at a rate not exceeding 5 per cent.?

It may be argued that if such a scheme were adopted the investor if required to make a forced sale would be compelled to sell his securities at a large discount, but this could largely, if not entirely, be prevented by prohibiting any one in Canada from investing in securities of another country. The Dominion loan would then be the controlling factor in fixing the interest yield of other Canadian securities.

The country is passing through an era of prosperity which it has not experienced for some years and although the cost of living has gone up, at these times of universal sacrifice, no true citizen can complain at being compelled to loan his money to the country at a reasonable rate of interest.

Yours, etc.,

C. J. YORATH.

Commissioner's Office, Saskatoon, September 17th, 1917.

[While no official announcement has been made, it is most unlikely that the next war loan will yield 6 per cent. to investors; the yield will probably be about 5½ per cent.—Editor, *The Monetary Times.*]

LARGEST MEASURE IN WORLD'S HISTORY

The war credits bill of the United States authorizing new bonds and certificates aggregating $11,538,000,000, and the largest measure of its kind in the world's history, was passed by the Senate on Saturday last, without a roll call or dissenting vote. It had already passed the United States House.

SIR THOMAS WHITE AT WASHINGTON

Sir Thomas White is visiting for a few days at Washington, by special invitation, to meet Lord Reading, who is there on a special financial mission for Great Britain.

The general question of war finance will undoubtedly be discussed, and particularly the establishment of credits in Canada for British purchases here, domestic war loans and possible financial assistance to Canada by the United States.

New questions which have arisen since the departure of Mr. A. J. Balfour have made it desirable for Great Britain to have in the United States a confidential agent, familiar with international financial affairs, a field in which Lord Reading, as chairman of the Anglo-French commission, which floated a $500,000,000 loan here in 1915, is familiar. He will act in a confidential advisory capacity with reference to financial subjects which could be handled better by such an agent here than by correspondence. He is accompanied by Col. E. D. Swinton, an assistant secretary to the British war cabinet, and Mr. J. M. Keynes, of the British treasury.

WAR LOAN PREPARATIONS WELL IN HAND

Preparations for the fourth domestic war loan are well in hand. The various bond houses have been working on different organization features for the marketing of the issue. If Sir Thomas White, finance minister, is back from Washington, a conference will be held at Ottawa with the bond house representatives. Later, committees of the Canadian Bankers' Association will confer with the bond men. The methods to be used to sell this loan will probably differ materially from those adopted previously. A strong effort will be made to reach the masses with the forthcoming issue. The advertising arrangements are being made and a national campaign will shortly be instituted.

The loan may be for $100,000,000 or $150,000,000, or the amount may be unlimited. The terms are not yet decided, but it seems likely that the issue will be one of 5, 10 and 20-year bonds, that would enable those who desired to convert previous issues, to do so.

The general selling plan for the loan will probably be settled at Ottawa this week.

LOANS TO CATTLE RAISERS

The following letter was sent by the Federal Reserve Board of the United States to all Federal Reserve banks on August 22nd:—

The board has received a letter from the food administrator, Mr. Hoover, stating that he is just beginning a campaign to secure a larger amount of cattle feeding in this country, and that his investigation shows that the interest charge represents between 35 and 40 per cent. of the total costs of this industry. The legal rate of interest in many of the cattle-raising states is 8 per cent. or more, and the food administrator suggests that if banks would make loans to the cattle people at a rate of interest not exceeding 7 per cent. (which he thinks they can afford to do in view of the 5 per cent. rediscount rate on six months' paper based on live stock, available at most of the Federal Reserve banks), a stimulus would be given to the cattle-raising industry, which all will agree is greatly needed at this time. The board appreciates, of course, the limitations upon its powers in this respect, and does not wish to put any pressure upon the banks to induce them to charge less than legal rates, but it is informing you of the suggestion made by Mr. Hoover in order that, should you deem it expedient, you may point out to your member banks this opportunity of rendering very effective help in the present food crisis.

MORE SIX-INCH SHELLS

There is to be a revival of shell manufacture in Canada, a largely increased output of the six-inch size, which has hitherto been manufactured in limited quantities, now being in hand. For the six-inch size inquiries for 3,000,000 shells were made in the United States last week by the British government, and new orders for shells of this size are now being placed in Canada.

UNITED STATES AND BRITISH TAXATION

As the War Revenue bill passed the United States Senate, the returns from the taxes on incomes, war profits and entertainments are estimated to bring in nearly $2,000,000,000, or about $200,000,000 more than Great Britain received for the fiscal year ending March 31st last. The comparative figures are as follow:—

	United States.	Great Britain.
On war profits ...	$1,060,000,000	$ 708,075,000
On incomes	842,200,000	1,028,290,000
On entertainments.	18,000,000	15,005,000
Total	$1,920,200,000	$1,751,470,000

FIVE BORDER TOWNS AT WORK

"The business situation here is remarkably good in every line. Our industries, of which we have 165 in our five points, are working full swing and exhibiting the most persistent tendency toward continual expansion."

This statement was made by Mr. F. Maclure Sclanders, F.R.G.S., commissioner of the Border Chamber of Commerce, comprising Ford, Walkerville, Windsor, Sandwich and Ojibway. Mr. Sclanders was formerly industrial commissioner at Saskatoon.

"The outlook could not be brighter," he continued. "The American is swiftly awakening to our strategic geographical location. He grasps the fact that with one set of highly paid executive brains he can operate a Canadian plant here and a United States one just over the river in Detroit. Further, he earnestly desires to establish in Canada, realizing the amazing unfolding of this Dominion and her extraordinary purchasing potentialities. Nevertheless, our United States friends hesitate to locate too far from their United States headquarters. They would rather establish on the Canadian threshold than beyond it; and, it seems to me, that we are the Canadian threshold! In the words of Mr. Timmerman, Canadian Pacific Railway industrial agent, who has just left me, in the whole Dominion there is no better, more logical strategic location for industries than is enjoyed by these five border points.

"As to my impressions of the east, I have already reached the conclusion that progressiveness and public spirit are not solely the prerogatives of the prairie provinces. West of the Great Lakes there is a strange delusion to that effect. I can show here, in each and all of these five points, a degree of development within the past three years which certainly duplicates—if not dwarfs—the most pronounced ever seen by me in the west. During the last three years over 500 buildings have gone up in Windsor alone.

"Almost daily, since my advent here, at least one interested United States manufacturer has called upon me. It is encouraging; but, after all, it is natural when one considers our geographical and other advantages. To my mind, the wonder is that they were not generally recognized long, long ago. But, prior to the past few years, we seemed to have been content to watch Detroit grow to the fourth largest city in the United States. We gazed admiringly at her stately skyscrapers; we heard afar the deep murmur of her commerce and industry; and, in our wonder at her almost weirdly swift expansion, it apparently escaped us that the very factors responsible for it all were duplicated in almost the fullest measure on our own Canadian side of the river. Now, however, we still gaze over at Detroit; but there is a great change. To-day our admiration mingles the will and the ambition to emulate. Detroit has merely made the pace for this Brotherhood of Beautiful Border Cities."

The Border Chamber of Commerce, representing the five progressive towns named, has 785 members, all leading citizens.

An Obsolete Compliment

It used to be considered a compliment to appoint a friend as executor. But the estate often suffered so much from the executor's absence, illness or death that the compliment proved a very expensive one.

Nowadays it is realized better that with most men personal affairs take up all their time outside business. In appointing a personal executor the appointor must expect estates matters to be left to what little spare time the executor has.

Many people, dissatisfied with this prospect, have appointed this Company as their executor. It has greater financial responsibility than most individuals and is not liable to the other disabilities to which they are subject. Booklets on request.

BANKS AND LIBERTY LOAN

National Banks' Part in Financing First Liberty Loan —Some Interesting Statistics

From official sources at Washington *The Monetary Times* has obtained the following figures as to the important part which was played by the national banks of the United States in placing the $2,000,000,000 Liberty loan of June, 1917.

Of the $3,035,000,000 of subscriptions which were sent in at the time of the placing of the $2,000,000,000 Liberty loan, $1,700,000,000, or 56 per cent., were made by or through the national banks of the country.

Of the $2,000,000,000 of bonds allotted to subscribers, $1,088,000,000, or 54 per cent., were made to those whose subscriptions were made through national banks.

Subscriptions of Country Banks.

A noteworthy feature of the subscriptions was that $582,000,000 of these subscriptions were sent in through the country banks, exceeding by two millions the total subscriptions sent in through national banks in the central reserve cities and by $43,000,000 the subscriptions received through all national banks in other reserve cities.

Of the $1,088,000,000 of bonds allotted on subscriptions made through national banks, $465,000,000 were allotted to subscribers whose subscriptions were received through the country banks to subscribers whose subscriptions were received through the national banks in central reserve cities of New York, Chicago and St. Louis, the allotment was only $270,000,000; to subscribers who sent their subscriptions through national banks in other reserve cities the amount allotted was $353,000,000.

Amount Taken by National Banks.

The total amount of Liberty bonds subscribed for by the national banks of the country for investment for their own account was $338,000,000. Of this amount the country banks subscribed for $149,000,000, the national banks in central reserve cities $100,000,000, and the national banks in other reserve cities $89,000,000.

The proportion of subscriptions made for themselves and others by all the national banks of the United States to their total resources was 10.59 per cent. The proportion of subscriptions sent in for themselves and others by the central reserve city banks to their total resources was 13 per cent.; other reserve cities 11.75 per cent., and country banks 8.2 per cent.

The proportion of bonds allotted to all national banks on their own account to their total resources was 1⅛ per cent.

The proportion of Liberty bonds allotted to the national banks in central reserve cities on their own account was seven-tenths of 1 per cent. of total resources; in other reserve cities nine-tenths of 1 per cent.; and for country banks the percentage of bonds allotted for their own account to their total resources was 1½ per cent.

The proportion of Liberty bonds still held by the national banks of the country on their own account on July 23, 1917, about one month after the allotments were made, was very small.

The amount thus held by all national banks was only $88,000,000, of which $64,000,000 were held by the country banks, $7,000,000 by the national banks in central reserve cities, and $17,000,000 by the national banks in other reserve cities.

Subscriptions of 25 States.

The 25 states (including the district of Columbia) whose national banks sent in for themselves and customers the largest amount of subscriptions to the Liberty loan were as follows: New York, $565,300,000; Pennsylvania, $194,000,000; Massachusetts, $136,500,000; Ohio, $104,700,000; Illinois, $97,400,000; California, $72,800,000; New Jersey, $45,000,000; Texas, $35,400,000; Missouri, $35,200,000; Connecticut, $30,600,000; Minnesota, $29,700,000; Michigan, $27,400,000; Indiana, $26,600,000; Wisconsin, $26,300,000; Iowa, $20,300,000; Maryland, $18,600,000; Oklahoma, $[illegible]. Nebraska, $15,000,000; Colorado, $14,200,000; Kentucky, $13,700,000; Washington, $13,700,000; District of Columbia, $10,900,000; Kansas, $10,300,000; Tennessee, $10,200,000; West Virginia, $9,200,000.

The 25 states (including the district of Columbia) in which subscribers to the Liberty bonds received the largest allotments of bonds were in the order named: New York, $273,800,000; Pennsylvania, $[illegible]; Massachusetts, [illegible] California, $52,500,000; New Jersey, $34,200,000; Missouri, $25,100,000; Connecticut, $25,000,000; Texas, $24,300,000; Minnesota, $20,100,000; Wisconsin, $19,300,000; Indiana, $17,900,000; Michigan, $15,800,000; Virginia, $14,200,000; Iowa, $13,900,000; Maryland, $13,900,000; Kentucky, $11,600,000; Oklahoma, $10,500,000; Washington, $10,400,000; Colorado, $9,700,000; Nebraska, $8,900,000; New Hampshire, $8,100,000; District of Columbia, $8,000,000; Tennessee, $7,600,000.

SECURITIES WITH SASKATCHEWAN GOVERNMENT

The following are the securities deposited by the insurance companies with the Saskatchewan government, the information being in order, name of company, amount of accepted value and nature of securities:—

British Crown Assurance Corporation, Limited, $20,000. Debentures of Battleford and Saskatoon; Dominion of Canada war loan bonds; Union Trust Company investment receipts.

Brotherhood of American Yeomen, $7,500. Herbert school district debenture; mortgage.

Canada National Insurance Company, Limited, $10,370. Debentures of Teo Lake, Black Strap, Silver Hills, Springwater, Schoenthal, Griffin, Fraser, Dryboro, Grant and Rouse school districts; Dominion of Canada war loan bonds; Adams rural telephone debenture.

Canada Security Assurance Company, $20,000. Dominion of Canada war loan bonds, $10,000; deposit receipt, $10,000.

Canadian Indemnity Company, $22,000. Town of Yorkton debentures.

Canadian Millers Mutual Fire Insurance Company, $5,000. Wilkie school district debentures.

Century Insurance Company, $20,000. Bonds of the province of Saskatchewan; bonds of the city of Regina.

Columbia Insurance Company, $10,000. City of Moose Jaw debentures.

Continental Fire Insurance Company, $20,000. Debentures of Mayne school district; town of Rainy River, Outlook, Kansas and Bulyea; rural telephone company bonds.

Excess Insurance Company, $20,000. Dominion of Canada war loan bonds.

Great North Insurance Company, $20,000. Deposit receipts, Merchants Bank.

Middle West Insurance Company, $10,000. Dominion of Canada war loan bonds.

Miniota Farmers Mutual Fire Insurance Company, $10,100. Mortgages.

Modern Woodmen of America, $10,000. Edmonton school district debentures.

Retail Lumbermen's Mutual Fire Insurance Company, $15,000. Western Trust Company investment receipt.

Retail Merchants' Mutual Fire Insurance Company, $5,000. Deposit receipt, Imperial Bank of Canada.

Saskatchewan Guarantee and Fidelity Company, Limited, $17,150. Debentures of Marquis, Watrous, Springside, Blairmore, Southey and Radisson; Fargo Rural Telephone Company debenture and Dominion of Canada war loan bonds.

Wawanesa Mutual Insurance Company, $10,000. Occidental Trust Company debentures.

Western Canada Accident and Guarantee Insurance Company, $20,000. Town of Battleford debentures; Canada West Securities Corporation stock.

Western Empire Life Assurance Company, $27,716. Debentures of Lancer, Dorgan, Paradise Valley, Whitehall and Vanceview school districts; mortgages.

Western Mutual Life Association, $21,000. Debentures of cities of Regina and Saskatoon.

Northwestern Life Assurance Company, $20,473. Rural municipality of St. Paul debentures; rural municipality of Fort Garry debentures; Victor Rural Telephone Company debentures; Beaver Rural Telephone Company debentures; Logberg Rural Telephone Company debentures; mortgage.

NOT A NEW JASPER BRANCH

In the August edition of the Bank Directory of Canada it was reported that a branch of the Bank of Nova Scotia had been opened at Jasper, Ont., during the month of July. This was an error, the branch having been taken over by the Bank of Nova Scotia at the time of the amalgamation with the Metropolitan Bank.

WAR SAVINGS CERTIFICATES FOR BOYS AND GIRLS

Buy one of the government war savings certificates. They yield over 5 per cent. interest and have the whole Dominion of Canada as security. One can obtain the return of the money at any time or can leave it invested for three years.

A new certificate that is just the thing to teach the boy or girl proper investment habits has just been issued. It costs $8.60 and pays back $10 at the end of three years. For $21.50 one can get a certificate redeemable at $25 in three years, or for $86 one can get one worth $100 in three years.

The certificates can be had from any bank, money order post office, or direct from the Department of Finance, Ottawa.

GOOD WORK OF THE BOY SCOUTS

The Boy Scouts of Canada are eagerly endeavoring every day to do their "good turn." A Boy Scout promises on his honor—1. To do his duty to God and the King. 2. To help others at all times. 3. To obey the Scout Law. A Scout is trustworthy, loyal, useful, friendly, courteous, kindly, obedient, cheerful, thrifty and clean.

Volunteers for active service are wanted. Hundreds of boys who are anxious to avail themselves of the activities of this greatest of boys organizations are unable to do so because an adequate number of the right kind of men to lead them is not available. Over 500 of our officers and senior Scouts are serving in the various battalions of the Canadian Expeditionary Force. Some of them have made the supreme sacrifice, many of them have been reported in the casualties, and the others are rendering a good account of themselves in the strenuous warfare of the trenches.

The boy of to-day is well cared for in the home; in the school he is under the influence of the best; while he is at church and Sunday School, as the man on the street says, "if he learns no good he learns no ill"; but what of those hours that he spends outside the home, school and church. That narrow undefinable territory between right and wrong is the boy's battle-ground; the activities provided in the Boy Scouts programme open avenues for the occupation of his spare hours, but the boy wants a man to lead him in those activities that appeal to him, and that enable him to become kindly and courteous, trustworthy and thrifty, and pure in thought, word and deed.

QUESTION AS TO BUSINESS PROFITS WAR TAX

Editor, *The Monetary Times*:

Sir,—"There is some controversy among business men as to the manner in which the percentage of profits should be computed. The government gets its percentage on net profits, and the contention is that profits are not established as net until the tax has been deducted. Some propose that from the net earnings one is first entitled to deduct the tax in order to arrive at the net amount to be divided between the company and the government.

"To reach this figure it would be necessary to divide the profits between 7 and 15 per cent. by 125 and divide the quotient, 75 per cent. to the company and 25 per cent. to the government. The profits between 15 and 20 per cent. would be divided by 150, of which each would get half, and the profits in excess of 20 per cent. would be divided by 175, of which quotient the government would receive 75 per cent. and the company 25 per cent. Do you happen to know whether this is the method which will be adopted by the government?"

Yours, etc.,
Simington Company, Limited,
Per R. A. Jackson,
Secretary.

Calgary, September 10th, 1917.

[The tax paid may be charged as an expense incurred during the accounting period following that which was taxable, e.g., the tax paid in respect to the profits of the 1915 accounting period is considered as an expense incurred in the 1916 accounting period. The tax payable in respect to the profits of the 1917 accounting period cannot be charged against the profits of that period.—Editor, *The Monetary Times*.]

"If there are no courts that men can trust, there can be no credits or contracts. If these are not, neither capital nor wages come."

"A clear and wise economic picture of Mexico, beyond any others that I have read."
Dr. Talcott Williams of Columbia University.

The Mexican Problem

By

C. W. BARRON

Author of "THE AUDACIOUS WAR."

A business solution, based on first-hand investigation, Mr. Barron's vivid and illuminating portrayal of Mexican unrest, casts a shaft of light over the whole field of international affairs and throws into sharp relief the fundamental causes of all wars.

CANADA'S NICKEL PRODUCTION

Sudbury District Furnishes Large Output of Nickel—Statistics for 1916

The production of nickel in 1916 has, as usual, been derived from the ores of the Sudbury district supplemented by the recovery of a small quantity of metallic nickel, nickel oxide and other nickel salts as by-products in the treatment of ores from the silver-cobalt-nickel ores of the Cobalt district. The total production was 82,958,564 pounds which at 35 cents per pound would have a total value of $29,035,497. The total production in 1915 was 68,308,657 pounds showing an increase in 1916 of 14,649,907 pounds, or 21.5 per cent.

The nickel-copper ore, derived from 9 separate mines in the Sudbury district supplemented by a small tonnage of similar ores from the Alexo mine in Timiskaming, is reduced in smelters and converters at Copper Cliff and Coniston to a Bessemer matte containing from 77 to 82 per cent. of the combined metals and shipped in that form to Great Britain and the United States for refining, the product of the Canadian Copper Company going to New Jersey and that of the Mond Nickel Company to Wales. A refinery is now under construction at Port Colborne, Ont., by the International Nickel Company, in which a portion of the matte produced by the Canadian Copper Company will be refined.

Big Corporation Develops Industry.

Although not shipping during the year the British-America Nickel Corporation, Ltd., has been actively engaged in the development of its nickel properties in the Sudbury district and in the erection of a smelter. The total production of matte in 1916 was 80,010 tons, containing 44,859,321 pounds of copper and 82,596,862 pounds of nickel. The tonnage of ore smelted (part being previously roasted) was 1,521,689 tons. The production in 1915 was 67,703 tons of matte containing 39,216,165 pounds of copper and 68,077,823 pounds of nickel.

Nickel was recovered as a by-product in smelters at Deloro, Thorold and Welland, from the silver-cobalt-nickel ores of the Cobalt district, the total nickel contents of nickel oxide, nickel sulphate and metallic nickel produced being 361,701 pounds. The products recovered included 79,360 pounds of metallic nickel; 323,418 pounds of nickel oxide and 232,450 pounds of nickel sulphate having a total reported value of $132,896. The recovery from these ores in 1914 was 231,634 pounds of nickel.

The exports of nickel in ore matte or other form are reported by the customs department as 80,441,700 pounds valued at $8,622,179, or an average of 10.77 cents per pound, of which about 83 per cent. were exported to the United States.

Imports 72,611,492 lbs. into United States.

The imports of nickel into the United States during 1916 which included small quantities from other sources as well as from Canada are recorded as 72,611,492 pounds contained in ore, matte, or other form valued at $9,889,122, or an average of 13 cents per pound. The exports of nickel and nickel oxide, etc., were 33,404,011 pounds valued at $12,952,493, or an average of 38 cents per pound, of which about 50 per cent. were consigned to Great Britain and 40 per cent. to France, Italy and Russia in Europe. The United Kingdom, it will be observed, has continued to receive through United States refineries a much larger quantity of nickel than is exported directly from Canada to Great Britain. The published records do not show the details "To other countries" for 1916, but a large portion of the 2,906,665 pounds thus exported went to Russia in Asia with smaller quantites to Norway, Sweden and Spain, etc. The value of the exports in 1916 ranged from 37 cents to 45 cents per pound. The average values of the exports in 1915 to different countries ranged from 35 cents to 43 cents per pound, the total average being 38 cents per pound. The total average value in 1914 was 34 cents with a range of from [illegible] to 38 cents per pound.

Production of Refined Nickel.

The price of refined nickel in New York according to quotations published by the Engineering and Mining Journal remained throughout the year at from 45 to 50 cents per pound for ordinary forms with 5 cents more per pound asked for electrolytic nickel. The following table shows the production of nickel by smelters in the Sudbury district, the exports from Canada and United States records of imports and exports, for the past three years:—

Production of nickel in Canada:

	1914 Tons.*	1915 Tons.*	1916 Tons.*
Ore mined	[illegible]	[illegible]	[illegible]
Ore smelted	[illegible]	[illegible]	1,521,689
Bessemer matte produced	[illegible]	[illegible]	[illegible]
Copper content of matte ..	14,448	19,608	22,450
Nickel content of matte	[illegible]	[illegible]	41,298
Spot value of matte	$7,189,031	$10,352,344	....

Exports of nickel from Canada:

	1914 Lbs.	1915 Lbs.	1916 Lbs.
Nickel contained in matte, etc.—			
Exported to Great Britain	10,291,979	13,748,000	11,136,900
Exported to United States	36,015,642	52,662,400	69,304,800
Exported to other countries	220,706	....	....
	46,538,327	66,410,400	80,441,700

Imports of nickel into United States:

	1914	1915	1916
Gross tons of ore & matte	29,564	45,798	59,741

Totals	27,595,152	26,418,550	33,404,011

*In tons of 2,000 lbs.

FIRE INSURANCE INVESTIGATION

Deputy Fire Marshal Lewis, of Toronto, presided at an inquiry at Hamilton to ascertain the cause of the destruction by fire on August 18th, 1917, of a stable and two horses on the premises of 271 Bay Street North. The stable and one of the horses belonged to Meola Giglia, the other horse being owned by Joseph Seime, 260 Bay Street North, who said he paid $130 for his horse and had it insured for $200. The barn was insured for $400. Fire Chief TenEyck, after a careful inquiry, decided that the fire should be investigated, basing his opinion on the fact that the barn and horses were insured for amounts considerably in excess of real values.

OUR FISHING INDUSTRY

The run of sockeyes on the Fraser River, British Columbia, this year, has been a disappointment, and it is expected that the pack will be very little, if at all, in excess of that of 1916, and, of course, below that of the corresponding year in the quadrennial cycle. It is impossible at this date to give any figures, but as an indication of the scarcity of this class of fish it may be stated that the canners have been paying 55 cents per sockeye, the highest price on record.

Reports of the catch of codfish in Newfoundland waters continue favorable, and the price paid for the fish so far delivered is from $9 to $10 per quintal. There is as yet no relief in sight with regard to shipping facilities, but the government has the matter in hand, and will, it is hoped, succeed in making suitable arrangements. Exporters are disinclined to buy at present prices, and it is impossible to forecast what the situation will be during the next two months.

At St. John, N.B., cod and hake are scarce and prices high. A heavy run of sardines late in the season recently resulted in reducing the price per hogshead from $40 to $20 in one day.—Canadian Bank of Commerce monthly commercial letter.

INSURANCE IN SASKATCHEWAN

Companies Numbering 170 Are Operating There—Hail Insurance Record

Insurance companies, numbering 170, operated in Saskatchewan last year, according to the report for 1916 of Mr. Arthur E. Fisher, superintendent of insurance and fire commissioner for that province. These companies were classified as follow: Fire, 82; life, 32; hail, 5; plate glass, 4; accident, 26; mutual insurance, 8; fraternal societies, 11; livestock, 1; automobile, 1; companies with additional powers under supplementary licenses, 24. Of this number 139 are licensees of the Dominion and 31 provincial licensees. In addition 17 underwriters' agencies were operating in Saskatchewan.

As to Hail Insurance.

The season 1916 proved disastrous for the many companies underwriting this class of business. The total loss sustained by the companies amounted to $1,693,291.25, and when to this figure is added the losses of the municipal hail commission it will be seen that 1916 was an exceptional year in the hail insurance business. A comparative statement of the premiums received and losses paid since 1909, the first year in which hail insurance was written in Saskatchewan, is interesting:—

	Premiums.	Losses.
1909	$ 281,035.72	$ 180,213.38
1910	547,095.35	237,537.84
1911	787,253.40	532,840.13
1912	1,051,125.31	757,030.85
1913	783,194.42	485,305.79
1914	747,838.68	173,443.44
1915	1,363,001.66	438,019.37
1916	1,431,202.47	1,713,326.01

Recent amendments to the Saskatchewan Insurance Act have standardized all hail contracts and have also done much to remedy certain conditions in the hail insurance business which were not in the interests of the policyholders. The law now requires that agents must mail applications to the company not later than the day following the taking of such application. The company must accept or decline the application on the date of receipt, notifying the applicant by telegram if the risk is declined.

Protection of Policyholders.

"The business of hail insurance," says Mr. Fisher, in his report, "is of such a precarious nature that particular attention must be paid to the matter of full protection for the policyholders. The increased value of the prospective crop and the experience of 1916 will undoubtedly result in an increased volume of business during 1917. For adequate protection either the volume of business underwritten must be limited or else the deposits of the companies for the security of their policyholders must be increased. The former would be detrimental to the company's interests owing to the possibility of the liability of the underwriting company not being sufficiently spread to preclude the possibility of heavy sectional losses. The latter is the preferable plan and was the method adopted by the insurance branch last year as far as provincial licensees are concerned.

Order in Council No. 681-17 provides the following regulations under Section 202 of the insurance act: Regulations relating to the underwriting of hail insurance by provincial licensees duing the year 1917:—

(1) Each company shall file with the superintendent of insurance within two days after the end of each calendar week a report of the hail insurance business underwritten by it during the preceding week.

(2) Fifty per cent. of the net premiums—no deduction for reinsurance in unlicensed companies being allowed—received by such company during the week preceding the date of the report shall be deposited before the mailing of such report, in a chartered bank agreed upon by the company and the superintendent of insurance to the credit of the said superintendent in trust, subject to release as hereinafter provided on the order or cheque of the said superintendent, such deposit being certified by the manager of the bank where deposit is made.

(3) The deposit referred to in section 2 hereof shall consist of securities permitted by section 23 of the Saskatchewan Insurance Act.

(4) When it is shown to the satisfaction of the superintendent of insurance that the company requires a portion of the deposit under section 2 for the payment of its loss claims, the superintendent of insurance may release to the company such portion of the deposit as he may consider necessary for such purpose.

(5) When the superintendent is satisfied that all the company's liability under its hail insurance contracts has been discharged, the deposit or balance thereof shall be released to the company.

(6) Any company underwriting hail insurance only, which has made a deposit under the provisions of the Saskatchewan Insurance Act, shall not be called upon for the special deposit under section 2 of these regulations until its net premium income has exceeded twice the amount of such deposit.

(7) A company may, before the issuance of any contracts for the year, make a deposit of acceptable securities in lieu of the weekly deposit under Section 2 hereof, but shall comply with section 2 when its net premium exceeds twice the amount of the deposit.

(8) It shall be optional on the part of licensees of the Dominion to comply with these regulations.

Failing to Comply.

(9) A company failing to comply with these regulations shall be subject to the penalties stipulated in section 203 of the Saskatchewan Insurance Act.

Regulations to be complied with by all companies underwriting hail insurance: Each company underwriting hail insurance shall within three days after the end of each calendar week, make a report of the losses which have been adjusted and reported during the preceding week, the form for such report to be supplied by the superintendent of insurance.

During 1916, 2,763 certificates of authority were issued to agents, of which 1,746 covered all classes of insurance and 1,017 classes other than fire.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September 15th, 1917:—

Nipissing Mine, 561,885; Coniagas Mine, 55,220; Kerr Lake, 120,387; McKinley Darragh Savage, 169,798; Dominion Reduction Company, 255,000; Cobalt Silver Queen, 50,000; Aladdin Cobalt Company, 63,000; Aladdin Mine, 65,700; Right-of-Way, 103,363; O'Brien Mine, 64,060. Total, 1,405,050 pounds, or 702.52 tons.

The total shipments since January 1st, 1917, now amount to 22,345,757 pounds, or 11,172 tons.

SHIPBUILDING ENTERPRISE AT THREE RIVERS

The Three Rivers Shipyards Company, Limited, has been organized by Mr. T. M. Kirkwood, Toronto. The company has obtained various concessions from the city of Three Rivers, where the new concern will operate. As previously noted in *The Monetary Times*, the company's bonds have been underwritten by Credit Canadien, Incorporé Limitée, of Montreal, and guaranteed by the city of Three Rivers, under a by-law passed on August 24th last.

Considerable credit is due to Mr. W. J. Shea, head of the publicity office of Three Rivers, for bringing this industry to that city.

The promoter has a contract for two sea-going vessels, length between perpendiculars, 250 feet; beam, 43 feet 6 inches; draught, 23 feet; deadweight, 2,700 tons. It is estimated that for the complete building of these the workmanship of 300 shipwrights and carpenters is required for a period of five months for each unit and that the cost of each vessel when completed and ready to go to sea will be approximately $450,000.

The shipyard is situated at the western side of the Three Rivers harbor, and covers an area of some five acres. Dredging is to be undertaken in order to reach the deep water in a basin of 350 feet long, 150 feet wide, with a mean depth of cut of 7 feet. The plant will consist of one two-story machine and pattern shop, 75 feet by 175 feet, concrete foundation and wooden frame, two 250-foot slips on pile foundations, the bottom being clay and sand. Mr. W. T. Donnelly, New York City, is the consulting engineer and vice-president for the company.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Cottons.—Mr. A. O. Dawson, vice-president of the Canadian Cottons, Limited, states, that the company has closed an order for 2,000,000 yards of khaki shelter tent duck. The order is said to be valued at about $700,000.

Nipissing Mines Company.—The company has declared an extra dividend of five per cent., in addition to the regular quarterly dividend of five per cent., payable October 20th, to holders of record on September 29th. The financial statement as of September 8th, shows cash in banks, $1,848,692, value of bullion and ore in transit, $239,566, and value of ore on hand and in process and bullion ready for shipment, $810,899.

International Nickel Company.—Governors of the New York Stock Exchange, at a special meeting, placed on the trading list, $38,112,900 common, and $5,802,400 preferred stock of the company. Last week the voting trust which had formerly held the nickel shares, and had its certificates listed on the exchange, expired. A meeting was hastily called to list the stock, otherwise International Nickel would technically have been off the board when the market opened.

Western Power Company of Canada.—The company reports operating revenue for July, 1917, of $35,777.37, an increase of 7.3 per cent. over the same month last year, and net earnings of $25,242.95, a decrease of 1 per per cent. compared with July, 1916. The net earnings for the year 1917 to date are $186,903, compared with $157,201 in 1916. For the twelve months ended July, 1917, the net earnings are $328,491.12, an increase of 30.5 per cent. over the twelve months ended July, 1916.

Ogilvie Flour Mills, Limited.—The company has declared a bonus of 15 per cent. on the common stock, along with the regular dividend of 2½ per cent. for the final quarter of the year ending August 31st last. A year ago, with the corresponding quarterly declaration, a bonus of four per cent. was declared. That supplemented the regular dividend of 8 per cent., giving shareholders 12 per cent. for the year. For the past year, with the regular dividend of 10 per cent., shareholders will receive 25 per cent. in all.

British America Nickel Company.—The company's Christiania office has received a telegram from the representative of the British government on the board of directors in Canada to the effect that an important discovery has been made in the Murray Mine, the chief mine of the company. It is said (states the London Times), that a layer, 80 feet thick, of rich nickel copper ore has been discovered, by which the present output of 11 million tons will be increased by 5 millions annually. The deposits are owned jointly by the Christiansand Nickel Refinery Works and the British government. The new deposits will be worked according to methods used in Norway.

Lake Superior Corporation.—In connection with the circular letter received by shareholders of the company, asking for proxies for use at the annual meeting, the president has issued the following statement:—

"The president of the Lake Superior Corporation has had brought before his notice a circular apparently issued to the corporation's shareholders by one signing himself W. B. Nolan. The president earnestly advises the shareholders to take no notice of this circular, as it is apparently from a source known to be antagonistic to the best interest of the shareholders. The president further states that he is in a position to assure the shareholders that there will be no contest at the annual meeting."

Steel Company of Canada.—The directors met on Monday and placed the common stock on a regular six per cent. basis. The stock went on a four per cent. basis in 1916, having paid nothing before that. On May 1st of this year the directors added a bonus of one-half of one per cent. to the regular [illegible] This week's declaration abolishes the bonus and makes the stock a six per cent. security.

The common stock will be ex-dividend October 13th, and the dividend will be payable November 1st. At the same time the directors declared the usual dividend of one and three-quarters per cent. on the preferred, which dividend is payable November 1st to shareholders of record October 13th.

Kerr Lake Mining Company.—Production of silver in the fiscal year ended August 31st, amounted to 2,586,532 ounces. This is the best year in the history of the company, and compares with a total production of 2,333,793 ounces in the previous year, an increase of 152,739 ounces. In the year ended August, 1915, production totalled 2,036,962 ounces, and in the fiscal year 1913-1914 production amounted to 1,828,424 ounces.

During August the average price of silver was in the neighborhood of 86 cents. The output for this month of 200,855 ounces is, therefore, valued at $172,735. Production for the year based on monthly reports and the average price of silver, amounts to $1,942,317. Allowing cost at 30 cents per ounce, operating expenses would approximate $775,959, leaving indicated net profits for the year of $1,166,358, or close to 40 per cent. on the outstanding capitalization.

Toronto Terminal Company.—The annual meeting of the directors and shareholders of the company was held last week in Montreal, for the re-election of directors and officers for the ensuing year, Mr. Howard G. Kelley, president of the company, occupied the chair, and the following directors were elected:—Sir George Bury, I. G. Ogden and E. W. Beatty, K.C., representing the Canadian Pacific Railway Company; Howard G. Kelley, J. E. Dalrymple and U. E. Gillen representing the Grand Trunk Railway Company.

The following officers were also elected:—Howard G. Kelley, president; Sir George Bury, vice-president; Henry Phillips, secretary; H. E. Suckling, treasurer; W. H. Ardley, auditor, and J. W. Leonard, general manager.

Good progress was reported on the construction of the new Union Station building, which has proceeded as rapidly as supplies of construction material will permit.

Granby Consolidated Mining and Smelting and Power Company.—Comparisons of the production of the company for the last 13 months follow:—

	Anyox	Grand Forks.	Total.
August	2,918,958	917,812	3,836,770
July	[illegible]	279,520	[illegible]

August	[illegible]	[illegible]	[illegible]

Cockshutt Plow Company.—The company's report for the year ended June 30th, shows that profits of the year, after providing for depreciation and making provision for bad and doubtful debts, aggregate $405,710, which, although slightly less than in the previous period, are considered by the directors as satisfactory in view of the conditions. The directors did not consider it wise to declare a dividend during the year just closed, but believe the payment of a small dividend on the preferred stock of the company will be justified in the near future. In their last annual report the directors drew the attention of the shareholders to the abnormal conditions which had for some time prevailed, particularly in connection with the price of material and the increase in operating expenses. It was then hoped that these conditions

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

would at least not become more onerous, but such did not prove to be the case, as still higher costs have prevailed throughout the year and manufacturing operations have been more difficult than during any previous period of the company's existence. The business of the company has, however, been well maintained in all its branches. The export department has shown a gratifying increase and, had the company been able to obtain the necessary material and labor, it could have secured a much larger output. The liabilities of the company have again decreased by $1,341,557. The reduction would have been about $600,000 more were it not for the increase of inventories consequent upon the higher cost of material, etc.

Calgary Power Company.—The company reports some contraction in earnings for the year 1916 as compared with 1915, but the figures are maintained well above the level of 1914. Gross at $266,982 was down $22,631 for the year, net from operation at $217,058, down $20,100, and profit after fixed charges at $65,209, down $14,983. But the 1916 profit is still nearly two and a half times that of 1914, when the company reported a surplus after charges of only $24,727.

Of the net profit of $65,209 for the year the company applied $60,000 to writing off discount on bonds and to depreciation, leaving the net surplus carried forward at the end of the year $107,735, against $102,526 the previous year. The surplus revenue wiped out most of the company's floating indebtedness. Bank loans, which were $90,500 a year before, are reduced to $25,000, and the only other item of liability except to bond and stock holders is $12,924 in accounts payable. In cash, stores and accounts receivable the company has current assets of $41,622.

Mr. R. B. Bennett's report as president goes in some detail into the question of the company's contract with the city of Calgary, which terminates December, 1918. The city has the option of renewing the contract for an additional term of five years, notice of renewal to be given on or before December 1st of the current year. The minimum amount payable to the company under the contract is $130,000 a year, being for 5,000 horse power at $26 per horse power. For the next 5,000 horse power the city has contracted to pay on a scale down from $25 to $21 per horse power. For all over 10,000 the city would pay at the rate of $20.

While the question of a further contract remains in abeyance, the city's demands for power are increasing. Another 1,000 horse power will probably be taken, which at $25 per horse power will provide an annual revenue of $25,000 in addition to the minimum of $130,000. In view of this expected increase the directors state that additional expenditures for transformers and other equipment will be necessary at an early date.

Spanish River Pulp and Paper Mills, Limited.—The report of the company for the year ended June 30th, 1917, gives the following summary of income account: Total net revenue for the year, $2,117,734; less reserved for depreciation, $269,821; less—interest on funded debts and other loans, $718,409; total net surplus for the year, $1,129,504; balance of the consolidated profit and loss accounts as at 30th June, 1916, $699,621; out of which there has been appropriated towards the extinction of the deficiency account of sum of $835,399; leaving to be carried forward $993,726.

The directors decided to present a consolidated balance sheet showing the united position of both companies, believing such a statement to be more comprehensive and satisfactory than the separate balance sheets hitherto issued.

The increase shown in net revenue amounting to approximately $775,000 is due to higher prices obtained for news print paper during the past twelve months and to the increased output of the plants, combined with greater efficiency in the operation of all departments of the business. This increased efficiency is the result of the improvements and betterments of the plants. It has been deemed advisable to increase the depreciation charges for the year in consequence of the present high cost of construction in the recently made improvements as well as the increased wear and tear upon all equipment when continuously operated at maximum capacity over a considerable period.

The property account shows that there has been expended during the year $1,500,000 on enlargements, improvements and betterments, increasing the capacity of the combined mills approximately 70 tons per day, and the additions to be completed during the present summer and fall will still further increase production as well as improve the efficiency of the plants. The difficulties of obtaining pulpwood and all other materials, including repair parts, etc., necessitate the carrying of unusually heavy stocks, which have increased over June 30th, 1916, by $1,180,000, entailing further bank advances.

WESTERN CROP ESTIMATE

The following is an estimate of the Northwestern Grain Dealers' Association, Winnipeg, regarding the crops of Manitoba, Saskatchewan and Alberta on September 1st, 1917

	Acres.	Bushels per acre.	Bushels.
Wheat	[illegible]	[illegible]	205,920,000
Oats	7,470,000	29.1	217,377,000
Barley	1,400,000	23.2	32,480,000
Flax	690,000	8	5,520,000

The wheat acreage is based on the figures used by the Dominion government in their bulletin issued in July, 1917.

The following is the final summary of the 1916 western crop:

	Cars.	
Wheat inspected	294	in August, 1916.
" "	167,018	in year.
	167,312	
Less new wheat	312	inspected in August, 1917.

	Bushels.	Bushels.
167,000 at 1,150 bushels per car		192,050,000
Less allowance for dual inspection...	3,000,000	
Less 1915 crop in farmers' hands....	8,250,000	
		11,250,000
		180,800,000
Wheat in store at country points....	2,540,000	
Less wheat in store last year	1,600,000	
		940,000
Wheat in transit, not inspected		1,150,000
" marketed in Winnipeg, not inspected....		149,000
" in farmers' hands to market		1,250,000
" used for seed, feed and country mills....		30,000,000
Total wheat crop		214,289,000

Inspected, 1916.	Bushels.	1915, bushels.
Oats	[illegible]	115,120,000
Barley	11,227,000	13,246,200
Flax	[illegible]	5,852,000

CANADIANS AT MINNEAPOLIS CONVENTION

There was a large Canadian representation at the recent convention of the Farm Mortgage Bankers' Association of America, held at Minneapolis. This delegation included Mr. Hume Cronyn, Huron and Erie Mortgage Corporation, London, Ont.; Mr. E. M. Saunders, treasurer Canada Life Assurance Company, Toronto; Mr. A. L. Crossin, of Oldfield, Kirby and Gardiner, Winnipeg; Mr. John Appleton, secretary of the Dominion Mortgage Investment Association, Toronto. Mr. Crossin spoke informally on "Moratoria and War Relief Acts," and Mr. Saunders spoke of the experience of their company with these acts. The information they gave the members of the American association was particularly valuable at this time, when the various states are considering similar legislation, and a committee of the association was appointed to frame a standard act in consultation with representatives of the Dominion Mortgage Investment Association.

The convention was altogether the best that the association has had. There were 300 registrations, and much interesting business was disposed of. The next convention will be held in Kansas City.

The use of hydro-aeroplanes for detection of forest fires is being considered by certain government and private interests in Canada.

(Incorporated under the Dominion Companies' Act by letters patent to manufacture and sell all kinds of Rubber Goods).

Efficient Management Important

The promoters of this enterprise have secured in the person of W. M. Mackintosh, as Managing Director, a practical rubber man, who has grown up with the trade, having been actively connected with the rubber business for 37 years. This fact is very important from the point of view of the investor as it insures efficient management and a keen sense of the requirements so far as the manufacturing end is concerned. Mr. Mackintosh is related to the original inventor of the waterproof garment, Charles Mackintosh. Mackintosh and rubber have been synonymous for three generations.

Are the Physical Conditions and Opportunities Surrounding the New Enterprise Reasonable?

In other words, does the present and possible demand for rubber goods warrant the formation of such a Company? The demand for rubber goods was never as great as it is to-day. In very many directions rubber is displacing leather.

The development of the Automobile trade alone is responsible for a demand for tires which existing Canadian plants simply cannot supply. About $1,600,000 worth of tires and tubes were imported into Canada from the U. S. A. in 1916. To-day none of the fine grades of waterproof clothing are produced in Canada, all being imported from England, amounting to $1,600,000 per year. By means of processes which the Mackintosh Rubber Company control it will be possible to produce work equal to the English cloth and with a very fine margin of profit.

New Uses for Rubber are Being Discovered Every Day

Galbulose a Great Asset of New Company

What is Galbulose? It is a natural product imported from Africa. The supply is practically unlimited. It possesses all the elasticity, resiliency and tensile strength of rubber and will vulcanize under all conditions like rubber. It possesses insulating qualities superior to para rubber, will thoroughly amalgamate with rubber in any proportion, and is in every way superior to rubber in that it is not subject to decomposition on exposing to light and air to nearly the same extent that rubber is. **The Mackintosh Rubber Company has contracted for the purchase of the sole rights to use and sell Galbulose in the Dominion of Canada.**

Galbulose requires no washing, and as para loses considerably in washing it will always cost 25 per cent. less to the Company than washed para. This gives the new Company a great initial advantage.

The Company's Buildings are Now Ready

$100,000 of the Capital Stock which is now being offered for subscription is to provide for the necessary Machinery and working Capital.

Price is $100 a share

Prospectus will be mailed upon application to the Company, 95 King Street East, Toronto

TENDERS FOR THE PURCHASE OF 40-YEAR DEBENTURES AT 6 Per Cent.

Sealed tenders, addressed to the undersigned for the purchase of about $200,000.00 debentures will be received up to 5 p.m. on Tuesday, October 2nd, 1917.

Said tenders will be considered by the Board at their meeting same day at 8 p.m. in their office, 56 Westminster Avenue, Montreal West, P.Q.

The lowest or any tender not necessarily accepted.

G. F. PATERSON,
Secretary-Treasurer.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

25 West Broadway New York, N.Y.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word, Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over **$5,000.00**, and he has built up a future income of over **$3,000.00** a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

GENERAL AGENCY WANTED.—By established firm of Insurance Brokers, of Montreal, writing Fire and Accident business. Apply A. B & Co., care of *Monetary Times*, Toronto.

LOOKING FORWARD

"Remembering the splendid number you sent out last year, I am looking forward with keen anticipation to your 1918 Annual." Letter from R. E. Armstrong, secretary, board of trade, St. John, N.B.

ANOTHER QUESTION AS TO PROFITS TAX

In reply to a question concerning common stock issued as a bonus in connection with the sale by corporations of preferred stock, it is assumed that such common stock would not be covered by an asset and, therefore, for the purposes of the business profits war tax act, the fair value of such stock would be nil.

ALGOMA STEEL CORPORATION

The Algoma Steel Corporation is erecting another blast furnace, which, when completed, will have a capacity of 400 tons of pig iron per day. The furnace will be finished by the new year.

The company's work is at present confined purely to the turning out of 4.5 and 6 in. shells, and it is understood that contracts on hand will keep the plants busily occupied for some months ahead.

The company recently completed its latest open-hearth furnace at the Soo plant, with a capacity of 75 tons per hearth, or about 200 tons per day, and makes the tenth open-hearth furnace which the company has in operation, as well as the duplex furnace.

SASKATCHEWAN OFFERING BONDS LOCALLY

The Saskatchewan government is offering to the people of Saskatchewan the Saskatchewan greater production loan. The object of this loan is to raise money within the province to provide the necessary funds for the carrying out of the scheme of rural credits under the farm loans act, the purpose being to supply money at cost to farmers requiring it for the development of their farms and the bringing about of increased agriculture and live stock production in Saskatchewan. The farm loans act came into operation a few months ago, and applications for loans from farmers for productive purposes have reached $2,500,000.

Ten-year Saskatchewan greater production loan bonds will be issued in denominations of $20, $100, $500 and $1,000, bearing interest at 5 per cent. per annum, payable half-yearly. The bonds will be redeemable at par at any time upon the giving of three months' notice to the provincial treasurer.

Users of printed matter are assured of a high standard of workmanship when they place their orders with the MONETARY TIMES PRESS

QUOTATIONS WANTED ON EBONITE OR VULCANITE

Mr. J. E. Ray, Canadian trade commissioner, Birmingham, writes to the department of trade, Ottawa, as follows:—

"Birmingham manufacturers state that ebonite (or vulcanite) is very scarce, and that if Canada is in a position to offer supplies, they would like to receive quotations on rods and sheets."

CANADA AT NEW YORK'S CHEMICAL EXHIBITION

Canada will be represented at the National Exposition of Chemical Industries to be held in New York next week. The department of interior will be represented by officials of its water powers branch and its natural resources branch and the department of mines by its mines branch. An attractive information bureau will be installed for these Canadian government departments. The Dominion government is to be complimented upon its action in this matter. There is much United States capital to be attracted to this country for the development of our raw materials in connection with the metallurgical and chemical industries.

Three floors of the Grand Central Palace, New York, will be devoted to the show, which will be the largest of its kind ever held at any place in the world. The number of exhibitors will be between 300 and 400. Chemists from all over the continent will be in attendance, a programme having been arranged in connection with the exposition that is intended to provide matter of interest for the various branches of the industry. Dyestuffs will again be an important feature of the exposition. Exhibits of chemical machinery, porcelain and glassware will occupy much space and are expected to attract much attention. Motion pictures illustrating various phases of the industry and processes of manufacture will be shown daily.

BANK CLEARINGS

The following are the bank clearings for the weeks of September 14th, 1916, and September 15th, 1917, respectively, with changes:—

The Toronto bank clearings for the current week are $55,104,461, compared with $46,794,170 for the same week in 1916 and $32,265,267 in 1915.

Mr. Mackenzie Williams, of Messrs. A. E. Ames and Company, Toronto, has just returned from a month's trip to New York, Boston, Philadelphia and Atlantic City.

UNDERWRITERS ON SHINGLE ROOF HAZARD

Increased Rate With Credits for Non-combustible Roofs —What Our Conservation Commission Says

A field for investigation of importance to the industries affected lies in an attempt to discover a satisfactory treatment of wood shingles that will render them measurably fire-retardent, says the Canadian Commission of Conservation in its latest bulletin. No process can ever make wood fireproof, but no class of material will resist fire under all conditions. Innumerable experiments have been made to demonstrate the efficacy of various compounds, but conclusions of practical value have never been reached. While tests have proved certain treatments to be suitable for one particular condition, such as retarding fire, the substances used have failed to embody equally valuable qualities of permanence and weather resistance. A good shingle fire-retardent must also have endurance, insolubility, attractiveness and cheapness.

With the discovery of a satisfactory method of treatment, there does not appear to be any sufficient reason why shingles should not become a most desirable roof covering for dwellings and other buildings outside congested areas. They have adaptability and beauty superior to most roofings, and entail the least first cost. Since the temporary nature of many of our buildings, the migratory tendencies of our people and the rapid development of our cities and towns are factors making the use of wooden construction advisable, to attempt to legislate the shingle or the frame dwelling out of existence is both uneconomical and impracticable in Canada at the present time.

Penalty in Rate.

Discussing the shingle roof hazard and the best methods for its mitigation, President Charles L. Jackman, of the Capital Fire Insurance Company, of Concord, N.H., said to the New York Journal of Commerce: "The only way I know of to reduce the shingle roof hazard is to raise the rates on all dwelling business and then allow a credit where slate or other non-combustible roofing material is used. In my opinion, the rate on frame dwellings here in New England is altogether too low."

Vice-President A. H. Baker, of the Michigan Commercial Insurance Company, of Lansing, Mich., said: "My opinion is that the shingle roof evil can only be removed gradually and by reason of penalty in rate. In some places a credit of 5 cents or thereabouts is given in the rate for fireproof roof—in this case the basis rate contemplates shingle roof. Inasmuch as dwellings are steadily becoming an unprofitable class, my solution would be to remove all credits for non-combustible roofs and make the present basis rates conditioned upon non-combustible roofs and then add a penalty of 10 cents flat to the rate for shingle roof. I do not claim that this method is scientific and it probably would have to be modified to meet special conditions, but I believe that a penalty of not less than 10 cents (not 10 per cent.) in the annual rate is about the only method that I can think of that would be effective."

William Douglas, of Jacksonville, Fla., general agent of the Connecticut Fire Insurance Company, reviewing the shingle roof hazard, as it exists in the south, said: "The recent conflagrations caused by shingle roofs were scarcely [illegible] to emphasize the necessity for the elimination of the pest, for as far as the [illegible] the $11,000,000 scourge at Jacksonville very positively recorded the potency for evil of roofs covered with shingled wooden material, and it has always surprised me that the underwriting interests have paused in their consideration of the subject. However, as evinced by the recent rate penalty imposed by the companies in the south-eastern field, it is apparent that at least the stirring and stretching stage of the awakening has come—and, accordingly, the future is brimming with promise. I believe that when this first rate increase shall have been assimilated there should be periodical promulgation of further homeopathic increases that the subject may be held and kept in continuous view of property owners. The companies have been carrying the burden all these years, and when it is even partially shifted the insaring public will realize the determination of underwriters to eliminate the shingle roof—for that, after all, is the only sound solution of the hazard.

Largely Educational.

"Increased rates are not going to cure the evil, but, I take it, are intended to be largely of educational value just at this juncture. Therefore, in the delivery of the lesson there should be great care shown in the form and method of its presentation. Wooden roofs are bad everywhere, but it is doubtless true that in the semi-tropical sections of our country the action of the extremely hot sun, followed by moist nocturnal influences, imposes conditions that make for greater inflammability, not only of roof coverings, but of all exposed wooden material entering into the construction of buildings.

"Shingle roofs must go; if underwriters are firm in the present movement, they will go, and in their passing will merit and receive the eventual approval of the vast legions of premium payers throughout the country."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first and second weeks of September:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
September 7	$2,[illegible]	$2,[illegible]	— $ [illegible]
September 14	2,728,000	2,691,000	— 37,000

Grand Trunk Railway.

	1916.	1917.	Inc. or dec.
September 7	$1,276,[illegible]	$1,317,[illegible]	+ $ 41,510
September 14	1,352,629	1,399,745	+ 47,116

Canadian Northern Railway.

	1916.	1917.	Inc. or dec.
September 7	$ [illegible]	$ 715,800	+ $ 6,700
September 14	[illegible]	751,[illegible]	+ 83,[illegible]

The Canadian Northern Railway's gross earnings from July 1st to September 14th, were $8,717,200 compared with $8,896,000 for the corresponding period last year, a decrease of $178,800.

	$19,797.45	$11,837.00

Mr. W. P. Hinton, who has been appointed vice-president and general manager of the Grand Trunk Pacific Railway, is an Ottawa man. At the age of fifteen he entered the service of the Canada Atlantic Railway in 1887, and after six years' service became general freight and passenger agent of the line. In 1905, when the Grand Trunk Railway took over the Canada Atlantic Railway, Mr. Hinton was appointed general passenger agent at Ottawa. Two years later to the Grand Trunk Railway headquarters at Montreal as assistant general agent of the system. When the Grand Trunk Pacific lines from Winnipeg were opened he was appointed chief passenger agent in that city. Recently Mr. Hinton has been assistant traffic manager of the combined Grand Trunk Railway and Grand Trunk Pacific systems at Montreal. Mr. Hinton's son, Lieut. Arthur Hinton, is serving in the Royal Flying Corps.

1918 - Monetary Times Annual - 1918

EVERY year the MONETARY TIMES ANNUAL is endorsed by the principal business men and financiers of Canada as an indispensable work of reference. Its value in this regard has been demonstrated over and over again until to-day it is to be found in all well-conducted financial, insurance and commercial offices in the country.

Year by year there is an ever-increasing demand for the Annual.

In order to adequately care for the 1918 Annual in this respect we have plans which insure a wider and more valuable distribution of the issue than of any previously sent out.

In spite of these larger plans and the fact that the cost of production of such an issue has gone up considerably **the advertising rates will remain the same as in previous years.**

There are some very desirable positions available. In order to secure one of these it is advisable that you **write us as early as possible.**

Read what a few of Canada's leading men of affairs have to say concerning the Monetary Times Annual.

"It had been my intention to quote some of the trade and financial statistics, but having recently had opportunity of studying, to some extent, the splendid review published by *The Monetary Times* on January 5th, I shall follow the precedent of some former presidents and omit these statistical statements."—ARTHUR HEWITT, ESQ., in presidential address before the members of the Toronto Board of Trade, January, 1917.

"There is a great deal of valuable information in your Annual which we find very useful to refer to from time to time."—MESSRS. OSLER, HAMMOND & NANTON, Winnipeg.

"I would like to bear testimony to the excellence of your Annual Number. It is a splendid contribution to Canadian war-time finance—a magnificent example of that new spirit which has taken possession of Canada since the beginning of the war."—R. E. ARMSTRONG, Secretary, St. John Board of Trade.

"A great many thanks for the most interesting and valuable Finance and Trade Review which *The Monetary Times* have just published. I shall keep it by me for reference during the coming year as I know it will prove of great value on many occasions."—H. V. F. JONES, Assistant General Manager, Canadian Bank of Commerce.

"Allow me to congratulate you on the 1917 Annual, which seems to me by far the most interesting and complete that you have ever issued. You are establishing a record that is enviable."—KINGMAN NOTT ROBINS, Treasurer, Associated Investors, Rochester, N.Y.

"The volume is a veritable vade mecum of financial and commercial information to which one will refer every now and again with the utmost confidence and satisfaction."—S. R. PARSONS, President, Canadian Manufacturers' Association.

"Without doubt the issue is the best Canadian financial publication that I have ever had an opportunity of looking over. There is a surprisingly large amount of information in this volume, much more so than is usually in a financial journal."—W. A. MACKENZIE, Toronto.

"I read the office copy which came in a few days ago, and wish to congratulate you upon the enormously valuable review of finance, development, etc., in Canada during 1916." —JAMES WHITE, Assistant to Chairman, Commission of Conservation, Ottawa.

"I received copy of *The Monetary Times Annual* for 1917, and I must congratulate you very much on this splendid issue. It certainly contains a world of information to any Canadian, and in this regard I have placed it in my private library for further reference. This is the most interesting issue that I have ever seen turned out by any financial newspaper, and I can assure you I appreciate it very much."—E. F. HUTCHINGS, Great West Saddlery Company, Winnipeg, Man.

"I have been greatly interested in your Annual Number this year, which I believe to be quite the best you have ever issued. Certainly there has been more meat for myself in this number than in any previous one."—A. L. CROSSIN, President, Western Canada Mortgage Association, Winnipeg.

AND FIRE INSURANCE

Ideal War-time Policies
Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

You Look for Security

Whether with the intention of taking out insurance or associating yourself with some Company, you look for security.

The latest figures emphasize the unexcelled financial position of this Company.

Business in Force over......	$59,600,000
Assets over................	16,400,000
Net Surplus................	2,600,000

These are reasons why the Company is known as

"SOLID AS THE CONTINENT"

North American Life Assurance Co.
HEAD OFFICE - TORONTO, ONT.

DO YOU

ever think of the plight of your family if ever you were killed or carried off by disease? Now your wages provide them with the comforts they deserve. Your wife is free from worry. Your children are obtaining a good education. Your love shields and protects them, and they are happy. But what would happen if the "unexpected" should overtake you?

Deprived of your support and protection, your wife would be compelled to take up the burden as a breadwinner. And, lacking your skill and training, she would be forced to take whatever work she could get — poorly paid drudgery that would break her health while bringing in hardly enough to avert starvation. Your children might be forced to leave school to enter the ranks of the workers.

Make adequate provision for your family by means of Life Insurance, the only sure way to provide for the future.

The Great-West Life issues policies to suit every need and circumstance. Do not put it off any longer, but write now for information—a post card will do—stating age to

For All We Have and Are—

To-night — under the wide canopy of Heaven, trenched in a line from the North Sea to Switzerland, pacing decks of ships, peering into darkness, that holds perils such as God's omnipotence never formed, millions of men are braving death for us.

Not one among whom but holds some woman dear (even though she be only the Dream Woman of his finer moments.)

And with thoughts of "her" comes that *other* thought of the German Michael loosed upon the earth.

Do you wonder why our men fight hard?

Think, then, of what a privilege it is for us women to help send sufficient of the right kinds of food for the bodies of such great souls.

Think of this and then ask yourself whether you will forbear to substitute other foods for the white bread, beef and bacon you and your family now consume; and, in addition, prevent the waste of a single ounce of food in your home.

Your service of sacrifice is so small. The result will be so great—you surely cannot refuse.

Serve Our Heroes—Sign and Live Up to Your Food Service Pledge

Woman's Auxiliary, Organization of Resources Committee, in Co-operation with The Hon. W. J. Hanna, Food Controller

Predictions As To Finance After the War

RISE *of Prices and Its Effect on Interest Burden and External Debt —How Canada May Benefit—Increase in Producing and Consuming Capacity—Ordinary Work of Repair and Betterment Has Been Checked.*

SEVERAL articles have been published in "The Round Table" dealing with the financial problems of the war. They have dealt with the existing state of things and have been based on a study of existing conditions. In the following article from the same source the future is considered, and a future the distance of which from the present is still uncertain. We shall be moving, therefore, in a region not only of conjecture but of conjecture contingent on the period of the war's ending. The financial position will not be the same if the war ends this year as if it ends next year or the year after.

To follow each alternative in detail and to make a guess at the probable conditions in each case would be a waste of speculation. Let us take the simplest case and assume that the war comes to an end now; and on that hypothesis consider as far as we can see them the financial conditions which we should face. If our conclusions are in any way correct they will at least be a guide in estimating the conditions which are likely to prevail at the termination of the war at an uncertain later date.

If the war should end to-morrow perhaps the most general change in financial conditions from those of the pre-war period would be the rise in prices of commodities throughout the world. In the United Kingdom the index number—the fingerpost of commodity prices—has risen from 2,565 in July, 1914, to 5,379 in April, 1917. In some other countries commodity prices have risen more, in others less. But in all there has been a rise, and a great rise, which would have been even greater but for the artificial restrictions imposed by governments on prices and on the general dealings of trade.

The causes of this rise in prices are various, and different in the cases of different commodities. But a general cause and probably the most important of all is the general expansion of currency—in belligerent European countries, through the issue of large amounts of paper money; in the United States and to a less extent in some other countries, through the importation of large amounts of gold; and in all countries through the inflation of credit.

This cause of high prices will not disappear at the advent of peace, nor will some of the others. There is no reason therefore to expect that peace will bring any great fall in the prices of commodities, speaking generally, although it may in individual cases.

Now, one result of high commodity prices is to lessen the burden imposed on a community by interest-bearing debt. For the rate of interest has been fixed beforehand and the interest is ultimately paid in commodities which are the product of the labor of the community. If the price of commodities is high it needs a lesser quantity of them to pay the same amount of interest; that is to say, the proportion of the annual production of the community which is absorbed in the payment of interest charges on borrowed money will be less. This applies to the interest on private as well as on public debt.

This reduction in interest burden, if the interest be reckoned in terms of commodities, will be a set-off against the increase in the burden of public debt which the communities of the belligerent countries will have to bear on account of the war loans contracted by their governments. The result, of course, will work out differently for each country according to its circumstances. Let us take the case of the United Kingdom. At the outbreak of war the national and municipal debts of the United Kingdom amounted, in round figures, to 1,200 million pounds sterling. The capital invested in railways in the United Kingdom was, in round figures, 1,300 million pounds sterling. We have thus a total capital liability of 2,500 million pounds on which the interest charge is practically fixed, either by law or by the custom of expecting a certain rate of interest from certain securities, such as railway shares. The annual interest charge in respect of this capital liability of 2,500 million pounds may be put at an average of 3½ per cent., say, 87½ million pounds a year. It is difficult to obtain statistics of the non-variable charges of other joint stock companies, operating in the United Kingdom, in the way of interest on debenture debts or on preference stocks, but we shall probably not be overstating the amount in putting it at from 20 to 25 millions annually. This will bring the fixed interest charges payable in the United Kingdom before the war to a figure of about 110 millions annually in respect of the particular class of indebtedness specified above.

During the war the national debt has been increased in round figures by 2,400 million pounds sterling (after deducting loans to the Allies and the dominions so as to arrive at the net increase in indebtedness). The annual interest on this increase at 5 per cent. is 120 million pounds. Apart from the increase in the national debt the increase in the indebtedness of the community has been small, as private borrowing has been insignificant. The fixed interest charges on the community of the United Kingdom may therefore be taken to have risen from 110 millions to 230 millions, or by 110 per cent. But the increase in commodity prices, according to the index figures given above, has been practically the same, *viz.*, about 110 per cent. Assuming these figures to be a fair guide to the increase in the prices of commodities produced in the United Kingdom, it is clear that the proportion of the production of the United Kingdom required to pay the above fixed interest on the indebtedness of the community will be no greater than before, although the amount of interest will be much higher reckoned in terms of money.

Private Indebtedness.

The above calculation takes no account of the great volume of private indebtedness existing before the war in the shape of mortgages, etc. Its inclusion would, of course, make the effect of the rise of prices in lessening the real interest charge on the community still more apparent.

It may be objected that one man's gain is another man's loss, and that, if a community gains in one way by having to devote a less proportion of its annual production to paying interest charges, the members of the community to whom the interest is due lose in a corresponding degree. This is true, but it nevertheless remains true that the burden on the community is lessened. For, though there are exceptions, it may be stated as a general rule that the effect of income arising from interest is to enable the individuals receiving it to live either without labor or with less labor than they would otherwise have performed; in other words, to increase the number of drones—using the word in no offensive sense. The payment of interest charges, therefore, is a real burden on the community, even though the interest be paid to individuals composing the community, because it enables those individuals to live without productive labor, and generally leads to their doing so, and thus diminishes the number of workers.

Interest Would Be Same.

If prices after the war went back to pre-war figures the interest on the pre-war indebtedness of the community, reckoned in terms of commodities, would be the same. The interest on the war debt would have to be added to it and the real burden on the community would be doubled. But, as shown above, the interest on the pre-war indebtedness of the community, reckoned in terms of commodities, has shrunk through the rise in prices, in the same proportion as the amount, in terms of money, has been increased. The actual burden on the community is not therefore any greater than before.

Effect on External Debt.

The effect of the above change in prices will be felt in relation to external as well as to internal debt. It will act to the advantage of debtor countries and to the disadvantage of creditor countries. Let us still consider the case of the United Kingdom, which is a creditor country and which lives partly on the yearly interest of its accumulated capital invested abroad. The total amount of this invested capital has not been greatly changed by the war. It is true that the United Kingdom has realized a great part of its capital investments in the United States and to a less degree its Canadian investments and some others. It has also called in its floating balances abroad. Thus it has decreased its loans to various countries and the amount of the annual interest derived therefrom. In addition it has incurred an external debt by borrowing in the United States a sum which may be estimated at two hundred million pounds* on which it will have to pay interest at [illegible] per cent, the amount of which is a set-off against its income from foreign investments. But, on the other hand, the United Kingdom has made loans to its Allies and the dominions to the extent of nearly one thousand million pounds sterling. This is probably a somewhat greater amount than the amount of the floating balances called in plus the amount of various investments realized or pledged plus the amount of the loans contracted in the United States. One transaction balances the other. After the war the United Kingdom will draw as much interest from abroad as it did before, in terms of money: but it will draw the interest from a different debtor, for example, from France and Russia instead of from the United States.

Nevertheless, though the amount of interest will be the same in terms of money, the real value of the amount will be so much less on account of the higher prices of commodities prevailing. The United Kingdom will receive a smaller amount of commodities which will represent the same amount of interest in terms of money. If the interest on these various loans brings in a smaller amount of commodities than before, the country will in reality be poorer to that extent, just as the man with a fixed income arising from investments becomes poorer when prices rise.

Canada Will Benefit.

On the other hand, a debtor country, such as Canada, will benefit because it will be able to pay its interest charges with a less quantity of commodities than before. It may well be that this benefit, for some debtor and belligerent countries, will more than counterbalance any actual increase in the amount of their external debt. Certainly it will be so in the case of Canada. Before the war Canada's indebtedness to external investors may be put in round figures at five thousand million dollars, carrying an interest charge of two hundred and fifty million dollars yearly. It is doubtful if the external debt of Canada has been increased much, even in terms of money, during the war. For the external loans contracted by Canada in the United States are probably offset by the extent to which private liabilities due from Canada to the United Kingdom have been paid off during the war. The external interest charge on the Canadian community will therefore be the same, reckoned in money, but reckoned in commodities it will be much less than before. If the commodities which Canada produces have risen in price by as much as the general average rise, that is, by over 100 per cent., Canada will have to pay only half as much in terms of commodities to discharge the same amount of interest as before the war. If the production of commodities in Canada after the war is the same as it was before, a less proportion of it will be eaten up by the interest charges of the external debt and the country will be so much the richer.

Similarly, France will be poorer and Russia richer after the war than before, in so far as the interest due to the one and payable by the other will be dischargeable by a smaller amount of commodities than it was before.

Producing and Consuming Capacity.

If the war ended to-morrow the actual impairment of the world's wealth caused by it would probably be found to be much less than is generally supposed. This impairment of wealth may be divided under two heads: first the destruction of property in the fighting zone; second, the running down of the machinery of production and transport and of the equipment of life in the belligerent countries and in others affected by the war. Of these two items the second is the more important, though it is the less evident at present to the eye. The actual destruction of property in the ground fought over by the armies has, of course, been considerable. But it is not relatively extensive, nor, except in certain small regions, complete. Some of it, no doubt, has already been repaired—for example, in Belgium. Some of it will only be repaired slowly.

---

*This does not include the borrowings against collateral securities. The pledged securities are a set-off against this.

But in all the belligerent countries the ordinary work of repair and betterment and improvement—especially so far as concerns the amenities rather than the necessaries of life—has been checked or altogether suspended. Expenditure on railways, roads, and buildings has been severely cut down. The machinery of transport by sea and by land has been used to its utmost, and, on the whole, destroyed faster than it has been replaced. All the belligerent countries will have much to do to bring their equipment in the above matters to the same condition as that in which it stood before the war.

Capacity Has Increased.

On the other hand, it seems probable that the productive capacity of the world has not diminished but increased during the war. The actual machinery of production has been destroyed comparatively little and has been largely added to. It is true that much of the new machinery has been established for the purpose of producing munitions of war, but a large part of it can be turned to other purposes. In the United Kingdom and probably in most other countries there has been a great extension in the boundaries of the class performing productive labor. This and a greater intensity of labor have the result that, in spite of the enormous number of men withdrawn for service in the field, the total production of the country in all lines taken together is greater than it was before the war. When the armies in the field return to the ranks of producers the productive capacities of all the belligerent countries should therefore be much higher than before—though allowance must be made for the difficulty with which returned soldiers settle down again to habits of regular industry.

As the producing capacity of all the belligerent countries after the war will be much higher than before, so the demand for consumption will be higher; partly on account of the necessity of replacing what has been lost, wasted, or gone out of repair; partly on account of the higher standard of living among the mass of the working classes in all countries, brought about by high wages and war expenditure.

Industrial Activity After War.

The conditions indicated above as prevailing at the end of the war—high prices, abundance of currency, easing of the burden of interest charges on private debtors, an extraordinary demand both for the common articles of consumption and for the material and supplies required for replacement and betterment of the world's equipment, an increased capacity for production through the addition of new machinery and an increase in the numbers of the labor force—all these conditions point to nothing else but a period of unusual activity in industry and commerce.

There are, however, three other conditions to be mentioned which may prove retarding factors. The first factor is certain but temporary. The other two are merely possible, and whether they come into play or not depends mostly on psychological considerations.

The first retarding factor will be shortage of transport. The merchant ship tonnage of the world may be less at the end of the war than at the beginning; and most of the ships will be badly in need of rest and repair. The railroads of the world will certainly be in bad condition, with their roadbed and equipment deteriorated and their rolling stock worn out and short in quantity. Until these deficiencies are repaired the transport of goods by sea and land will be more than ordinarily long and expensive. That will be a retarding factor to commerce.

Matter of Difficult Credit.

The next retarding factor, which may or may not come into play, is that of difficult credit. Currency will be abundant, and if bankers follow their usual tendency and are governed in their attitude toward credit by the position of currency reserves, credit will be plentiful and it will be easy to get money for new business. It is possible, however, that a feeling of uncertainty about conditions may make the financial world timid; and that the business of taking up and putting into permanent form the great amount of floating government liabilities created during the war may absorb the best part of their energy. This may lead to a stringency in credit which, of course, would hamper commercial activity. It is not a necessary nor on the whole a likely condition, but it must be mentioned as a possible factor of retardation.

The last factor which is also uncertain is the possibility of widespread labor unrest, arising on the one hand from the reluctance of the returned soldiers to settle down again to habits of plodding industry and from their difficulty in conforming to the standards of intensive industry set during the war; on the other hand from the reluctance of employers to pay the higher wages which will be generally demanded. It will be a calamity for the world if these conflicting feelings lead to a succession of industrial wars between employers and employees. It cannot, however, be dismissed as an impossibility. Whether and to what extent it comes about will depend mainly on the frame of mind in which the end of the war finds the classes concerned.

(To be concluded next week.)

NEW BOND HOUSE

Another bond house has been established in Toronto. Mr. Harry B. Housser, who for two years has been connected with Messrs. Æmilius Jarvis & Company, as manager of the bond department, has severed his connection with that banking house, and established the firm of H. B. Housser & Company. Offices have been secured in the Dinnick Building, 10-12 King Street East, Toronto, where the new firm will deal in government and municipal bonds. Mr. Housser is a well-known bond man and carries the good wishes of many friends to his new bond house.

ONTARIO MARBLE QUARRIES FOR SALE

Marble and stone quarries and all equipment, in Hastings County, Ontario, are being offered for sale. The marbles are white and colored. The company which has operated the quarries is in liquidation and tenders for the property are now invited. An official advertisement appears on another page in this issue of *The Monetary Times*. The marble from these quarries has been used in many notable buildings, such as the Ontario Lieutenant-Governor's official residence, and the Ontario hydro-electric commission's head office building at Toronto.

NEW INSURANCE LAW FOR CANADA

Summary of Principal Changes—Standard Provisions for Accident Policies

The insurance act of 1910 has been repealed and the insurance act of 1917, assented to on September [illegible] last, is now law. The following summary, just issued over the signature of Mr. G. D. Finlayson, superintendent of insurance, Ottawa, shows the material changes which have been made in the old law. The numbers of the sections refer to the new act, but where these numbers differ from the numbers of the corresponding sections in the old act the latter are shown in parentheses immediately after the former.

Section 2. Paragraph (d) defining "company" and paragraph (e) defining "Canadian company" have been redrafted to exclude the provincially incorporated company. Paragraphs (f), (g) and (h) defining "provincial company," "British company" and "foreign company," respectively, are new. Paragraph (y) defining "explosion insurance" is enlarged to include bombardment and war risk insurance.

Section 3. Subsection (1), paragraph (ii), sub-paragraphs (b) and (c) These exemptions have been transferred from sections 70 and 75 respectively of the old act.

Section 4. Subsections (1) and (2) are new. subsections (3) and (4) include in substance the provisions of subsection (3) of section 3 and section 12 of the old act. Subsection (3) of this section specifically authorizes the issue of licenses to inter-insurance associations.

Section 7. Subsection (3) respecting the validity of the license is new.

Section 8. Subsection (1) has been amended to permit of the payment of total and permanent disability benefits under life insurance policies without reducing the amounts which may be paid as main benefits. Subsections (2) and (3) replace subsections (2), (3), (4) and (5) of section 8 of the old act.

Eligibility for License.

Sections 9 and 10. These sections are amended by leaving to the discretion of the treasury board the conditions under which companies with wide charter powers may be deemed eligible for licenses under the act. A proviso has been added to section 9 dealing with the case of companies already transacting business in Canada but not able to immediately comply with the provisions of the section.

Sections 11 and 12. These sections replace section 4 of the old act and prohibit Canadian, British and foreign companies from transacting insurance business in Canada without a license from the minister.

Section 13. This section has been amended to permit of a contract of automobile insurance being combined in one policy with a contract of fire, explosion and inland transportation insurance.

Section 36. This section relating to the advertisement of capital and surplus is new.

Section 41. Subsections (4) and (5), providing for the issue of a conditional license requiring a company to make arrangements for reinsurance of its business and providing for reinsurance by the department if the company fails to do so, are new.

Reinsurance of Insolvent Companies.

Section 42. This section, providing for the reinsurance of insolvent companies and giving the policyholders a preference on the assets of the company, is new.

Section 53, (52). Subsection (3), requiring that the permission of the minister shall be obtained before any company enters into an agreement for amalgamation with or reinsurance by, another company, is new.

Section 57, (56). This section, limiting salary agreements to five years, has been extended to apply to directors and agents as well as to officers or trustees. Subsection (2), providing for the termination of agreements on insolvency or reinsurance of a company, is new.

Section 59, (58). Subsections (2) and (3), requiring provincial companies obtaining a license under the act to dispose of unauthorized securities within five years, are new.

Section 60, (59). Paragraph (a) of subsection (1) has been amended to permit of the investment in debentures of rural telephone companies. Sub-paragraph (ii) of paragraph (b), respecting the investment in unsecured debentures, has been amended to provide that the company issuing the same must have paid regular dividends on its preferred or common stocks for at least five years immediately preceding the date of investment.

Section 64, (63). The proviso to subsection (1) is new, prohibiting the investment by fire and casualty insurance companies in the shares of any other company transacting the same class of business. Subsection (3), providing for the maintenance in Canada of assets at least equal to the liabilities in Canada, is new.

Section 66, (65). This section requires all investments and deposits to be made in the name of the company, except insofar as is necessary to comply with the laws of other countries respecting deposits. The section also prohibits directors and officers from receiving a commission in respect of any purchase, sale or loan made by the company.

(Sections 70, 71, 72 and 73 of the old act have been omitted from the new act and transferred to the criminal code.)

Section 73, (77). Subsection (3) providing for the disposal of unauthorized investments, the liability of the directors therefor, and the exoneration of directors from the said liability, is new.

Section 91, (95). Paragraph (g) of subsection (1) has been amended to require a life insurance company to return to the policyholder his policy on which a loan has been obtained after such policy has been produced for examination and endorsement. Paragraph (k) has been transferred from section 97 of the old act.

Sections 105 to 111, both inclusive. These sections contain insubstance the provisions of sections 111 to 120, both inclusive, and section 122 of the old act respecting assessment companies.

May Withdraw License.

Section 125, (135). Subsection (1) has been amended by requiring a Canadian fire insurance company to maintain assets to a value at least fifteen per cent. in excess of its total liabilities, including a reserve of unearned premiums calculated *pro rata* for the time unexpired. The proviso to subsection (3) has been amended to provide for the withdrawal of the company's license if its assets are less than its total liabilities, including a reserve of unearned premiums calculated on the said basis.

Section 127, (137). This section has been amended by penalizing the person who receives, as well as the person who grants, a rebate of premium on a fire insurance policy.

Section 133. This section is new. It provides for the maintenance by Canadian companies transacting hail insurance of a hail insurance surplus fund, and for the deposit by British and foreign companies transacting hail insurance in Canada, of an amount at least equal to fifty per cent. of the [illegible] premiums received during the preceding calendar year.

Standard Provisions for Accident Companies.

Section 134. This section, providing as a condition of the license that personal accident and sickness insurance policies issued by companies licensed by the department shall contain certain standard provisions, is new.

Sections 177 and 178. These sections are new and are designed to secure a more economical organization of new insurance companies.

Section 182, (188). The list of fraternal societies whose special acts are exempted from the repeal has been extended to include those societies incorporated since the passing of [illegible]

Schedules. The only changes in the schedules are those made necessary by the re-numbering of the sections, and a change in paragraphs 5 and 6 of Form G, respecting the production of the policy for examination and endorsement.

Bill No. 54, "An act to amend the criminal code (respecting insurance)" was assented to on the 20th day of September, 1917, and is now law.

This act contains in substance the penalty sections of the insurance act, 1910, being sections 70, 71, 72 and 73 of the said act.

It also includes in substance the provisions of subsec[illegible] of the [illegible] classes of in[illegible]

BONDS AWARDED

Lanark, Ont.—[illegible] per cent. 20-year debentures has been awarded to C. H. Burgess and Company, Toronto.

THE WAR LOAN

After all, we cannot claim the exercise of a great deal of patriotism in buying war loans which yield a substantial income of about 5½ per cent. Our war bonds are first-class investments, safe, always negotiable and remunerative. Their purchase helps the Canadian government to finance our share of the war. It assists the government to establish credits here for the purchase of various supplies in this country by Great Britain. These include the products of our factories, forests, farms and mines. The purchase of war bonds is therefore in the best interests of the individual citizen and of his country. It is helping the Allied nations and the cause for which they and we are fighting. It is assisting to bring the war more speedily to a successful conclusion. What patriotism goes with buying a war bond is the patriotism of doing a duty.

Under these circumstances, the finance department, Ottawa, have taken the proper action in refusing to countenance the suggestion made in some quarters that the next war loan should bear interest at the rate of 6 per cent. In a semi-official statement issued at Ottawa last week, it was stated that the best authorities do not think it is at all necessary that Canada should establish such a rate at this time for our domestic loans. The existing war loans have largely recovered from the price depression coincident with the strain of floating the third loan last March. The issue of last March, which was a twenty-year bond, maturing in 1937, sold below the issue price shortly after the subscription lists closed, but the absorption of the semi-undigested subscriptions has, since that time, been steady and consistent, until at the present time the demand exceeds the supply, with the price holding steady not far from the issue price, and approximately at the cost price, allowing for unearned interest paid with the first coupon. The next war loan, which will yield about 5½ per cent. to the investor, must be made an unquestionable success by the people of Canada. Every home should have a war bond.

RISING PRICE OF SILVER

On Saturday last, the Mining Corporation of Canada sold 200,000 ounces of silver on a basis to net the company in Toronto $1.16 7/16. The official price for bar silver on the same day was $1.08½, an advance of .08 cents during the week, of 17⅞ cents since September 1st, and of 33⅛ cents since January 1st, 1917. Silver is now nearly 60 per cent. higher than it was a year ago. On Saturday last, the London price stood at the highest since March, 1878. The influence behind last week's advance (aside from decreased world's production and increased demand for European coinage) was the increase in Oriental trade activity during Europe's diversion of its energies to war, and the fact that, to settle Oriental exchange while drawing gold from the East, Europe has no recourse left but to send large quantities of silver.

The price of silver has only to advance as much further as it advanced in the fortnight past, in order to reach a point where the silver dollar will be worth more than 100 cents as bullion. What then? So far as the United States is concerned, the New York Post reminds us that the United States has had some experience in the matter. Between 1837, when the silver dollar was fixed at its present intrinsic value, and 1872, just before its free coinage was suspended, less than 2,000,000 of the dollars were coined. The value of the silver in them ranged from an average of $1.009 in 1837 to $1.052 in 1859, and it was found that every dollar put out from the mint, if it did not get into a collector's cabinet, was privately melted down and sold. If the price should now go much above $1.29 per ounce, the silver dollars would again disappear from circulation and their coinage be suspended.

Canada is keenly interested in the rapidly increasing price of silver. We are now the world's third largest producer of that metal. This year, the Dominion will probably produce 30,000,000 ounces of silver, an output which at present prices will mean a considerable source of wealth.

IMPORTANT FINANCING

Since the outbreak of war, to the end of August, 1917, the Dominion government had advanced to the Imperial government in cash and securities the sum of $443,000,000. With the credits last week, the total now exceeds $590,000,000. The securities were pledged in New York and furnished the basis of an Imperial credit there.

Last week, provision by the Canadian banks of credits amounting to upwards of $150,000,000 was considered at a conference between Sir Thomas White, finance minister, and the executive of the Canadian Bankers' Association. Of these credits, $75,000,000 will be applied to the purchase of foodstuffs for the Allies, and $88,200,000 to buy 40,000,000 bushels of wheat, this being the amount required to acquire the exportable surplus of the present year's wheat crop. These credits, which are apart from the coming war loan, will enable the British government to make purchases in Canada which otherwise might go to the United States.

The magnitude of the financing which Canada has undertaken since the beginning of the war is a surprising demonstration of the country's previously latent financial power. It shows what can be done when based upon great production and thrift. Up to the present time, the financing has been accomplished with comparatively little difficulty. From now onward, it will not be so easy. We cannot continue to establish credits in this country for Great Britain's purchases here unless every citizen does without luxuries, putting his increased savings and surplus funds into the national securities of the Dominion, and unless every corporation regulates profits according to a decent standard of honesty.

REGULATING FOOD PRICES

One way to obtain information for the proper regulation of food prices is to trace the journey of the food from the producer to the consumer. By the time, for example, that the basket of tomatoes has passed from the grower to the express or railway company, to the cartage company and the wholesale merchant to the retail grocery or fruit store, and thence to the consumer, it has picked up many costs. Add to these the price of seed, baskets and tops, labor, packing, cartage, and the tomato, growing in stately simplicity on the country vine becomes, in the city, a somewhat costly luxury. It comes back to the old trouble of a wide gap between producer and consumer. Can that gap be reduced? The tomato is only a typical example. Is it possible by a better marketing system, to place the producer in more intimate touch with the consumer?

In price regulation, the grower should receive his due. When one hears talk of regulating the price of potatoes, for instance, to $1.25 a ninety-pound bag, one wonders whether the food controller has figured what it cost the farmer for seed last spring, and what the cost of labor, spraying and packing has been since. The potato dealers are not the only men whose views are worth having. The potato grower should be given a chance to tell what it has cost to produce his crop. Dealers and middlemen in many lines have a habit of making statements to the press, calculated to create sentiment which acts in their favor. Let us hear from the growers. They usually work much harder and make less money than the middlemen.

PREVENTION OF FIRE

Have We Made Any Great Advances to Get Anything Done?

Editor, *The Monetary Times.*

Sir,—Many of your readers who know Mr. Henry Lye, of Vancouver, will approve and applaud his timely letter published in your issue of the 7th inst., imparting information and warning anent annual wastage and loss through fire and its causes, and whilst everyone is ready to admit that some steps should be taken to remedy the terrible defects in our Dominion or Provincial legislation, and that some measure of justice for insurance companies and innocent sufferers should be provided to cope with the ever-growing calamitous losses which we read of every week, and which in many cases have to be paid by the insurance companies, we continue along the same methods without any relief in sight, except what is organized in some towns by the local council, and this in many cases is very meagre. As an instance of this great lack and want of co-operation I might cite a recent experience I had in a town in Alberta, where it is the duty of the policeman to prevent an accumulation of rubbish in yards of merchants. He had approached two of the merchants and reminded them of the violation of the by-law in having rubbish and excelsior of a week's growth piled outside against the warehouse—both of these men are members of the local council—and they told him to "go to ...." as they were quite capable of taking care of themselves.

In Western Canada.

Whilst perhaps it is not fair to compare conditions in Canada—especially Western Canada—with the various States, it is indeed refreshing to pick up and read some of the leaflets which dribble through from some of the individual states, setting forth conditions obtained by the governing bodies, and all of whom seem to be working with one view and intent, namely, the prevention of fire. Of the four western provinces in Canada, Saskatchewan stands alone in providing and passing an act for the prevention and suppression of fire, which act came into force June, 1916, but, after laboriously drawing up 29 articles and various sections which set forth the object of the act, positions, titles, penalties, and especially the taxes to be levied on the insurance companies for the maintenance of the department, we are told under article 17 that "nothing shall render it obligatory for the fire commissioner, his deputy or inspector, to perform in cities, towns or villages such of the duties prescribed by or under the authority of this act, relating to matters other than the investigation of fires, as are provided for by by-laws of the municipality."

In other words a department is created, the maintenance of which is made by taxation of insurance companies, but that the question of doing any work must rest entirely with the department, and in corroboration of this, I know of one company who have been writing to the department since May for information concerning a bad condition in a town in the province of Saskatchewan, and to date the only reply given is that "the inspector has not reported on the matter as yet," after a delay of three months.

The National Fire Protection Association of Boston are doing good work and publish essays, lists of improved and standardized material and products, and much of this reading material reaches the head offices of the insurance companies, and other corporate bodies who derive much useful and beneficial knowledge, but with all that we seem to make no appreciable advance towards formulating and enforcing restrictive measures for the prevention of fire, though it is frequently admitted by all that something should be done.

Yours, etc.,
H. E. Bligh.

Brandon, Man., September 15th, 1917.

LIFE INSURANCE COURSE

Under the auspices of Columbia University a course in life insurance is to be conducted at 203 Broadway, New York, every Friday from 5.30 to 7.20, the first session beginning September 28th. The work of instruction will be in charge of Professor S. S. Hueber. The following is an outline of the course, winter session:—September 28th, 1917, life insurance as a means of protection; October 5th, savings and investment aspects of life insurance; October 12th, business uses of life insurance; October 19th, term, whole life, limited payment and endowment policies; October 26th, income policies; November 2nd, annuities; November 9th, group insurance; November 16th, total disability benefits in life insurance contracts; November 23rd, factors underlying a correct plan of life insurance; December 7th, the net single premium; December 14th, the net single premium (continued); January 4th, 1918, the net level premium; January 11th, the reserve; January 18th, unsound (non-reserve) plans of life insurance; January 25th, loading.

[illegible] values and policy loans; February 15th, surplus and dividends; March 1st, insurance of impaired lives; March 8th, stock versus mutual life insurance; March 15th, life insurance invest- [illegible] gain and loss exhibits; March 20th, legal interpretation of the contract; April 12th, insurable interest and the law relating thereto; April 19th, life insurance in its relation to bankruptcy; April 26th, law pertaining to the beneficiary; May 3rd, assignment of policies; May 10th, law pertaining to the payment of [illegible] of agency.

PERSONAL NOTES

Mr. C. E. Watts, secretary of the Canadian Millers' Association, has gone to Winnipeg to place before the grain men the situation regarding the distribution of wheat.

Mr. James E. Johnston has been admitted to partnership in the firm of O'Brien and Williams, members of the Montreal Stock Exchange. The other partners are Messrs. W. P. O'Brien, M. E. Williams and R. E. MacDougall.

Lord Reading and Lord Northcliffe will pay an official visit to Ottawa on October 4, 5 and 6. Lord Reading has full powers to act for Great Britain in matters of finance. It is probable that, while he is here, he will meet with Canadian bankers for the purpose of discussing exchange and other financial subjects.

Mr. Phelps Johnson.

Mr. Phelps Johnson, president of the St. Lawrence Bridge Company, is the designer of the K-truss system used for the new Quebec bridge completed last week. He was the organizer of the St. Lawrence Bridge Company, and the man who decided that there should be at least one bid from a Canadian company for the building of such an important Canadian structure. He evolved the idea of floating and hoisting the suspended span into position, and he was the executive head of the whole big organization that planned and carried out the great undertaking. Mr. Johnson is president of the Dominion Bridge Company, having succeeded the late Mr. James Ross about four or five years ago. He joined the Dominion Bridge Company as vice-president thirty-five years ago, after having had several years' experience with three different United States bridge companies. After having acted for some years as vice-president of the Dominion Bridge Company, Mr. Johnson undertook the duties of chief engineer, and was for a considerable period very active in the design and erection of many of Western Canada's most important structures. Subsequently he returned to Montreal as vice-president and general manager of the company, which office he filled until he succeeded to the presidency.

Sir Thomas White discussed with the executive officers of the Life Underwriters' Association on Wednesday, the preparations for the flotation of the fourth domestic war loan and received from them a promise of co-operation in issuing it. Those who were present at the conference were Messrs. T. B. Macauley, of Montreal, H. C. Cox, of Toronto, J. B. McKechnie and J. B. Kilgour.

Mr. A. W. McLimont, one of the leading traction experts of the continent, has been appointed general manager of the Winnipeg Electric Railway Company. Mr. Wilford Phillips, who has occupied the position of general manager for some 15 years, is retiring. Mr. McLimont [illegible] New York [illegible] New York and was also [illegible] of the Chicago and Milwaukee Electric Railway. Mr. McLimont is a Canadian and was born in the city of Quebec.

Mr. J. J. Hall has been elected president and Mr. Chas. E. Meek, vice-president of the Vancouver Grain Exchange. Mr. Hall was formerly president of the Vancouver Milling and Grain Company. The Vancouver Grain Exchange has taken on new activity with the opening of the Vancouver route for Canadian wheat and there is every hope that Vancouver will prove a grain port.

Mr. Geo. H. Duggan.

Mr. George H. Duggan, chief engineer of the St. Lawrence Bridge Company, is also vice-president of the Dominion Bridge Company. He graduated at the School of Practical Science, Toronto University, about 1883, and a few years later entered the employ of the Dominion Bridge Company, becoming chief engineer in [illegible]. In [illegible] he resigned to become assistant to the president of the Dominion Iron and Steel Company, [illegible] was appointed second vice-president and general manager of the Dominion Coal Company. About six years later he rejoined the Dominion Bridge Company as general manager. Mr. Duggan is also a director of the Royal Bank of Canada, the Montreal Trust Company, the Hillcrest Collieries, and many other engineering and business concerns. Some interesting information as to the new Quebec bridge appears on another page.

ALLIANCE INSURANCE COMPANY OF PHILADELPHIA

Another important insurance organization of the United States has decided to do business in Canada. The Alliance Insurance Company of Philadelphia, which has built up an excellent business and reputation during its 12 years' career, has just established a Canadian department. This will be in charge of Robert Hampson and Son, Limited, 1 St. John Street, Montreal, one of the best-known insurance firms in the Dominion. Messrs. Hampson and Son invite applications for Canadian agencies.

The Alliance Insurance Company of Philadelphia, which has agents throughout the United States and settling agents in all the principal foreign countries, writes the following forms of insurance: Fire, marine, rent, tornado, automobile, inland, baggage, leasehold, use and occupancy, parcel post, salesmen's samples.

How the company has grown in the past few years is shown in the following table, which is a strong tribute to its business methods and prompt and satisfactory loss settlements:

Jan. 1st.	Assets.	Reserve.	Net surplus.
[illegible]	[illegible]	[illegible]	$ [illegible]
[illegible]	2,288,274	672,858	691,160
1915	[illegible]	[illegible]	[illegible]
[illegible]	2,678,459	690,335	975,876
[illegible]	[illegible]	[illegible]	[illegible]

Since its organization, the Alliance Insurance Company of Philadelphia has paid losses of $[illegible]. Its surplus to policyholders is $1,001,852. The company's liabilities, according to the latest annual statement, are as follows: Capital [illegible] reserve [illegible] all other liabilities, $[illegible]; contingent [illegible]. Total, $[illegible]

The Bank of British North America

INCORPORATED BY ROYAL CHARTER

The Court of Directors hereby give notice that an interim dividend, for the half-year ended 31st May last, of 40 shillings per share, less Income Tax, being at the rate of 8 per cent. per annum, will be paid on the 5th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the legal par of exchange on the 5th day of October next.

No transfer can be made between the 21st inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Apparently the recent offerings of provincial and municipal bonds to Canadian investors at high interest rates have had some effect in reducing the special loans, some of them of long standing, which the important cities and provinces had been carrying with the banks, says Mr. H. M. P. Eckardt in the New York Financier. These new issues were put out at prices yielding the investors from 5⅞ to 6½ per cent. Then, in addition, the bond houses, in case of certain of the issues, offered concessions of ¼ per cent. and ½ per cent. on the par amount of the purchase to parties taking more than a stated sum. When allowances are made for these special terms and for commissions, etc., it will be seen that the loans must have cost the borrowers from 7 to 7½ per cent. Those are high rates for such high class paper. For example, a loan of $1,000,000 costing 7 per cent. means that the municipality must pay in interest $70,000 per year during the currency of the loan. (Most of the new issues run from three to ten years.) Perhaps the city in question was accustomed to getting its money in London before the war at an interest cost of, say, 4¼ per cent. So the rise in interest thus represents an extra annual burden of $27,500 for each $1,000,000 borrowed at present rates. Such terms, therefore, operate powerfully to cause the municipal and provincial authorities to cut down their expenditures wherever possible or practicable; and in that way they are forcing the people to be most careful and economical.

Stratford, Ont.—The city council will issue five-year debentures for its $50,000 gift to the Patriotic fund.

Aurora, Ont.—An issue of $8,000 6 per cent. 20-year waterworks extension debentures was awarded to Mr. J. M. Walton, the selling price being $7,940.

Carleton, Ont.—Tenders will be received up to October 3rd for an issue of $60,000 5½ per cent. 40-year debentures. Charles Macnab, county clerk, Ottawa, Ont.

Smith's Falls, Ont.—No award was made of the issue of $135,000 6 per cent. 20-instalment hydro-electric debentures, all offers being considered too low.

Sudbury, Ont.—W. F. Morgan Dean and Company, Hamilton, have purchased two blocks of 5 per cent. 20-year bonds, amounting to $21,000 and $17,226, respectively.

Redford, Sask.—Tenders were to be received up to September 27th for an issue of $10,200 rural telephone debentures. R. J. Rivett, secretary-treasurer, Wilkie, Sask.

Sherbrooke, Que.—Debentures amounting to $25,000, issued in 1892 to cover previous issues, were paid in cash on maturity at the Canadian Bank of Commerce. Last year bonds to the value of $50,000 were paid immediately they became due. Another issue of debentures to the amount of $90,000 will mature in 1920. Ample provision has been made for meeting these on maturity.

Toronto, Ont.—The municipality's current expenditure up to August 31st has been $7,771,744, as compared with $8,875,037, which would be eight months' share of the $13,312,556 provided in the estimates. While there have been many expenditures during the past eight months which have not been paid, the indications are that it is unlikely that there will be any considerable deficit at the end of the year.

Expenditures made by the different departments are given as follows:—

	Estimate.	Expended.
Justice administration	$ 98,007	$ [illegible]
Jail	14,432	17,584
Board of Health	238,802	244,826
City treasurer	290,003	306,851
Fire department	940,026	1,060,520
Abattoir	76,675	122,671

So far as the abattoir is concerned, the maintenance cost for eight months is higher than the estimate for the whole year, which was $115,012.

Saskatchewan.—The following is a list of debenture applications granted by the local government board during the week, August 27th to September 7th, 1917:—

School Districts.—Sunny Corner, $2,500 10-years, not ex. 8 per cent. annuity; H. F. Lucas, Milestone. Cymric, $2,000 10-years, not ex. 8 per cent. annuity; Geo. Deakin, Cymric. East Butte, $1,600 10-years, not ex. 8 per cent. annuity; J. Lawson, Ardkenneth. *Sceptre, $7,000 20-years, not ex. 8 per cent. instalment; W. R. Ducie, Sceptre. *Taelman, $1,200 10-years, not ex. 8 per cent. annuity. Geo. Gaylord, Patner. Green Corn, $1,800 10-years, not ex. 8 per cent. annuity; L. Mellbye, Surprise. *Franko, $700 5-years, not ex. 8 per cent. annuity; P. D. Savchook, Canora. South Traill, $1,200 10-years, not ex. 8 per cent. annuity; E. Erickson, Frontier. *Sand Hill, $1,200 10-years, not ex. 8 per cent. annuity; Ed. Hinsche, Forres. *Aisne, $2,000 10-years, not ex. 8 per cent. annuity; S. Fowler, St. Swithin. Return, $1,800 10-years, not ex. 8 per cent. annuity; Chas. Swanson, McEachern. Festubert, $1,800 10-years, not ex. 8 per cent. annuity; Chas. Swanson, McEachern.

Towns.—Wilkie, $6,000 20-years, interest at 7 per cent. annually; T. A. Dinsley, Wilkie. Wadena, $4,500 10-years, interest at 7 per cent. annually; J. F. T. Saich, Wadena; $1,400 15-years, interest at 7 per cent. annually; J. F. T. Saich, Wadena; $500 10-years, interest at 7 per cent. annually; J. F. T. Saich, Wadena.

Rural Municipalities.—Bitter Lake, $5,000 10-years, not ex. 7 per cent. instalment; L. A. Moore, Forres. Winslow, $6,000 10-years, not ex. 7 per cent. instalment; R. H. Percival, Druid.

Rural Telephone Companies.—Authorization will issue on evidence of a satisfactory sale being submitted. Glenavon South, $3,700 15-years, not ex. 8 per cent. annuity; Geo. W. Moodie, Glenavon. Richard, $11,000 15-years, not ex. 8 per cent. annuity; H. G. Graham, Richard. Alsask, $21,500 15-years, not ex. 8 per cent. annuity; F. J. Clark, Alsask. Hafford, $13,200 15-years, not ex. 8 per cent. annuity; M. Allen, Hafford. Ferland, $22,000 15-years, not ex. 8 per cent. annuity; J. M. Coutare, Fournierville. Elrose, $11,300 15-years, not ex. 8 per cent. annuity; C. W. Springford, Elrose. Shell River, $9,900 15-years, not ex. 8 per cent. annuity; H. A. Marchany, Marchant Greve. Birch Hills, $5,700 15-years, not ex. 8 per cent. annuity; A. Jamieson, Birch Hills. Aneroid South, $18,200 15-years, not ex. 8 per cent. annuity; P. Madden, Aneroid. Thurlby, $13,300 15-years, not ex. 8 per cent. annuity; P. Stapleton, Kincaid. Wolfe, $8,000 15-years, not ex. 8 per cent. annuity; A. R. Driver, Wolfe. Lac Pelletier, $3,100 15-years, not ex. 8 per cent. annuity; C. R. Hunter, Swift Current. Troy, $500 15-years, not ex. 8 per cent. annuity; G. G. Bulstrode, Qu'Appelle. Ridpath, $8,300 15-years, not ex. 8 per cent. annuity; B. A. Higgins, Ridpath. Shackleton, $800 15-years, not ex. 8 per cent. annuity; J. W. Cassburg, Shackleton. Longlaketon, $1,000 15-years, not ex. 8 per cent. annuity; S. W. Arneil, Selton. Last Chance, $3,800 15-years, not ex. 8 per cent. annuity; Jas. Wiggins, Grenfell. Leslie, $3,400 15-years, not ex. 8 per cent. annuity; F. A. Howe, Leslie. Horse Lake, $7,100 15-years, not ex. 8 per cent. annuity; Fred Ironside, Kelliher. Dewdrop, $5,400 15-years, not ex. 8 per cent. annuity; H. C. Furnell, Vantage. Wabash, $10,300 15-years, not ex. 8 per cent. annuity; A. M. O'Brien, Willmar. Big Gully, $2,200 15-years, not ex. 8 per cent. annuity; John Kay, Lloydminster.

The following is a list of debentures reported sold through the local government board from August 29th to September 7th, 1917:—

Rural Telephone Companies.—Meadowvale, $10,000; W. L. McKinnon and Company. Winton Park, $15,600; W. L. McKinnon and Company. Gottlinger, $4,300; W. L. McKinnon and Company. McGee, $6,600; W. L. McKinnon and Company. Lancer, $22,700; W. L. McKinnon and Company. Tiree, $4,800; W. L. McKinnon and Company. Eldon, $3,500; W. L. McKinnon and Company. Eye Hill, $38,500; W. L. McKinnon and Company. Doyton, $8,000; W. L. McKinnon and Company. Eddy, $5,500; W. L. McKinnon and Company. Bright, $5,700; W. L. McKinnon and Company. Deer Lodge, $10,000; W. L. McKinnon and Company. Sprayville, $2,000; Canada Landed and National Investment Company. Sunbeam, $2,000; Canada Landed and National Investment Company. Nipawin, $800; Nay and James, Regina. Glen Elder, $1,800; Goldman and Company, Regina. Sharon, $1,800; Diocese of Saskatchewan, Prince Albert. Sunny Valley, $2,000; Western Canada Bond Company, Winnipeg. Colonsay, $7,000; Canada Landed and National Investment Company. Querrin, $2,000; Great-West Life Assurance Company.

London, Ont.—That the city's debentures command a ready sale in the city itself is evidenced from the fact that two issues, totalling $85,000, recently offered for sale locally, have all been disposed of. City treasurer Bell stated that all had sold quickly. It is expected that another block of $100,000, authorized last January for the London Railway Commission, for which a by-law is now being prepared, will be offered for sale locally. Approximately $2,000,000 yet remain unsold, but on these short-term loans have been made. On $1,300,000 a three-year loan was made two years ago. This falls due next summer, and another loan will probably be made on the same conditions. Several weeks ago a five-year loan on $760,000 worth of debentures was negotiated in Toronto.

MONARCH LIFE INSURANCE COMPANY'S CONVENTION

The Monarch Life Assurance Company of Winnipeg held their annual convention at the head office at the same time as the Life Underwriters' Association. Delegates attended from Ontario and throughout the west as far as the Pacific Coast. The Monarch Life is making consistent, steady progress. The business for the first eight months of 1917 is over sixty per cent. ahead of the same period of last year, and there is every indication that this company will issue $[illegible] of business before the year closes.

Reading from left to right, commencing with the top row, the delegates to the convention are:—

Top Row—R. J. Dean, Winnipeg; W. D. Crumb, Regina, Sask.; C. C. Coffee, Regina, Sask.; S. W. Goldin, Winnipeg; E. Henselwood, Winnipeg.

Second Row—J. F. L. de Rouville, Inspector, Winnipeg; H. A. Fish, Head Office; C. A. Manlove, Estevan, Sask.; V. E. Lee, Shaunavon, Sask.; D. A. Macdonald, Winnipeg; G. Bridgman, Minnedosa, Man.; A. Lucier, Winnipeg.

Third Row—J. H. Reid, Silverton, B.C.; M. R. Godfrey, Vancouver, B.C.; S. S. Davis, Vancouver, B.C.; R. J. Sivil, Calgary, Alta.; H. J. Denhart, Taber, Alta.; H. R. Leacock, Etzikom, Alta.; C. T. Docherty, Calgary, Alta.

Fourth Row—R. H. Brydon, Branch Mgr., Guelph, Ont.; M. B. Farr, Prov. Supt., Regina, Sask.; C. A. Crysdale, Mgr. for Vancouver, B.C.; J. W. W. Stewart, Managing Director; R. W. Simpson, Branch Mgr., Windsor, Ont.; H. S. Ellis, Prov. Supt., Calgary, Alta.; F. J. Castle, Inspector, Head Office.

Bottom Row—J. A. Macfarlane, Secretary and Actuary; C. H. Philpot, Branch Mgr., Ft. William and Pt. Arthur; J. H. Romig, Head Office; G. J. Telfer, Head Office; J. E. S. Buchanan, City Mgr., Winnipeg; A. Splatt, Head Office.

NEARLY 250,000,000 BUSHELS WHEAT

That is the Government's Estimate for the Whole of Canada

The preliminary estimate of this year's wheat crop in Canada is for a total of 249,164,700 bushels from 14,755,800 acres, an average yield per acre of 16.88 bushels, as compared with 17 bushels in 1916 and 29 bushels in 1915, according to figures of the census and statistics office, Ottawa, issued this week. The estimated yield of wheat in 1916 is 229,313,000 bushels from 13,448,250 acres, so that the estimated total for 1917 represents an increase of 19,851,700 bushels or 8 per cent. The total yield of oats in 1917 is estimated at 399,843,000 bushels from 12,052,000 acres harvested, as compared with [illegible] bushels from 10,17[illegible],000 acres harvested in 1916. For the prairie provinces it has been necessary to deduct from the sown areas percentages of 10 in Manitoba and 17 in Saskatchewan and Alberta for crops not ripened into grain. The yield per acre on the harvested area is therefore for all Canada 33.18 bushels, as compared with 35.91 bushels in 1916 and 45.84 bushels in 1915. For rye the estimate is 4,194,950 bushels from 211,870 acres, as compared with 2,967,400 bushels from 148,620 acres in 1916, the yields per acre being nearly 20 bushels in both years. Barley yields 59,318,400 bushels from 2,392,200 acres, as against 42,647,000 bushels from 1,703,700 acres in 1916, the yields per acre being 24.80 and 25 bushels respectively. The total yield of flaxseed is placed at 10,067,500 bushels from 1,242,000 acres, as compared with 7,316,300 bushels from 622,000 harvested acres in 1916, the average yields per acre being 8.11 bushels in 1917 and 11¾ bushels in 1916.

Grain Yields of the Prairie Provinces.

The estimated total production of wheat in the three prairie provinces (Manitoba, Saskatchewan and Alberta) is 225,778,700 bushels from 15,619,370 acres, as compared with 208,846,000 bushels from 12,441,350 acres in 1916. In Manitoba the total yield of wheat for 1917 is 41,642,200 bushels, as compared with 27,943,000 bushels in 1916, in Saskatchewan 130,356,000 bushels as against 131,765,000 bushels and in Alberta 53,780,500 bushels against 49,138,000 bushels. Oats yield 224,199,000 bushels in the three prairie provinces as compared with 269,258,000 bushels in 1916, barley 43,168,400 bushels against 33,296,000 bushels, rye 2,498,850 bushels against 1,636,000 bushels and flaxseed 9,951,500 bushels as against 7,269,000 bushels.

Condition of Field Crops.

At the end of August the condition of field crops for Canada, expressed in percentage of a standard representing a full crop was as follows: Spring wheat, 73; oats, 70; barley, 75; rye, 82; peas, 76; beans, 81; buckwheat, 85; mixed grains, 88; flax, 65; corn for husking, 73; potatoes, 77; turnips, 84; mangolds, etc., 83; alfalfa, 87; corn, for fodder, 81; sugar beets, 80; pasture, 87; and hay and clover, 95. The Saskatchewan department of agriculture telegraphed September 11 that wheat cutting was completed and that some oats were still too green and were ripening slowly. Threshing had commenced, and wheat was turning out a good sample, with the yield higher than was expected. Labor was scarce and prices were high. Frost in some parts would injure late crops. Potatoes were a fair crop. The Alberta department telegraphed September 8 that frosts had done more or less damage to vegetables but that all grain, except late barley and oats, had been saved.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Rural Credits in Western Canada Analysed

Comparison With the Federal Farm Loan Scheme of the United States — Distrust of Political Control—Cost of Funds of Provincial Governments —Outline of Plans in the Canadian Provinces.

WANTED, a creditor who (1) will lend money at a low rate of interest, (2) refrain from pressing too sharply for its repayment, and (3) allow borrower to repay at any time convenient to them. These are the words of the president of one of our western grain growers' associations, who in a more or less jocular vein, thus described what the farmers wanted.

In an instructive address at the recent annual convention of the Farm Mortgage Bankers' Association of America, at Minneapolis, Mr. Hume Cronyn said that it might well be asked, whether, under existing conditions, there was any crying need for a government, at the expense of the general taxpayer, to embark upon a scheme for the benefit of a particular class. Perhaps the reasons were best given, he said, in the grain grower's remarks noted above. Mr. Cronyn, who is managing director of the Huron and Erie Mortgage Corporation, London, Ont., continued:—

There can be little doubt low rates and wide privileges of repayment are ideal conditions for a borrower, but not always a possibility with the commercial lender who must make his business yield some profit and who cannot compel his debenture holders to accept repayment before the due date of their securities.

As to item (2) it is open to question whether even a government can afford to have its mortgage debts remain long overdue, or whether it is in the true interest of the mortgagor for it to do so.

Beyond these outstanding attractions, we cannot blind ourselves to the fact that in Canada, mortgage lenders as a class are not exactly objects of popular affection. Along with the coal merchant, the plumber and the medical specialist, they enjoy the reputation of charging all the traffic will bear. Perchance, indeed, they have inherited along with their business reputation of those Shylocks who were its originators. There are in this, as in all other walks of life, men of that unreasonable narrow character whose unvarying reply to the pleadings of an unfortunate debtor is based upon the incontrovertible statement: "It is so nominated in the bond."

Western Provinces Try Experiment.

Whatever the reasons, the four western provinces of Canada, Manitoba, Saskatchewan, Alberta and British Columbia, have placed upon their statute books measures which they believe will enable them to lend money to the farmer at rates below those now current on mortgages repayable by amortization over a long period of years, with large privileges to the borrower of anticipating his payments before these fall due.

Of the provinces named, all save Alberta have completed their organizations and have made a start in the business of money lending.

The general lines followed in all the provinces are as follows:—

1. Agricultural associations have been formed under the control and management of permanent officials, and subject to governmental or legislative supervision.
2. These associations are offering to the investing public bonds running from 10 to 30 years, which bonds are either direct obligations of the province, or are secured by a deposit of mortgages and the unrestricted guarantee of the province.
3. The funds thus obtained are to be lent upon first mortgages of improved farms, repayable by amortized payments spread over a period of from 20 to 40 years. In no case must an advance exceed one-half of the value of the security as determined by the association.
4. The rate of interest charged the mortgagor must not be more in British Columbia than one and one-half per cent., nor in the other provinces more than one per cent. above the rate at which the association or province floats its bonds.

The farmer for so many years has seen coin from his own purse handed over by his government to railroads, in the shape of a bonus, or to manufacturers by way of a tariff, we might expect him to bear with equanimity the idea that at least some portion of the public funds will be diverted for his special benefit. Let it be said, to his credit, the western farmer through his various associations and their official organ, the Grain Growers' Guide, has put himself on record against special privileges and insists that provincial loan associations must be placed on a self-sustaining basis, even though this involves a substantial increase in mortgage rates.

Provincial, Not National in Scope.

In comparing the rural credit system so far as it has been established in Western Canada, with the United States Federal farm loan act, the outstanding difference arises from the fact that the United States measure applies to practically every portion of the country, and is controlled by a federal body. In Canada, the Dominion parliament has not yet dealt with the idea, although a federal measure has been mooted in the press and at the late convention of the Liberal party in Winnipeg was adopted as one of the planks of its platform, but to date each province has been left free to provide some measure which may be effective within its own borders.

The next contrast, and one which must have an important bearing on the Canadian situation, arises from the fact that our provinces find the moneys needed for this purpose either by a direct obligation and pledge of the credit of the province, or by a guarantee of the bonds issued by their agricultural associations. In the United States, as I understand the act, the loanable funds are not supplied from the Federal treasury, nor are the bonds issued by the farm loan banks guaranteed by the country at large, unless, indeed, one is to treat the subscription by the United States of stock in the land banks to be in the nature of an indirect guarantee. In the United States it is evidently believed a market can be found for bonds secured by a deposit of farm mortgages, with the triple guarantee of the mortgagors themselves (up to the amount of their double liability on stock held) the Federal farm mortgage associations, and the Federal farm land banks.

Strain on Provincial Treasury.

The Canadian method involves, if it proves successful, a constantly increasing strain on the financial resources or credit of the provinces interested. Official records show that in Manitoba alone institutional mortgage investments aggregate $117,000,000, over one-half being credited to mortgage companies. Of this amount about $60,000,000 are represented by farm mortgages. Should the declaration of peace be followed by renewed immigration, this latter sum might easily be doubled within a few years. To care for even a fair proportion of that amount might embarrass the most sanguine of provincial treasurers.

A third difference is the absence in Canada of anything corresponding to the United States Federal land banks. These institutions are unnecessary under the plan adopted as the provincial farm loan boards (with the aid of governmental machinery and credit) can, over an area restricted by provincial boundaries, perform the functions which in the United States are divided between the Federal board and land banks.

Amortization not New.

Those of us whose business may be threatened by governmental competition will be thought to look with a jaundiced eye on the whole proposal. Were it not for the need of earning profits for our shareholders (and incidentally our salaries) there are some of us who would be only too glad to offer our borrowers all the advantages which are claimed by these governmental methods. There is not, and has never been, any difficulty about making farm loans on the amortization plan. As explained earlier, the custom of limiting the duration of mortgage loans to five years arose largely, [illegible], from the Dominion law so long in force.

whereby borrowers are entitled to pay off a long-time loan after five years. Lenders naturally felt that as this act did not give them the reciprocal right to call in their loans before maturity, or to repay their debenture-holders ahead of time, it was necessary to protect themselves by adopting a five-year term as one best fitted to meet the conditions imposed.

On the question of rates of interest, we naturally enough believe that in economical and efficient management the private corporation equals (if it does not excel) the best efforts of anybody subject to public (and perhaps political) control. This being so, an examination of the records of Canadian mortgage companies will show their stockholders have received, by way of dividend on capital invested, what approximates to the interest rate on mortgage investments current at the time. To take the case of the company with which I am most familiar, for the past 25 years all new issues of stock have been made at a premium of from 75 to 100 per cent. On this basis, the dividends paid during the same period have yielded on this new stock an average return of less than 5½ per cent., surely not an extravagant rate.

Distrust of Political Control.

Speaking, so far as one can, from an unprejudiced standpoint, I am inclined to believe the most serious criticism of the scheme arises from a deep-rooted distrust of the efficiency of public management of business affairs. Let us take it for granted that eventually the business in each province will attain such a volume that cost of management can be kept within the limit fixed either by the act itself or by the estimates upon which the enterprise is founded. Will those officials in charge be unhampered by politicians (1st) in their selection of what are or are not good loans, and (2nd) in their vigilant determination to collect payments as those fall due?

We have had in Canada an illuminating experience of what may happen when money is lent by the country at large. Early in 1915, following a year of drought in certain sections of our West, the Dominion government advanced over $12,000,000 for the purchase of seed grain and supplies for the distresed farmers. Providence rewarded this generosity with far the largest crop in the history of the country, and the war added hugely to its value, yet we find on June 30, 1917, more than one-half of the amount advanced remains uncollected.

Will the borrower in urban committees be content to pay higher rates of interest than his more fortunate neighbor on the farm? If not, will not his political influence force an extension of the plan into a field where the difficulties will be vastly increased?

Will the credit of the respective provinces remain unimpaired by the increasingly large sums to be supplied if the plan be successful and the country grows? May not the depreciation caused by an over-issue of bonds or extensive guarantees, force down the value of and raise the rate on all provincial bond issues, thus laying on its people a burden greater than the advantage sought?

Bonds Free of Taxation.

At the present moment 5 to 15-year bonds of any of these western provinces—direct obligations and charged on all their assets—both rural and urban—are offered in retail amounts to net the investor better than 6 per cent. After allowing for the cost of marketing it will appear that funds thus raised must cost the provincial governments concerned at least 6½ per cent. It, therefore, becomes clear, until some distinct change occurs in the money market, it will be impossible for western agricultural associations of their respective provincial backers, except at a loss, to carry on the business of mortgage lenders at the rate quoted.

As was to be expected in the initiation of an enterprise of this kind, where a government sets up a fully-fledged staff and department, the expense of administration cannot be met out of profits and must largely be charged against the general revenue of the country. Thus we see the provinces interested appropriating sums of from $10,000 to $[illegible] to cover these expenses with the expectation—perhaps a vain one—that in later years the outlay may be recouped from the profits of the association.

In addition to this direct financial assistance, the agricultural associations are exempt from those license fees or taxes which must be paid by other mortgage lending corporations, and, as stated above, their bonds are offered to the investor free from all provincial or municipal taxation save death duties.

CANADA LOSES LUMBER ORDER

Owing to the lack of bottoms to transport freight to Australia, British Columbia is losing orders for ten million feet of lumber, and the orders will be given to mills in Washington and Oregon States, says Mr. Neil Neilson, of San Francisco, trade commissioner for New South Wales, who is now in Vancouver.

SASKATCHEWAN'S POPULATION STATISTICS

The population of Saskatchewan on June 1st, 1916, was 647,835, of which 363,787 were males and 284,048 females, according to a bulletin of the census and statistics office, just issued. Compared with the population of 492,432 in 1911, this represents an increase of 155,403, or 31.55 per cent. in five years, or it marks a ten-year increase (1906-1916) of 390,072, or 151.53 per cent. The growth of the province during the quinquennium (1911-16) was, owing to the war, much slower than during the preceding one (1906-1911), when the increase was slightly more than 91 per cent.

The province has a total area of 251,700 square miles, of which 243,381 square miles is land and 8,329 square miles water, lake and river. The average number of persons to the square mile of total area was 2.57 in 1916, as compared with 1.96 in 1911.

The population (647,835) of the province was made up of 363,787 males and 284,048 females, as compared with 291,730 males and 200,702 females in a population of 492,432 in 1911. In 1916 there were 128 males to every 100 females. as compared with a ratio of 145.3 in 1911 and 145.5 in 1906.

From 1906 to 1911 the increase in the male and female population was practically level, being 90.93 per cent. for the former and 91.20 for the latter, as compared with a total increase of 91.05; whereas the ratio of increase from 1911 to 1916 in males was 24.70 per cent., and in females 41.52 and the total average increase for the five years 31.55 per cent. The falling off in the number of immigrants, consequent upon the outbreak of the war, is largely responsible for the smaller difference shown in the ratio of males and females, in Saskatchewan, in the last census as compared with previous ones.

There were 7 cities, 72 towns, and 302 incorporated villages in 1916, as against 4 cities, 50 towns, and 195 villages in 1911. Ten years ago there were four cities, 24 towns, and 70 villages. The town of Assiniboia and Shaunavon appear for the first time as separate incorporate entities.

In 1905, when the province was constituted, there were three cities, Regina, Moose Jaw, and Prince Albert. Saskatoon became a city in 1906. Weyburn and North Battleford were advanced to the status of cities in 1913, and Swift Current in 1914. There were also 12 incorporated towns in Saskatchewan in 1905. Of these, Moosomin, Whitewood and Wolseley were proclaimed towns previous to 1901.

In the five years 1911-1916 the city population of the province increased by 11,460, or 16.7 per cent., as compared with a gain of 47,683, or 229.5 per cent. in the five-year period 1906 to 1911.

One city and 18 towns show a smaller population in 1916 than was reported for them in the census of 1911. Eleven towns had a population of 1,000 or better, and of these two—Melville and Estevan—passed the 2,000 mark; while one—Yorkton—has exceeded 3,000 population. There are 10 towns with a population of less than 300. The village population of Saskatchewan has about doubled in the last five years, having risen from [illegible] in 1911 to [illegible] in 1916.

For every 1,000 males there were 963 females in Saskatoon, 913 in Regina and 880 in Moose Jaw. The female population exceeded the male in the towns of Carnduff, Estevan, Rosthern, Scott, and Watson.

In 1916 the province contained 150,721 families occupying 144,785 dwellings, or 104.09 families to every 100 dwellings, as compared with 118,283 dwellings occupied by 120,751 families, or 102.09 families to every 100 dwellings in 1911.

The population (79,921) of the cities in 1916 was distributed among 18,039 families occupying 15,918 dwellings, being at the average rate of 5.02 persons per dwelling and 4.43 per family. For every 100 dwellings there were 118.5 families in Regina, [illegible] in Saskatoon and 109.6 in Moose Jaw. The size of city families ranged from 3.90 in Swift Current to 4.60 in North Battleford.

Property Management

On account of inexperience, illness, absence, a desire to travel or the demands of other business, individuals may wish to be relieved from the responsibility of the management of property, including mortgages, real estate, securities, etc. In such cases, the management may be entrusted to our experienced care with the fullest confidence.

ONLY 14 PER CENT. INSURED

That is the Life Insurance Record Here—Institutional Advertising Proposed

Institutional, or co-operative advertising as it is sometimes called is, and must be considered as an educational propaganda, said Mr. J. H. Castle Graham, general secretary of the Life Underwriters' Association of Canada, at their annual convention at Winnipeg recently. "When we consider," he continued, "that life insurance companies distribute over $2,000,000 per day to the people of North America we can get some conception of its economic and beneficient relation to humanity. It is exceeded by none other. But the gains of the past are small compared with the possibilities. That the public has yet to grasp the magnitude of the business is evidenced by the fact that only about 14 per cent. of the insurable risks are covered in Canada.

"We must admit there is a better appreciation on the part of the public than formerly with regard to life insurance owing chiefly to the good work of the agents and the companies. But why should men of your calibre spend so much valuable time in giving courses of instruction to not more than two or three new prospects each per day when an appeal can be made to the millions through the use of printers' ink or by means of the bill-boards. This would indicate that the present method was slow, inefficient and expensive. And when we take into account the many hundreds of men holding a rate book who are not well enough versed, or competent enough to tell the story of life insurance, this makes the situation even worse.

Theme for Advertising.

"Life insurance is, after all, a simple proposition; the conservation of human life, or man's earning power, and is the only adequate offset to either. Is that not a great theme for an institutional advertising campaign?. There is no reason to believe that the people who respond so readily to advertising in other lines cannot be reached in paying numbers. For instance, the Lake of the Woods Milling Company spend annually about $125,000, and the United States Sugar Company appropriate $1,000,000.

"A letter was written by Mr. Charles Jerome Edwards in which he states that institutional advertising was a "monumental mistake" in as far as the National Association was concerned. His statement made great capital for one of our insurance journals. This led me to write to Mr. Edwards and his answer is as follows: My objection to Mr. Horner's scheme of institutional advertising is and was, to the method, not the idea. The original idea was that the companies should subscribe towards a plan of institutional advertising. . . . It was only after the companies declined to take up institutional advertising that Mr. Horner adapted the slogan to the Life Underwriters' Associations and life underwriters individually, although it was pointed out to him that it was impossible to either secure sufficient funds or to conduct a serious campaign through such channel.

Would be Successful.

"A letter to Mr. Everett M. Ensign, corresponding secretary of the National Association of Life Underwriters has drawn this reply: My opinion about the advertising campaign, planned along the lines outlined in your prospectus is summed up in a very few words. It will undoubtedly be a very great success. Summed up, the secret of a successful institutional advertising campaign lies in a common fund contributed from the offices of the companies.

"Let us make a brief survey of what a campaign will do: It will educate the public to the true function of life insurance; it will create a desire on the part of the public for life insurance by showing its adaptability to their many needs; it will prepare the road for the salesman making it unnecessary for him to be 'private tutor' to each and every one of his prospects; it will enable the agents to thus secure more business in less time and in this way lessen the cost of doing business; it will safeguard the business written by making sure that the policies are intelligently sold—the campaign would educate both the agents and the public in this regard. It will decrease lapsation by awakening in the public the strongest motives for buying life insurance and by keeping them continually 'sold'; it will raise the standard of the business and the life insurance agent in the eyes of the public once the public recognizes the service rendered by the agents and the companies; it will give increased confidence to the agent. It will educate the public in regard to taxation and insurance laws; it will make life insurance such a smooth-running machine as to make it inexpedient for any adverse influences to grow that might in any sense menace the business; it will bring out the keynote of 'service' upon which the business is founded; it will break down prejudice, dispel ignorance and substitute attention for indifference; it will create a spirit of altruism to replace the selfish spirit encountered by many agents in their canvass; it will enlighten the public as to the advantages of old line legal reserve life insurance as compared to fraternal insurance; it will open up for the companies the way for direct advertising, or intensive advertising, which would form a most productive field for individual effort.

Advantage to Companies.

"What will the companies and the agents get out of it, is a question often asked. The answer is simply this; they will get out of it a share proportionate to the efficiency of their sales organization or ability, as the case may be. To wit, the Bemis Brothers Bag Company started to advertise with the idea of getting the housewife to do her own baking. The result was that flour was sold in bags to the retailer instead of in barrels to the bakers. The Bemis people, although they did not sign the advertisements, declared that the campaign was a most successful one from their standpoint.

"There are certain assurances of success. First, a strong appeal can be made as evidenced by the advertising of some of our companies, and by the fact that over 260 banks in the United States advertised life insurance to secure a by-product in the shape of savings accounts. Second, the public are in a receptive mood due chiefly to the good work of the agents and the companies and to the strong appeals for the encouragement of thrift. A campaign launched now would take advantage of this favorable atmosphere and intensified thrift will doubtless be necessary for many years after the war. And then, laymen who have life insurance on realizing its value all say that there is nothing sold that the average person knows so little about and needs so much as life insurance. At this time, especially when people are realizing more fully the value of human life and the need for thrift, the subject of life insurance is bound to receive full consideration if brought to them in a constructive, educational, 'human interest' manner.

Would Produce Good Results.

"It is safe to say that with the unified action of the whole fraternity, a sane and properly conducted campaign would at least produce results commensurate with the great future of this business. As the public avoid insurance interviews so they avoid reading partisan advertising; therefore unified action is the only way to tackle and successfully combat the ignorance, prejudice and all forms of opposition to life insurance. Herein lies the scope of institutional advertising."

In support of his address Mr. Graham displayed some suggestions for newspaper and billboard advertising. Three of the posters were painted on canvass 25 feet by 10 feet being regular size.

UNITED STATES LOANS TO ALLIES

Further loans of $50,000,000 and $35,000,000 to Great Britain and $60,000,000 to France were made by the United States government recently. The total of all credits granted the Allies by that government now amounts to $2,466,400,000, of which Great Britain has received $1,190,000,000, and France $690,000,000.

ALBERTA FOOD CONTROL AND DUTIES

The Alberta food control committee have appealed to the food controller to make representation to the government for the establishment of a Dominion inland trade commission to oversee the relationships of producers, manufacturers and distributors, so as to insure greater fairness; for the reduction of import duties and the abolition of war duty on foods; a reorganization of the fishing industry under government control, so as to prevent waste and reduce prices; and to take greater care in the conservation of livestock used for food.

Investments by Experts

to yield 5%

The care and consideration given by the Company as an expert in the selection of security forms in itself a guarantee of safety for moneys invested with it on its Guaranteed Trust Investment plan.

The report on the security offered is made by experts in property values, who are salaried officers of the Company, not paid by commission. From their reports the Executive decides the amount to be loaned—seldom more than 50 per cent. of a conservative valuation. The investment of its client's money, thus made by the Company, is then further safeguarded by the Company's direct guarantee of both principal and income, the latter at the rate of 5 per cent. *per annum.*

These measures constitute an investment incomparably more secure than can be obtained by the ordinary investor who wishes to loan money on mortgage. Booklet, "Guaranteed Trust Investments," on request.

EQUITABLE MUTUALIZATION OPPOSED

Royal Trust Company of Canada and Sir William C. Van Horne Estate Ask for an Injunction

As briefly noted in *The Monetary Times* last week, the Royal Trust Company, of Montreal, and the executors and trustees of the estate of Sir William C. Van Horne have filed a bill of complaint in the United States District Court, strenuously opposing the mutualization of the Equitable Life Assurance Society, as proposed to the company by General T. Coleman du Pont, owner of 564 of the 1,000 shares forming the entire capital stock of the Equitable Society.

Judge Hough has heard arguments and accepted a brief from the complainants on an application for a temporary injunction to restrain the directors of the Equitable Life Assurance Society from taking any action toward the plan of mutualization. In the complaint the plaintiffs state that they are citizens of the United Kingdom, and reside in the province of Quebec, Canada. They state that the shares of the defendant society have commanded a price in the market vastly greater than their par value. That 502 shares of the stock were sold in 1905 for $2,500,000, 510 shares were sold in 1911 for $3,000,000, and that 564 shares were sold to P. Coleman du Pont in 1915 for $4,394,540, and that from time to time other shares have been sold in the open market for prices in excess of the price paid by du Pont in 1915 for the 564 shares.

Benefit to du Pont.

The brief filed, which Judge Hough is now considering, recites the vast benefit which would accrue to T. C. du Pont from the proposed plan of mutualization, and gives additional reasons why the mutualization plan should not be permitted to take effect. One of the schedules filed with the bill of complaint sets forth an agreement made between the Equitable Life Assurance Society and the Equitable Office Building Corporation, stating that the former is the owner and holder of a bond of the latter, dated April 24th, [illegible], for $20,500,000 and interest, secured by a mortgage on the Equitable building. This agreement provided for the payment of the principal sum of $20,5[illegible] and interest [illegible] until May 1st, 1974, when the last amount of the principal outstanding, with interest, should be liquidated. The brief shows the amount of money and other valuable considerations which it is proposed to turn over to T. Coleman du Pont for his 564 shares of stock, and sets forth the various points on which is based the claim of illegality of the proposed act. It is claimed that it is illegal to use the funds of the society for the benefit of one stockholder, or for any member of a corporation to sell his vote for anything of value, which it is claimed Mr. du Pont has done.

Mutualization Good Business.

In reply to the argument that "Mutualization is the order of the day," and that it would be "good business," Lord, Day and Lord, as counsel for the complainants, state that it is not shown that there has been any falling off in the business of the society, and that no facts have been advanced to show that the Equitable Life has suffered in competition with other companies. They further argue that the report of the committee shows that new business in 1916 exceeded the business of 1900 by upward of $100,000,000.

The bill of complaint asks that the defendant society, its officers, directors and all persons claiming to act under them, be enjoined from taking any steps to hold a meeting of the policyholders for the purpose of voting for or against the proposed plan of mutualization; that they be enjoined from submitting for the approval of the superintendent of insurance of the State of New York the proposed plan of mutualization and from taking any other or further steps to carry the plan into effect; and from executing or delivering to P. Coleman du Pont or his nominees any instruments in conformity of the plan of mutualization.

HAIL INSURANCE IN SASKATCHEWAN

Indemnities payable to claimants this year in the Saskatchewan Municipal Hail Insurance Association will total approximately $830,000, according to Mr. F. G. Hingley, general manager. About 7,000 claims were put in, against 11,000 a year ago.

NEW CREDITS OF $155,000,000

Canada Has Advanced $498,000,000 Since War Commenced

Further credits of $155,000,000 have been arranged by the Canadian government with the chartered banks for British purchases here of wheat, bacon and other meats. The total credits for munitions, wheat, cheese and meat purchases to date are now $598,000,000.

For immediate necessities of furnishing Canadian credits for British war purchase in Canada of bacon, meats, etc., and of wheat, $155,000,000 is needed. At a conference in Montreal last week with banking and financial interests arrangements were practically completed for bank advances of $75,000,000 to finance the bacon and meat purchases. Last Saturday the banks agreed to finance another temporary advance of $80,000,000 for wheat purchases.

Short-term Advance.

The banks will advance the money for the payment of the wheat at western points of delivery, and hold the wheat as security until it reaches the seaboard. At the seaboard the British government, through the Wheat Export Company, will accept the wheat and repay the banks. The credit thus advanced will thus be a short-term one, lasting about until December next, and gradually relieving the strain on the banks during the heavy financing period of the tardy crop movement. The increased circulation allowed the banks under the bank act during this period will doubtless be taken advantage of this year to the utmost. Some extra tens of millions of ready money will thus be made available towards meeting the eighty millions of advances.

Further Credits Later.

Later on, when the deposits begin to flow into the banks again from the farmers who have realized on their crops, the banks will be in a position to advance further credits, and the Canadian government may then be able to meet the wishes of the Imperial government and relieve it of the necessity of paying cash for wheat when delivered at the seaboard.

The temporary arrangement for partial financing of wheat purchases in Canada was agreed to by Lord Reading, representing the British government, during his recent conference with Sir Thomas White in Washington.

Eighty millions will finance less than forty million bushels of this year's exportable wheat surplus. After the new year a further credit of more than one hundred millions for wheat purchases will have to be arranged.

ONTARIO'S MINERAL PRODUCTION FOR SIX MONTHS

The following is a record of the mineral production of Ontario for the first six months of 1917:—

	—Quantity—		—Value—	
Product.	1916.	1917.	1916.	1917.
Gold, ounces	[illegible]	[illegible]	$4,822,740	[illegible]
Silver, ounces ...	10,267,743	10,073,787	6,188,269	7,584,439

[illegible]		[illegible]		715,012
			$25,886,052	$27,897,322

CANADA

“How Many of our Men are Liable to be Drafted?”

The Canadian business man is asking this question often, now that the Military Service Act is the law of Canada. A simple means of answering it at once is being provided.

Medical Boards are in process of formation throughout the country for the free physical examination of all men who apply. The first class liable to call includes all single men and widowers without children between the ages of 20 and 34 inclusive, all men married after July 6, 1917, being classed as single for the purposes of the Act. In a very short time, the average employer may learn how many of his staff are liable for selection. Those adjudged physically unfit will be given a certificate which will secure them exemption from any Exemption Tribunal. Those found physically fit may still apply for exemption on any ground. The employer will be given a chance to decide if he should seek exemption for any employee whose physical condition renders him liable for selection.

This early medical examination, which quickly decides if a man is liable for selection or not, is a feature of the operation of the Military Service Act calculated to appeal strongly to the business community. It assists in definite planning for the future, enabling an employer of labor to learn at once what men will be left at their work and those who may be removed for military service. Haphazard withdrawals, the nightmare of business men of method and precision, are insured against by this timely arrangement.

Every employer of labor will find it to his advantage to note carefully the formation of Medical Board in his locality and to be sure that his employees secure as early as possible this very important information as to their status under the Military Service Act.

Issued by
The Military Service Council.

Finance.—A useful pamphlet, containing records of manufacturing costs, business organization, relation of stock market to business activity and various other valuable hints for the world of finance, illustrated by up-to-date charts. "Graphic Charts for the Business Man," by Stephen Gilman, C.P.A. Published by the La Salle Extension University, Chicago, U.S.A.

CANADIAN FINANCIERS TRUST COMPANY

The Canadian Financiers Trust Company was incorporated in 1907 under the Companies Act of British Columbia as "Canadian Financiers, Limited," to carry on a trust and general financial business. In 1914, when the Trust Companies Act of British Columbia was passed to restrict and regulate the operations of trust companies and confine the business carried on by them to purely non-speculative transactions, the company abandoned many of its powers and was the first company to comply with the new conditions and obtain the registration made necessary by the act, receiving Certificate No. 1. This necessitated a change of name to its present title "Canadian Financiers Trust Company." It is, however, still a limited liability company with nearly 400 shareholders resident in Canada, the United States, and Great Britain. The business undertaken includes the following:—Trusts and executorships; liquidator and receiver of companies and assignee of estates; real estate and rental departments and the management of estates; agents for investment or funds in mortgages, bonds, and Dominion, provincial and municipal securities; agent for other companies; fiscal agent for municipalities; insurance department, and savings department.

Among the companies represented are the following:—Fidelity (fire) Underwriters of New York; Continental Life Insurance Company of Toronto; Ocean Accident & Guarantee Corporation of London, England; American Express Company; and the Canadian Express Company. The company is the business agent for the Roman Catholic Archdiocese of Vancouver, and other important corporate and private interests. The general manager is Lieut.-Col. G. H. Dorrell.

SHIPBUILDING AT THREE RIVERS

The consulting engineer and vice-president of the Three Rivers Shipyards, Limited, at Three Rivers, Quebec, is Mr. W. T. Donnelly, a naval architect and engineer. He has been acting in an advisory capacity for the United States government in dealing with the submarine danger. He was the designer and builder of the 20,000-ton wooden dry dock at Prince Rupert, B.C., at a cost of $3,000,000, the largest dry dock on the Pacific Coast. He is the inventor of an unsinkable wooden vessel, which is now under consideration by the United States government, and has also devised a method of rendering steel vessels unsinkable, which he hopes to see adopted by the allied countries shortly.

Speaking of Three Rivers, Mr. Donnelly says:—"If there is one logical spot, or one city more than another, in the eastern part of Canada, where wooden ships can be built to advantage, as well as economically, that place is Three Rivers. Situated as it is on the St. Lawrence River, backed up by thousands of miles of timber land, possessing abundant and cheap electric power, where hundreds of hands are only waiting and eager to take up again the adz and the maul, and take their place in this revived trade of wooden shipbuilding, which formerly was a common occupation around Three Rivers. Three Rivers seems destined to become the new home of wooden shipbuilding, at least in the eastern part of this country."

The company has an order from the Imperial Munitions Board, to construct two wooden cargo vessels. The vessels will be 268 feet long, 43 feet 6 inches beam, 27 feet deep, and 2,900 tons deadweight.

Whilst the large timbers required in the construction of these vessels, will at first be brought from British Columbia, it is expected that the native timbers of the east will be utilized later, when timbers of sufficiently large size will be brought out of the forests of the district. This will furnish a new use for Quebec's large timbers, whilst increasing considerably, its already large lumber industry.

FIGURES OF COST OF LIVING

The index figures of the Department of Labor Ottawa, for August show an advance in both wholesale and retail prices. In wholesale prices the department's index number reached 245.0 for August, as compared with 242.6 for July, 180.7 for August last year, and 134.6 in July, 1914.

In retail prices the average cost of the weekly family budget of staples in sixty cities was $11.68 at the middle of August, as compared with $11.62 in July, $11.89 in June, and $8.63 in August, 1916. The increases for the month appeared in salt pork, bacon, eggs, milk, butter, rice, beans, evaporated apples, prunes, sugar and tea. There was no great advance in the average for any of these commodities, while potatoes averaged ten cents per peck lower than in July. In fuel, coal, and wood prices were higher.

Only one new strike was reported to the department in August, and this strike and four of the thirteen disputes carried over from the previous month were adjusted. Seventy firms and 1,941 employees were affected by disputes in existence during the month, with time losses estimated at 21,568 days.

Six changes in wages, affecting approximately 2,600 employees, were reported during August, as compared with eighteen changes, affecting approximately 5,394 work people, in July. All the changes were increases in wages.

GOVERNOR-GENERAL VISITS NORTHERN ONTARIO

This week, the governor-general is spending in Northern Ontario as the guest of the Temiskaming & Northern Ontario Railway. The governor-general's party left Ottawa on Sunday last and arrived at Cobalt on Monday. To-day they are making a daylight run from Cochrane to Temagami, making a stop at the Experimental Farm at Monteith. Addresses of welcome have been presented all along the line.

A handsome souvenir booklet of the trip has been issued and contains some interesting information regarding the mineral wealth along the Temiskaming and Northern Ontario Railway. Mr. Arthur A. Cole, the railway's mining engineer, points out in this pamphlet that the Ontario government's railway forms a main artery from which prospecting activity takes its start. Thus along the Temiskaming and Northern Ontario Railway from Cobalt to Porquis Junction, a distance of 125 miles, it was noticeable this year that there was hardly a station from which some mining operations were not being carried on. Then the water routes radiating in all directions from the railway, make transportation comparatively easy to prospectors and they also supply power in abundance for the development of the mines.

The Ontario government railway was originally projected as a colonization railway, but the finding of rich mineral lands in the country traversed opened it up much more rapidly than would otherwise have been the case. The happy combination of mineral and agricultural land in the district is of the greatest benefit to both, furnishing a cash market to the farmer at his door. New districts are being reported from time to time and the older districts are looking better as work proceeds.

The established mining camps form nuclei from which prospecting parties are sent out. Thus the finding of Porcupine may be directly attributable to the Cobalt Camp, and it was due to the exertions of men from these camps that important discoveries have been made along the Transcontinental Railway and also in Northern Manitoba.

"Anyone who looked over the unbroken forest of Northern Ontario a dozen years ago," says Mr. Cole, "and predicted that this district would soon be producing over 20 millions in gold and silver annually would have been put down as a fantastic dreamer, but that figure is surpassed to-day by three million dollars and the output is continually increasing. And yet, only a small portion of the country has been prospected. Running north-east and north-west from Cobalt and extending to the Arctic Ocean is the great Pre-Cambrian Shield, the basement formation of the continent. It contains thousands of square miles and offers to prospectors better chances of locating valuable mineral deposits than can be found in any other country in the world."

The Temiskaming and Northern Ontario Railway is operated by the following commission: J. L. Englehart, chairman; G. W. Lee; W. H. Maund, secretary-treasurer; A. A. Cole, mining engineer; W. A. Griffin, superintendent of traffic; S. B. Clement, chief engineer and superintendent of maintenance; A. J. Parr, general freight and passenger agent.

TORONTO'S SOLDIERS' INSURANCE

The amounts which Toronto has paid out on account of soldiers' insurance up to September 20th are as follows:—

Paid by city directly, prior to 1917, $398,000; during 1917, $1,003,000; paid to companies as premiums previous to 1917, $741,038; premiums during 1917, $105,685; total cost to city, $2,247,723. This large sum, practically two and one-quarter millions of dollars, will be largely increased before the end of the year. Here are the details in connection with soldiers' insurance to date:

Premiums paid to companies during 1917: Metropolitan Life, $63,643; Aetna Life, $42,042.

Premiums paid to companies previous to 1917: Metropolitan Life, $610,884; Aetna Life, $91,646, State Life, $38,506.

Claims paid during 1917: Metropolitan Life, 195, $195,000; Aetna Life, 55, $55,000; State Life, 15, $15,000; City of Toronto, 1,003, $1,003,000.

Claims paid previous to 1917: Metropolitan Life, 538, $538,000; Aetna Life, 58, $58,000; State Life, 4, $4,000; City of Toronto, 398, $398,000.

Toronto is now putting through $1,000 insurance claims for slain soldiers at the rate of about 100 a week. That rate may not be maintained, but for the past week or two the civic authorities have been passing claims at this rate. If that pace were maintained for a year it would mean $5,200,000 out of the city's chest. The city has so far undertaken to insure 43,500 Toronto soldiers—a total risk of $43,500,000.

Another point that is being urged against insuring drafted men is that the whole purpose of the civic insurance scheme was to encourage voluntary enlistment.

SENDING CATALOGUES ABROAD

Regarding the sending of catalogues, circulars and other trade literature abroad, Mr. Harrison Watson, Canadian trade commissioner, London, writes to the department of trade, Ottawa, as follows:—

"Although actual transactions are almost impossible under existing circumstances, it is a favorable time for Canadian exporters to investigate the possibilities of business in this country with a view to the return of normal conditions.

"It is therefore gratifying to note that quite a number of Canadian manufacturers are approaching this office in this connection.

"As, however, in nearly every case, only a single copy of the catalogue, price list or illustrated sheet has been transmitted, it should be pointed out that this is quite insufficient for the purpose in view.

"In practically every instance a number of different firms have to be consulted, and as it is not only necessary to place the printed matter before each firm, but moreover any prepared to interest themselves in the goods almost invariably wish to permanently retain the lists, etc., a single copy is wholly inadequate, and greatly hampers the prosecution of the inquiry, while the necessity to write for a further supply causes a great delay.

"Canadian correspondents, when consulting this office and also those of the other trade commissioners, are recommended to forward say half a dozen copies of their printed matter, except of course in cases where the catalogue is an expensive work, and the same applies to samples, the supply of which shoud be sufficient to furnish information to a number of people.

"It should also be mentioned that ordinarily United Kingdom buyers, almost without exception, insist upon prices being c.i.f. United Kingdom ports, and while it is difficult and almost impossible for Canadian shippers to give this information with the existing dislocation of shipping—and indeed the particulars would in most cases be useless because actual business is impossible—Canadian firms should make a point of quoting f.o.b. Canadian seaports, while it would be extremely advantageous for them to name the rate of freight to this country previous to the war, because this information enables firms here to make a comparison with rates of freight which were obtainable from competitive sources of supply at that time."

HOW WHEAT PRICE WAS FIXED

Mr. H. W. Wood, member of the Board of Grain Supervisors for Canada and president of the United Farmers of Alberta, issued a statement this week to the members of the latter organization giving the details on how the fixed price on Canadian wheat was arrived at and the details of the system.

It was absolutely necessary to set a price on wheat that would stimulate the greatest production of wheat, even over that of other grains, said Mr. Wood. Each member of the board arrived at the figure of $2.25 independent of the other members, but the board could not act until such time as the United States fixed their price, the co-operation with that country being absolutely necessary. While the board was delayed in taking action for that reason, the wheat in the meantime was all in the hands of the manipulators, who proceeded to take advantage of the situation and launch a wheat boom.

In the meantime the farmers who had any wheat on hand tried to get it on the market on the $2.40 basis. This was aggravated by some irresponsible parties. The $2.40 price is the highest price that has been fixed by any authority in the Empire. He found there was some justification for the objection raised by some grain producers that other commodities should have carried a fixed price before wheat, but these are not sufficient to leave the wheat market uncontrolled. The fixed price eliminates all waste between producer and consumer.

With prices unregulated the allied governments would have been seriously, if not disastrously, crippled, and the consuming public would have suffered great hardships. Wheat is the base of the food supply of the world.

SUCCESS OF THE EXPORT ASSOCIATION OF CANADA

It is a hopeful sign that there is at least one organized effort being made by Canada to prepare for after-the-war trade, and that it is meeting with considerable success.

We refer to the Export Association of Canada, whose general manager, Mr. R. J. Younge, of Montreal, has just returned from a trip of investigation through South Africa. Mr. Younge spent nearly four months in the large buying centres of the South African Union, and came into personal contact with the majority of the large merchant houses, the banks, the South African railways and a large number of leading manufacturers' agents. As a result of his visit the number of Canadian manufacturing firms actively represented in South Africa will be largely increased, and there are excellent prospects for a large volume of business with Canada after the war.

Two prominent business men from South Africa accompanied Mr. Younge on his return to Canada for the purpose of connecting up with Canadian sources of supply. This interchange of visits, securing information and studying conditions at first hand, building up a personal knowledge of demand and supply, are sound methods for establishing export business.

Mr. Younge reports that he found everywhere throughout South Africa the friendliest feelings towards Canada. The actual British preference of 3 per cent. is enhanced by a universal desire on the part of the big buyers to make their purchases within the Empire—and they are not slow in expressing their whole-souled preference for British products.

Previous to the war South Africa was an important customer of Germany. Many of the lines purchased from that country can be supplied by Canada. Under the new conditions Canada's strongest competition will come from the United States, Great Britain, Japan and Sweden. Handicapped as the majority of these countries are by the war, Canadian firms who are sufficiently energetic to introduce their lines at the present time, will reap an enormous advantage when the war is over.

Mr. Younge speaks in the highest terms of the splendid service being rendered to Canada by Mr. W. J. Egan, the Canadian Trade Commissioner in South Africa. Mr. Egan brings to bear on behalf of Canada a wide business experience with an earnest desire to secure the best results for Canadian commerce, and he commands universal respect and esteem throughout the entire Union.

NEW WAR LOAN IS TAKING SHAPE

Five and Half Per Cent. Bonds at or Near Par Will Be the Issue

Preparations for the next domestic war loan, the fourth to date, are well in hand. Last week a statement was issued at Ottawa forecasting the issue of a 5½ per cent. bond at or near par." Investors, large and small, are now guessing what the exact rate will be. The predictions vary from 5.55 per cent. to 5.65 per cent. The Ottawa statement said: "The suggestion has been made in several quarters that a 5½ per cent. bond at or near par would be most acceptable to Canadian investors on the coming loan. Different classes of investment funds would unquestionably be attracted to the issue if a choice of a short maturity and a long maturity was given to prospective buyers. At the same time this would undoubtedly be a factor in helping to increase the number of individual subscribers to the issue, which is most essential.

Should Get Good Reception.

"Should an issue containing these terms materialize little doubt is felt that the Canadian public would accord it a most hearty reception, and once more give clear evidence of Canada's position, economically and internationally, by a substantial over-subscription of the loan."

The minister of finance held a series of meetings last week in connection with the organization of the campaign for the forthcoming war loan. These meetings were attended by representatives of the Canadian Bankers' Association, the Canadian Press Association and advertising agencies, the Canadian Bond Dealers' Association, and the Toronto and Montreal stock exchanges. Committees of these several organizations are being constituted to co-operate with the finance department in connection with the issue.

The loan arrangements are beginning to take definite shape. At present it is probable that the issue will be one of $150,000,000 5 and 10-year 5½ per cent. bonds, to be sold at or near par, free of federal income tax, and instalment payments spread over about three months.

War Loans to Date.

An idea of the large total of the war loans already financed by the Canadian government is given in a statement just compiled showing the separate loans, apart from the British loans, during the first few months of the war. In 1915 the three loans negotiated totalled $170,000,000. In 1916 there were two loans totalling $175,000,000. This year there have been already two loans totalling $250,000,000. The aggregate is $595,000,000. The cost of flotation has totalled a little more than $9,000,000, of which nearly $6,500,000 is chargeable to the three New York loans, aggregating $220,000,000.

WHAT NAME FOR WAR LOAN?

Great Britain's last big war issue was the Victory loan and that of the United States the Liberty loan. What shall we name Canada's next war loan?

Mr. H. H. Groff, manager of the Simcoe, Ontario, branch of the Molsons Bank suggests that an appropriate title to the new issue would be "Win the War Loan."

WORLD'S WHEAT CROP

The world's wheat crop this year for the principal countries which have reported, including the United States, is 1,665,489,000 bushels, an increase of 3.3 per cent. over 1916, according to reports from the International Institute of Agriculture at Rome.

The world's barley crop is 464,289,000 bushels, an increase of 2.4 per cent.; the rye crop 89,950,000 bushels, an increase of 10.7 per cent.; the oats crop 1,995,504,000 bushels, an increase of 19.9 per cent., and the corn crop 3,273,996,000 bushels, an increase of 25.3 per cent.

Algeria, the latest country to report, shows wheat production of 29,715,000 bushels, an increase of 1.9 per cent. over last year. Her oats crop is 18,946,000 bushels, an increase of 44.2 per cent., and her barley crop 33,208,000 bushels, a decrease of 7.7 per cent.

CONSERVING CANADIAN TRADE

A special senate committee with Senator Nicholls as chairman, appointed to inquire into and report upon the best method or methods of conserving and increasing Canadian domestic and overseas trade, have presented their second report. The committee has had under consideration for its first objective the best means of meeting the needs of Canadian trade after the war, with particular reference to securing orders for overseas trade to replace in part the great volume of orders that during the war have been received for war munitions and supplies, and the financing of large overseas contracts.

The committee are of the opinion that the organization of a trade bank to be known as the Canadian Trade Corporation would best meet the object.

The government of Great Britain has granted a royal charter to a trade bank known as the British Trade Corporation, having for its object amongst others the following:—

(a) To afford advice and financial assistance to British commercial and industrial undertakings and generally to further the development of British trade, industry and commerce.

(b) To assist in obtaining orders from abroad for British manufacturers and traders and to grant financial facilities for the execution of such orders.

(c) To acquaint themselves with the conditions of trade and with the business requirements of all countries of the world and to enter into banking arrangements with such countries with colonial and British foreign banks, or where necessary to open up branches in such countries.

(d) To establish, equip and maintain information bureaus in close touch with the Department of Commercial Intelligence of the Board of Trade for furnishing British merchants or manufacturers and the business community generally with reliable data and information upon openings for trade, new contracts, state and other loan and issue proposals, and generally upon all matters relating to foreign trade and business, [illegible] organization of industrial projects.

(e) To act as an agent for carrying through overseas commercial and financial transactions in which His Majesty's government may be interested and to receive official recognition and assistance.

UNION INSURANCE OF CANTON IN CANADA

The Union Insurance Society of Canton, Limited, incorporated in Hong Kong in 1835, has entered Canada. Mr. C. R. Drayton, formerly manager of the Vancouver Financial Corporation, has been appointed Canadian manager, with head office in Toronto. Mr. F. G. Parker, formerly insurance manager of the Franco-Canadian Trust Company, has been appointed superintendent of agencies.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

WANTED a Fire Insurance Inspector for a Tariff Company, principally for Ontario and the North-West Provinces. All applications treated confidentially. Apply Box 109, *The Monetary Times*, Toronto.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

The Cost of Smoking

Do you know that the cost of your two or three cigars—say a quarter a day---will maintain about $4,000 of life assurance for a man between 25 and 30?

You can afford to smoke, sure! But you can also afford an Imperial Life Policy to provide for your wife and little ones should death call you suddenly. For particulars write to

"This is the need of Mexico to-day—opportunity to labor, opportunity for the family, opportunity for food, clothing, better shelter, and better social conditions.

"And this is exactly what Canadian, American and European capital and organization have brought to Tampico, attracted by its underground wealth, and this is what will ultimately redeem Mexico and forward her people by industrial opportunity."

The Ontario Loan and Debenture Co.

Dividend No. 121

Notice is hereby given that a QUARTERLY DIVIDEND of 2¼ PER CENT. for the three months ending 30th September, 1917, (BEING AT THE RATE OF 9 PER CENT. PER ANNUM) has been declared on the paid up capital stock of this Company, and will be payable at the Company's Office, London, Ontario, on and after the 1st October next, to Shareholders of record of 15th September.

By order of the Board.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended September 21st, 1917:—

Temiskaming Mining Company, 63,827; Penn Canadian, 42,015; Hudson Bay, 65,960; Nipissing Mining Company, 570,185; McKinley-Darragh-Savage, 223,467; Dominion Reduction Company, 172,000; La Rose, 191,566. Total, 1,329,020 pounds, or 664.51 tons.

The total shipments since January 1st, 1917, now amount to 23,674,778 pounds, or 11,837 tons.

NATIONAL TRUST & CANADIAN NORTHERN RAILWAY

That Canadian Bank of Commerce owns less than 9 per cent. of the total shares of the National Trust Company, and that National Trust is not interested directly or indirectly in the stock of the Canadian Northern Railway, is the statement made by Mr. W. E. Rundle, general manager of the latter institution. Mr. Rundle's statement and the reasons that prompted it are contained in the following letter addressed to the Morning Leader, of Regina:—

"My attention has just been called to an editorial relative to the proposed purchase by the Dominion government of Canadian Northern Railway shares, which appeared in your paper on August 25, in which the following assertion is made:

" 'Hence the Canadian Bank of Commerce and all its subsidiary interests, as, for instance, the National Trust Company, of which Sir Thomas White was vice-president and general manager prior to being pitchforked by the big interests into the finance portfolio in the Borden Cabinet, are deeply interested in having a good round price paid by the Canadian people for this worthless stock now lying in their vaults as an asset.'

"I desire to inform you that the National Trust Company does not now own, either directly or indirectly, nor has it ever owned directly or indirectly a share of stock in the Canadian Northern Railway, nor has it ever advanced any money directly or indirectly upon the security of any such shares.

"I further desire to inform you that your suggestion that the National Trust Company is a subsidiary organization of the Canadian Bank of Commerce, is also incorrect. The shareholdings of the bank are a small percentage—less than 9 per cent.—of the total shares of the National Trust Company and never have been any greater."

STEEL PRICE FIXED AT $58 A TON

Steel prices agreed upon by the United States government and producers were announced on Monday as follows: Steel bars at Pittsburgh and Chicago $2.90 per hundredweight. The recent price was $5.50. This is equivalent to $58 a ton. The Street has talked of $68 a ton for some time back.

Netting reductions in steel prices of from 50 to 70 per cent., President Wilson approved an agreement between the war industries and the steel men for figures on steel and its products. The prices become effective immediately, subject to revision January 1, 1918. They are:—

Iron ore, basis, Lower Lake, new price, $5.05 gross ton, recent price, $5.05 gross ton; coke, basis, Connellsville, new price, $6 net, recent price, $16 net; pig iron, basis, Connellsville, new price, $33 gross ton, recent price, $58 gross ton; steel bars, basis, Pittsburgh and Chicago, new price, $2.90 cwt., recent price, $5.50 cwt.; shapes, basis, Pittsburgh and Chicago, new price, $3 cwt., recent price, $6 cwt.; plates, basis, Pittsburgh and Chicago, new price, $3.25, recent price, $11.

Other prices agreed upon, all subject to revision January 1, 1918, but to become effective immediately, follow: Iron ore, basis, lower Lake Ports, price agreed upon, $5.05 gross ton, no change; coke, Connellsville, price agreed upon, $6 net ton, recent price, $16 a ton, a reduction of 62.5 per cent.; steel plates, basis, Chicago and Pittsburgh, prices agreed upon, $3.25 cwt., recent price, $11 cwt., a reduction of 70.5 per cent.; pig iron, price agreed upon, $33 gross ton, recent price, $58 net ton, a reduction of 43.1 per cent.; steel bars, Pittsburgh and Chicago, basis, price agreed upon, $2.90 cwt., recent price, $5.50 cwt., a reduction of 47.3 per cent.; steel shapes, basis, Chicago and Pittsburgh, price agreed upon, $3;

ANALYSES OF FIRE CAUSES

Mr. Garrett B. James, assistant chemical engineer of the Underwriters Laboratories, Chicago, has made a report on the fire prevention phases of oil storage, in the quarterly of the National Fire Protection Association. An examination of the records of the oil fires in the south-west shows that 99 per cent. were due to lightning, and of the total losses 32 per cent. occurred during the month of August, when lightning storms are most numerous. He recommended as the most effective means of reducing the fire hazard of oil in steel storage tanks the equipment of such tanks with gas-tight steel roofs. The use of a tenacious foam solution was endorsed as the most efficient extinguisher for oil tank fires once started.

The National Fire Protection Association has made a tabulation of fires in warehouses and storehouses, with cotton, wool, tobacco warehouses and cold storage plants excluded. The report covers 834 fires, of which 294 were due to causes common to all risks, and 91 to the special hazards of the line, while 39 were incendiary and 30 were due to exposure. Forty-five per cent. of the fires were attributed to unknown causes. Of the known causes, spontaneous combustion of stock led with 12.6 per cent., followed by smoking, with 10.4 per cent. Automatic sprinklers were unusually valuable in warehouses, where there is more than the usual likelihood of delay in discovering a fire and where the presence of closely packed goods may hamper the work of the firemen. Comparatively few of these risks are sprinklered, however. Of 205 sprinkler fires reported, the equipment worked satisfactorily in 68.8 per cent. of the cases, held the fire in check in 2.49 per cent., and was unsatisfactory in 6.3 per cent.

BANK CLEARINGS

The following are the bank clearings for the weeks of September 21, 1916, and September 22, 1917, respectively, with changes:—

	Week ended Sept. 22, '17.	Week ended Sept. 21, '16.		Changes.

Totals	$219,464,649	$200,708,761	+	$18,755,888

The Toronto bank clearings for the current week are $56,829,091, compared with $48,339,996 for the same week in 1916, and $33,881,818 in 1915

Mr. George B. Woods, of Toronto, president of the London and Lake Erie Railway, an electric line running between London and Port Stanley, informed a committee of the city council this week, that his company is willing to accept 60 cents on the dollar of the bonded indebtedness of the road, or $505,000 for the railway. Failing this, he said, the road will be "scrapped" immediately, and its equipment disposed of. The committee referred the offer to the London Railway Commission for a report.

COST OF QUEBEC BRIDGE

It is Estimated at $17,000,000—Some Interesting Figures Concerning the Structure

The placing of the centre span of the Quebec bridge last week practically completes the structure. The bridge, which will carry the main line of the National Transcontinental Railway across the St. Lawrence River near Quebec city, is the most remarkable steel structure ever built. Enterprising citizens of the city of Quebec advocated a bridge across the St. Lawrence River, near Quebec, as early as 1852, the cost then being estimated at $3,000,000. In 1882 a charter to construct the bridge was obtained by Mr. M. W. Baby, of Quebec, and two years later a design was submitted to the Quebec board of trade for a bridge at about the present site, but nothing was ever done until 1900, when the company was reorganized as the Quebec Bridge and Railway Company and undertook a Dominion government contract to build the structure. The south cantilever arm of the first bridge collapsed on August 29th, 1907, with a loss of 70 men and about $8,000,000.

After the accident a commission was appointed to report on its causes. The members of that commission were Messrs. J. G. G. Kerry, Henry Holgate and the late Dean Galbraith, of Toronto University. After their report the government decided to reconstruct the bridge, and in 1908 appointed a board of three engineers to prepare plans. The board consisted of Messrs. H. E. Vautelet (chairman), Ralph Modjeski and Maurice Fitzmaurice, chief engineer of the London (England) county council.

Contract to St. Lawrence Company.

After studies lasting about a year, the idea of inclined planes for the trusses was abandoned, and Mr. Fitzmaurice, who was a staunch advocate of the Forth type of bridge, resigned. He was temporarily succeeded by Mr. McDonald, and when bids were called, Messrs. Hodge and M. J. Butler were called in as consultants. Four out of the five recommended that the St. Lawrence Bridge Company's tender be accepted. Mr. Vautelet did not favor that firm's method of erection, and resigned from the board, being succeeded by Colonel Monsarrat. Mr. McDonald, having agreed to act only until the bids were decided upon, asked to be relieved of his duties and was succeeded by Mr. C. C. Schneider, of New York. Mr. Schneider died not very long after his appointment, and was succeeded by Mr. H. P. Borden.

The board of engineers, under direction of Mr. Vautelet, made exhaustive studies of various possible designs, both suspension and cantilever. Tenders were called on cantilever designs with invitation to submit alternative tenders on the bidders' own designs. One German, one English and one United States firm bid on the board's designs, but the St. Lawrence Bridge Company bid only on their own alternative K-truss designs and received the contract.

The St. Lawrence Bridge Company, Limited, of Montreal, was incorporated August 5th, 1910, to construct the Quebec Bridge. The company undertook no other contract excepting for the manufacture of some 9.2 and 6-inch shells. Its shops are located at Rockfield, Que.

The authorized capital stock is $3,000,000, half of which was subscribed for by the Dominion Bridge Company and half by the Canadian Bridge Company. Poor's Manual of Industrials says: "Paid in to May 31st, 1917, $2,750,000. Shares, $100. Annual meeting, third Thursday in May at Montreal. Stock closely held."

The directors are Messrs. Phelps Johnson, Chas. Cassils, G. H. Duggan, F. L. Wanklyn, J. F. Weber, F. C. McMath, Willard Pope and B. S. Colburne. The officers are Messrs. Phelps Johnson, president; Chas. Cassils, vice-president; J. F. Weber, secretary-treasurer; and W. P. Ladd, superintendent.

Some Interesting Statistics.

The Canadian Engineer, of Toronto, which last week published an unusually interesting issue dealing with the bridge and the lifting of the span, gives the following statistics regarding the structure: Lengths—Length of suspended span, 640 feet; length of cantilever arm from centre of main pier to end of cantilever, 580 feet; centre to centre of main piers, 1,800 feet; centre to centre of anchor piers, 2,830 feet; centre of main pier to centre of anchor pier, 515 feet; first north approach span, 110 feet 7 9-16 inches; second north approach span, [illegible] feet [illegible] inches; south approach span, 140 feet 4 3-16 inches.

Quantities and weights: Timber in south main pier, 3,845 cubic yards; concrete in south main pier, 24,050 cubic yards; masonry in south main pier, 10,385 cubic yards; timber in north main pier, 5,450 cubic yards; concrete in north main pier, 16,480 cubic yards; masonry in north main pier, 9,940 cubic yards; concrete in south anchor pier, 2,135 cubic yards; masonry in south anchor pier, 14,279 cubic yards; concrete in north anchor pier, 1,123 cubic yards; masonry in north anchor pier, 17,954 cubic yards; steel in main anchorage, each anchor pier, 732,000 lbs.; steel in wind anchorage, each anchor pier, 58,000 lbs.; four main shoes weigh about 450 tons each; four main posts, 10 feet square, weigh about 1,200 tons each; pins at shoe connection to bottom chord and main post are 45 inches diameter Weight, 12 tons each, including sleeve; weight of each anchor arm inclusive of main posts, 17,000 tons; weight of each cantilever arm exclusive of main posts, 12,000 tons; weight of suspended span, erected complete, 6,000 tons; weight of approach spans, 1,500 tons; anchorages, 790 tons; total structural steel received at bridge site for the structure, exclusive of rails and reinforcing steel in sidewalk, 133,310,570 lbs., or 66,655 tons.

Cost of Bridge.

The cost of the new bridge is estimated at approximately $17,000,000. The estimated total cost of the first Quebec bridge and the new bridge, including interest on all moneys expended, is estimated at about $35,000,000. This figure has been variously estimated by different authorities. Mr. W. F. Tye, consulting engineer, places it as high as $40,000,000. The contractors for the superstructure were the St. Lawrence Bridge Company, Limited, and the contractors for the substructure, Messrs. M. P. and J. T. Davis, Quebec. The contract for the superstructure was let in 1911 and work on the substructure was started in December, 1911. The work of constructing the cantilever and anchor arms of the bridge progressed rapidly and without accident, and just about a year ago, on September 11th, 1916, an effort was made to hoist the central span. Due to the failure of a casting, the span was lost, twelve men being killed. A new suspended span was erected at a cost of about $800,000, and was successfully hoisted 150 feet into place last week. The hoisting of this span was practically the last, and certainly the most difficult, stage of the erection of the world's largest cantilever bridge.

TOO MUCH WATER IN BUTTER

The laboratory of the inland revenue department, Ottawa, has just issued a report upon 228 samples of butter, procured by their inspectors during January, February and March of the present year. This collection was made in consequence of many complaints, suggesting the extensive sale of oleomargarin as butter, or as a butter substitute. Not a single sample of the article was obtained by the inspectors; although this may not be held as conclusive proof that oleomargarin is entirely absent from our markets. Another complaint to the effect that excessive amounts of water were frequently incorporated into butter, appears to be substantiated by the fact that seven samples contained decidedly more water than the 16 per cent. fixed as a maximum permissible limit; while sixteen other samples nearly reach, or slightly exceed this limit.

Legal butter should contain approximately 82.5 per cent. of milk fat. Slightly less than this amount may be present in samples of butter which contain maximum, or nearly maximum amounts of water, salt and curd; but as a rule, the defection does not exceed one or two per cent.

Thus nearly 90 per cent. of the samples (138 in number) collected in October, November and December of 1915, contained at least 82.5 per cent. fat, many of them considerably exceeding this limit. Of the present collection, representing 228 samples, 187 samples contain at least 82.5 per cent. of fat (82 per cent. of the total collection).

Since milk fat is the most valuable constituent of butter, it is important that any deficiency below 82.5 per cent. should be small. Six samples show deficiencies varying from 5 to 12 per cent. of fat. No admixtures or substitutions of foreign fats, instead of milk fat, occurred.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Mining Corporation of Canada.—The stock of the company, at present the largest producer in the Cobalt camp, was listed on the Standard Mining Exchange this week, and found buyers at $4.35. The par value of the shares is $5. The company pays dividends of fifteen per cent.

Ophir Mining Company.—The capital of the company has been increased from $1,000,000 to $1,500,000. It was stated at a recent meeting that sufficient of the new treasury stock had already been underwritten to provide for uninterrupted development of the property for the next year.

British Columbia Fishing & Packing Company, Limited.—During the season of 1917, the company packed 250,000 cases, which represents a good pack, especially at prices that now prevail. This compares with 193,000 in 1916; 286,000 in 1915, which was regarded as the big year, and 208,000 in 1914.

Southern Canada Power Company.—The company is building 88 miles of high-tension transmission lines, connecting up the cities of Sherbrooke, Magog, Waterloo, Granby and St. Johns. It is expected that these lines will be completed this fall. When completed this will give the company over 160 miles of high-tension transmissions, principally 50,000 volt.

Dominion Park Company.—This company, which has been in the non-dividend paying class since July, 1915, last week announced a declaration of five per cent., payable September 30th, to holders of record September 20th. Gross earnings for the year are reported in the neighborhood of $220,000, while the record year was $245,000 in 1906, the first year the park was in existence. In 1906 a dividend of six per cent. was declared, from 1908 until 1911 five per cent. was paid, from 1912 to 1914 six per cent., and in 1915 three per cent. was paid.

Porto Rico Railways.—Net earnings for August show a gain of $11,958, or no less than 56.5 per cent., over the same month a year ago. Net earnings for the year to date, however, are $13,436, or 4.7 per cent. lower.

	August, 1916.	August, 1917.	Increase.
Gross	$ 60,528	$ 75,153	$14,625
Net	21,148	33,107	11,958
For eight months:—			
	1916.	1917.	Increase.
Gross	$563,025	$598,039	$35,014

Ottawa	.....	152
No. 1	.....	50
Other mines	2,772	101,708
	8,581	368,300

International Nickel Company.—With active operations conducted in two countries, says a New York despatch, the International Nickel Company must pay tribute in the form of taxes to both the Canadian and United States treasuries. The management has, however, carefully investigated the situation, and, after making most liberal allowances for the probable tax in this country in conjunction with the known tax in Canada, has determined that current earnings more than meet dividend requirements. Its nickel-copper deposits in Canada constitute the largest in the world, and enable the company to maintain almost a world monopoly. During August the International company set up a new high production record with approximately 5,000,000 pounds of nickel. The new refinery in Canada should be ready for commencement of operations early in 1918, if not by the end of the current year as planned. This plant will cost approximately $5,000,000, and will permit the company to increase its annual output by about 20,000,000 pounds of nickel, all of which will go to the Canadian and British governments.

Lake Superior Corporation.—A more confidential attitude on the part of the management has assured certain large stockholding interests that highly commendable progress is being made in advancing the financial status of the corporation, according to a Philadelphia dispatch. New arrangements just effected have securely placed the Algoma and Eastern Railway in a position to earn its interest charges in the future, while the Algoma Central and Hudson Bay Railroad is now earning 50 per cent. of its interest charges. Additional light has also been thrown upon the development of the new ore properties in the Helen mine. While Siderite ore, new deposits of which have been found beneath the floor of the old hematite mine workings, has long been regarded among mining men as a "bastard" ore, a new process has been installed at the Algoma Steel Company to undertake the conversion of it into a fine steel-making product. This ore in its natural state contains 48.28 per cent. iron and has a hardness ranging from 3.5 to 4.5 with a specific gravity of 3.7 to 3.9. But up until this new process, which the management naturally is not willing to disclose, this ore has been practically useless because of its utter lack of flexible properties.

Canadian Locomotive Company.—Mr. M. J. Haney, referring to the report at the company's annual meeting last week, drew attention to the considerable change that had taken place in the company's position. He also pointed out that for some time past the company has been working out its munition contracts and devoting more effort and attention to the locomotive output.

Extracts of his address follow: "The proportion of the munition output compared to the total output of the factory in the year under review was 33 per cent. Gradually decreasing with each succeeding month, to-day this proportion was only 10 per cent. The munition contracts had been taken at very low figures, which is emphasized by the fact that our profits for the first two months of this year over the corresponding period of last had increased 40 per cent." He also drew attention to the position of the company with regard to its liquid assets. At the end of 1916 the company owed the banks $581,500, whereas at the corresponding period this year the company had no loans with the banks and had over $175,000 cash in hand, which has been very substantially increased since that date.

Sir Henry Pellatt, in congratulating the board, stated that it was in times like the present that companies should give every possible consideration to shareholders, as they needed all the income they could get. It was doubtful whether it was a good thing to build up too large surpluses. Instead of companies investing largely in government bonds, it would be better to give the shareholders their money and let them do the investing. Mr. Jarvis concurred in Col. Pellatt's remark, and expressed the hope that the company should long be able to maintain the disbursement to shareholders.

The board of directors was re-elected as follows: Æmilius Jarvis, Toronto; J. J. Harty, Kingston; Robert Hobson, Hamilton; John L. Whiting, Kingston; Warren Y. Soper, Ottawa; H. W. Richardson, Kingston; Frank G. Wallace, Kingston.

After the meeting of the shareholders the directors met and elected the following officers for the ensuing year: Æmilius Jarvis, chairman of the board; J. J. Harty, president; F. G. Wallace, vice-president; J. H. Birkett, secretary treasurer.

Ideal War-time Policies

Combining Savings, Investment and Protection Features

It's a question whether there is a more completely satisfied class of men anywhere than those Mutual Life policyholders who are to-day receiving settlements under maturing endowment policies. Year by year they have laid by in premiums sums that would otherwise probably have been dissipated: and now they find that for every $100.00 so invested, from $125.00 to $210.00 have been received, depending on the length of the endowment term. Meanwhile their homes have been protected for the face value of the policies. Thus endowments in the Mutual of Canada combine an easy savings system with a gilt-edged investment and perfect home protection.

"I WILL INSURE NEXT YEAR."

In nineteen cases out of twenty, men canvassed for Life Insurance agree that they should be insured, and intend "some day" to obtain Insurance—but too many are disposed to procrastinate. "I will insure next year," they say—forgetting that if only one could count upon "next year," there would be no need of Life Insurance.

The Great-West Life Policies offer the protection of Insurance on most attractive terms, and at the same time offer a remarkably good investment. The leaflet, "Deferred Dividend Policies," gives convincing proof in this direction, and a copy will be mailed to any interested person on request.

Swimming pool which we recently erected. In Toronto, we recently finished one for Sir John C. Eaton.

Let Us Build For You a Glass Enclosed Swimming Pool

OUR new Glass Enclosure Book shows several interesting pools, that we have designed especially. Each one has some unique features. You probably would not want all these features in one pool. But let us build for you a glass enclosed pool, combining such features as appeal to you. We will attend to its building from the turning of the sod to the turning on of the water.

The New Book No. 342 containing them you are welcome to. Representative will gladly call at your request. For over half a century we have been builders of greenhouses, swimming pools and glass enclosures.

August Bank Statement is Excellent

THE *Statement of the Chartered Banks For That Month Shows That Total Deposits Are $1,392,000,000, of Which Savings Deposits Account for $952,000,000—Current Loans Were Increased in August and Are $96,000,000 Greater Than a Year Ago—Analysis of Statement.*

	August, 1916.	July, 1917.	August, 1917.	Year's inc or dec.	Month's inc. or dec.
Deposits on demand	$443,317,275	$450,849,356	$439,995,259	— 0.63	— 2.22
Deposits after notice	806,774,687	929,442,340	952,591,821	+18.11	+ 2.36
Current loans in Canada	739,938.513	829,560,700	836,429,670	+13.12	+ 0.84
Current loans elsewhere	66,556,371	90,253,882	87,082,849	+31.18	— 3.33
Loans to municipalities	39,882,811	43,989,207	43,940.176	+10.25	— .10
Call loans in Canada	86,351,216	71,376,788	71,204,351	—17.44	— 0.23
Call loans elsewhere	171,380,353	151,875,676	178,610.605	+ 4.03	+11.25
Circulation	129,824,206	161,762,871	156,450,659	+20.15	— 3.10

THE above are the changes in the principal accounts of the chartered banks during August. The most notable change is perhaps the increase of over $17,000,000 in savings deposits. These deposits are $146,000,000 greater than a year ago, an appreciation in the twelve months of 18.11 per cent. Call loans abroad increased $26,000,000 or over 11 per cent. This account is likely to show decreases during the autumn months in connection with the financing of the crop movement. Municipal loans were approximately the same as in July. Circulation was slightly less. Total deposits made a new high record for the month of August.

Domestic deposits for the past thirteen months are as follow:—

	Deposits payable on demand.	Deposits payable after notice.
1916—August	$443,317,275	$806,774,687
September	454,148,049	816,374,171
October	480,230,234	814,297,404
November	459,277,454	836,593,269
December	458,208,417	845,006,717
1917—January	427,308,526	864,163,344
February	430,331,801	880,456,637
March	448,151,528	888,765,698
April	471,312,285	874,948,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552
July	450,849,356	929,442,340
August	439,995,259	952,591,821

Demand deposits in August were a little less than $440,000,000. This total has been smaller only twice in the last thirteen months. Deposits payable after notice made an increase of 2.36 per cent. during August and over 18 per cent. during the year. Only twice during the past thirteen months has this account shown any decreases. While the deposits payable after notice are generally conceded to be mainly savings, a fairly large proportion of demand deposits have been transferred to the savings accounts during the past two or three years.

The course of the deposits account during the past five years is shown in the following table:—

August.	On demand.	After notice.	Total.
1913	$358,321,925	$619,032,847	$ 977,354,772
1914	338,984,418	659,399,151	998,383,569
1915	334,022,174	692,580,626	1,026,602,800
1916	443,317,275	806,774,687	1,250,091,962
1917	439,995,259	952,591,821	1,392,587,080

These figures make a substantial showing. Since August, 1913, demand deposits have increased 22 per cent., total deposits 42 per cent., and notice or savings deposits, 53 per cent.

The trend of the bank loans for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1916—August	$739,938,513	$86,351,216
September	752,545,756	88,145,851
October	774,928,222	90,412,023
November	813,791,947	89,395,370
December	820,378,557	82,569,983
1917—January	8[illegible],470,147	7[illegible],737,[illegible]4
February	813,302,717	78,686,535
March	843,054,466	76,478,708
April	880,523,897	82,737,417
May	844,890,589	78,514,798
June	839,355,782	76,085,220
July	829,560,700	71,376,788
August	836,429,670	71,204,351

Frequently in the summer months, current loans in Canada are considerably decreased. This year, the summer months have shown high totals. The August figures, for example, were $7,000,000 greater than in the previous

Of the deposit in Central Gold Reserves $16,710,000 is in gold coin : the balance is in Dominion Notes.

month. They are $97,000,000 or 13 per cent. larger than a year ago. This position is probably due almost entirely to the activity in the munitions and shipbuilding industries. Current loans in Canada are large, despite the fact that a number of industrial companies are in excellent financial condition and able to get along without bank accommodation or with very little. Call loans in Canada were slightly decreased during August and are $15,000,000 less than a year ago. This is a reflection of the attitude of the banks in reducing the volume of Canadian stocks held as collateral.

The following table shows the course of the principal loan accounts during recent years :—

August	Current loans in Canada	Current loans elsewhere	Call loans in Canada	Call loans elsewhere.
[illegible]	[illegible]	[illegible]	[illegible]	$ 92,041,292
[illegible]	[illegible]	[illegible]	69,229,045	96,495,473
[illegible]	[illegible]	[illegible]	71,855,565	120,607,677
[illegible]	[illegible]	[illegible]	86,351,216	171,380,353
1917	[illegible]	[illegible]	71,204,351	178,610,625

Current loans in Canada in August last were higher than in any August since 1913. Current loans abroad are considerably higher than in any August of the past five. Call loans in Canada were about the same as in August, 1915, and a little more than in August, 1913 and 1914. The increase of nearly $27,000,000 in Canadian call loans

Dominion Government---Aug., 1917

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to other banks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

T. C. BOVILLE, *Deputy Minister of Finance.*

abroad is probably a reflection of the banking policy in building up external reserves against the time when the Canadian crop movement will call for an increased supply of credit at home.

The course of call loans abroad for the period beginning two months before the declaration of war is of interest and is shown in the following table, compiled by *The Monetary Times*:—

	1914.	1915.	1916.	1917.
January	....	$ 85,796,641	$134,248,552	$155,747,476
February	....	89,890,982	139,138,651	162,344,556
March	....	101,938,685	141,889,989	161,616,735
April	....	121,522,971	147,146,443	159,156,054
May	....	136,098,835	163,400,659	168,692,675
June	$137,120,167	124,604,875	182,757,015	159,309,133

September	89,521,859	135,108,412	173,877,586	....
October	81,201,671	120,681,624	189,346,216	....
November	74,459,643	135,530,562	183,250,389	....
December	85,012,904	137,157,869	173,878,134	....

The note circulation in August showed evidence of further expansion, and the volume of notes in circulation at the end of the month was almost $34,000,000 in excess of the same month a year ago.

PROGRESS OF SASKATCHEWAN'S AGRICULTURE

Census Statistics, Just Issued, Reflect Substantial Increases in Crop Values

From 1911 to 1916, according to a recent bulletin of the census and statistics office, Ottawa, the number of farm holdings in Saskatchewan increased from 96,372, with an acreage of 28,642,985, to 104,006 holdings, with an acreage of 36,800,698. The total land area of the province is placed at 155,764,100 acres. Of this amount 36,800,698 acres, or 23.63 per cent., was occupied as farm land out of a total of 94,000,000 acres estimated as being available for crop production in this province.

During the five years 1911-1916 the number of farms increased by 7.8 per cent., the land occupied, as farms, by 28.4 per cent. The average size of farms in 1916 was 353 acres, as against 297 acres in 1911, and the area of improved land per farm increased from 123 acres to 188 acres during the same period.

The total acreage under crop in 1916 was 13,973,373 acres, as compared with 9,136,862 acres in 1911, being an increase of 4,836,511 acres or more than 52 per cent. in five years. In 1911 nearly 98.74 per cent. of "land under crop" was devoted to the production of cereals, as against 99.35 per cent. in 1916. Flax, only, shows a decrease in acreage, having fallen from 1,153,861 acres in 1911 to 542,034 acres in 1916. There was an increase in the acreage sown to wheat from 1911 to 1916 of 3,776,195 acres, and to oats of 1,459,005, being a gain for the former of 71 per cent., and for the latter of 62 per cent. There is also a considerable increase in the acreage devoted to hoed crops; potatoes alone show an increase of 56 per cent. in five years.

The enumerators' returns show that only 50,965 acres, or less than two-fifths of 1 per cent. of the acreage planted for the harvest of 1915 did not yield a return to the husbandman. In the harvest year 1910, of the total plantings of 6,871,858 acres, 159,456, or 2.32 per cent., failed to produce a harvest. When the figures of the total acreage devoted to a crop runs into millions, the areas non-producing, are too small to make any appreciable difference in the total production.

Some Large Crop Values.

The total value of the field crops of Saskatchewan produced on 104,006 farms in 1915 was $269,025,230, as compared pared with a total value of $79,954,575 for the crops produced on 96,372 farms in 1910. The average value of the crops per farm in 1915 was $2,586, as against $830 in 1910; and the gain made in the value of field crops in 5 years (1910-15) was $189,070,655, or 236 per cent.

From 1910 to 1915 the acreage devoted to wheat increased by 4,701,038 acres, or 111 per cent.; during the same time the yield increased by 157,332,990 bushels, or 235 per cent., and the value by $153,674,712, or 306 per cent. Flax is the only one of the main crops which gave a smaller gross return in 1915 than in 1910.

The large increase in area, production and value of crops used as fodder evidences the growing importance attached to animal husbandry in Saskatchewan. From 1910 to 1915 the value of fodder crops increased from $876,551 to $3,729,133, being a gain of $2,852,582, or 325 per cent., in five years. The falling off in the area, production and value of hay is more apparent than real, and is explained by the relatively large increases shown for grass seeds and alfalfa.

"Interesting and Accurate"

In renewing his subscription to ***The Monetary Times*** recently Sir Robert W. Perks, of Westminster, London, England, writes:

"I find your paper most interesting and accurate."

The districts of Swift Current, Kindersley, Maple Creek, and Last Mountain, in the order named, led in wheat production in 1915, having produced more than 20,000,000 bushels each; and Mackenzie, Kindersley, Swift Current, Saltcoats and Last Mountain districts in the production of oats.

Live Stock on Farms.

The returns of live stock on farms show that in horses and mules there was an increase of 333,439 or 65.7 per cent.; in cattle of 59.6 per cent., which brought the number of cattle in the province well over the million mark. Milch cows show an increase of 77.8 per cent., and swine of 85.3 per cent. in the five years 1911-1916. Sheep show a five-year increase of a little more than 10,000 animals. The Maple Creek district possesses more than one-third of all the sheep reported for the province in 1916. The production of poultry has increased, from 1911 to 1916, by 1,225,422, being a five-year gain of 36 per cent.

Mules were included with horses in the census of 1911 and previous ones. The average number of horses and mules per farm in 1916 was 8.6 and their value $1,440, as compared with 5.2 per farm in 1911, with a value of $921. The total value of horses and mules increased from $88,759,211 in 1911 to $142,292,869 in 1916, being a gain of $53,533,658, or 60 per cent. in five years. The average price per head of horses in Saskatchewan in 1916 was $168.83, and in 1911 $174.91.

In previous censuses cattle were given under two heads only, milch cows and other cattle; whereas in this census they are classified as bulls, milch cows, calves, and other cattle. In the previous censuses "other cattle" included all cattle except milch cows, in this census it includes cows not used for the production of milk, and steers. The average value of milch cows per head in 1911 was $43.25 and the number per farm 1.9, as against 3.09 per farm in 1916 and an average value per animal of $64.09.

The average value per head of sheep on the farm rose from $5.44 in 1911 to $7.59 in 1916, representing an increase in value of nearly 40 per cent. in the quinquennium.

From 1911 to 1916 the number of swine increased by 85.4 per cent.; during the same period the value of hogs on farms increased from $2,512,540 to $5,137,474. This represents an increased revenue to the farmer from this branch of animal husbandry of more than 104 per cent. In 1911 the average price per head of hogs, all kinds, was $8.78; in 1916 it is reported at $9.68, being an increase of 90 cents or 10.2 per cent. in the average value per head on the farm.

Hens and chickens increased from 3,242,820 in 1911 to 4,418,100 in 1916; turkeys from 72,616 to 98,797, geese from 22,999 to 37,460, and ducks from 54,968 to 60,783. The value of all poultry rose from $1,988,081 in 1911 to $2,615,764 in 1916.

WILL OF MR. SANDERSON PEARCY

The will of Mr. Sanderson Pearcy, late president of Sanderson Pearcy and Company, Limited, paint manufacturers, who died August 27th, 1917, is being entered for probate by the National Trust Company, Limited, the executors named in the will. Although the estate amounts to $524,298. Mr. Pearcy had only $9,000 life insurance, in three policies. About half the estate is in the form of debentures, stocks and mortgages, including $60,242 debentures city of Westmount, $15,000 Union Trust Company stock, $5,000 mining stock, $9,389 Alberta province debenture stock, $35,750 shares Sanderson Pearcy and Company and $120,029 mortgages.

Cash in bank amounts to $5,681; furniture and personal effects, $1,200; book debts, $64,451; real estate, $134,300; and miscellaneous assets, $64,253. The real estate consists of Mr. Pearcy's residence, a vacant lot and a warehouse property, all in Toronto.

The will [illegible] April [illegible], 1914, and is drawn by Mr. J. B. Clarke, K.C., of Toronto. Other than the insurance policies, no bequests are made to the widow, as Mr. Pearcy had made provision for her during his lifetime. There are a number of small bequests, from $500 to $15,000 each, to various individuals, and $1,400 is divided among seven Toronto charitable institutions. The residue, valued at approximately $450,000 is divided equally between Mr. H. P. Porter, a nephew, and Mr. C. N. Haldenby, a brother-in-law

The directors of the Home Investment and Savings Association, Winnipeg, have declared a dividend at the rate of 9 per cent. per annum for the quarter ending September 30.

CROPS AND WAR LOAN

The crops of Western Canada will, as usual, be better than anticipated earlier in the season. The estimates of the wheat crop vary considerably. Here are eight recent estimates:—

Estimate of	Bushels.
Northwest Grain Dealers	217,377,000
Free Press, Winnipeg	214,250,000
Norman P. Lambert	217,000,000
Canadian Northern Railway	250,000,000
E. L. Pease, Royal Bank	250,000,000
Bank of Commerce	225,000,000
Grain Growers' Guide	224,307,200
Census Office, Ottawa	225,778,700

These all refer to the wheat crop of the three prairie provinces. Mr. E. L. Pease, managing director of the Royal Bank, has just returned from the West and he estimates that the yield will reach 250,000,000 bushels, with a larger percentage of high-grade than ever before produced. The crop would then realize, at the price fixed by the government ($2.21 per bushel), upwards of $500,000,000, a great addition to the wealth of the country. Even taking the lowest estimate, 214,250,000 bushels, at the fixed price, the value would be about $473,000,000.

A recent estimate of the entire crop yield of 1917 for Canada made by the department of agriculture gives the yields of the principal grains as compared with 1916 as follows:—

	1917.	1916.
Wheat, bushels	249,164,000	229,313,000
Oats, bushels	399,843,000	365,553,000
Rye, bushels	4,194,000	2,967,000
Barley, bushels	59,318,000	42,647,000
Flaxseed, bushels	10,067,000	7,316,000

The increase in wheat is almost 20,000,000 bushels, in oats over 34,000,000 bushels and in barley nearly 17,000,000 bushels. We should have about 180,000,000 bushels for export. The Census and Statistics Office, Ottawa, estimates Canada's wheat for this year at 249,164,700 bushels.

The farmer is making good money from his products and we may reasonably expect considerable support for our next war loan in that direction. As Mr. Pease has pointed out, it is their duty as well as privilege to invest their surplus in Dominion government bonds. By so doing they will assist in the prosecution of the war and at the same time secure the safest possible investment for their money, yielding more than 5½ per cent. or nearly twice as much as the Liberty bonds yield in the United States. The shrewd farmer need not be told of the potential value of the possession of a government bond.

NORTHERN ONTARIO'S MINERALS

Since 1904, when the Cobalt silver camp was discovered, the silver production there to the end of 1916 was 254,391,494 ounces valued at $135,693,020. Last week the Governor-General and party paid their first visit to Northern Ontario, taking a glimpse of its agricultural and mineral wealth. Mr. Arthur A. Cole, mining engineer of the Temiskaming and Northern Ontario Railway, prepared a useful souvenir of the trip. Therein he recalls that although the Cobalt silver deposits proved to be very rich, most investors were sceptical. Several small shipments of silver ore were made in 1904, but it was not till the following year that real mining operations were commenced. Interest in the new camp rapidly increased, till in 1905 it reached the proportion of a boom. The district was easily accessible and it was a novelty for investors to be able to reach a thriving mining camp in a Pullman car in little more than twenty-four hours of leaving New York City. The stocks of the producing companies became inflated beyond their real value and carried with them the usual wild-cat schemes. The inevitable crash and slump followed, and for some years afterwards speculation in mining stocks in this district was practically dead. In the meantime the legitimate industry was making steady and rapid progress, as the record of production shows. Twenty-four companies of the Cobalt camp have paid dividends aggregating $67,460,000 or 47 per cent. of the gross production.

Since, the Porcupine gold district has been discovered. It is fortunate that the best discoveries passed into strong financial hands so that sufficient capital was available to continue development, without interruption, before actual production could begin. "Anyone who looked over the unbroken forest of Northern Ontario a dozen years ago," says Mr. Cole, "and predicted that this district would soon be producing over 20 millions in gold and silver annually would have been put down as a fantastic dreamer, but that figure is surpassed to-day by three million dollars and the output is continually increasing. And yet, only a small portion of the country has been prospected. Running northeast and northwest from Cobalt and extending to the Arctic Ocean is the great Pre-Cambrian Shield, the basement formation of the continent. It contains thousands of square miles and offers to prospectors better chances of locating valuable mineral deposits than can be found in any other country in the world."

FOOD CONTROL

Food Controller Hanna [illegible] entire agreement with his comprehensive statement issued last week. At the same time, it was an excellent exposition of the subject, spoiled largely by the talk of temporary ruin "to every city and town in the country" if an attempt were made "to reduce the cost of our middlemen system." The primary duty of the food controller is to conserve consumption in Canada and further production so as to help solve the food problems of our Allies overseas. Drastic regulation of prices might easily discourage production. If production by any means is made less, prices necessarily rise. That is the natural working of the law of supply and demand, a law which it is incorrectly assumed by some has ceased to exist.

Mr. Hanna cites the following seven main factors as governing the present prices of food: First—The disproportion between demand and supply, consumption and production. Food cannot be cheap while there is such a growing disparity between the numbers of producers and the numbers of consumers. Second—Unrestrained competition between great foreign buyers of foodstuffs in our markets. Third—Unequal distribution of the available supplies, surplus production in one province being unavailable for provinces in which were shortages. Fourth—The food speculator. Fifth—The greedy middleman. Sixth—The supernumerary, unnecessary and inefficient middleman. Seventh—The waster."

We believe that an examination by the food controller's office of the fifth factor, the greedy middleman, would disclose some interesting facts. While that middleman may be necessary, and efficient in his own interests, he is often unsatisfactory so far as the interests of producer and consumer are concerned. The middleman frequently exacts from the producer a commission, say, of 10 per cent. on everything handled, as well as other fees. Could not such a [illegible] be reduced to benefit the producer and the consumer, without creating the suggested ruin in our cities and towns?

A CITY IN BUSINESS

With a display of the inborn optimism of many public-ownership advocates the city of Toronto four years ago decided to build a municipal abattoir. This civic enterprise was to create competition, break combines, and give the small butcher a chance to slaughter his cattle at low cost and under the auspices of the municipal authorities. The cost of the enterprise was $400,000. Except for one year, it has been operated at a loss. If it is to be continued, the taxpayers will have to provide the deficit out of the taxes. Already a loss of about $160,000 has been incurred. It is now proposed to accept an offer of a private company to purchase the abattoir. The offer is $420,784, the company being prepared to pay $50,000 cash and the balance, including principal and interest, at the rate of $27,798 per annum for 20 years.

City Treasurer Bradshaw, one of the best civic financial administrators in America, has advised the acceptance of the offer; so has Property Commissioner Chisholm. Some of the city fathers propose to throw good money after bad by continuing the abattoir and embarking in the dead meat business. It is contended that this new enterprise would counteract the loss already made and place the entire undertaking on a paying basis. Mr. Bradshaw and Mr. Chisholm are not very sanguine regarding that proposal. In any event, it means that a large amount of working capital will have to be provided, which is not available at the present time.

About 17,000 citizens voted in favor of the city going into the abattoir business. How many of them wrote "Yes" on the ballot paper without giving the matter more than a moment's thought?

NEW INCORPORATIONS

Mining Company with Capital of $2,500,000 Chartered at Toronto Leads the Way

The largest companies incorporated last week were:—

Porcupine Whelpdale Mines, Limited (no personal liability), Toronto, Ont.	$2,500,000
Ontario-Kirkland Gold Mines, Limited (no personal liability), Haileybury, Ont.	1,500,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Winnipeg, Man.—The Canada Atlantic Grain Company, Limited, $100,000. M. Cohen, A. Cohen, D. H. Lockerbie.

Galt, Ont.—The Iroquois Hotel Company, of Galt, Limited, $100,000. G. Bernhardt, G. H. Bernhardt, L. E. Bernhardt.

Walkerville, Ont.—Standard Foundry and Supply Company, Limited, $40,000. F. S. Ferguson, T. P. Charlton, G. Ross.

Long Bay, Ont.—[illegible] Company, Limited, [illegible]. [illegible]

Haileybury, Ont.—Ontario-Kirkland Gold Mines, Limited (no personal liability), $1,500,000. W. A. Gordon, F. A. [illegible]

Athens, Ont.—Plum Hollow and Eloida Independent Telephone Company, Limited, $25,000. A. Henderson, G. W. [illegible]

Sault Ste. Marie, Ont.—Barnes Drug Company, Limited, $40,000. T. T. Barnes, H. E. Allcock, D. S. Hartley; Soo Pile and Tie Company, Limited, $500,000. H. F. Partridge, E. D. Alger, J. L. O'Flynn.

Vancouver, B.C.—Pioneer Cigar Company, Limited, $50,000; Pacific Industries, Limited, $10,000; Pearson Shingle Company, Limited, $10,000; Hudson Harvey, Limited, $10,000; Knowles Company, Limited, $25,000.

Toronto, Ont.—Harold F. Ritchie and Company, Limited, $600,000. R. D. Moorhead, L. Macaulay, W. T. Sinclair; Delta Chemical Company, Limited, $40,000. W. B. Honeywell, J. C. Ballantyne, W. A. McCarthy; W. Harris and Company, Limited, $500,000. J. B. Harris, F. K. Harris, J. H. Harris; Lucky Cross Bondholders, Limited (no personal liability), $100,000. J. P. Walsh, C. J. McLaughlin, H. R. Armstrong; Porcupine Whelpdale Mines, Limited (no personal liability), $2,500,000. D. I. Grant, G. Grant, M. Macdonald.

Montreal, Que.—Cole-Whitaker, Limited, $40,000. F. H Cole, W. M. Whitaker, H. Morin; Wheeler Safety First Belt and Fireproofing Company, Limited, $25,000. J. A. McLean, J. D. Lajeunesse, L. Morrin; United States Coal Corporation, Limited, $25,000. C. B. Walsh, F. G. Reid, P. N. Foley; Stanford's, Limited, $240,000. J. S. Stanford, J. C. Dussault, O. Dufresne; Maison Charles, Limited, $20,000. E. Garmaise, R. Garmaise, A Wilson; H. Rosenfeld and Company, Limited, [illegible]

PERSONAL NOTES

Mr. Æmilius Jarvis has recently been elected chairman of the board of the Canadian Locomotive Company, Limited, Kingston, Ont. He is also president of the company.

Dr. Adam Shortt has recently been appointed chairman of the Board of Historical Documents at Ottawa. His former position as chairman on the civil service commission will be filled by Mr. Clarence Jameson, M.P. for Digby, N.S.

Mr. Charles Augustine Hanson, formerly alderman of London and member of parliament for the southeast division of Cornwall, England, elected recently Lord Mayor of London, is an Englishman by birth, but has spent a great part of his life in Montreal. He is a brother of Messrs. Edwin and William Hanson, members of the Montreal Stock Exchange, who conduct the firm which he founded in Montreal. He removed to England about twenty-five years ago, and is at present a member of the firm of Coates, Son & Company, of London, the senior partner being Major Sir Edward Coates, Bart., member of parliament for Lewisham, Eng., the other partner being Mr. J. G. Colmer, C.M.G., well known in Canada as the confidential adviser of the late Lord Strathcona. Mr. Hanson is chairman of the Gresham Life Assurance Company; chairman of the Gresham Fire and Accident Company, and is connected with several other leading companies. He was appointed by King George, then the Prince of Wales, sheriff of the County of Cornwall in 1907; elected a sheriff of the City of London in 1911, and was presented to the late King Edward and Queen Alexandra in 1907. He declined the Conservative nomination to the Imperial Parliament in 1903.

Commodore C. G. Marlatt, of Oakville, Ont., and Mr. Jack Ross, of Montreal, have both been awarded the special service decoration for patriotic services. These gentlemen and Mr. Æmilius Jarvis and Sir John Eaton are the only four in Canada, it is believed, who have received this distinction.

Viscount Reading, who is in the United States on a financial mission of the first importance to the Allies, and is visiting Ottawa to confer with Sir Thomas White, has filled the post of Lord Chief Justice of England with ability since October, 1913, when he succeeded Lord Alverstone. Before his appointment to the bench he had won the highest honors at the bar and had achieved notable success in political life. Before his elevation to the peerage he was known to the world as Sir Rufus Isaacs. He was born in London on October 10th, 1860, the son of Joseph M. Isaacs, a city of London merchant. He was for a time upon the London Stock Exchange and has always exhibited a marvellous keenness in financial affairs. At an early age he found his true vocation in the law; he was called to the bar and quickly established a reputation for skill in cross-examination. He became a K.C. in 1898. From 1904 until 1913 he was Liberal member of parliament for Reading. Early in 1910 he became solicitor-general and later in the same year was made attorney-general. In 1912 he was given a seat in the cabinet. The present is his second financial mission to the United States since the beginning of the war. He was connected with the flotation of the $500,000,000 Anglo-French loan in 1915.

Mr. J. C. [illegible], formerly of Calgary, has been appointed manager of the North Lethbridge branch of the Standard Bank of Canada.

Mr. L. Verhoeven, who for a great many years has been in the financial business in Winnipeg, and who was until recently Captain and Quartermaster of the [illegible] Battalion C.E.F., now overseas, is back again in Winnipeg. Mr. Verhoven has received an appointment with the Equitable Life Insurance Company of the United States, and in future will devote all his time to the life insurance business. He is changing his office from the Electric Railway Chambers to the Great West Permanent Building.

Col. Charles Colquhoun Ballantyne, who has accepted the portfolio of Minister of Public Works, was born at Colquhoun, Ontario. He commenced his business career in Montreal, and while still a young man, became managing director of the Sherwin-Williams Paint Company. In 1911 he participated in the purchase of the entire concern, and since then he has been vice-president as well as general manager of the company. In 1903 he was president of the Montreal branch of the Canadian Manufacturers' Association, and in 1905-6 of the general association. He was appointed to the Montreal Harbor Commission in 1907.

Lieut.-Col. C. N. Monsarrat, chief engineer and chairman of the Board of Engineers, Quebec Bridge, (or as it was formerly called, the Quebec Bridge Commission), was a member of the class of 1888 at McGill University. He joined the C.P.R. bridge engineering staff as an inspector of erection, and remained for twenty years a member of that department. [illegible] head of the department, [illegible] 1911 to succeed Mr. Vautelet on the Quebec Bridge Commission. He is the commanding officer of the Fifth Royal Highlanders of Montreal. Some interesting facts and figures regarding the Quebec Bridge appeared in *The Monetary Times* last week.

Mr. R. S. Hudson, joint general manager of the Canada Permanent Mortgage Corporation, has been appointed second vice-president in succession to the late Mr. G. W. Monk. The vacancy on the board created by the death of Mr. Monk has been filled by the appointment thereto of Mr. William Mulock. Mr. Hudson has also been appointed second vice-president of the Canada Permanent Trust Company, and Mr. Mulock has been appointed a director, thus filling the places vacated by Mr. Monk's death.

Professor Murray Haig has concluded his inquiries into the incidence of taxation in Saskatchewan municipalities. He has been successful in accumulating an interesting mass of data and information, having visited all the cities, a large number of towns and many villages, making inquiries into taxation matters in each. He also conferred with the committee appointed by the Union of Saskatchewan Municipalities. The original committee, of which Mr. Mayberry, of Moose Jaw, is chairman and convener, has done much to further the investigation. Professor Haig has now left the province and is engaged in the preparation of his report, which even if no very radical changes are suggested will doubtless be of great benefit both to the provincial department of municipal affairs and to the municipal institutions concerned.

Established in 1836. Incorporated by Royal Charter in 1840.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Linderman Company.—The local factory of the company at Woodstock is to commence part of a $1,[illegible] munitions order which the Linderman Steel and Machine Company has secured from the United States government.

Blake Lake Asbestos and Chrome Company, Limited. Earnings for the half-year ending June 30th last permitted of the payment of 2 per cent. on the company's bonds paid around the first of the present month, and the directors hope to be able to make a [illegible] per cent. payment out of the second half-year's earnings. Present indications are that at least 2 per cent. can be paid the bondholders next March, and it is probable that earnings will justify the 3 per cent. hoped for.

Kerr Lake Mining Company.—Net profits for the year show $1,343,474, as against $813,702 in the previous year. In dividends there were paid $666,000, compared with $672,000 in 1916. The company's cash on hand amounted to $[illegible]291, and its total assets and liabilities to $1,875,349.

The balance sheet as of August 31st last compares as follows:—

	1917.	1916.
Sales	$1,716,460	$1,212,676
Less ore on hand	164,483	104,818
Balance	$1,551,977	$1,107,858
Other income	335,141	164,483
Total income	$1,887,118	$1,272,341
Interest received	22,346	13,868
Gross income	$1,909,464	$1,286,209
Total deduction	565,990	472,507
Net profits	$1,343,474	$ 813,702
Dividends	666,000	672,000
Surplus	$ 677,474	$ 141,702
Previous surplus	1,033,570	891,868
Total surplus	$1,711,044	$1,033,570

During the fiscal year there were produced 2,551,345 ounces of silver at a cost of 11.65 cents per ounce. Positive ore reserves are estimated to contain 3,120,400 ounces.

Shawinigan Water and Power Company.—Following a meeting of the board of directors, Mr. J. E. Aldred, president of the company, stated that before the end of the year 18,000 horse-power of new business would go into effect on the system, 15,000 of this at Shawinigan Falls alone. That increase would be in addition to 6,000 horse-power connected up as new load so far this year.

Measured in kilowatt hours, added Mr. Aldred, the output of the combined system showed an increase of no less than 30 per cent. in the four months of May, June, July and August, as compared with the corresponding period a year ago. The increase is a natural sequel to great activity in the industries dependent on Shawinigan for their power requirements.

Mr. Aldred stated that the company was now negotiating for next year a contract similar to that recently entered into with the Canadian Aloxite Company, which is spending about $1,250,000 on a new plant at Shawinigan Falls and will take a large amount of power. As a result of this situation the resources of the Shawinigan system are being used up as fast as they can be developed. The Laurentide Power Company's output will be increased next year about 50 per cent. by the completion of the dam at the head of the St. Maurice River. That, however, is not the only dependence of the system for growth in the early future, as surveys have been started at the Gres Falls power site, purchased from the old Union Bag and Paper Company a couple of years ago, with a view to development at a [illegible]. As one example of the extensions that are constantly going forward, Mr. Aldred stated that an aerial span, 5[illegible] feet long, supported by towers 325 feet high, was now being built [illegible]

American Cyanamid Company.—The following table gives the results of the company's operations during the past four years:—

	1914.	1915.	1916.	1917.
[illegible]	[illegible]	[illegible]	$[illegible]	$2,7[illegible]
Manufacturing and other costs			1,4[illegible]	2,052,049
Depreciation			100,000	189,625
Net trading profit	$[illegible]	$[illegible]	$ 351,219	$ 494,007
Miscellaneous revenue and credit	[illegible]	[illegible]	34,279	144,641
	$[illegible]	$[illegible]	$ 385,498	$ 638,648
Preferred dividend, 6 per cent.	[illegible]		196,578	....
Dismantling depreciation			......	148,952
Balance of year's [illegible]	$[illegible]	$ 58,583	$ 188,920	$ 489,696
Brought forward	44,887	179,781	43,364	35,706
Carry forward	$179,781	$238,364	$ 232,284	$ 525,402
Subsequent charges	....	(a)195,000	(b)196,578	....

(a—1915) For depreciation; (b—1916) for arrears of preferred dividends.

The company's works are at Niagara, Ontario. Manufacture was commenced there in January, 1910, with a plant capable of producing 12,000 tons a year. Extensions and reconstructions have since been made at Niagara, bringing the output capacity there up to 60,000 tons, and other plants have been installed or are projected.

The Niagara plant was fully occupied all last year, subject only to restriction from the scarcity in the earlier months of nitrogen gas, which, however, was remedied when the new liquid air plant, as a substitute for the original copper oxid plant, which was "costly and relatively inefficient," was brought into use. The net sales are reported to have amounted to $2,705,000, a 44 per cent. increase on 1915-16. The tonnage output is not stated; in 1915-16 it was 42,956 tons. Whereas the unfilled orders last year were equal to 50 per cent. of the year's total output, the contracts on hand at the commencement of the current year were estimated to be equal to 75 per cent. of last year's sales.

A net trading profit of $494,007 is reported—that is, after providing $189,625 for depreciation, against $100,000 in the previous year. Miscellaneous revenue brings the total net profit up to $638,648, against $385,498 in 1915-16, but a special charge of $148,952 is made against this profit to write off the abandoned gas plants at the Niagara works, leaving a net dividend balance of $489,696 from the year's operations.

The dividend on the preferred stock (which is cumulative) was passed in 1915, but the accounts show that these arrears were discharged on December 1st last year.

SHIP-BUILDING IN CANADA

There are 74 vessels of 126,000 tons being built in Canadian shipyards. The ships are divided geographically as follows:—

	Boats.	Tonnage.
Atlantic coast	25	22,525
Great Lakes	[illegible]	45,2[illegible]4
Pacific coast	10	50,190
Total	[illegible]	12[illegible]

While Canada spends about four millions yearly in studying agricultural problems, only a trifling sum has been spent thus far on the study of forest problems. More than two-thirds of the whole of Canada is better adapted for tree-growing than anything else, and will pay profits according to the scientific care bestowed on it.

DECREASE IN LEAD PRODUCTION

Notwithstanding the Demand, Actual Recovery of Lead in 1916 was Less Than Previous Year

The total production in 1916 of lead in bullion credited to Canadian mines and estimated as recoverable from ores exported, 41,593,680 pounds, which, at the average price of lead at Montreal, 8 cents per pound, was valued at $3,327,494, says the department of mines, in a recent report on mineral production. In 1915 the production was 46,316,450 pounds, valued at $2,593,721 (5 cents per pound). There was a decrease of over 10 per cent. in quantity, but an increase of over 32 per cent. in total value.

The 1916 production included 38,838,372 pounds of lead in bullion, of which a large portion was electrolytically refined, and 2,755,308 pounds recoverable from ores exported. The lead bullion was produced chiefly at Trail with small contributions from smelters at Kingston and Galetta, Ontario. The lead ores exported were derived from Notre Dame des Anges, Quebec, Hollandia mine, Bannockburn, Ont., Surprise mine, Slocan, B.C., and the Silver King mine, Mayo, Yukon district.

Although the recoveries of lead were small in 1916, shipments of lead ores from mines appear to have been greater than in the previous year. Lead ore shipments in 1916 were approximately 82,000 tons, containing 51,083,000 pounds of lead, while zinc-lead ores shipped to Trail contained considerable quantities of lead which would be recoverable in large part after the extraction of the zinc. In 1915, the ore shipments were 73,752 tons containng 48,708,005 pounds of lead.

The exports of lead in 1916 included: Lead in ore, etc., 9,048,400 pounds, valued at $558,180 and pig lead 112,100 pounds, valued at $7,710. Exports in 1915 were: Pig lead 2,066,929 pounds, valued at $79,067, and lead in ore, etc., 1,845,100 pounds valued at $40,273.

The total value of the imports, as shown by the customs records of lead and lead products in 1916 was $2,077,986, as against a value of $2,482,916 in 1915. The 1916 imports included old and scrap lead 19,865,800 pounds, valued at $1,258,284; bars, sheets, pipe, etc., 3,427,233 pounds, valued at $1,312,067; other manufactures valued at $155,368, litherage 2,767,200 pounds, valued at $211,359 and lead pigments containing approximately 1,474,979 pounds of metallic lead, valued at $140,908. The total imports would thus exceed 13,629 tons by the quantity contained in "other manufactures" which would probably not be greater than 500 or 600 tons. The imports in 1915 were about 25,000 tons.

The average monthly price of lead in Montreal varied between a minimum of 7 cents per pound in January and a maximum of 9 cents in December, averaging for the year 8 cents. This is the producer's price for lead in car lots as per quotations furnished by Messrs. Thomas Robertson and Company. The average monthly price of lead in New York was 6.858 cents per pound and in London £30 19s. 6d. per gross ton equivalent to 6 cents per pound.

BRITISH COMPANIES AMALGAMATE

A provisional agreement has been arranged for the acquisition by the Commercial Union Assurance Company of control of the National Insurance Company of Great Britain, says The Financial News, the proposed consideration being £6 2s per share, payable as to £6 in 5 per cent. war loan calculated at the issue price of 95 and the remainder in cash. The authorized capital of the National Insurance Company of Great Britain is £1,000,000 in £5 shares, of which £250,000 has been subscribed and £50,000, or £1 per share, called up. Last week they were quoted at 6⅛. The company was registered in June, 1897, with head office at Glasgow, and is engaged in fire, accident, burglary, plate glass and kindred insurance business.

Brantford Life Underwriters on Wednesday October 2nd, elected officers for the coming year as follows: President, L. C. Schmidt; vice-president, T. H. Whitaker; secretary, F. J. Ritchie; treasurer, W. B. Burrill; executive, F. J. Reid, J. E. Hess, W. B. Collins.

SOME GREAT-WEST LIFE MEN

Here is a group of some of the leading field men of the Great-West Life Assurance Company, of Winnipeg.

Reading from left to right they are:

Standing—(1) C. P. McQueen, manager for Alberta, Calgary; (2) C. H. Carpenter, eastern superintendent and manager for Ontario, Toronto; (3) M. N. Hatcher, state agent, North Dakota, Fargo, N.D.; and (4) W. R. Hewat, manager for Nova Scotia, Halifax.

Sitting—(1) F. G. Castle, western superintendent, Winnipeg. (He has resigned since the photograph was taken.); (2) G. W. Merritt, manager for New Brunswick, St. John; (3) J. A. Johnson, manager for British Columbia, Vancouver; and (4) C. A. Butler, manager for Quebec province, Montreal.

UNION INSURANCE SOCIETY OF CANTON, LIMITED, ENTERS CANADA

The Union Insurance Society of Canton, Limited, has decided to enter the Canadian field. This company, although probably not well known here, is a very old one, having been established 82 years ago.

The present general manager, C. Montague Ede, has been identified with the company all his business life, and the success of the company is largely due to his enterprise and management.

The company does business in all the civilized parts of the world, and is said to be the largest marine stock company in existence. In Canada, as it is doing elsewhere now, it is going to write fire, marine and automobile. It is a very strong British company, and has several millions of British war loans. It has made a large deposit with the Dominion government, in fact more than the law calls for.

Mr. C. R. Drayton has been appointed manager for Canada. He is a brother of Sir Henry Drayton, chairman of the Railway Commission. Before his appointment, Mr. C. R. Drayton was actively engaged in insurance and other financial organizations.

Mr. G. S. Minty, who has been for many years with the Rochester Underwriters, is identifying himself with the company, and will occupy an important position.

The head office for Canada is to be in Toronto, and its offices are situated in the Excelsior Life Building, Toronto.

Messrs. F. T. Stanford, Canada Life, Toronto; A. J. Meiklejohn, Confederation Life, Montreal; G. Powell Hamilton, North American Life, Guelph; D. J. Scott, Winnipeg; E. J. L'Esperance, Montreal, and J. G. Taylor, Mutual of Canada, Toronto, have been appointed as a board of directors to the Life Underwriters' News, the organ of the Life Underwriters' Association of Canada.

What Financial Conditions After the War?

Problem of National Debts—the Arguments For and Against—Three Methods of Paying the War Debts—Reform of Currency—Period of Intense Industrial and Commercial Activity Predicted After the War, With Possibility of Over-Production Later, With the Usual Falling Prices, Credit Curtailment, and Stagnation.

The following is the conclusion of the article on finance after the war, printed in *The Monetary Times* last week:—

It seems, therefore, that we should expect the end of the war, if it came to-morrow, to be followed by a period of intense industrial and commercial activity—possibly modified in some countries, or even generally, by one or all of the retarding factors mentioned above. There will follow an extraordinary production of commodities in every direction. For some time this will be absorbed by the increased consumption of daily life and by the replacement of the material which has been destroyed, and by the repair of the world's equipment which has run down. When the latter task has been overtaken—and it will not take very long—there will be a possibility of a condition of over-production setting in, with the usual attendant circumstances of falling prices, curtailment of credit, increase in the real burden of debt, and spreading stagnation.

It is not, however, necessary that this should happen. The production which is no longer needed for replacement and repair may be absorbed by the development of new countries. Here, again, the question will be a psychological one. There are large areas of the globe now comparatively unproductive, where capital can be spent to the ultimate advantage of the world, if people can be found to take the trouble and self-denial of accumulating it and the risk of employing it. But for schemes of development where the return is certainly distant and not certainly assured, easy credit is essential. Credit depends partly on actual conditions, partly on the temper of banks and financial institutions. If those who manage the world's finances are inclined, when the period of over-production draws near, to throw themselves zealously into the development of new countries to a greater productiveness, the period of stagnation may be avoided. If, on the other hand, they find themselves in a timid and conservative frame of mind, credit will grow difficult, and the over-production of commodities, finding no new fields to absorb it, will soon make itself felt, with the usual consequences.

Return is Poor.

It is worth while here to emphasize the fact that, from the point of view of the world, development of productiveness in new directions is good, although the return on the capital invested in the development may be poor. For the alternative may be that the capital is not employed at all or is not even brought into existence. To take a concrete example: From the point of view of the individual investor it is bad that he should put his money into a new railroad—say, in Russia or South America—unless it will bring him in an average return on his money—say, 5 per cent. But the world may be the richer for the railroad being built even if the investor only gets 1 or 2 per cent.—even though he gets nothing—if the productiveness of the world and the supply of useful commodities is thereby increased. For the alternative may be, not that the capital invested in the railroad would have been more productively employed, but that it would never have come into existence at all. The materials in the shape of steel rails, and so on, might have remained in the ground and the labor employed on manufacturing and laying them might have been left unemployed and in idleness.

Non-Paying Enterprises.

This argument is not to be taken as a general defence of non-paying enterprises. Generally speaking, the question whether an enterprise will pay the usual rate of interest or not is a good rough test of its usefulness. Even this is not universal. Road-making has never paid from the time of the Romans down, but without question it has made the world richer. The general argument, however, is that while a less paying enterprise may not be beneficial to the world if a better paying enterprise could have been undertaken with the capital employed, it may be beneficial if the alternative is that no enterprise is undertaken at all and that the real capital employed in the form of commodities is not brought into existence at all but is left a mere potentiality in the shape of unused raw materials and idle labor.

Problem of National Debts.

We have left until the last the enormous increase in the national debts in the belligerent countries which will be an outstanding feature of financial conditions after the war. If the war ended to-morrow the national debt of the United Kingdom would stand at over three thousand millions sterling, after deducting the advances made to the dominions and the Allies. A similar condition of public indebtedness will confront France and Russia. To deal adequately with the problem thus set up will be a task worthy of the best thought of public financiers. The subject is one which requires fuller discussion than it is possible to undertake in this article. It may be worth while, however, to mention some of the alternative suggestions which have been made for dealing with it.

One way suggested is to leave the whole amount as a permanent funded debt—that is, to reckon only on providing the interest and a comparatively small annual sinking fund out of current taxation. Another suggestion is to pay off the whole or the greater part of the war debt at once by a levy on capital. A third is a compromise between the first and second methods—namely, to extinguish the debt within a limited time by devoting to that purpose some special taxation, which would probably in effect be a levy on capital—for example, a special scale of death duties—but which would take effect over a number of years instead of at once.

The argument for the first method is that it is conservative and simple and involves nothing new or experimental. Against it, first of all, is the consideration that it lays so great a permanent burden on the State revenues that they will be overweighted and inelastic. It is argued that this will lead to chronic embarrassment and probably to unsound methods of taxation. A further objection is

OFFICERS OF THE BANK

R. Campbell, General Manager
J. P. Roberts, Supt. B.C. Branches
V. F. Cronyn, Supt. Eastern Branches

raised that this huge State debt will absorb the savings of the community, and will be a constant drawback to the employment of capital in reproductive enterprises. Still another argument is that the time to pay off debt is when prices are high, and not to leave it until a fall in prices may make the real burden, measured in terms of commodities, so much the greater.

Levy on Capital.

The second method proposed—namely, to pay off the war debt at once by a levy on capital—is at first sight somewhat startling. The advantage in it as compared with the first method is that it cleans the slate and leaves the public finances in an unembarrassed condition. The main objections to it are, first, the difficulty of applying it; second, the fact that the burden would fall exclusively on the present owners of property. The latter objection is the more serious. Nevertheless, it may be argued that the sacrifice is necessary, and that even if the war debt be funded the bulk of the taxation necessary to provide the interest and sinking fund would have to be laid on the propertied classes. Assuming that to be so, it may be indifferent to the capitalist whether he gives up at once, say, a sixth of his capital or is compelled to give up annually a sixth of his income in the form of extra taxation. There is this difference, however, that in the latter case future accumulations of capital also would pay, while they would be exempt if the war debt were wiped out at once. It is arguable that this would be to the advantage of the community, since it would put a greater premium on future exertions.

Case of the United Kingdom.

The difficulty of applying the method of a levy on capital is probably not so great as appears at first sight. Take, for instance, the case of the United Kingdom. The total capital wealth of the community may be estimated at about 24,000 millions sterling. To pay off a war debt of 3,000 millions sterling would therefore require a levy of one-eighth. Evidently this could not be raised in money, nor would it be necessary. Holders of war loans would pay their proportion in a simple way, by surrendering one-eighth of their scrip. Holders of other forms of property would be assessed for one-eighth of its value and be called on to acquire and to surrender to the State the same amount of war loan scrip. To do this they would be obliged to realize a part of their property or to mortgage it. But there is no insuperable difficulty about that. In the case of property already mortgaged the holder of the property might be responsible for the whole levy and might be allowed to raise a prior mortgage to cover it, and thereafter to deduct the proper proportion from the capital amount due to the previous mortgagee. Thus, a man having a property assessed at £80,000, encumbered with a mortgage for £40,000, would raise a prior mortgage of £10,000 and pay the levy on the whole property. But the capital amount of the old mortgage would be reduced from £40,000 to £35,000.

Reform of Currency.

In this connection a suggestion may be mentioned for combining a levy on capital with a reform of the currency which has some elements of ingenuity. A considerable part of the accumulated capital of the United Kingdom is represented by the share capital and debenture debts of limited liability companies. It has been suggested that a decimal system of currency might be introduced by making the shilling worth tenpence and reducing the weight of gold in the sovereign by one-sixth, leaving the sovereign worth twenty shillings. The nominal capital and debenture debts of all limited liability companies would be left as at present in pounds. At the same time they would be required to pay to the State in the shape of war loan scrip an amount equivalent to one-sixth of the assessed value of their assets. As their real liability to debenture holders and shareholders would also have been reduced by one-sixth through the change in value of the pound, there would be no real change in the financial position of the companies, and in effect the levy would fall on debenture holders and on shareholders *pro rata* to their interest in the company. Such a levy would only cover the particular form of property which is represented by shares and debentures. Other forms of property would have to pay the levy in a different way.

The third method of extinguishing the war debt over a period of years, by earmarking some special form of taxation for that purpose, is neither open to all the objections against the second method nor would it carry all its advantages. It would be comparatively easy in application and could be arranged so as to fall on future as well as present accumulations of capital, and even on current earnings as well. On the other hand, like the first method, it would necessitate the devising of new ways of raising revenue on a large scale, to provide interest charges until the war debt was paid off.

LARGE GROUP INSURANCE POLICY

A policy for more than $2,000,000, covering 3,000 employees of the H. J. Heinz Company, of Pittsburg, has been issued by the group division of the Ætna Life Insurance Company, of Hartford, Conn.

All premiums on this group insurance contract will be paid by the Heinz company, and practically every one of its employees, including the agents, is included in the plan. Any employee of two months' standing is to have a policy worth $250; employees of five years or more are insured for $500 or more.

WESTERN CANADA'S GRAIN

One hundred million bushels of grain were loaded and handled over the lines of the Canadian Northern Railway system in Western Canada during the crop year ended August 31st. In all, 88,953 cars were handled over its lines in Manitoba, Saskatchewan and Alberta, 60,551 cars being moved through to Port Arthur and points east of that Lake Superior port. Wheat constituted the major portion of the total handlings.

In 1898, when the influence of the Canadian Northern Railway construction was beginning to be reflected in larger production on the western plains, the entire crop attained to less than 57,000,000 bushels, according to figures of the Department of the Interior. Accordingly, the grain loaded and handled over the lines of the Canadian Northern—and a great deal of it produced from territory opened up for settlement since 1898—is almost double the Western Canada production of nineteen years ago.

Official figures of the Department of the Interior show that in 1900 there were in Canada 426 elevators and 97 warehouses of a total capacity of 18,329,352 bushels. In 1916 and 1917 there were 3,360 elevators of a total capacity of 193,844,000 bushels. Of these, Manitoba has a capacity of 22,775,000; Saskatchewan, 65,625,000; Alberta, 25,886,000; and British Columbia, 1,793,000. The capacity of the terminal elevators in Canada is [illegible] bushels. These are located chiefly at Port Arthur and Fort William, at the head of Canadian Great Lakes navigation, the Canadian Northern Railway elevator at Port Arthur (capacity, 9,500,000 bushels) being the largest consolidated elevator plant in the world.

A Family Duty

A man owes no more important duty to his family than the making of his Will. Every man knows who should or should not participate in his estate, and it is only by making his Will that proper division can be assured. A capable and impartial Executor must be appointed. We solicit the appointment, and by our thorough organization can and will give your estate economical and efficient administration. Write us for free Booklet, Making Your Will.

GET AT MASSES WITH BONDS

Is a Bond Issue, With Substantial Prizes, the Best Way? —Question of Demoralization

Canada is not likely yet to resort to the issue of premium bonds to attract war loan funds. The form of issue, however, is a prominent topic in the United Kingdom, where a select committee of the House of Commons was appointed last summer to consider the matter. Commenting on this development the London Financier says, editorially: "Advocates of the project will welcome the government's decision, while opponents of the scheme will not be dismayed by it. It may be recalled that this is not the first time the subject has been considered by a committee.

War Savings Certificates.

"The war savings committee, which investigated it thoroughly, early in 1916, arrived at the conclusion that the issue of premium bonds was not desirable, and proposed as an alternative suggestion, which was subsequently adopted, the issue of war savings certificates of the now familiar type. Much has happened since then, and people who were formally rootedly opposed to any scheme which seemed to partake of the nature of a state lottery, have modified their opinions. Their objections, on principle, to the issue of prize bonds are as strong and as forcible as ever, but they are prepared to sacrifice their views on the ground that if premium bonds, or, for that matter, any other form of security, are the means of providing funds for the prosecution of the war they ought to be issued. The urgent need of the moment is to raise money, especially from the masses. If that can be done, a twofold advantage is gained. In the first place, money which would otherwise be spent, instead of being saved, is placed at the disposal of the government. In the second place, the public, by applying their surplus earnings to the purchase of premium bonds, instead of to the purchase of commodities, will automatically check their consumption of a large variety of articles, and thereby tend to prevent a further harmful advance in prices.

Masses not Reached.

"Even those who are opposed to the issue of bonds to which prizes are attached will allow that the methods hitherto adopted to obtain funds for the financing of the war from the masses have been more or less of a failure. War savings certificates have enjoyed a certain amount of popularity, but the sum raised by this means is relatively quite trivial, while sales of exchequer bonds through the post office have also produced only a comparatively small amount. It is quite evident that the 5 per cent. offered by exchequer bonds or the £5 7s. per cent. compound interest offered by war savings certificates does no arouse enthusiasm among either the industrial classes or even the middle classes. If, as the advocates of premium bonds contend, that kind of security forms an irresistible magnet, and causes the masses to devote all their surplus earnings to the purchase of the bonds, by all means try the experiment. It is certainly worth trying, and it must be judged only by its results. It is useless to dogmatize on the subject, and the only effective means of proving or disproving the theories of the premium bond enthusiasts is to put the matter to the test. We know that large masses of the population are fond of a flutter, whether on the turf or the stock exchange, and as opportunities of indulging their propensity has now practically ceased it may be that premium bonds would prove a welcome alternative.

Character of Scheme.

"Assuming that the projected committee reports in favor of the issue of prize bonds, a good deal will depend upon the character of the scheme recommended. It may be taken for granted at the outset that no proposal will be a success which does not provide for the distribution of substantial prizes. To fix the maximum prize at a comparatively modest sum, such as £500, as has been suggested in some quarters, would be merely to court disaster. It is undoubtedly the chance of winning a handsome prize up to, say, at least £5,000 that will most powerfully attract people of small means and cause them to loosen their purse-strings.

"The idea that the winning of a big prize will only serve to demoralize the lucky recipient may or may not be justified —and much must depend upon the character of the individual concerned—but even the demoralization of a limited number of [illegible] the net result is to procure for the prosecution of the war large sums which would otherwise be probably squandered. From the government's point of view the issue of premium bonds is attractive, so far as it enables money to be raised at a comparatively cheap rate, especially if a large block of bonds were redeemed each year and a corresponding reduction effected in interest charges. It will be for the committee, whose appointment, instead of being deferred until after the recess, ought to be proceeded with immediately, to devise a practicable scheme, and, whatever the proposals may be, they will be impartially and even sympathetically considered."

Safety of Principal—Certainty of Interest

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment—safety of principal and certainty of interest.

To those who have funds for investment only in small sums, this most desirable class of security is not directly available. They may, however, secure all those advantages by investing in the bonds of this corporation, which are based on upwards of thirty-two million dollars of carefully selected first mortgages on improved real estate. These bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest trust funds.

Send for specimen bond, copy of Annual Report and full particulars.

Opinion has changed:—

People no longer believe that a man has done his duty to his family when he has made a will leaving them all his property and appointed a personal friend as executor and trustee.

People nowadays expect that a man will not only pass on his property to those who have the strongest claim to it, but will safeguard it for them in every possible way.

How the trust company has been the means of making this protection more complete is indicated in our folder "By Way of Comparison," mailed anywhere on request.

STRENGTH OF MUTUAL COMPANIES

Mr. Wegenast Takes Further Issue With Statements in Recent Article

Editor, *The Monetary Times*:—

Sir,—In order that your readers may not lose sight of the text of Mr. Barton's article in your issue of the 17th ult., which gave rise to my letter, published in your issue of the 21st inst., together with Mr. Barton's comments, I shall repeat the paragraph referring to the point at issue.

"The question (of mutualization) was prominently before the public in Canada about two years ago, and is not unlikely to be so again after the war, when it is to be hoped that Canadian life policyholders will give very careful thought before yielding the tried security and progress of proprietary companies for the comparative obscurity of mutualization. Communistic as is the basic idea of life assurance, only to a very limited extent can its government in the past be called democratic, while there are many and cogent reasons, too long to set out here, that its best development lies in continued individualistic control."

Fling at Mutual Companies.

It will be observed that the warning Mr. Barton sounds to Canadian policyholders is, that they should "give very careful thought before yielding the tried security and progress of proprietary companies for the comparative obscurity of mutualization." I have no desire to enter into further controversy with Mr. Barton, or any one else, upon this subject, which, as he says, has been the subject of much discussion for many years, but it seemed to me that he went needlessly out of his way to have a fling at mutual (presumably purely mutual legal reserve) companies. There being but one such company in Canada, he no doubt felt that his advice would find a receptive audience here. I am inclined to think that he would have hesitated to offer the above statement for publication in the United States, where the largest and best companies are purely mutual.

Mr. Barton calls attention to a list published in the Spectator Year Book, 1917, of some 50 American mutual companies, which have either failed, retired from business, or were reinsured. I have examined the list most carefully, and found that it contains a record of 307 such companies in all. Of these, 65 are referred to as mutual life companies, but while mutual in name, 18 of them had capital stock, so that they were not mutual in fact, but were what is known as "mixed" companies; 20 of the remainder were reinsured, and 15 retired from business. This leaves 12 companies out of the total of 65 that are reported as failures of so-called mutual or fraternal companies. Amongst these was the Mutual Reserve of New York. Had this organization been favored with sound actuarial advice, and built its foundation upon adequate premium rates and policy reserves, its energetic management would doubtless have made a magnificent company of it. Lacking in these essentials as it did, it was fore-doomed to failure. Such companies are not under review, and the question of mutualization, referred to in the above extract, which he states was prominently before the public in Canada about two years ago, surely did not contemplate converting any of our stock life companies into assessment or fraternal organizations!

Mr. Barton, whether intentionally or not, confuses the point at issue by introducing such concerns into the discussion. One would hardly expect this from an associate of the British Institute of Actuaries.

Record of Mutual Companies.

Fraternal or assessment companies, as many of your readers know, do not charge adequate premiums, and do not hold the reserves required by law of regular companies; hence the cause of their failure. Purely mutual companies, such as the Mutual Life of New York, and a host of others, charge practically the same premiums as stock companies, and, of course, are compelled to hold the reserves for the protection of their policyholders prescribed by law. I could not reasonably ask you to give space for a history of the magnificent work accomplished by the great American mutual companies. I will go on record, however, in stating that Mr. Barton stultifies himself if he embraces such companies within the scope of "comparative obscurity," as his article leaves your readers to infer.

[illegible] proprietary companies," I would refer Mr. Barton to the list of failures in the Year Book. It would be interesting to set forth a statement of the enormous losses not only to stockholders but to policyholders, in the hundreds of defunct stock companies which blacken the pages of American life insurance history. Space forbids this, but I shall mention a few of them where the loss in each case ran into millions of dollars:—

Company.	Capital stock.	Loss to policyholders.
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]
Continental	100,000	3,476,982
Columbia	100,000	2,574,959

Misfortunes in Canada.

But even here in Canada we know something of such misfortunes, for there are lingering memories of unhappy experience by shareholders and policyholders in the Union Life of Toronto, whose "individualistic control" by Pollman Evans, would hardly shed lustre upon Mr. Barton's theory!

I have examined all available records carefully, and could find that up to the present time only one regular American purely mutual life insurance company has ever failed, and that was the Life Association of America, St. Louis, Mo., whose downfall was the result of an attempt to take over a disabled stock company!

In the light of these facts, it is nothing short of a perversion of the truth to speak of stock control as yielding "tried security making for progress," and that, "the best development lies in continued individualistic control."

Change of Control.

Mr. Barton seeks to point out some of the dangers of the mutual principle in so far as management is concerned, alleging as one reason "the difficulty of combination amongst policyholders to change an inefficient or undesirable control." I agree with him as to the great importance of being able to change the control when such becomes necessary, but he fails to show how such change is possible in the case of stock companies, where the management holds the controlling interest. There is no way of removing an inefficient management in such, unless fraud or dishonesty can be proven, the policyholders in Canadian stock companies having only a minority representation on the board of directors.

Does Mr. Barton really believe for one moment that companies like the Prudential and Metropolitan could possibly have been mutualized, if it were not absolutely clear to all concerned that such a step was a forward movement, designed to benefit the policyholders? Does he believe that the control of these companies will be less efficient now than formerly, and that the policyholders will have less of "tried security and progress" than they had? If he does, he underestimates the intelligence of the public which he is attempting to enlighten in such matters.

Yours, etc.,
Geo. Wegenast,
Managing Director, Mutual Life Assurance
Company of Canada.

Waterloo, Ont., September 25th, 1917.

STEEL PRODUCTS IN CANADA

The total production of steel ingots and direct castings in Canada in the first six months of the current year amounted to 836,149 short tons, an increase of 246,596 tons, or 42 per cent. over the corresponding period of 1916.

Average monthly production was 139,858 tons, against 98,259 tons in the first half of 1916, and 106,268 tons for the full year, 1916. A new high record in output was reached [illegible] falling off of about 18,000 tons.

Pig iron output, from returns covering all producers, was 586,098 short tons, as against 562,097 tons in the first [illegible]

Imports from the United States have been on a con- [illegible] and direct castings for the first six months of the year totalled 130,640 short tons, against 47,493 tons in the same period in 1916. In pig iron the increase was from 29,801 tons last year [illegible]

CANADA

How best to Serve

Every Canadian can help in the successful application of the Military Service Act

THE Military Service Act is the law of the land. It will be enforced sincerely and with firmness, but fairly. Reinforcements to be raised are limited to 100,000 men, who are being selected by the country, not by the military authority. Military control does not start until these men are chosen.

The Men Called Can Help

The first call is for men between the ages of 20 and 34 inclusive, who were unmarried or widowers without children on July 6, 1917. All these men should go immediately before a Medical Board in this district for examination as to physical fitness. If they are not placed in the Medical Category A., their present obligation ceases. If found physically fit and placed in Category A., they should, immediately after the issue of the proclamation calling out the first class, visit the nearest post office and report for service on a printed form supplied. If reasonable ground for claiming exemption exists, an exemption form may be obtained from the Postmaster, and filled out. The Postmaster will forward this form to the Registrar appointed for the district, and the man seeking exemption will then be advised by mail when and where he should appear before an Exemption Board to have his case taken up.

The Employer's Part

Employers will find it to their advantage to see that all the men in their employ who are in the first class under the Military Service Act appear as soon as possible before a Medical Board for examination. Should an employer desire exemption for any one of his men who is found physically fit, he may seek it on the following grounds:

(1) that the national interest demands that a man be left at his work rather than placed in military service.

(2) that, instead of doing military service, a man should be used in work for which he has special qualifications.

(3) that it is expedient in the national interest that instead of being employed in military service, he should continue to be educated or trained for any work for which he is then being educated or trained.

Duty of Parent or Near Relative

Parents or near relatives of men in the class called may apply for their exemption on the above grounds or because of some special domestic reasons. In this, as in other cases, delay is a grave mistake.

Issued by
The Military Service Council

SEPTEMBER MUNICIPAL BOND SALES

Lowest Total This Year, With the Two Exceptions of March and April

The municipal bond sales in Canada for September, as compiled by *The Monetary Times*, were $440,268, compared with $4,637,836 in August and $960,435 for September of last year. Last month's sales made the lowest total of the year, with the two exceptions of March and April. The high record of August last was made up largely of a substantial sum of Ontario sales and an additional $1,000,000 of the Greater Winnipeg Water District bonds.

Comparing the record of September, 1916, with that of the month just ended, the bond sales are as follow:—

Sold in	Sept., 1917.	Sept., 1916.
Canada	$440,268	$ 960,435
United States	......	200,000
	$440,268	$1,160,435

The municipal bond sales in Canada for the first nine months of the year, according to *The Monetary Times*' bond record, were as follow:—

	1913. $	1914. $	1915. $	1916. $	1917. $
January	1,337,500	1,953,137	1,784,947	1,909,441	1,969,256
February	1,038,806	5,995,336	3,047,011	1,419,909	458,874
March	335,492	5,123,176	2,572,357	2,027,741	229,013
April	3,693,857	2,847,953	8,603,094	1,979,852	430,974
May	880,630	6,400,755	3,464,281	2,649,000	1,375,039
June	2,435,726	4,617,857	2,395,744	4,428,100	1,642,003
July	1,591,924	2,180,758	1,618,422	1,485,225	3,814,489
August	526,300	395,395	1,087,415	807,297	4,637,836
Sept.	1,663,260	535,050	2,768,484	960,435	440,268
Totals	13,503,495	30,049,417	27,341,755	17,667,100	14,997,752

There were no Canadian bond sales in the United States in August or September. Sales for the first nine months of 1914, 1915, 1916 and 1917, were as follow:—

	1914.	1915.	1916.	1917.
January	......	$ 340,000	$ 3,183,215	$2,285,000
February	$ 50,000	6,471,000	899,506	485,752
March	18,000	6,543,947	595,000	95,000
April	25,000	7,100,825	2,158,306	1,563,200
May	1,750,000	600,000	7,219,000	1,375,039
June	2,100,000	......	2,136,226	80,000
July	1,130,000	890,000	3,540,000	1,030,000
August	35,000	750,000	97,300	......
September	90,000	6,748,342	200,000	
Totals	$5,198,000	$29,444,114	$20,028,553	$6,913,981

The following are details of sales during September:—

Ontario.

	Amount.	Rate %	Term (Yrs.).
Bridgeburg	$ 30,000	5½	30
York Township	8,000	5	20

	Amount.	Rate %	Term (Yrs.).
Assiniboia	$ 26,492	5	5-20

War loans have the right of way in the money markets and municipalities are consequently having considerable difficulty in marketing their bond issues. Montreal proposed last month to issue a popular loan of $7,000,000 locally; London, Ont., has sold over $85,000 of short-term bonds to its citizens.

PRESENT INTEREST RATES

"Were mortgage companies able to obtain an increased rate of interest, these items would eventually be borne by the borrower, but money, like other commodities, is subject to the law of supply and demand, and it is but a few years since the rate on farm loans in Ontario was 5 per cent. or less. Even with the world at war, and the various belligerent governments bidding extravagant rates for money, we find the prevailing rate on farm loans in Ontario to be between 6 and 6½ per cent., in Manitoba 7 per cent., and in the further western provinces 8 per cent."—Mr. Hume Cronyn, managing director, Huron and Erie Mortgage Corporation, speaking at annual convention of the Farm Mortgage Bankers' Association at Minneapolis recently.

DEFAULT ON VICTORIA RAILWAY BONDS

The default on bonds of the Victoria and Sydney Railway, B.C., was recently noted in *The Monetary Times*. Commenting on the matter, the British Columbia Financial Times says:—

"The future of the Victoria and Sydney Railway, which for twenty-five years has operated on the Saanich peninsula, is now veiled in great uncertainty. The struggle to make ends meet in a sparsely settled territory in competition with two other lines has brought the matter to a crisis, the next move resting with the bondholders of the company, whose interests are represented by a trust company in Montreal.

"The company had a clear field in its early years, but was a losing proposition later, and the government of British Columbia and the city of Victoria, who had in 1892 guaranteed the interest at 2 and 3 per cent. respectively on the $300,000 worth of bonds issued in that year, had to meet the interest for a term of years. Then in 1913 an agreement was reached which extinguished their interests, made with the Victoria, Vancouver and Eastern Railway, as the holding company in this province for the Great Northern Railway.

"The company, which had built the Blanshard Street Depot a few years earlier under the authority of a separate company, known as the Victoria Terminal Railway and Ferry Company, put on a gasoline motor car in 1913. It only had three months' service before the competition of the Saanich Interurban line of the British Columbia Electric Railway began, and the Victoria and Sydney has continued to lose money, about $15,000 per year, it is understood, up to date. Added to its other difficulties, in April the Canadian Northern Pacific Railway commenced its Patricia Bay service in practically the same territory as the Victoria and Sydney line.

"The bonds mature on September 1st, and since that time the officials have been waiting for some action to be taken by the bondholders. It is presumed that if the controlling company, the Great Northern Railway, will no longer come to the relief of the company, it will pass in the ordinary [illegible] there is no specific information on that point yet.

"The question of electrification of the line is said to have been broached over at least a portion of the route, but hitherto no specific action has been taken. The section between Saanichton and Sydney is particularly regarded as likely to be treated in this way, provided that the British Columbia Electric Railway want direct access into Sydney."

The Investment of Small Sums

We have at the present time a number of bonds of odd amounts and small denominations, which represent the unsold balances of large blocks of high-grade Canadian Government and Municipal Bonds.

In order to clean out these amounts we are offering them at very special prices, the yield to the investor being from

$6\frac{1}{8}\%$ to $6\frac{5}{8}\%$

SEPTEMBER FIRE LOSSES

Waste was About Same as in August—There Were 21 Deaths by Fire

The Monetary Times' estimate of Canada's fire loss during September is $1,101,700, as compared with the August loss of $1,230,183, and $981,703 for September of last year. The following is the estimate of the September losses:—

Fires exceeding $10,000	$ 778,000
Small fires reported	180,000
Estimates for all unreported fires	143,700
	$1,101,700

The Monetary Times' record of the first nine months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January	$ 2,796,312	$1,240,886	$ 1,619,217	$ 1,918,660
February	2,920,749	1,019,556	3,275,600	2,009,953
March	2,660,066	1,931,090	1,406,501	2,050,650
April	1,916,238	1,406,747	1,460,437	1,317,714
May	1,935,516	881,855	1,850,205	1,163,110
June	1,267,416	1,157,156	494,557	1,184,627
July ..	2,093,130	773,200	1,159,285	1,101,734
August	2,021,370	400,403	1,057,109	1,230,183
September	1,356,281	1,116,109	981,703	1,101,700
Totals	$19,807,693	$9,927,297	$13,304,614	$13,078,331

The fires reported in September at which the losses amounted to $10,000 and over were:—

Esquimalt, B.C., Sept. 2., laundry and machinery, $15,000.

Lac-la-Biche, Alta., Sept. 3, business section of town, $25,000.

Fernie, B.C., Sept. 6, two stores and hotel, $10,000.

Toronto, Ont., Sept. 26, Toronto Hydro-Electric Commission's shop, Yonge Street, $250,000.

Charlottetown, N.B., Sept. 8, business block, $25,000.

Kelliher, Sask., Sept. 9, business block, $30,000.

St. Anne de Bellevue, Que., Sept. 12, Clarendon Hotel, $50,000.

Swan River, Man., Sept. 11, Commercial Hotel and other buildings, $25,000.

Tara, Ont., Sept. 12, business section, $18,000.

Trenton, N.S., Eastern Steel Company's machine shop, $125,000.

Windsor, Ont., Sept. 14, Bellinger's dry goods store, $30,000.

Elgin, Man., Sept 24, offices in business section, $15,000.

Penticton, B.C., Sept. 24, hotel. Estimated loss, $35,000.

North Bay, Ont., Sept. 24, Stoddart Brothers' general store, $25,000.

Among the reported causes in September were: Spontaneous combustion, 1; spark from engine, 3; overheated motor, 1; incendiarism, 2; blast of natural gas, 1; flame from torch, 1; defective wiring, 1; lightning, 13; spark from kitchen stove, 1; defective stove pipe, 1; lighted match, 1.

The structures damaged or destroyed last month included: Blacksmiths' shops, 2; garage, 1; barns, 24; fair building, 1; laundry, 1; liquor store, 1; hotel, 4; stores, 1; dwellings, 15; horse stable, 1; livery stable, 2; barber shop, 1; bowling alley, 1; apartment house, 1; fish company's plant, 1; town business sections, 3; warehouses, 3; drug store, 1; harness shop, 1; saw mill, 1; colliery bankhead, 1; machine shop, 1; dry goods store, 1; oil house, 1.

The fires at which fatalities occurred were:—

Montreal, Que., Sept. 5	Store and dwelling fire	2
Weir, Que., ...	Summer house	1
Osnabruck Tp., Ont., Sept. 5	Farm house	3
Ingersoll, Ont., Sept. 14	Playing with matches	1
Marrtown, N.B., Sept. 21 ..	Smoking a pipe	1
Toronto, Ont., Sept. 23	Playing with matches	1
Wingham, Ont., Sept. 11 ...	Clothing ignited by bonfire..	1
Montreal, Que., Sept. 26 ...	Setting fire to clothing	1
Maidstone, Ont., Sept. 24 ..	Curling girl's hair	2
Thetford Mines, Que., Sept. 19	Trapped in burning house ..	1
Vancouver, B.C., Sept. 21 ..	Curtains blown on to oil stove	1
St. Anne de Monts, Que., Sept. 19	Trapped in burning house ..	5
Woodstock, Ont., Sept. 26 ..	Overturned lamp	1

Several deaths last month were due to simple causes. Two children were burned to death through playing with matches. An old woman's clothes became ignited with a pipe she had been smoking, and she lost her life. A mother and daughter were burned, the fire originating, it is thought, in some way while the little girl's hair was being curled. The wind blowing lace curtains on to an oil stove caused another death. This year to date 148 lives have been lost in fires through these and similar causes.

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first nine months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.
January	27	27	27	14	26	3	10	21
February	15	12	11	21	18	11	23	19
March	[illegible]	18	24	22	27	23	23	20
April	7	20	15	11	22	14	6	15
May	15	28	18	3	8	5	14	12
June	52	13	6	18	12	2	6	9
July	13	110	9	9	8	13	213	19
August	11	22	16	29	3	14	30	12
September	10	1	6	27	9	27	6	21
Totals	202	263	132	154	233	112	331	148

A large number of fires were caused by lightning last month, resulting in the destruction of many barns, involving losses of stored crops, implements and horses.

In *The Monetary Times'* fire record for August, the loss at Curtiss and Harvey's explosive works at Dragon, P.Q., which occurred on August 18th, was not included. We understand that the property loss in that case was about $1,500,000, with some $700,000 insurance. The origin of this loss was fire and the sum of the damage must be included amongst fire losses notwithstanding that after the fire started some damage was caused by explosion. The August figures have therefore been revised accordingly.

WAR COSTS AND NEW SAVINGS

Warning against waste of war-time profits was given to the public recently by Hon. Basil P. Blackett, special representative of the British treasury, at the American Bankers' Association convention. He was speaking before the members of the savings bank section. It was stated that the theory of officials of savings banks is that purchases of war loan bonds should be made from the extra money earned by wartime conditions. "The war must be paid for out of new savings," Mr. Blackett insisted.

He said in part: "How is the war paid for? It is not enough to say that it is paid either out of taxation or out of the proceeds of government loan issues. For the question arises immediately, How does the nation at war manage to provide the sums required from it by the government in the form of taxes or loans?

"The British government is spending something over thirty million dollars a day on the war at the present time. It is getting goods and services valued at that figure. The important thing is not the number of dollars which the belligerents are spending, but the goods and services which they command. When the goods and services are secured the war is being paid for.

"When people lend money to the government, they provide the money needed to pay for their subscription in various ways. The best way is that they should deny themselves comforts and luxuries, and instead of using their money to [illegible] they should get out of the market and not compete, but hand over the power to command these goods and services to the government, which uses them for war needs.

"A second way of providing money for subscriptions to [illegible] securities."

In order to save for the Indians of Canada their large timber holdings against loss by forest fires, the Indian department at Ottawa is obliging licensees to pile and burn their "slash" after taking the logs out of the woods. The [illegible] bad fires.

IMPORTANT CHANGES IN INSURANCE ACT

Accident Companies to File Copies of New Policy Forms Before January Next

The attention of insurance companies transacting personal accident and sickness insurance has been especially called to section 194 of the new insurance act by Mr. G. D. Finlayson, superintendent of insurance, Ottawa. This section requires all companies transacting personal accident and sickness insurance under Dominion license to include in policies issued on and after January 1st, 1918, the provisions specified in the section.

It also provides that copies of all such policies and of the company's classification of risks and established premium rates applicable to such policies shall be filed with the department before the policies are delivered.

The department has therefore requested all companies affected by this section to file copies of their policy forms, revised to comply with the provisions of the section, and copies of their classification of risks and established premium rates, before the date noted.

Loans and Return of Policy.

Superintendent Finlayson has drawn the attention of life insurance companies to section 91 of the new act, where an amendment has been made in paragraph (g), of subsection 1 of the paragraph which provides that a policy on which a loan has been obtained shall be returned to the borrower, if so required by him, after having been produced for examination and endorsement by the company. Attention is also drawn to a corresponding change in paragraphs 5 and 6 of form G in the schedules to the act. Policies issued after this date should therefore contain nothing inconsistent with paragraph (g) as amended.

Officers and Investments.

The attention of all Canadian companies is drawn to the provisions of section 66 of the insurance act, 1917, which provides that all investments and deposits of the funds of any such company shall be made in its corporate name. This requirement replaces the provisions of section 65 of the insurance act, 1910, which permitted such investments to be made in the name of any officer of the company or other person in trust for the company.

An exception to the new requirement is made to meet the case of companies carrying on business in any foreign country in which deposits are required to be registered in the name of some person other than the company.

Attention is also drawn to the provisions of the said section prohibiting any director or officer of a Canadian company from accepting any fee, brokerage or commission for any loan, deposit, purchase, sale, payment or exchange made by or in behalf of the company.

DOMINION TRUST COMPANY'S AFFAIRS

With $144,000 balance on hand after two and one-half years of liquidation with which to meet the $2,746,000 claims against the Dominion Trust Company, the liquidator of that institution, Mr. Andrew Stewart, last week, filed a report with the Supreme Court, covering the history of the proceedings to June 30 of this year. Owing to the involved state of the liquidation and the number of large claims yet undecided, the liquidator informs the court that he is as yet unable to state approximately the amount of any "possible dividend." The costs of the liquidation to date amount to $167,657, of which $126,215 belongs to the Vancouver office, and $41,441 to branch offices.

The realizations to date, Mr. Stewart states, amount to $[illegible], and there is cash on hand of $[illegible], after advancing $56,528 to protect assets and paying off $3,82[illegible], of preferred claims. Of the total realizations, $186,209 was from the estate of the late W. R. Arnold, manager of the company.

Military [illegible] United States [illegible] by the soldiers and sailors of our Allies, will be filled by Canadian firms, so United States despatches say.

Earnings,

Past and Present

¶ The investor in stocks is sometimes misled by large current earnings. It is equally important to know how earnings averaged over a period of years on the stock he is considering.

¶ Our new edition "Analysis of Canadian Stocks" gives both of these facts in such a way that all companies can be quickly compared. It gives many other vital facts as well.

¶ We will gladly send a copy free on application.

LIFE INSURANCE LAW

Important Principles Enunciated in Recent Court Case—Evidence of Insurability

BY M. L. HAYWARD, B.C.L.

The case of Sussex v. [illegible] Life Assurance Company, recently decided by the Appellate Division of the Supreme Court of Ontario, is a [illegible] one and lays down some important principles of life insurance law.

In this case the company issued a policy on the life of one, Alfred E. Sussex, on the 24th of March, 1914, calling for 20 annual premiums of $80 each, and the first and second premiums were duly paid. The third fell due in 1916 and was not paid or tendered on the due date or within the 31 days of grace allowed by the policy. A few days after the last day of grace Sussex mailed the company a cheque for the premium which was refused and returned. In refusing the premium the company acted under clause 5 of the policy which read as follows:—

"This policy shall not take effect until the first premium hereon shall have been actually paid during the good health of the insured, a receipt for which payment shall be the delivery of the policy. If any subsequent premium be not paid when due, then this policy shall cease, subject to the values and privileges hereinafter described, except that a grace of thirty-one days, during which time the policy remains in full force, will be allowed for the payment of any premium after the first, provided that with the payment of such premium interest at the rate of six per cent. per annum is also paid thereon for the days of grace taken; but for any reckoning herein named the time when a premium becomes due shall be the day stipulated therefor without grace."

Not a Direct Right.

On this point the court held that: "It is evident that the plaintiff has not a direct right to have the policy continued or reinstated by reason of forwarding his cheque as above stated, under the provisions of this condition, for the double reason that the thirty-one days' grace had then expired, and that he did not add interest as provided for; but I shall have occasion later on to refer specifically to the precise wording of this condition, in discussing the defendants' contention that by default in payment the policy, ipso facto, became null and void to all intents and purposes—in fact ceased to exist.

"There was evidence given with a view of excusing the plaintiff's default, and evidence to show that he was without excuse, but I do not think it matters either way; the plaintiff failed to comply with the terms of his policy as to periodical payments, and the only question is, is the plaintiff entitled to have the policy reinstated by reason of condition 14 of the policy?"

Condition 14 referred to above was as follows:—

"Within five years after default in payment of premium, unless a cash surrender value has been paid for the policy or the extension period has expired, or if this policy has not been surrendered, it may be reinstated upon evidence of insurability satisfactory to the company and by payment of arrears of premiums with interest at the rate of six per cent. per annum, and by reinstatement of whatever indebtedness to the company existed hereon at the date of default, with interest from that date."

Contained no Restrictions.

Condition 7 provided that "this policy contains no restrictions regarding change of occupation, residence, travel, or service in the militia or army or navy in time of war or in time of peace; but, if the insured shall commit suicide within one year from the date thereof, while sane or insane, this policy shall be null and void."

Sussex then applied to the company to reinstate the policy under clause 14 and this the company was willing to do; but in the meantime Sussex had enlisted with the C.E.F., and the company insisted on charging the extra "war premium" of $50 per $1,000 of insurance. Sussex then brought an action to have the policy reinstated according to its original terms and without the burden of the additional premium.

The court decided against the company and ordered a reinstatement of the policy.

"It is quite clear," said the court, "that from the company's proposal above set out, and is bluntly admitted by Mr. Parkinson, the company's manager for Western Ontario, that the real difficulty or cause of dispute is not the delay in payment, but the necessity of readjusting methods by reason of the unforeseen burdens imposed upon insurance companies by the daily casualty lists of the war. In consequence of this, this company adopted new rules—an altered interpretation of their contract in fact—after the making of this contract and after the war, to wit, on the 1st September, 1915. It is not shown that notice of the change was given to the holders of [illegible] policies.

General Rule of Interpretation.

"I am not wedded to any general rule of interpretation, but all the same it is right to keep in mind that the language of the policy is the language of the company; that the plaintiff, like thousands of others similarly situated, entered the service of he country upon the faith of it; and, without saying that it is therefore to be construed unfavorably or favorably to its author, it is plainly right that the generality of the language of condition 14 should not be narrowed or cut down, or the express provisions of condition 7, in effect, abrogated, unless there is clear notice to the insured, somewhere upon the face of the policy, that the undertaking of the company by condition 14 is to be read in a more limited sense than the prima facie meaning of its language would import."

It was also argued on behalf of the company that Sussex, having enlisted, could not furnish the "evidence of insurability" required by clause 14, but in view of clause 7 the court disposed of this argument in the following words:—

"'Proof of insurability,' in condition 14, means that the insured, at the time of application for reinstatement, is a proper risk for insurance upon the basis of the original contract, and the condition of the health of the insured is the only matter to which I can think it could apply in this case; and, at all events, it is the only matter to which it did in fact apply, upon the circumstances here. If the policy had excepted the risks incident to warfare, the insured, having become a soldier, would not be eligible for insurance without the consent of the company, and so would lack the quality of 'insurability' and the right to reinstatement, but the policy itself determines this point against the defendants."

Evidence of Insurability.

On the point that the evidence of insurability had to be "satisfactory to the company," Judge Lennox said:—

"I give no weight to the argument, somewhat faintly urged, that the evidence of insurability is to be 'satisfactory to the company'; the provision is not a contract that the company is to be allowed to be arbitrary or unreasonable. The plaintiff furnished proof of good health by the certificate of the doctor who originally examined him. Dr. Drake says: 'This is to certify that I have this day carefully examined the above J. E. Sussex and find him in perfect health and an A No. 1 risk for life insurance as in previous examination on 9th May, 1914'—tendered the overdue premium with interest at six per cent., and offered to furnish any further proof of insurability required. The defendants did not at the time dispute the sufficiency of the proof or tender, nor since or at the trial claim that the tender or proof was insufficient or defective, if as a matter of contract the plaintiff comes within the provisions of condition 14."

STERLING EXCHANGE A NECESSITY

Mr. R. H. Brand, member of the Ministry of Munitions of Britain and of the Imperial Munitions Board of Canada, recently put forth a strong plea for a continuation of loans to Britain before the national banks section of the American bankers' convention. Every effort is being made to stabilize sterling exchange, he said. Britain has drained herself of gold and of liquid United States securities. If she cannot borrow, financial chaos will result.

"The future peace of the world will depend upon the perfection of an understanding between the United States and the British Empire," Mr. Brand declared. He placed the burden of financing the war from this time on for all the Allies upon the United States.

Mr. Brand declared his belief in the adequacy of the allied credit to win the war, but said it must be extended to all. There is no question about the integrity of the external debts of all the allied nations, he said; they will be paid. The United States' strictly fundamental problem is ships, he continued. He predicted the abandonment of the private automobile before long in the United States.

FIRE INSURANCE IN SASKATCHEWAN

Record of Premiums and Losses Last Year—Mutual Companies' Business

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the month of September:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
September 7	$2,679,000	$2,666,000	— $ 13,000
September 14	2,728,000	2,691,000	— 37,000
September 21	2,779,000	2,964,000	+ 185,000
September 30	3,660,000	3,631,000	— 29,000

Grand Trunk Railway.

	1916.	1917.	Inc. or dec.
September 7	$1,276,061	$1,317,980	+ $ 41,919
September 14	1,253,629	1,300,745	+ 47,116
September 21	1,310,670	1,336,312	+ 25,642
September 30	1,786,466	1,828,755	+ 42,289

Canadian Northern Railway.

	1916.	1917.	Inc. or dec.
September 7	$ 708,900	$ 715,800	+ $ 6,700
September 14	668,000	751,300	+ 83,300
September 21	726,000	770,200	+ 44,200
September 30	1,085,000	1,104,400	+ 19,400

The Canadian Pacific gross figures for the last period of September were at $3,631,000, as compared with $3,660,000 for the corresponding nine days of last year. This is a decrease of $29,000, or .798 per cent.

The Grand Trunk total was at $1,828,755, an increase of $42,289, or 2.36 per cent. over 1916. Canadian Northern gross returns were at $1,104,400, comparing with $1,085,000 for the same period of last year.

DIVIDENDS AND NOTICES

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the DOMINION TEXTILE COMPANY, LIMITED, has been declared for the quarter ending 30th SEPTEMBER, 1917, payable OCTOBER 15th, to shareholders of record September 29th.

By order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 17th September, 1917.

Judicial Sale of the Assets of the Ontario Marble Quarries, Limited, in Liquidation.

Tenders are called for the purchase of the property of the above Company consisting of Marble and Stone Quarries, Mineral Rights and Sand Pits—with Mill, Plant, Machinery and Equipment, the property of the Company—which Quarries are situated in the Townships of Faraday and Dungannon, County of Hastings, Province of Ontario, Canada, with connection with the Central Ontario (C.N.) Railway. Marbles are white and colored.

The Quarries and Plant may be inspected at Bancroft, about 20 completed works in the City of Toronto and elsewhere and Plans, Reports, Certificates, etc., at the Liquidator's Office, 906 Excelsior Life Building, Toronto. All particulars to be obtained from the Liquidator.

All Tenders must be accompanied by a certified cheque for five per cent. of the amount of the Tender (which will be returned if not accepted) and the balance of the purchase money shall be paid as arranged. Tenders shall be addressed to J. A. C. Cameron, Official Referee, Osgoode Hall, Toronto, and marked "Tenders for the Assets of the Ontario Marble Quarries, Limited," and must be received before noon on Monday, 1st October, 1917. The highest or any tender not necessarily accepted.

J. A. C. CAMERON,
Official Referee.

The date for the receipt of Tenders has been, by request, enlarged to noon on Thursday, 1st November.

J. A. C. CAMERON,
Official Referee.

NOVA SCOTIA STEEL & COAL CO., LTD.

DIVIDEND NOTICE.

A Dividend of Two per Cent. on the Preferred Shares of the Company for the quarter ending September 30th, 1917, has been declared payable on October 15th, 1917, to Shareholders of record of September 29th, 1917.

By Order of the Directors.

THOMAS GREEN, Cashier.

New Glasgow, Nova Scotia, September [illegible], 1917

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that a Dividend of 1¾% for the quarter ending 30th September, 1917, being at the rate of seven per centum per annum, on the Preference and Common Shares of Marcus Loew's Theatres, Limited, has been declared payable on the 15th day of October, 1917, to Shareholders of record on 30th September, 1917

By Order of the Board

SAMUEL B. FOWLER.
Secretary.

Toronto, 29th September, 1917.

PENMANS, LIMITED

DIVIDEND NOTICE.

Notice is hereby given that a Dividend of one and one-half per cent. has been declared on the Preferred Shares of the capital stock of this Company, for the quarter ending October 31st, 1917, payable November 1st, 1917, to shareholders of record of October 20th, 1917, also a Dividend of one per cent. on the Common Shares for the quarter ending October 31st, 1917, payable November 15th, 1917, to shareholders of record of November 5th, 1917.

By Order of the Board.

C. B. ROBINSON
Secretary-Treasurer.

Montreal, September 20th, 1917.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended September [illegible], 1917:— [illegible] McKinley-Darragh-Savage Mines, [illegible]; Mining Corporation of Canada, [illegible]; [illegible] Mining Company, [illegible]. Total, [illegible] pounds, or [illegible] tons.

The total shipments since January 1st, 1917, now amount to 24,285,855 pounds, or 12,142 tons.

LIFE INSURANCE IN SASKATCHEWAN

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word, Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street. Toronto.

POSITION WANTED.—Experienced Fire Insurance Inspector (Exempt), well acquainted with the Western territory, will be open to accept position in October; tariff companies only. Address Box 111, *The Monetary Times*, Winnipeg.

The thirty-sixth annual general meeting of the shareholders of the Great North Western Telegraph Company was held at Toronto, Wednesday, October 2nd, when the following directors and officials were re-elected: Z. A. Lash, K.C., president; Adam Brown, Hamilton, vice-president; Geo. D. Perry, general manager. Other directors: F. B. Hayes, Æmilius Jarvis, D. B. Hanna, R. P. Ormsby, Lieut.-Col. the Hon. Frederick Nicholls. A. C. McConnell is secretary and auditor, and D. E. Henry treasurer of the company.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Aylmer, Ont.—September 30—King's livery stable, containing 14 horses; also A. W. Pierce's flour and feed store, completely destroyed. Mr. King's loss is $10,000; he carries insurance to the extent of $9,000. Mr. Pierce's loss, who is owner of the burned property will be $25,000.

Beauport, Que.—September 27—Mr. Edmond Robert's barn containing season's crops destroyed. No insurance carried.

Brockville, Ont.—October 1—Mr. J. F. Fitzpatrick's boathouse and adjoining buildings, containing five launches destroyed. Estimated loss, $10,000.

October 2—Mr. A. Argue's barns and contents totally destroyed.

Cal, Alta.—September 27—Chevrolet car, owner the Kissel garage.

Canso, N.S.—September 23—Whitman's coal shed badly damaged. Covered by insurance. Cause, spontaneous combustion.

Chilliwack, B.C.—September 28—Mr. R. Ronksley's house completely destroyed. Total insurance, $1,500. Cause, spark from chimney.

Delaware, Ont.—September 25—Mr. Leo. Wilson's house, garage and stable completely destroyed; also adjoining barn, property of Robt. Hepburn. The former's property was not insured. Cause, upsetting gasoline vulcanizer.

Donegal, N.B.—September 23—Mr. J. D. Bustard's barn destroyed.

Dundas, Ont.—October 1—Col. A. C. Gwyn's residence completely destroyed.

Edmonton, Alta.—September 29—Unoccupied shack destroyed. Estimated loss, $200.

Elmira, Ont.—September 26—Elmira Shoe Company's finishing department badly damaged. Estimated loss, $3,000, practically covered by insurance. Cause, defective wiring.

Fergus, Ont.—September 30—Monkland Mills, owned by James Wilson and Son, completely destroyed. Estimated loss, $50,000, covered by insurance.

Halifax, N.S.—September 22—Northern Electric Company's building badly damaged.

Irvine, Alta.—October 1—Golden West Hotel destroyed. Owner, Perry Yuell.

Kentville, N.S.—September 27—The Arena skating rink destroyed. Estimated loss, $10,000. Insurance, $5,000.

Lethbridge, Alta.—September 24—Marinaro Macaroni factory badly damaged. Estimated loss, $2,000.

Little River, Que.—September 25—Mr. Savard's residence completely destroyed. Cause, defective wiring.

London, Ont.—October 2—Green Swift's factory damaged. Estimated loss, $500.

McGregor, Ont.—September 29—Parish Hall destroyed. Loss, $4,000. Cause, incendiary.

Quamishat Lake, B.C.—September 26—Dr. Guy Mellin's residence totally destroyed.

Quebec, Que.—September 25—Mr. Joseph Boivin's residence badly damaged. Insurance carried on furniture, $3,000; on building, $1,500.

Senneville, Que.—September 27—Mr. Harold Morgan's farm totally destroyed. Estimated loss, $100,000, covered by insurance.

Spring Valley, Sask.—September 28—Mr. M. Michaelson's home and contents completely destroyed. Estimated loss, $1,000. Cause, using kerosene to light fire.

Thorburn, N.S.—September 29—Mr. J. Grant's barn, containing the season's crops, burned to the ground.

Toronto, Ont.—September 27—Toronto Hydro-Electric Company's premises completely gutted out. Estimated loss, $200,000. The following companies were interested: On stock, machines and fixtures—North West Fire, $7,000; Norwich Union, $7,500; Westchester, $5,000; Insurance Company of North America, $5,000; Providence. Washington, $3,000; total, $27,500. On interest in improvements and betterments—Glens Falls, $5,000; Century, $5,000; London and Lancashire, $15,000; Ocean, $5,000; total, $30,000, making a total insurance of $57,500. The building, which was the property of Mr. McKay, of Johnston, McKay, Dodds and Grant, suffered damage to the extent of $12,000, and was insured for that amount. Further information to follow.

October 2—Arlington Comb Factory's building badly damaged. Estimated loss, $500. Cause, spark from emery wheel.

Waterborough, N.B.—September 22—Mr. Herbert Barker's barn and contents destroyed. Cause, children playing with matches.

Waterford, N.S.—September 22—Residence and store, owned by the Dominion Coal Company, burned to the ground.

Windsor, Ont.—September 27—East End Quoit Club's frame building destroyed. Covered by insurance. Cause, defective wiring.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Oakville, Ont.—September 9—Frame dwelling and contents, owner Mr. Cottie, occupant Mr. H. J. Orr. Estimated damage to contents, $650; to building, $2,000. Insurance carried on buildings, $1,200.

Saskatoon, Sask.—August 26—The Western Distributors, Limited, stable. Estimated damage on contents, $8,000; on buildings, $5,500. Insurance carried in the following companies: State of Pennsylvania, on stock, $6,000; Commercial Union, on stock, $2,000; Phœnix of Hartford, on stock, $2,000; Canadian National, on buildings, $5,000; Union, on buildings, $2,500; total insurance, $18,000.

Toronto, Ont.—August 23—The Dunlop Coal Company's elevator and pocket destroyed. Damage to stock, $150; to buildings, $3,000. Insurance on stock, $2,000; on buildings, $4,300; total insurance, $6,300, carried in the Liverpool and London and Globe Insurance Company.

ILLINOIS TRACTION COMPANY

The gross earnings of the Illinois Traction Company for the eight months ended August 31st show an increase of 10.79 per cent., and the net earnings an increase of 4.16.

The August figures, now issued, show an increase in the gross earnings of 14.67 per cent., and in the net of 4.20 per cent., which is the first net increase for the month of August since 1913. Working expenses show an increase of over $100,000 as compared with last year's and over $200,000 as compared with the average of the previous three. Despite this heavy increase in expenses, the net for the eight months is the largest for more than five years. Comparisons for the eight months and for August follow:—

Eight months—

	1917.	1916.	Inc.
Gross	$8,677,024	$7,832,640	$844,984
Expenditure	5,657,661	4,933,356	724,305
Net	$3,019,963	$2,899,284	$120,679

August—

	1917.	1916.	Inc.
Gross	$1,114,511	$ 971,934	$142,577
Expenditure	767,079	638,497	128,582
Net	$ 347,432	$ 333,437	$ 13,995

In our issue of September 21st, an article appeared headed "Five Border Towns at Work," in which it was stated that over 500 buildings have gone up in Windsor alone during the past three years. This was an error, 1,500 being the correct number.

Messrs. J. J. M. Pangman, A. F. Riddell, P. P. Cowans, W. J. Turpin and L. G. Beaubien have been appointed a special committee of the Montreal Stock Exchange to co-operate with similar committees of other financial bodies in the interests of the flotation of the approaching Dominion war loan

CAPT. D. JELLETT BARKER KILLED IN ACTION.

Montreal banking circles were shocked a few days ago by the news conveyed by private cable that Capt. D. Jellett Barker, assistant to the general manager of the Bank of Montreal, had been killed at the front.

Although less than forty years of age, Capt. Barker had had a splendid record of service with the Bank of Montreal, and had for some years past been regarded as one of the foremost among what is regarded as the younger generation of the bank.

He entered the employ of the bank in 1896, and through marked ability rapidly rose in its service and performed important work in Mexico, London (England), and New York, while as inspector he visited most of the bank's branches in Canada.

In 1911 he was appointed accountant of Montreal branch, and while in that position acted as manager at times. In 1912 he was promoted to be assistant to the general manager, which position he held up to the time he enlisted for overseas service.

The late Captain Barker took an active interest in sports and was a life member of the Montreal Amateur Athletic Association. He was also an ex-president of the Racket Court, a member of St. James' Club, Beaconsfield Golf Club and the Winter Club.

Sir Frederick Williams-Taylor, in referring to him, said that he had suffered a great personal loss and the bank was deprived of the services of one of its most able officers, possessed of a grasp of affairs far beyond his years and untiring energy, whose career gave promise of carrying him to a high position in the bank's service.

Major H. G. Wickens, formerly accountant in the Toronto office of the Imperial Bank, has been killed in action a month after he had been transferred, at his own request, from a non-combatant branch of the service to the infantry in the first-line trenches.

Coteau St. Pierre, Que.—Tenders are being called for $200,000 6 per cent. 40-year school debentures.

Manitoba. Tenders are called for an issue of $[illegible] 7 per cent. school debentures. Andrew Crozier, secretary-treasurer, Altamont, Man.

Toronto, Ont.—The city finance commissioner has arranged to lend the Toronto harbor board money out of the sinking fund to carry on their work in 1918.

The city council recently held a special meeting, as recently noted in *The Monetary Times*, at which the harbor commissioners were given authority to hypothecate $4,000,000 of bonds for the purpose of raising by a three-year loan $2,000,000.

The sale of bonds at the present time is impossible, and for a temporary loan the commissioners would have to pay a high rate of interest.

The harbor work being of a quasi-municipal nature, the commissioner considered that the city should come to the aid of commission, and agreed to let them have money from time to time as they require it, the city sinking fund to receive the current rate of interest at the time the withdrawals are made.

Montreal, Que.—According to the reports of the city treasurer and comptroller and auditor for 1916, the expenditure on account of the ordinary municipal services, with the school tax, which is turned over to special authorities, exceeded the regular revenue by $1,239,082. The balance was restored by borrowing $2,000,000 and treating it as if it had been income. In 1915 it was necessary to borrow a smaller sum and use it in the same way. During the present year similar action will be taken. For the repayment of these special loans special taxes are being levied. This does not practically affect the situation, in regard to which Mr. Arnoldi, the city treasurer, says in the introduction to his report:

"Although special assessments will be levied to meet these loans at maturity, these methods, which may be justified to some extent by existing conditions, should be discontinued if possible, as they may affect the city's credit and increase the cost of future calls on the money market. In order to meet the deficiency between the revenue and expenditure additional revenue by increased taxation seems absolutely necessary."

He also states that the adding of three-tenths of 1 per cent. to the assessment rate on real estate, which would include the fractional rate already authorized for both the revenue loans of 1916 and 1917, and making the water rates 5 per cent. instead of 4 per cent. on the assessed rental of stores and dwellings would bring an additional revenue of about $1,800,000, which, added to the ordinary resources, would be sufficient to meet all necessary expenses of administration.

Real estate, both land and buildings, being assessed at presumed fair market value, is the chief source of municipal revenue, as the following figures of receipts for the past year show:—

[illegible]	$[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	[illegible]
[illegible]	158,426
Recorder's Court receipts	92,928
[illegible]	[illegible]
Interest collected	[illegible]
Insurance companies' contributions	37,623
Rents and privileges	[illegible]
Montreal Tramways' percentage	[illegible]
Miscellaneous	[illegible]
[illegible]	$12,5[illegible]

The expenditure of 1916 was made under the following [illegible]:

Interest and sinking fund	$ 4,804,885
School tax	2,064,550
Finance department	996,424
Water department	663,416
Road department	1,365,487
[illegible]	[illegible]
[illegible]	[illegible]
Light department	314,695
Incineration department	324,344
Hygiene and statistics	199,672
Parks department	173,808
Printing and stationery	36,408
Markets	40,060
Sewers	124,864
Building and boiler inspection	53,832
Recorder's Court	35,921
Municipal assistance	355,156
Municipal buildings	144,324
Municipal library	12,182
Archives	3,950
Chief engineer's office	24,084
Total	$13,803,868

Montreal has a population of about 650,000. Its area is some 26,300 acres. The climatic conditions add somewhat to the expense of some of the services, compared with other cities of relatively the same size. The assessed value of real estate is high. It was $821,106,000 in 1916; but $205,124,000 was exempt from taxation under various laws, general and special.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Equity, $2,000 10-years, not ex. 8 per cent. annuity; S. Neil, Milden. *Instow, $1,800 10-years, not ex. 8 per cent. annuity; J. M. Mooney, Instow. Osgoode, $1,200 10-years, not ex. 8 per cent. instalment; R. Oliver, Eldersley. *Henderson, $1,600 10-years, not ex. 8 per cent. annuity; G. M. Turrell, Spoorer. Semans, $10,000 20-years, not ex. 8 per cent. instalment; W. G. Wright, Semans. Wolsley, $2,300 15-years, not ex. 6½ per cent. instalment; J. M. Dyck, Wolsley. Muriel, $1,900 10-years, not ex. 8 per cent. annuity; H. J. T. Sterling, Netherhill. Bryn Mawr, $2,000 10-years, not ex. 8 per cent. annuity; J. R. Hill, Earl Grey. Garrett, $2,000 10-years, not ex. 8 per cent. annuity; S. Ellis, Dunkirk. Duval, $7,000 20-years, not ex. 8 per cent. annuity; E. Smith, Duval.

Rural Telephone Companies.—Radant, $8,900 15-years, not ex. 8 per cent. annuity; Jos. Nostadt, Grenfell. Bangor, $5,500 15-years, not ex. 8 per cent. annuity; A. W. Shaw, Bangor. Carmoustie, $2,000 15-years, not ex. 8 per cent. annuity; J. D. Mercer, Rocanville. Bluffview, $2,475 15-years, not ex. 8 per cent. annuity; K. Bennett, Regina. Colonsay, $12,000 15-years, not ex. 8 per cent. annuity; J. E. Morgan, Colonsay. Marcelin, $13,300 15-years, not ex. 8 per cent. annuity; J. M. Renaud, Marcelin. Eclipse, $10,600 15-years, not ex. 8 per cent. annuity; F. P. Brown, Success. Brickleigh, $9,000 15-years, not ex. 8 per cent. annuity; J. H. Williams, Brickleigh. Sinnett, $4,100 15-years, not ex. 8 per cent. annuity; A. T. Brown, Sinnett. Luseland East, $9,800 15-years, not ex. 8 per cent. annuity; J. B. McConica, Luseland. Silver Lake, $16,800 15-years, not ex. 8 per cent. annuity; A. N. Rosenquist, Bladworth. Luseland West, $10,000 15-years, not ex. 8 per cent. annuity; J. B. McConica, Luseland. Elmsdale, $2,000 15-years, not ex. 8 per cent.

Totals	$235,902,469	$200,690,140	+	$35,212,329

The Toronto bank clearings for the current week are $63,589,986, compared with $48,339,996 for the same week in 1916, and $33,881,818 in 1915.

Toronto's bank clearings for the month of August were $228,809,207, for August, 1916, $196,413,726, and for August, 1915, $140,624,050.

Word has been received of the death, while on active service of Lord Robert Manners, C.M.G., D.S.O. Lord Manners was one of the directors of the Royal Exchange Assurance.

Mr. A. E. Wilson, of Indian Head, Saskatchewan, who is the president of the Municipal Hail Insurance Association of Saskatchewan, and commissioner and chief agent of the Dominion government's seed purchasing commission, is an Englishman who came to Canada in 1891 and engaged in farming at Indian Head. He has been connected with the Dominion's seed brand work since 1905 and became a commissioner on hail insurance in 1913. He was for years president of the Indian Head Agricultural Society and has served as councillor and reeve.

SASKATCHEWAN'S LOCAL GOVERNMENT BOARD

Review of Its Work—Debentures Authorized During Recent Three Years

In 1905 to 1914, owing to the rapid growth in the population of Saskatchewan, caused by immigration, and the exploiting of the provincial resources, there was a consequent necessity for the extension of public utilities. This unprecedented increase in population and the increased business being done resulted in a very optimistic outlook on the part of local authorities, and the general trend was to provide facilities far beyond their immediate needs. To carry on these works it was necessary to provide funds by the issue of debentures, repayable at various times in the future, and money being plentiful for investment, there was no difficulty in obtaining funds for all kinds of municipal improvements, with the result that often sufficient forethought was not given as to whether the then existing conditions would continue to such an extent as to warrant the expenditure.

Previous to 1914, as noted in the Public Service Bulletin of the Saskatchewan government, there had been a general supervision over these borrowings by the provincial government, but it was felt that some central body should be created which would deal with all borrowings by local authorities, and whose duty it would be to acquaint itself with their immediate needs and probable future necessities, and while not hampering their work, to prevent as far as possible undue mortgaging of the future, thus keeping them within bounds.

Accordingly an act to provide for the creation of a local government board was passed at the 1913 session of the legislature, and the lieutenant governor appointed A. J. McPherson, C.E., chairman, with S. P. Grosch, B.A., and J. R. Bunn, as commissioners of the local government board. Only one change has since taken place in the composition of the board, when in January last, Mr. (now Major) McPherson resigned, Mr. Grosch became chairman, and Mr. J. N. Bayne was appointed acting commissioner. The board gathered available information on the works and actions of similar boards, and decided to deal on its merits with each application by local authorities to borrow money by way of debenture, and that no application should be granted until the board was in possession of all necessary information as to requirements, estimated cost, etc.

Revision of Estimates.

During the first year of the board's operations several applications were made for permission to borrow amounts which in the board's opinion would have entailed too great an expenditure for the benefits to be derived from the works, and would have been beyond the means of the ratepayers, but on this being shown the local authorities were nearly always able to revise their estimates and provide the necessary facilities with provision for addition at a much decreased cost. The board has endeavored in all cases to be fair and just, but although its decisions cannot be expected to have given satisfaction in every case, even those local authorities who were inclined to demur when their proposed debentures were not authorized, in most instances have ultimately acknowledged that the board's action was taken with a view to their best interests.

In the financial panic following the outbreak of the war, there was uncertainty as to whether certain bond dealers would be able to fulfill their commitments to buy debentures, and several repudiations of contracts did occur, but most of them were able to again take up their contracts at a later date. The board made careful inquiries into these conditions, and as a measure of protection to local authorities, and in order to keep control of the situation, decided not to authorize debentures of any kind until evidence was submitted that a sale was being made at a price satisfactory to the board.

In the whole experience of the board, although delays have occasionally occurred in the payment of debenture coupons, there has never yet been a case of permanent repudiation, so that investors who put their money into this class of security need not have any fear as to its being a first-class security.

In 1914 the difficult matter of dealing with superfluous subdivisions was undertaken by the local government board, and the act respecting subdivisions was passed. It was found on inquiry that owing to the rapid increase of population (which had grown [illegible] per cent in the nine years from the inauguration of Saskatchewan to 1914), owing also to the great expansion of business and the flow of capital, real property in the vicinity of urban centres had increased enormously in value. But in anticipation of this prosperity being continued, the prices had been inflated far beyond what was warranted by actual conditions, being based more or less on prospective growth. In 1914, however, money suddenly became scarce, business expansion ceased, and the flow of immigration was checked, with the result that these lots were left a drug on the market. It was found that there was a total of approximately 277,000 acres of these subdivided lands, of which 214,000 were inside corporation limits, and by far the greater part of these lands were not, and for many years probably would not be needed for building purposes. The act respecting subdivisions gave the board power to initiate proceedings to cancel plans of survey of subdivisions, but it was seldom necessary to use this power, as the owners themselves made application for the cancellation; and although many difficulties arose where scattered lots had been sold in many subdivisions, the board succeeded in getting several of these plans removed and the land returned to the agricultural class where it belonged.

Act Was Consolidated.

The local government board act has been twice amended and was consolidated at the last session. The changes made in almost every case have merely to do with methods of procedure which were designed to facilitate the business of the board. Two exceptions to this, however, may be mentioned. An amendment was made at the session of 1916 by which when default has been made in retiring debentures or debenture coupons when due, the board was given power to intervene and adjust matters between the defaulting municipal corporation or school board and the disappointed bond holders. The effect is to constitute the board a mediator between the parties concerned, so as to assist both in reaching an equitable adjustment. This power has many times been exercised, and four formal inquiries have been made in this connection. The other noteworthy change was the addition of a new clause detailing the conditions under which, in connection with the board's orders, an appeal is allowed to a judge of the supreme court.

A new sale of shares act was passed in 1916. The main difference between the new and the old legislation is that whereas under the old act the power is given after examination, to control the sale of shares of unregistered foreign companies only, the new act gives the board authority over the sale of all shares or bonds, except those of the Dominion of Canada and of its provinces, of foreign countries, and of all varieties of municipal, school or local improvement districts in Canada.

Debentures Authorized.

The following is a comparative table showing the debentures authorized in each of the three years since the board was constituted:—

	1914.	1915.	1916.
Cities	$[illegible]	$ [illegible]	$ 170,217
Towns	[illegible]	[illegible]	172,757
Villages	[illegible]	[illegible]	53,150
School districts..	1,227,125	638,075	559,260
Rural telephone	[illegible]	[illegible]	2,269,500
Rural municipal .	174,500	58,000	20,000
Total	$[illegible]	$[illegible]	$3,244,844

Thse figures cover only amounts of debentures authorized. During the three years many applications to borrow by debenture were for one reason or another refused authorization, but these refused applications probably took just as much time before the board arrived at its decision, as those which were authorized. In addition to the work outlined above, the board, in its judicial capacity, on many occasions, settled appeals against the assessment of subdivisions.

Duties of Board.

The services which the board is rendering may be summarized as follows:—

1. It supervises the debenture borrowings of all municipalities, school districts and rural telephone companies. 2. It administers the act respecting subdivisions. 3. It administers the sale of shares act. 4. It protects both the bond buyer and the local authority. 5. It gives its assistance in adjusting the affairs of local authorities which for various reasons have become involved. 6. It hears and determines appeals from the decisions of courts of revision of assessments of all cities, such towns as are designated by the minister of municipal affairs, and subdivisions in rural municipalities.

WESTERN
Assurance Company

INCORPORATED 1851

1918 - Monetary Times Annual - 1918

EVERY year the MONETARY TIMES ANNUAL is endorsed by the principal business men and financiers of Canada as an indispensable work of reference. Its value in this regard has been demonstrated over and over again until to-day it is to be found in all well-conducted financial, insurance and commercial offices in the country.

Year by year there is an ever-increasing demand for the Annual.

In order to adequately care for the 1918 Annual in this respect we have plans which insure a wider and more **valuable distribution of the issue than of any previously sent out.**

In spite of these larger plans and the fact that the cost of production of such an issue has gone up considerably **the advertising rates will remain the same as in previous years.**

There are some very desirable positions available. In order to secure one of these it is advisable that you **write us as early as possible.**

Read what a few of Canada's leading men of affairs have to say concerning the Monetary Times Annual.

"It had been my intention to quote some of the trade and financial statistics, but having recently had opportunity of studying, to some extent, the splendid review published by *The Monetary Times* on January 5th, I shall follow the precedent of some former presidents and omit these statistical statements."—ARTHUR HEWITT, ESQ., in presidential address before the members of the Toronto Board of Trade, January, 1917.

"There is a great deal of valuable information in your Annual which we find very useful to refer to from time to time."—MESSRS. OSLER, HAMMOND & NANTON, Winnipeg.

"I would like to bear testimony to the excellence of your Annual Number. It is a splendid contribution to Canadian war-time finance—a magnificent example of that new spirit which has taken possession of Canada since the beginning of the war."—R. E. ARMSTRONG, Secretary, St. John Board of Trade.

"A great many thanks for the most interesting and valuable Finance and Trade Review which *The Monetary Times* have just published. I shall keep it by me for reference during the coming year as I know it will prove of great value on many occasions."—H. V. F. JONES, Assistant General Manager, Canadian Bank of Commerce.

"Allow me to congratulate you on the 1917 Annual, which seems to me by far the most interesting and complete that you have ever issued. You are establishing a record that is enviable."—KINGMAN NOTT ROBINS, Treasurer, Associated Investors, Rochester, N.Y.

"The volume is a veritable vade mecum of financial and commercial information to which one will refer every now and again with the utmost confidence and satisfaction."—S. R. PARSONS, President, Canadian Manufacturers' Association.

"Without doubt the issue is the best Canadian financial publication that I have ever had an opportunity of looking over. There is a surprisingly large amount of information in this volume, much more so than is usually in a financial journal."—W. A. MACKENZIE, Toronto.

"I read the office copy which came in a few days ago, and wish to congratulate you upon the enormously valuable review of finance, development, etc., in Canada during 1916."—JAMES WHITE, Assistant to Chairman, Commission of Conservation, Ottawa.

"I received copy of *The Monetary Times Annual* for 1917, and I must congratulate you very much on this splendid issue. It certainly contains a world of information to any Canadian, and in this regard I have placed it in my private library for further reference. This is the most interesting issue that I have ever seen turned out by any financial newspaper, and I can assure you I appreciate it very much."—E. F. HUTCHINGS, Great West Saddlery Company, Winnipeg, Man.

"I have been greatly interested in your Annual Number this year, which I believe to be quite the best you have ever issued. Certainly there has been more meat for myself in this number than in any previous one."—A. L. CROSSIN, President, Western Canada Mortgage Association, Winnipeg.

1918 - Monetary Times Annual - 1918

AND FIRE INSURANCE

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

Future of Franco-Canadian Trade

CANADIAN *Manufacturers Should Go More Than Half Way Towards Making Business Between Two Countries Easy and Mutually Profitable—Banking Facilities and Transportation — Report of Our Special Trade Commission.*

"CANADIAN exporters will find French business men active, alert and progressive. Their only difficulty will lie in the fact that continental competition has already evolved a system of service to the French customer which was extremely good, and which relieved the purchaser of a good deal of trouble.

"Let Canadian manufacturers, therefore, if they wish to secure business in a way that will be perfectly fair, and in accordance with the customs of our French Allies, look particularly to the specifications which are laid down; let them endeavor to quote always in the customer's currency and at his own warehouse. In short, let them go more than half-way towards making business between the two countries easy and mutually profitable.

"Canada is particularly interested, of course, in the changes which will come about in French industry after the war. Many of the brave Allies have fallen in the fields of battle, many others will be incapacitated; but demands for increased production along all lines will be very insistent, and, therefore, the introduction of machinery is much more than a possibility. Canadian manufacturers of machinery and other mechanical means of reducing labor costs will find in France a ready demand for their products. It only remains to be seen what can be done along the lines of transportation—and possibly also of fiscal changes—to make it possible for Canada to meet the competition which Germany will press upon her former customers, both directly and through neutral channels under the guise of neutrality."

These are the opinions expressed in the report of the special Canadian trade commission which visited the United Kingdom, France and Italy last year. The commission comprised Mr. H. Edmond Dupr'e, Quebec; Mr. W. Frank Hatheway, St. John; Mr. Theo. H. Wardleworth, Montreal; Mr. Frank Pauze, Montreal; Mr. James W. Woods, Toronto (chairman); and Mr. George W. Allan, Winnipeg. Mr. Roy Campbell, Montreal, acted as secretary. Before proceeding to a detailed examination of the opportunities which exist for developing trade between France and Canada, says the report, it will be well to recall the outstanding features of our Ally, which are of prime importance in trade relations.

The area of France, 207,146 square miles, is approximately that of the land area of Manitoba, or three-fifths of that of Ontario.

Of France's population of 38,500,000, one-third live in towns. Her population per square mile of 146.5 is almost seventy times that of Canada with 1.93, Canada's population in 1911 being 7,206,643.

In 1908 the surface of the country was divided as follows: 23,590,915 hectares under cultivated crops, including sown meadows; 1,478,160 under forage; 3,601,830 under pastures; 1,723,635 under vines; 1,247,638 under divers industrial plants, truck gardens, etc.; 9,309,760 under woods and forests; 3,951,970 uncultivated lands, 3,203,177 not included in above categories; total, 52,954,085 hectares. The area under principal grain crops and yield (1911 yield preliminary) is as follows:—

	Hectares.	Thousand. quintals.
Wheat	6,331,350	87,128
Rye	1,163,410	12,222
Barley	774,425	11,604
Oats	4,040,100	50,843

Hectare=2.471 acres. Quintal=220.46 pounds. Franc=19.3 cents.

The forest area is about 18 per cent. of the total surface of the country. About one-third is under public ownership.

The mines employ upwards of 5,000,000 workpeople and have an estimated product of about 750,000,000 francs.

The fisheries, including the catch of the Banks of Newfoundland, are valued at over 140,000,000 francs.

France is pre-eminently a producer and exporter of manufactured articles. The following table of exports of products (in millions of francs) during the years 1908-1913 indicate the industrial tendency of the nation.

	1908.	1909.	1910.	1911.	1912.	1913.
Food stuffs ...	746.8	823.6	858.2	738.9	840.8	838.0
Materials necessary to industry	1,341.4	1,693.8	1,930.8	1,830.1	1,944.0	1,858.1
Manufactured goods ...	2,962.5	3,200.7	3,444.8	3,507.9	3,917.0	4,183.2
Totals	5,050.7	5,718.11	6,233.8	6,076.9	6,712.6	6,880.2

On the other hand, France has depended to a certain extent upon other countries for a portion of her food stuffs and manufactured articles. Raw materials, however, form the larger part of her importations for consumption, as the following table covering the six years up to and including 1913 will indicate:—

Imports for Consumption

(In millions of francs)

	1908	1909	1910	1911	1912	1913
Food stuffs	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Materials necessary to industry	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Manufactured articles	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Totals	5,640.5	6,246.1	7,173.3	8,065.8	8,730.8	8,421.3

The report continues: Individualism is the keynote of French industry, as it is of French buying and selling. In such industries as the cutlery industry, which is thriving in the city of Thiers, the great bulk of the hand labor is performed in the homes of the workers. Of the 15,000 in that town of 52,000, who are engaged in the industry, fully two-thirds take the work home, and have their own apparatus for grinding and other processes of finishing in their dwellings.

Combined with the high artistic proclivities of the French people, this individualism makes for unusually fine initiative in design and workmanship. The French workman takes an unusual pride in the solidity, fineness and finish of his work, and not only may basic quality be depended upon where quality is at all accepted as the standard, but the fine details of workmanship will be found to be incorporated in the finished article.

The French people have a high appreciation of individual effort and personal talent. Therefore, among their manufactured products, and even in the case of articles which are intended for very ordinary use, preference is given to the one which bears the impress of the individual workman.

However, after the war, not only will it be necessary for machinery to be more largely employed in order to make up for the tremendous loss of productivity during hostilities, but because of the drain which has been made upon skilled labor in France through the toll of war, these standards of fineness and individuality may have to be dropped in favor of economy. As this individualism in French products is an asset of France, any change will no doubt be most jealously challenged for fear that the French nation may lose to a great extent one of its most charming characteristics.

In the same way, the artistic temperament also evinces itself in the manufacture of fine goods of all types. This has a most important effect upon trade relations with Canada in the matter of shipping. While France is able to export fine, artistic, high-priced goods, Canada is engaged in shipping rough products, raw, semi-manufactured and manufactured. The ships which take cargoes of wheat, timber or pulp to France are not adapted to carrying back silks, gloves, perfumery, objets d'art and other beautiful and costly articles which express the genius of the French people. This difficulty is a very practical one, and must be most carefully considered.

France has long been recognized as the nation to whom other nations, when in need of money for financing enterprises, can turn. Her wealth is composed principally of the savings of a people who are naturally thrifty. The Frenchman is a born saver. Canadian exporters when seeking markets in France for Canadian products, should bear this point in mind.

Trade with France should undoubtedly increase with the close of the war, if for no other reason than that France will stand in great need of materials for the reconstruction of cities and of industries, and will also desire to pay her war debts by increased exports.

Canadians will be glad to promote such an exchange. Canada has the goods which France needs, and there are many articles formerly purchased from Germany which we can with advantage secure from our Ally.

As to Banking Facilities

Canadian exporters to France will find that the banking system of that country is admirable, and the facilities afforded are adequate for the ordinary requirements of commerce. The commission learned, however, that there is a movement on foot in France for an expansion of banking credit for the help of industrial establishments, based upon the systems obtaining in other countries; this will no doubt have an important influence upon France's future industrial development. The Bank of France holds a predominant position, and can be looked upon in the same way as the Bank of England is regarded amongst merchants of Great Britain. Other banks which have an important influence in French finance are the Banque Nationale d'Escompte and the Credit Lyonnais, and, in so far as trade with English connections is concerned, the French branch of Lloyds Bank has a most important influence. Canadian exporters will have no difficulty in establishing relations through these banks.

The functions of the banks are rendered all the more simple by the fact that the French people pay their financial obligations without the slightest hesitation, and exactly on the date set. They expect in return all debts due to them to be paid promptly.

The French trader wishes to conduct his business upon a cash basis. Canadian exporters who wish to extend business relations in France may rest assured of the best possible treatment in the matter of payments, when good relations and confidence between buyer and seller are established. Some French manufacturers are so punctual in these matters that they even require cash with the order, and importers, on the other hand, are so prompt in their payments that no notification of the maturity of notes is needed, and still less is any extension required.

The "Commissionaire" is an important factor in the mercantile life of France. His sphere of usefulness will appear unusually large to Canadian manufacturers. Very few business transactions are carried on direct, and the commissionaire or middleman, therefore, occupies a unique position.

Interior Transportation

Hundreds of years ago the interior waterways of France furnished the great means of transportation from point to point. The Rhone was used at the time of the Romans. These waterways have consistently been used for a large part of France's interior trade and will doubtless play a great part in future transportation systems. While slow, water transport is cheap. This fact will be of great importance after the war.

The principal ports have canal systems radiating from them, and Bordeaux in particular is able to serve a very large part of southern and eastern France on account of its canal systems. The interest which is taken by the French people in the development of their canals is seen in the construction of the wonderful canal from the Rhone to Marseilles. This remarkable engineering feat of tunneling through hilly country for a distance of eight miles brings the main artery of north and south trade within easy reach of the ancient and thriving port of the Mediterranean, Marseilles.

French railways appear to serve the country consistently and well. The fact that much of the mileage in the country is administered by the state puts into the hands of the general public a greater degree of control over rail transportation than if the lines were privately administered. The company controlled lines provide a service which seems both cheap and rapid, and on account of the smallness of the carriages, the shipper, whose consignments are not large, has an advantage not common in America.

Following the war of 1870, Germany had an advantage over France due to the indemnity which the latter was compelled to pay. This indemnity was paid ahead of time out of the people's savings to the surprise of Germany and to the admiration of the world. Germany's main advantage, however, consisted not in the indemnity, but in the right as imposed by the treaty of Frankfort to secure the minimum tariff for all her products in all circumstances when imported into France.

This concession undoubtedly has worked great harm to French industry, as its development has been checked in many directions by Germany's system of government subsidies and "Kartells." French manufacturers have undoubtedly had to submit to great commercial pressure brought about by the systematic and undermining competition of Germany, and in many cases they have experienced great difficulty in maintaining the prosperity of their establishments. Consequent upon this condition in French industry, the balance of trade with Germany has been growing steadily more and more adverse to France. Canadian exporters who are considering business with France will find that many of the products imported from Germany are such as could be supplied from Canada—and if not from Canada, then from other portions of the Empire.

France may have been ready for the war, but she was not prepared for anything like the struggle necessitated by the high development of German preparations. France was caught exactly as England was caught, with some of her key industries at a low level of preparedness; but the coming of hostilities gave a tremendous stimulus to some of these. The difficulties by which the country was confronted were immensely increased by the fact that the greater part of her industrial territory was overrun. The steel-producing plants of the north-east, which ranked among the best in the world, fell into German hands; therefore the other centres of metal production were forced into unusual activity. Many other industries had practically to be developed from the ground up, and the best brains of the country were put into the making of changes, rapidly and efficiently. The marvellous power of rapid improvisation was witnessed by the commission, when it had the privilege of seeing a certain munitions factory, where a complete plant capable of producing 50,000 shells per day was installed and working to full capacity within five months.

The national response among all classes has been quite beyond anticipation, and the world owes much to France for her hardihood and her adaptability under circumstances which were most difficult.

Through the aid of the Ministry of Commerce and the good offices of the commissioner-general for Canada in Paris, the commission was enabled to send out blanks to be filled out by French firms who wished to import from, or export to, Canada. The large number of replies received indicates the strong desire for closer trade relations which exists in France. The department of trade and commerce can give full information regarding these to any who apply.

PORT OF PROGRESS

St. John, New Brunswick, Makes Wonderful Strides as Shipping Port

"Blood will tell. So will geography," remarked Mr. R. E. Armstrong, secretary of the St. John, N.B., board of trade, to *The Monetary Times* recently. "It is the existence of the geographical fact that St. John has the shortest rail haul from the west of any other winter port in Canada that has led to its wonderful strides as a shipping port. For the first three months of the present fiscal year the total of exports and imports passing through the city amounted to $103,514,476, a greater sum than at any other port in Canada.

"During the last fiscal year its total trade, as shown by the government blue books, amounted to $206,087,220, which was over 50 millions greater than the combined export and import values at the ports of Halifax, Sydney, Quebec, Vancouver, Victoria and Prince Rupert. The previous year showed an increase of over $26,000,000 over the ports named above.

Winter Freight Terminus.

"The Canadian Pacific Railway Company, recognizing the strategic situation of St. John, has chosen it as its winter freight terminus and has entered upon a campaign of terminal development which must greatly increase the potentialities of the port. This company now has yardage accommodation for about 1,800 cars and elevator space for a million and a half bushels of grain. In addition to what the Canadian Pacific Railway is doing at St. John, the Canadian Government Railways is constructing a grain elevator with a present capacity of 500,000 bushels. The Fegles-Bellows Company have the contract for the construction of this elevator and hope to have it completed by the 1st of December.

"The federal government has asked for tenders for the extension to Partridge Island of the breakwater at the western entrance of the harbor, the objects of this extension being to protect the inner harbor from southerly and south-westerly swells and at the same time to give more room for pier development. It is expected that work will shortly be begun on pier 17 and that the Courtenay Bay (East St. John) development, which was suspended some months ago because of the slow progress that the contractors were making, will be resumed.

"There is no boom on at St. John, but its growth is steady and healthy. Business has been unusually good. Industrially, the city has made much progress. One of the most encouraging industrial features has been the revival of wooden shipbuilding. Forty years ago, St. John stood fourth in the list of wooden ship-owning ports. Until this year there has been no wooden ship construction here since 1884. Now, the firm of Grant and Horne are building a 3,000-ton wooden steamer for the Imperial government; D. A. Saker and Company have started on the construction of a vessel of one thousand tons carrying capacity, and the St. John Shipbuilding Company, with a million dollar capital, is preparing to enter upon the construction of wooden and steel ships. Other shipyards are springing up in the neighborhood.

The business of the Sun Life Assurance Company of Canada for the first nine months of this year showed an increase of more than $7,000,000 over the same period of last year. The Montreal agency of the company reports business under which the full year's premium was paid to the company in cash, from January 1st to September 30th, amounted to $2,925,465, against $2,588,754 last year, an increase of $336,710.

VALUE OF FIRE INSURANCE AGENTS

Their Work is Discussed at the Ontario Insurance Inquiry

"The question of the agent [illegible] situation is one over which I am more perturbed than any other that has arisen in the course of this investigation." This statement was made by Mr. Justice Masten, presiding at the Ontario insurance inquiry, resumed this week at Toronto. "It seems to me," he continued, "that there are certain classes of agents who are not of any economic good to the community. They do not do anything to earn their money except play a game of golf and have a long list of acquaintances. Yet I can see where the companies are to a large extent at the mercy of these men."

Mr. John A. Robertson, secretary of the Canadian Fire Underwriters' Association, and Mr. John B. Laidlaw, manager of the Norwich Union Insurance Company, spoke for the agents.

"Dwelling business must be sought," said Mr. Robertson. "For what he gets the agent who goes after this class of business does a great deal more work than the insurance broker."

Commissioner Masten: "Could not this class of insurance be sent in direct to the company Every one knows he has got to insure his dwelling."

Mr. Leighton McCarthy, K.C., who appeared for the Canadian Fire Underwriters' Association, said that although it might be imagined that the general public would see the wisdom of insuring their dwellings, many had to have the need presented to them before they would insure.

Agents Are Necessary.

Mr. Laidlaw contended that agents were necessary in order that the companies might be properly represented. "I do not think you could say that the agents do not earn their money," he said. "Although an insurance company may assume a liability of five millions it only receives an income of $10,000, and of this the agent receives but $2,000 in commissions."

Mr. McCarthy said that while there might be some truth in the commissioner's statement that city agents easily earned their commissions by having a large list of acquaintances, the agents in the country had to work for all they could get.

Commissioner Masten: "I can appreciate the argument that you advance that agents are necessary in order that you may effectively reach the public."

"If the agents do more work than the brokers and get less remuneration, is it not true that the value of a policy is not the proper basis for figuring out the commissions?" asked Mr. F. W. Wegenast, who represented the Canadian Manufacturers' Association.

"That may be true," replied Mr. Robertson, "but there is no other method by which you can do it."

Paying Tribute to Agents.

Mr. Laidlaw suggested that when the government was issuing licenses to agents, some restrictions might be made before a license could be taken out.

"Can you suggest a way in which larger manufacturers can escape paying tribute to agents?" queried Mr. Wegenast.

Mr. Robertson said that he thought it was necessary that commissions should be paid.

Mr. McCarthy: "It is just the same question as to whether the consumer should pay tribute to the wholesaler."

Mr. Wegenast: "A person may go to the market and buy [illegible] you want to. The same thing is true in nearly every other business except the insurance business." Mr. McCarthy contended that insurance and produce were entirely different and could not be compared.

FARMERS AND THE WAR LOAN

Farmers should subscribe for a substantial portion of the forthcoming war loan. Crops have been uniformly good throughout Canada, prices were never so high, and the margin between selling price and cost of production has ensured a splendid profit. Mr. E. L. Pease, vice-president and managing director of the Royal Bank of Canada, in a recent interview, gave it as his opinion that an active campaign should be carried on among the farmers of the West. The farmers of that section of Canada and Ontario, according to Mr. Pease, are the best class to canvass for the loan.

The Manitoba Free Press also urges that an active campaign be carried on to get the farmers to invest. It suggests that the minister of finance send a letter to 100,000 western farmers, personally appealing for their support of the loan.

BOLO PASHA'S BUSINESS CAME FROM PARIS

The German spy, Bolo Pasha, who is under arrest in Paris, was in the United States between February 22nd and March 17th, 1916. He was in New York to arrange for the transfer of German money to Paris through New York banking institutions to further peace propaganda in France. He succeeded in getting at least $1,600,000 over to the French capital through J. P. Morgan and Company and other banking institutions, the New York State attorney-general's investigation has disclosed. Part of this money went to Senator Charles Humbert, owner of Le Journal, a Paris newspaper, which, however, according to cable despatches, he refunded after becoming suspicious of Bolo.

Examination of the accounts of Bolo Pasha in the banks of G. Amsinck and Company, the Royal Bank of Canada (New York branch), and J. P. Morgan and Company revealed that $1,683,500 had been deposited to the credit of the alleged spy.

The money had originally been on deposit to the credit of the Deutsche Bank of Berlin, with the National Park Bank and the Guaranty Trust Company, New York, and was transferred from these banks to Amsinck and Company, and later to the Royal Bank of Canada.

Mr. C. E. Neill, general manager of the Royal Bank of Canada, in a statement regarding this matter to *The Monetary Times* this week, said:—

"No transaction of an unusual nature had taken place at the agency of the Royal Bank of Canada, New York. Bolo Pasha was introduced to the Royal Bank of Canada by its Paris bankers. A deposit account was opened, but after a short time the funds were transferred to J. P. Morgan and Company. In so far as the Royal Bank of Canada is concerned, the transactions were entirely regular, and the New York officers of the bank had not the slightest suspicion that the depositor had any connection whatsoever with Bernstorff or the German government."

Birthday Wishes from London, England.

"The Canadian ***Monetary Times*** has now completed fifty years of publication. We extend our congratulations to our contemporary, and sincerely express the wish that in its second fifty years it may serve the country as well as it has in the first. Few financial journals survive to a respectable age, and only a very few enjoy any respect at any age. The ***Monetary Times*** of Toronto has maintained a high standard of journalistic responsibility, and during all the boom years in Canada it was one of the few journals that refused to harbour the puffs of the wild-cat promoter and the building-plot boomster. The reputation which our contemporary justly enjoys among the great banks, the insurance companies, and the leading financial houses in Canada, is a tribute to its sound and solid policy. Scorning the flamboyant headline and all forms of sensational journalism, it has consistently given all the information within its purview required by its readers, and its statistical tables have long been a most valuable and appreciated feature of its contents."—***Canada***, London, Eng., Sept. 22nd, 1917.

NECESSITY FOR THRIFT

The prosperity of the citizens of Canada depends largely upon their thrift. More important than that, the successful conclusion of the war can be brought more rapidly nearer by increased savings and their investment in our national securities. Great Britain can continue to make large war purchases here only if we establish the necessary credits. The financing of industrial activity in Canada is dependent upon the extent to which the people economize. As recently pointed out by the Canadian Bank of Commerce, the resources of the United Kingdom are not inexhaustible, every day adds to the strain placed upon them, and a realization of this fact impels to greater efforts those who are seeking to organize the savings of the people. Much has been done in Canada, but as yet the Canadian people have not submitted to sacrifices, nor assumed burdens, proportionate to those borne in the United Kingdom, although there is no difference in the relative degrees of responsibility.

Occasionally citizens question the need of drastic limitations of personal expenditure, but the address of Mr. R. M. Kindersley, chairman of the National War Savings Association at Southampton recently, the substance of which is given below, is a sufficient answer to such objections: "If the government is to carry on the war and find the necessary material and labor," he said, "it seems to me without doubt, speaking in the broadest possible way, that you and I must do without a thousand and one things that we have been used to. I cannot conceive any other way to enable the government to do what it has to do and to win the war. That is the broad aspect of the matter: we cannot look at it from any other point of view but the broadest, the national, point of view. We must not forget that you and I sent other men to fight for us. We undertook that responsibility, and when we did that we took upon our shoulders a moral obligation to do everything in our power to help our fighting forces, and to see that no act of ours lessened their chances of safe return to these shores. Have we really lived up to that moral obligation since we undertook it? I say without hesitation, and not in any spirit of criticism, that the nation as a whole has not lived up to that obligation. But we have done it because we did not understand. Therefore it is the duty of everyone to explain to the people what the position really is: that every time we spend money unnecessarily we absorb material and labor—goods and services—required for the purposes of the war." Bonds of the fourth Canadian war loan should be held in every home in Canada.

PULP AND PAPER INDUSTRY

Into the newsprint inquiry at Ottawa last week a somewhat new element was introduced—consideration of the good of the industry as a whole. This phase of the situation has been overlooked during the excited talk of high prices, profits and price fixing. Recent Ottawa dispatches have indicated that in view of the fact that the price to be fixed as a fair figure for newsprint made in Canada will likely prevail in the United States, the investigating commissioner will thoroughly probe the subject of costs. It was stated by counsel for the government, following the inquiry last week, that the price determined would be at least $60 per ton and perhaps more. If the price fixed is too low it will mean a crippling of the newsprint industry in Canada, because the same price will probably be adopted in the United States and it is upon the high prices now being obtained in that country that the Canadian mills are making money. Their losses on supplying newsprint in Canada at $50, it is stated, are more than covered by their profits in the United States.

The Canadian pulp and paper industry is worthy of encouragement. The exports of Canadian newsprint for the fiscal year ended March, 1917, were $23,594,134 compared with $17,974,134 for the previous period, which was in turn increased by nearly $2,000,000 over the 1915 fiscal year. Our exports of chemical pulp have increased in the last two years from $4,[illegible] to $14,032,133 while the exports of mechanical pulp have increased in the same period from $4,459,539 to $6,371,133. The newsprint enquiry has only an indirect bearing on the latter phase of the pulp and paper industry but the total exports amount to a handsome sum, approximately $45,000,000. Within five years the total exports should amount to at least $100,000,000, in the opinion of students of the situation. While exorbitant profits must be curtailed, it is not necessary to discourage production, the extension of our export trade, and the investment of capital, while performing what should be a comparatively simple operation, the fair regulation of profits.

LESS LAND, WELL TILLED

We frequently hear in Eastern Canada the plea that much more land should be brought under cultivation by the farmers of Western Canada. From time to time, earnest discussions are heard as to devising a method of breaking up our western prairies by the hundred thousand acres by means of tractors, and so on. This sounds well but it requires a little analysis. The other morning, the manager of a Western loan company had brought to his attention a report by one of the company's inspectors on a block of land in the neighborhood of Winnipeg, comprising several hundred acres of the best soil in the country. This had been broken up and brought under cultivation two years ago by the owner who is a city man. It had been so inefficiently farmed during the past season that in a year when the entire Red River Valley is harvesting one of the best crops in its history, this magnificent property has produced about four bushels of wheat to the acre and this newly broken land is thoroughly infested with noxious weeds. In other words, where a man had the equipment and labor properly to cultivate fifty acres of land, he has undertaken several hundred, with the invariable result of a great waste of labor and the fouling of a tract of the best land in the West.

The Western farmer is too apt to break up about twice as much land as he can adequately care for. The production of this country might be much better if we had about one-third less land in crop and the land was being properly worked and kept free of weeds, and the seeding and harvesting carried out in a methodical and thorough fashion instead of the hasty, haphazard way in which so much of it is now being done.

CANADIAN FLAX

There is in the United Kingdom and Ireland a very urgent demand for flax fibre to replace supplies which formerly came from Russia, Belgium and other sources. The probability is that this shortage will continue for some considerable time, as the producing districts even in the Allied countries have been ravaged. Considerable time will have to elapse before satisfactory cultivation can be resumed. The importations of flax dressed and undressed into Great Britain are valued at $20,000,000 per annum.

The Monetary Times recently received a letter from a Belfast reader, who wanted to know what became of all the Canadian flax. The flax seed produced here is used for the manufacture of linseed oil and oil cake and for sale as seed. The fibre is usually burned. The Special Canadian Trade Commission, which visited the United Kingdom, Italy and France last year devoted considerable attention to the question of the utilization of Canadian flax straw. In doing so it studied as far as practicable the problem of retting, which would be suitable to the Canadian conditions and climate. Much time and money has been spent in endeavoring to overcome the climatic and labor conditions in the Dominion, which have hitherto prevented a satisfactory solution of the problem. From information gathered by the commission and investigations made upon the spot, it is hoped that one of two new processes or both, may be employed in Canada for the purpose of utilizing flax straw in the desired direction, thus adding a new source of wealth to the Dominion.

One of the new processes under consideration is a combined chemical and physical method which offers considerable promise of success. The other is bacteriological in its character; it is possible that it may be adapted to the needs of Canada in such a way as to give successful results. Two members of the commission are following this question and hope to report further as to the feasibility of one or both methods.

HELD $60,000 WESTMOUNT BONDS

The will of Mr. Sanderson Pearcy, late president of Sanderson Pearcy and Company, Limited, Toronto, who died on August 27 last, is being entered for probate by the National Trust Company, Limited, the executors named in the will. The assets of the estate are as follows:—

Cash in bank, $5,681.83. Household furniture and personal effects, $1,200. Life insurance, policy in North American Life Assurance Company, $3,000; policy in Canada Life Assurance Company, $4,000; Ancient Order of United Workmen, $2,000; total, $9,000. Debentures, city of Westmount, Que., $60,242.71. Stocks, 100 shares Union Trust Company, Limited, $15,000; 4,000 shares Gosselin Gold Mines, Limited, $5,000; £2,500 Alberta first mortgage 4½ per cent. guaranteed debenture stock, $9,380.47; 550 shares Sanderson Pearcy and Company, Limited, $35,750; total, $65,139.47. Real estate, residence, No. 92 Bloor Street West, $45,000; Nos. 61-65 Adelaide Street West, Toronto (warehouse property), $[illegible], vacant lot on rear of Nos. [illegible] Adelaide Street West, Toronto, $16,300; total, $134,300. Mortgages, $120,029.41. Book debts, $64,451.89. Miscellaneous assets, $64,253.58. Total, $524,298.89.

KING EDWARD HOTEL, TORONTO, MAY BE SOLD

An offer for the purchase of the King Edward Hotel, Toronto, has been made by the United Hotels Company, which controls eighteen hotels in the United States and Canada, but the matter is still under consideration by the hotel company, which owns the building, and the King Edward Hotel Company, which leases the premises. The figure has not been made public, but Mr. George McCann stated that "it was less than the present assessment of the hotel," and it is rumored freely that the offer does not exceed one-half of the first outlay on the hotel, which has been put at $2,500,000. Offers for the purchase were made several months ago, but did not materialize, though an application for the reduction of the assessment followed closely upon the transaction.

In [illegible] county, Ont., horses are selling at from $50 to $[illegible] [illegible] spring values, while cattle are said to have reached their highest figures this fall. Large shipments of good beef animals are reported from points in Lanark and Prince Edward, Ont. Hogs are scarce, and are [illegible].

PERSONAL NOTES

MR. H. B. MACKENZIE, general manager of the Bank of British North America at Montreal, is taking a business trip to the Pacific coast.

MR. R. S. MCLAUGHLIN, president of the Chevrolet Motor Company of Canada, has been elected a director of the Chevrolet Motor Company, the Delaware corporation.

MR. J. A. TERRACE, formerly with the Royal Bank of Canada at Montreal, has been appointed assistant manager of the foreign department of the Guaranty Trust Company of New York.

MR. JOHN MCDONALD has been appointed manager of the National Trust Company's Montreal office in succession to the late Captain Percival Molson, M.C. Mr. McDonald has been acting manager of the Montreal branch of the National Trust Company since the late Captain Molson went overseas. He is a Montrealer, and the son of the late Mr. John McDonald, chartered accountant. Mr. W. Wynne Robinson has been appointed secretary of the Montreal office, and Mr. O. B. MacCallum continues in the capacity of trust officer, in the legal department.

JOHN McDONALD,

Appointed Manager, National Trust Company's Montreal Office.

MR. J. E. ALDRED has been elected a director of the Gillette Safety Razor Company of Canada, Limited, replacing Maurice J. Curran, resigned. Mr. Aldred is well known in Montreal financial circles.

MR. C. A. MARSHALL, formerly representing the Sun Life, has been appointed as manager of the Monarch Life Assurance Company in northern Saskatchewan, with headquarters at 55 York Building, Saskatoon.

MR. C. W. CONNELL, formerly representing the Continental Life, has been appointed manager of the Monarch Life Assurance Company for northern Alberta, with headquarters at 213-214 McLeod Building, Edmonton.

LORD READING and LORD NORTHCLIFFE were guests at a dinner at the Rideau Club last week to which the following honorary presidents and officers of the Canadian Bankers' Association were invited: Sir Vincent Meredith, Sir Edmund Walker, Sir Frederick Williams-Taylor, Sir John Aird, Sir George Burn, President E. L. Pease, C. A. Bogert and H. A. Richardson.

PUBLICATIONS RECEIVED

Insurance.—A pamphlet setting forth the great advantages of purchasing annuities. "Where contentment dwells," issued by the Manufacturers Life Insurance Company, Toronto.

Military Hospitals Commission.—A brief review of the work undertaken by the Commission in caring for disabled men returned from active service. "Report of the Work of the Military Hospitals Commission." Issued by the Canadian Government at Ottawa.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first week of October:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
October 7	$2,966,000	$2,842,000	— $124,000

Grand Trunk Railway.

October 7	$1,319,090	$1,342,050	+ $ 22,960

Canadian Northern Railway.

October 7	$ 857,400	$ 758,500	— $ 98,900

For the first seven days of October the gross earnings of the three principal railways totalled $4,942,550, as compared with $5,142,490 in 1916, a decrease of $199,940, or 4.04 per cent.

The Grand Trunk Railway earnings for the first week amounted to $1,342,050, as against $1,319,090 for the same period in 1916. The increase was $22,960, or 1.74 per cent. The earnings for October's first week are the highest of any month for some time. The Canadian Pacific Railway and also the Canadian Northern Railway reported decreases for the first week of October this year, as compared with the same period in 1916. The Canadian Pacific Railway earnings for the first seven days of October show an increase over the first week in September, the totals, respectively, being $2,842,000 and $2,666,000. Earnings in the first week of October, 1916, totalled $2,966,000, this year showing a decrease of $124,000, or 4.36 per cent. Canadian Northern Railway earnings for the first week of this month were $98,900 short of the amount for the same seven days in 1916, the figures being $758,500 and $857,400.

BUY A WAR BOND

Technically, a bond is a promise to pay. A person buys a bond; that is, he lends his money to an organization and in return he receives an engraved paper receipt called a bond. A part of this bond bears the terms of the loan. It states that $50, $100, $500, $1,000 or more has been borrowed from the buyer of the bond for a stated period of years at a certain rate of interest, this interest to be paid on dates stated in the bond. The interest is usually paid twice a year. Attached to the bond are the coupons. These represent the interest. Beginning with the first date on which interest is due, these bear the date and the amount of money to be paid. If the bond was issued June 15th, 1917, for $100, at 3½ per cent., the first coupon would state that on December 15th, 1917, $1.75 would be paid to the bearer. This coupon could be deposited or cashed at any bank.

If a bond is registered the owner receives a receipt for his money, the bond is held by the organization issuing it, and the interest is paid to the owner by cheque. Coupon bonds are payable to bearer, and should be kept in a safe deposit box, because they are almost the same as cash. The registering of a bond relieves the owner of the responsibility of taking care of it, though he must take care of his receipt.

Canada must fully subscribe its fourth Canadian [illegible]

FARMERS OF CANADA DRAFT PLATFORM

What the Organized Farmers Want and Their Reasons—Many Reforms Suggested

The organized farmers of Canada have just published their platform in pamphlet form. It was drafted by the Canadian Council of Agriculture, Winnipeg, and adopted by the United Farmers of Alberta, the Saskatchewan Grain Growers' Association, the Manitoba Grain Growers' Association and the United Farmers of Ontario. The pamphlet has been issued by the Canadian Council of Agriculture, Winnipeg.

In the introduction of Mr. R. McKenzie, secretary of the Canadian Council of Agriculture, it is pointed out that the organized farmers have for years, in their annual conventions and local meetings, been passing resolutions demanding relief from "the opppressive burdens imposed on the agricultural industry, by legislation enacted in the interest of privileged classes." Representation has been regularly made to the government at Ottawa "demanding redress, but up to the present time a comparatively small measure of relief has been secured. On the contrary, the burdensome legislation farmers have complained of has not only been maintained, but of recent years made more oppressive." The introduction continues:—"Since the inception of the Grain Growers' movement, the organization has devoted a large amount of energy to training men and women in the duties of citizenship, including those of different languages and nationalities, to assume the responsibility of true Canadian citizenship and to fit themselves when occasion should arise, to become the mouth-piece of their fellows in the making and administering of laws. As a matter of fact, the Grain Growers' movement has developed into a school of thought, aiming at training farmers to do clear thinking on financial, social and economic questions.

Under Influence of Wealth.

"It is becoming more apparent each year that our parliament is becoming more and more under the direct influence of industrial, financial and transportation interests, represented by men of wealth in financial and industrial centres, and if the rural population and the common people, including industrial wage earners, are to have their viewpoint represented in parliament, a democratic system of nominating and electing representatives must be adopted.

"The history dealing with economics in Canada for the last quarter of a century is an outstanding illustration of how far those responsible for the commercial legislation of the nation may wander away from that which is in the best interest of the country. However fertile the soil of the country may be and however frugal and industrial its people, it will remain poor and backward and the people will be lacking in the highest comforts of life, if its trade laws and its fiscal policy are unsound. The abandoned and unused fertile fields of the Western prairies and the decadence of agriculture of the rich province of Ontario abundantly testify to the truth of this natural law.

How Council Is Made Up.

"The Canadian Council of Agriculture at its session in December, 1916, deliberated upon these matters very carefully. The council is composed of the executive officers of the United Farmers of Alberta, the Alberta Co-operative Elevator Company, the Saskatchewan Grain Growers' Association and the Saskatchewan Co-operative Elevator Company, the Manitoba Grain Growers' Association, the Grain Growers' Grain Company, the Grain Growers' Guide, the United Farmers of Ontario and the United Farmers' Co-operative Company of Ontario, representing 65,000 farmers thus affiliated with this organization. The president and executive officers of each of the above organizations were present at this meeting and took part in the deliberations. One outstanding fact that impressed itself on the minds of the delegates present was the anomaly that while agriculture is the basic industry of Canada, and the rural population represents one-half the population of Canada, members of parliament are almost exclusively from the urban population. Men whose environment and training is urban, causes them to view all questions affecting production, trade and economics from the view point of the city and notwithstanding however well disposed they may be towards the needs of agriculture, and how unselfish they approach legislation, their conclusions must necessarily be one-sided. The council regards this situation as being very undesirable.

In order to have legislation equitable to all the different interests concerned, all those interests must be represented in the making of such legislation and that until such time as the rural population is adequately represented in parliament, by men having the practical training, view point and knowledge of agriculture, we need not expect to get legislation that will be just to our industry.

"The delegates at the council meeting having regard to this situation as they see it, decided that the time has arrived for them to direct the people in the course of political action that would tend to bring the electors to a clear sense of their responsibility as citizens and give them a lead as how to act unitedly as never before. To this end the council adopted a platform designed, when given effect to by legislation, to place the country on an ecomonic, political and social basis that would be in the interest not only of farmers, but of the citizens of Canada generally.

"Members of the Canadian Council of Agriculture realize that the wage earners, artisans, professional men and trades people suffer equally with the agricultural classes from the fiscal and economic system that prevails in Canada and are just as much interested in economic and social reforms as are the farmers.

"The platform drafted by the council was submitted to the annual conventions of the United Farmers of Alberta, the Saskatchewan Grain Growers' Association, the Manitoba Grain Growers' Association and the United Farmers of Ontario in January and February, 1917. At these great conventions, attended by a total of 3,000 delegates, this platform was adopted unanimously. It was then referred to the 2,000 local unions or associations which constitute these organizations and was by them received with equal unanimity."

What the Platform Is.

Here is the platform:—"Whereas the war has revealed the amazing financial strength of Great Britain, which has enabled her to finance not only her own part in the struggle, but also to assist in financing her Allies to the extent of hundreds of millions of pounds, this enviable position being due to the free trade policy which has enabled her to draw her supplies freely from every quarter of the globe and consequently to undersell her competitors on the world's markets, and because this policy has not only been profitable to Great Britain but has greatly strengthened the bonds of Empire by facilitating trade between the motherland and her overseas dominions—we believe that the best interests of the Empire and of Canada would be served by reciprocal action on the part of Canada through gradual reductions of the tariff on British imports, having for its object a closer union and a better understanding between Canada and the motherland and by so doing not only strengthen the hands of Great Britain in the life and death struggle in which she is now engaged, but at the same time bring about a great reduction in the cost of living to our Canadian people;

"And whereas the protective tariff has fostered combines, trusts, and 'gentlemen's agreements' in almost every line of Canadian industrial enterprise, by means of which the people of Canada—both urban and rural—have been shamefully exploited through the elimination of competition, the ruination of many of our smaller industries and the advancement of prices on practically all manufactured goods to the full extent permitted by the tariff.

"And whereas agriculture—the basic industry upon which the success of all other industries primarily depends—is almost stagnant throughout Canada as shown by the declining rural population in both eastern and western Canada, due largely to the greatly increased cost of agricultural implements and machinery, clothing, boots and shoes, building material and practically everything the farmer has to buy, caused by the protective tariff, so that it is becoming impossible for farmers generally to carry on farming operations profitably;

Protective Tariff "Wasteful."

"And whereas the protective tariff is the most wasteful and costly method ever designed for raising national revenue, because for every dollar obtained thereby for the public treasury at least three dollars pass into the pockets of the protected interests, thereby building up a privileged class at the expense of the masses, thus making the rich richer and the poor poorer;

"And whereas the protective tariff has been and is a chief corrupting influence in our national life because the protected interests, in order to maintain their unjust privileges, have contributed lavishly to political and campaign funds, thus en-

couraging both political parties to look to them for support thereby lowering the standard of public morality;

"Therefore be it resolved that the Canadian Council of Agriculture, representing the organized farmers of Canada, urges that as a means of bringing about these much needed reforms and at the same time reducing the high cost of living, now proving such a burden on the people of Canada, our tariff laws should be amended as follows:—

"1.—By reducing the customs duty on goods imported from Great Britain to one-half the rates charged under the general tariff and that further gradual, uniform reductions be made in the remaining tariff on British imports that will ensure complete free trade between Great Britain and Canada in five years.

"2.—That the Reciprocity Agreement of 1911, which still remains on the United States statute books, be accepted by the parliament of Canada.

"3.—That all food stuff not included in the Reciprocity Agreement be placed on the free list.

"4.—That agricultural implements, farm machinery, vehicles, fertilizer, coal, lumber, cement, illuminating fuel and lubricating oils be placed on the free list.

"5.—That the customs tariff on all the necessaries of life be materially reduced.

"6.—That all tariff concessions granted to other countries be immediately extended to Great Britain.

Taxation for Revenue.

"As these tariff reductions will very considerably reduce the national revenue derived from that source, the Canadian Council of Agriculture would recommend that in order to provide the necessary additional revenue for carrying on the government of the country and for the prosecution of the war to a successful conclusion, direct taxation be imposed in the following manner:—

"1.—By a direct tax on unimproved land values, including all natural resources.

"2.—By a sharply graduated personal income tax.

"3.—By a heavy graduated inheritance tax on large estates.

"4.—By a graduated income tax on the profits of corporations.

Other Reforms Suggested.

"The Canadian Council of Agriculture desires to endorse also the following policies as in the best interests of the people of Canada:—

"1.—The nationalization of all railway, telegraph and express companies.

"2.—That no more natural resources be alienated from the Crown but brought into use only under short-term leases, in which the interests of the public shall be properly safeguarded, such leases to be granted only by public auction.

"3.—Direct legislation, including the initiative and referendum and the right of recall.

"4.—Publicity of political campaign fund contributions and expenditures both before and after elections.

"5.—The abolition of the patronage system.

"6.—Full provincial autonomy in liquor legislation, including manufacture, export and import.

"7.—That the extension of the franchise to women in any province shall automatically admit them to the federal franchise."

CANADA FOUNDRIES COMPANY

The purchase of the Delaney Iron and Forgings Company, of Buffalo, by the Canada Foundries and Forgings Company has been ratified at a special meeting of the shareholders of the latter company, held at Brockville, Ont. The transaction will materially strengthen the Canadian organization in its programme of extension into shipbuilding activities at its Welland properties, as the Delaney plant has been a successful producer of ship forgings for many years. The transfer of the ownership of the Buffalo plant will be effective as of date July 1st last, according to the terms of the option given to the Canada Forgings interests some months ago. Profits which have accrued from the Buffalo plant since that date, owing to the activity in shipbuilding, have been substantial, and will reduce the net cost of the Canadian company's purchase, viewing it from the conclusion of the transaction.

LAKE OF WOODS MILLING COMPANY

In spite of many handicaps, the Lake of the Woods Milling Company did a good year's business for the twelve months ended August 31st last. Its net earnings were $569,747. This provides for bond interest, dividends (7 per cent. on preferred and 8 per cent. on common stock) and $100,000 written off property and goodwill accounts, leaving a sum of $142,747.75 towards surplus account. It is gratifying to see on principle the good-will account reduced by such a substantial sum. Since the bonds of the company mature in 1923, the sum of $200,000 has been transferred from surplus account as a redemption account. With this amount provided for and this year's surplus carried forward, surplus account now stands at $831,883.

The company's Medicine Hat plant, which was destroyed by fire on April 29th, 1916, was reconstructed by January 2nd, 1917, and has been operated continuously from that date.

The following table compares the company's profit and loss accounts for three years:—

	1917.	1916	1915.
Net profit	$ 569,747	$525,141	$518,920
Bond interest	54,000	99,000	99,000
Balance	$ 515,747	$426,141	$419,920
Preferred dividend .	105,000	105,000	105,000
Balance	$ 410,747	$321,141	$314,920
Common dividend..	168,000	168,000	168,000
Balance	$ 242,747	$153,141	$146,920
Written off	100,000	100,000	100,000
Surplus	$ 142,747	$ 53,141	$ 46,920
Previous surplus ...	*889,135	935,994	889,074
Total surplus	$1,031,883	$989,135	$935,994
Bond redemption ..	200,000		
Surplus	$ 831,883		

*After deducting $100,000 for two years' war tax to August 31st, 1916.

In presenting the company's annual report, the vice-president of the company, Mr. W. W. Hutchison, stated that the purchasing department established by the Allied government in Canada was now taking the surplus products of all four mills, and also buying established mill brands for commercial purposes. This compensated the Canadian mills for the loss of the export market. Mr. Hutchison presided in the absence of the president, Brig.-Gen. F. S. Meighen, who is on active service, together with two directors and more than 125 members of the company's staff.

The company has had the best year, since 1909, in its history. The excellent results are largely due to the capable management of the company and its active directorate.

CANADA'S FIRST MODEL TOWN

Canada's first model town will be built on the Upper Ottawa. A splendid site overlooking Lake Temiskaming has been laid out according to modern principles of town planning by the Commission of Conservation through its town-planning adviser, Mr. Thomas Adams, who has acted as consulting engineer. Building operations will be started shortly by the Riordon Pulp and Paper Company, who are to erect a large sulphite mill and paper plant nearby, and for the accommodation of whose employees the town is intended.

If the usual method of rectangular survey had been adopted, the most important streets would have had grades of from 10 to 18 per cent., but, under the present plan, the maximum grades have been reduced to 3 and 5 per cent. in most cases, with a maximum of 8 for short lengths.

Before any buildings have been erected the line of each street has been blazed through the forest so as to fix the best street locations and to secure the best aspects for the dwellings. Areas are being set aside or open spaces, social centres, churches, schools, etc., in advance. The main approach to the town will be by a street, 80 feet wide, passing through a square on which the stores and public buildings will be erected.

LOAN AND TRUST COMPANIES' BUSINESS

Grand Total of Companies' Assets in Ontario is $609,491,715

The debentures payable in Canada of loan and loaning land companies doing business in Ontario in 1916, increased from $26,042,486 to $[illegible]. Comparatively few of these debentures are held in the Dominion. This is elicited from the annual report for 1916 of the Ontario register of loan corporations. Debentures payable outside of Canada, largely in Scotland, increased from $77,066,347 in 1913 to $77,465,323 in 1914, and to $77,[illegible] in 1915, with a decrease to $77,784,756 in 1916. There was also in existence at the end of last year $1,206,368 debenture stock. The interest on these securities for the one year amounted to $1,107,858. Among other liabilities to the public are due on loans in process of completion, $177,603, in comparison with $451,218 in the previous return; borrowings on mortgages and on other securities, which in 1913 were $2,939,498, dropped in 1914 to $1,334,793, and were only $40,630 in 1915, rising to $235,583 last year; owing to banks, $3,124,250; and miscellaneous liabilities, $4,772,859. These four accounts include the figures of the trust companies also.

Trust Companies' Liabilities.

The trust companies alone have in addition contingent liabilities; these in 1913 were $271,293,762, in 1914 $305,002,125, in 1915 $350,248,048, and last year $365,458,200. The total liabilities of the various classes of companies are as follow:—

Class.	Total liabilities. 1915.	1916.
Loan companies (permanent stock)	$196,505,742	$198,202,094
Loan companies (having terminating stock)	4,915,932	5,18[illegible]
Loaning land companies	11,936,314	12,190,907
Trust companies	378,574,406	393,917,081

The grand total of liabilities to the shareholders and the public of all these companies doing business in Ontario is $609,491,715. These corporations carry a large amount on deposit, a total of $24,545,532, as compared with $23,180,899 in 1915, and $22,391,642 in 1914. The loan companies having only permanent stock account for the bulk of the deposits, the figures being $20,361,768 in 1912, $21,982,964 in 1913, $21,737,913 in 1914, $22,412,199 in 1915 and $23,782,914 last year.

Capital Stock Figures.

The liabilities to shareholders alone in the case of permanent stock loan corporations are $72,953,143, and of terminating stock concerns, $2,425,539, while for loaning land companies, the amount is $7,765,314, and for trust companies, $24,760,994. The reserve fund of loan, loaning land and trust companies aggregates $37,214,439. This compares with capital stock fully paid of (permanent) $49,239,469 and (terminating) nil. The prepaid terminating stock totals $137,630, and the instalment stock, $276,425. The loan, loaning land and trust companies authorized capital permanent stock totals $147,741,377, of which $79,939,111 is subscribed. The terminating capital stock subscribed is $828,086.

Details of Assets.

Turning to the companies' assets, it is found that the total debts of all these companies, secured by mortgages of land, amount to $167,643,566, divided as follows:—

	Mortgages of realty. 1915	1916
Loan companies (permanent stock)	$152,869,923	$149,013,967
Loan companies (having terminating stock)	38,043	40,095
Loaning land companies	2,454,305	1,7[illegible]
Trust companies	[illegible]	[illegible]

	Mortgaged land held for sale. 1915	1916
Loan companies (permanent stock)	$ 500,551	$ [illegible]
Loan companies (having terminating stock)	38,043	40,095
Loaning land companies	—	—
Trust companies	[illegible]	[illegible]

The interest on these sums approximates $2,766,453. The companies of the various classes noted have also as assets debts secured in various ways and amounting to over $40,000,000. They are divided as follows: Secured by municipal debentures and debenture stock, $7,643,653; government securities, $6,067,037; shareholders' stock, $979,864; other stocks, bonds and securities, $21,433,866. Office premises are valued at $5,550,490. The total assets, owned beneficially, of the loan, loaning land and trust companies transacting business in Ontario, amount to $244,033,514, and those not so owned, to $365,458,200, a grand total of assets of $609,491,715. The accompanying table gives further details of the returns of the companies for 1916.

(See table on page 2[illegible])

RAILWAYS AND INCREASED RATES

Mr. A. W. Smithers, chairman of the board, Grand Trunk system, is telling the people of western Canada of the urgent need which the railway feels for increased rates. "We are doing at the present time an immense volume of business," says Mr. Smithers, "using our great equipment to the limit, and we are getting nothing for it. For the present calendar year our gross earnings will be the greatest in the history of the company, and our net earnings (owing to increased costs) will be practically the lowest we have ever known. My own position in the matter is one of great concern to me. We have in England thousands of debenture holders who are dependent on these investments for their maintenance, and their cause is just. What we ask for is such an increase in rates as will enable the railway to go on, to cover a portion of the extra expense to which we have been put owing to the changes due to the war."

GOLD PRODUCTION HIGH

The total production of gold in placer and mill bullion and in smelter production in 1916 in Canada is estimated at 926,963 fine ounces, valued at $19,162,025, as compared with 918,056 fine ounces, valued at $18,977,901 in 1915, an increase of $184,124, or about 1 per cent., according to a report of the department of Mines, Ottawa. It is the largest production since 1902. The highest production recorded was $27,908,153 in 1900, and the lowest since then was $8,382,780 in 1907.

Of the total production in 1916, $4,957,663, or 26 per cent., were derived from placer and alluvial mining; $10,472,723, or 54 per cent., in bullion and refined gold; and $3,731,639, or 20 per cent. contained in matte, blister copper, residues and ores exported.

The production in Nova Scotia was about $103,359, a decrease of 24.4 per cent. from that of 1915, and was due to the water shortage, which interfered seriously with the operations of the hydro-electric plants. The production in Quebec is derived from the pyrites ores of the Eastern Townships. The gold content of these ores is very low and is not paid for to the mine operators.

Ontario is, since 1914, the largest gold-producing province in Canada. The production for 1916 was 489,679 fine ounces, valued at $10,122,563, being 52.8 per cent. of the total production for Canada and an increase of 20.4 per cent. over that of 1915, and 82 per cent. over the production of 19[illegible].

The Hollinger Consolidated Mines contributed about 48 per cent. of the output and the Dome about 21 per cent. Apart from a very small recovery of alluvial gold in Alberta, no production is recorded from this province nor from Manitoba or Saskatchewan. The production in British Columbia was $[illegible], as against $[illegible] in 1915, a decrease of 20 per cent.; this total includes $575,000 estimated by the provincial mineralogist as being the output of placer mining, and $3,945,000 recovered from milling and smelting operations.

The production from the Yukon Territory amounted to $4,391,669, as against $4,750,450 in 1915, a decrease of 7.5 per cent., and was derived from the alluvial deposits with the exception of about $9,000, which was produced from the gold and copper ores of Whitehorse and the silver-lead ores of the Silver King mine, near Mayo. The exports of gold-bearing dust, nuggets, gold in [illegible] are reported by the [illegible]

FOREIGN INSURANCE COMPANIES IN CANADA

They Must Have License from Finance Minister — New Instructions Issued

To the chief agents in Canada of foreign companies heretofore transacting business in Canada under provincial license, Mr. G. D. Finlayson, superintendent of insurance, Ottawa, has issued memoranda, pointing out that the new insurance act and an act to amend the criminal code (respecting insurance) prohibit under penalty the transaction within Canada of any of the classes of insurance to which the Insurance Act applies by any British or foreign insurance company not possessed of a license from the minister of finance.

The following instructions for insurance companies desiring to apply for licenses under the Insurance Act, 1917, have been issued by the department of insurance, Ottawa:—

Instructions for Application.

Any company desiring to apply for a license authorizing it to transact business in Canada under the Insurance Act, 1917, should, as preliminary step, forward to this department.

(1) A copy of its charter, act of incorporation, articles of association or other instrument of incorporation, together with all amendments thereto to date. If the company is incorporated by articles of association, or by letters patent under a general act, a copy of such general act or of extracts therefrom affecting the insurance powers of the company should be included. If the insurance powers granted by the instrument of incorporation, in whatever form it may be, are enlarged or abridged by any general Act, a copy of such general act or applicable extracts therefrom should also be included.

(2) A copy of the company's latest annual financial statement rendered to the government of the state or country by which it is incorporated, or if no such statement is required to be rendered, a copy of the financial statement submitted to the shareholders or members of the company at the last preceding annual meeting.

From an examination of these documents the department will be able to ascertain whether a license for the classes of insurance desired can be granted. If so, a form of application with full instructions will be sent to the company.

Some Important Points.

Attention is drawn to the following provisions of the act and regulations and decisions of the treasury board:—

(a) The documents required to be filed before the issue of a license are:—

(i.) A copy of the company's charter, act of incorporation or articles of association certified by the officer in charge of the original. In the United States this officer is usually the secretary of state or the insurance commissioner of the state, and in Great Britain, the registrar of Joint stock companies. For companies incorporated by the parliament of Canada and for provincial companies, if incorporated by special act, a copy of the charter bearing the imprimatur of the King's Printer for Canada, or for the province, as the case may be, will be accepted.

(ii.) A copy of the company's latest financial statement as in (2) above, signed by and verified by the oaths of the president and manager or other proper officers thereof. A certified copy of such a statement is not sufficient.

(iii.) A power of attorney to a chief agent in Canada. The form for this document will be supplied by the department.

(iv.) A certificate from the proper court official that duplicates of the three documents above mentioned have been filed in one of the superior courts of the province or district in which the head office or chief agency in Canada is located. (Secs. 22 and 23.)

As to Deposits.

(b) Deposits. (i.) The amount of ordinary initial deposit for a license to transact fire or life insurance throughout Canada is $50,000. (Sec. 14.) If the charter of the company authorizes the transaction of classes of insurance which cannot be combined in one license under the act, such as, for instance, fire and life insurance (Sec. 8), an excess deposit in addition to the ordinary initial deposit may be required by the treasury board. The necessity for the excess deposit and the amount thereof, not exceeding $200,000, is usually determined by the financial strength of the applicant company. The amount required has not in the past exceeded $[illegible]

(ii.) The amount of initial deposit may be reduced in cases in which the license is limited to one or more of the provinces of Canada. (Sec. 14, sub-section 2.) The treasury board has in the past authorized the following deposits in such cases:—

Provinces covered by license.	Initial deposit for license throughout Canada.	Deposit authorized for limited license.
British Columbia	$50,000	$20,000
Ontario	80,000	50,000
Manitoba		
Alberta		
Saskatchewan		
British Columbia		
Manitoba	60,000	30,000
Alberta		
Saskatchewan		
British Columbia		

(iii.) The amounts of deposit which have been required by the treasury board under Section 131 of the act for the various miscellaneous classes of insurance are as follows: Accident (including employers' liability), $40,000; automobile, $20,000; burglary, $10,000; explosion, $10,000; guarantee, $50,000; live stock, $20,000; inland transportation, $10,000; plate glass, $10,000; sickness, $10,000; sprinkler leakage, $10,000; steam boiler, $10,000; tornado, $5,000.

The foregoing amounts are, of course, subject to change, but may be taken as indicating the practice in the past.

Deposit of Securities.

(c) The securities which may be deposited under the act are the following (Sec. 15):—

(i.) Securities of, or guaranteed by, the Dominion of Canada, or any province of Canada, or the United Kingdom, or any British colony:—

(ii.) Securities of the government of the country in which the company is incorporated.

The treasury board has power to accept securities other than the foregoing (Sec. 16), and in the past the following classes of securities have been accepted:—

(iii.) Canadian municipal securities.

(iv.) Debentures of Canadian loan companies which comply with the conditions fixed by the board as to financial standing.

(v.) Securities of the governments of certain states of the United States.

At Market Value.

The securities mentioned in (i.) and (ii.) above are accepted at their market value not exceeding par at the time they are deposited. Those mentioned in (iii.), (iv.) and (v.) are accepted at 95 per cent. of their market value, the accepted value in no case to exceed par.

If registered securities are deposited they must be registered as follows:—

In the name of "The Receiver-General of Canada in trust for the. ....company, being part of the deposit made by the company with said Receiver-General, in pursuance of the statutes of Canada in that behalf."

(d) No fees are charged by this department for filing documents, nor for the license or any renewel of the license. To meet the expenses of the department an annual assessment is made on all companies licensed by the department. This assessment is based on the premium income of the companies, the rate in the past being less than one-tenth of 1 per cent.

(e) A federal war tax of 1 per cent. of the net cash received for premiums in Canada, other than life insurance premiums, is payable under the Special War Revenue Act, 1915.

The N. Bawlf Grain Company, Limited, of Winnipeg, Man., has purchased five elevators from the Atlas Elevator Company, in the Yorkton district, on the Grand Trunk Pacific, for $40,000; and also six elevators from the Imperial Elevator Company, on the Canadian Pacific Railway, in the Yorkton district, for $42,000. The E. J. Bawlf and Company have purchased for $10,000 the elevator of the Canadian Farmers' Grain Exchange, situated along the Goose Lake line.

Safety of Principal—Certainty of Interest

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment—safety of principal and certainty of interest.

To those who have funds for investment only in small sums, this most desirable class of security is not directly available. They may, however, secure all those advantages by investing in the bonds of this corporation, which are based on upwards of thirty-two million dollars of carefully selected first mortgages on improved real estate. These bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest trust funds.

Send for specimen bond, copy of Annual Report and full particulars.

EXPORTS OF CANADIAN SILVER FROM STATES

Federal Reserve Board Will Approve all Applications Without Limitation

The Federal Reserve Board of the United States has issued the following statement on administrative procedure with reference to the proclamation and regulations issued by the president to control exports of coin, currency, and bullion:

Individuals, firms, and corporations desiring to obtain licenses for the exportation of coin, bullion, and currency must file an application with the Federal reserve bank of the district in which the applicant resides, or where the transaction requiring the shipment originates. These applications must be made on a standard form which has been furnished to all Federal reserve banks.

It will be the general policy of the board not to authorize the exportation of gold unless the shipment applied for is shown to be connected in a direct and definite way with a corresponding importation of merchandise for consumption in the United States, but in any case authorization will be granted only where the exportation of gold in payment for such merchandise is found to be compatible with the public interest. In reaching its conclusions, however, the board will consider all attending circumstances in each particular case.

Shipments of Canadian Silver Coin.

Until further notice the board will approve all applications for the exportation of Canadian silver coin and currency without limitation. The treasury department has instructed collectors of customs to pass such shipments into Canada when approved by the Federal reserve bank of the district from which the shipments are made. Continuous permits for shipments of Canadian silver coin and currency, without requiring an application in each case, may be granted by Federal reserve banks upon condition that each transaction will be reported to it without delay. The Federal reserve banks will transmit to the board weekly reports of all applications of every kind passed upon by them, showing the amount of each shipment.

Applications for the exportation of silver bullion and silver coin of foreign mintage will in general be approved by the Federal Reserve Board upon recommendation of the Federal reserve bank with which the application is filed.

United States Notes, etc.

Applications for the exportation of United States notes, national bank notes, and Federal reserve notes will as a rule be approved by the Federal Reserve Board, but each application must come before the board for its determination before shipment is made.

Instructions have been issued by the treasury department to collectors of customs to permit travelers leaving the country to carry on their persons or in their baggage:

(a) United States notes, national bank notes, and Federal reserve notes not to exceed $5,000 for each adult;

(b) American silver dollars, subsidiary silver coins, and silver certificates not to exceed $200 for each adult;

(c) Gold coin or gold certificates not to exceed $200 for each adult.

Collectors of customs have been informed that in dealing with travelers they may act in accordance with these regulations without communicating with the Federal Reserve Board or with the Federal reserve bank of their district.

Shipments of coin or currency which appear to be or are suspected of being for enemy account or for the benefit of the enemy will not be permitted. These regulations are issued subject to change without notice, and no application granted will be regarded as constituting a precedent.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended October 5th, 1917:—

Buffalo Mines, 65,593; La Rose Mines, 65,531; Beaver Mines, 86,757; Tretheway Mines, 53,140; McKinley-Darragh-Savage Mines, 109,134; National Mines, 70,811; O'Brien Mine, 64,060; Nipissing Mining Co., 448,269; Mining Corporation of Canada, 672,520; Dominion Reduction Company, 346,600; Coniagas Mines, 165,554; total, 2,147,969 pounds, or 1,074 tons.

The total shipments since January 1st, 1917, now amount to 26,433,824 pounds, or 13,216 tons.

INSURANCE IN TIMES OF DEPRESSION

Principle Could Be Pushed Farther on This Continent—Part of Private Corporations

The insurance principle has not been pushed far enough in America. This was the statement of Professor W. W. Swanson, of the University of Saskatchewan, at the life underwriters' annual convention held at Winnipeg.

"In its life aspect alone," he continued, "it is probably more highly developed than elsewhere; but the leaders in the movement should bear in mind that much remains to be done. For example, in every period of depression there is a considerable percentage of lapsed policies which are never afterwards made good. Some thoughtless critics have contended that this is good business for the insurance companies, inasmuch as they retain part of the premiums paid in, and are not called upon to make losses good. The subject is too complicated to discuss in detail here; but it is safe to say that lapsed policies now bring no advantages to insurance companies. But in addition to this, through unemployment, sickness or accident, many are compelled to borrow on their policies, and a considerable proportion never wipe out the loan. It is clear that if provision were made for carrying through a broad programme of accident, sickness and unemployment insurance, the main life policy could be always amply protected. And let it not be forgotten that life insurance is, of all forms of insurance, the most vitally essential to the security and economic wellbeing of the individual.

More Than in Canada.

"Germany, the United Kingdom and France, have done much more in this direction than either the United States or Canada. Both Germany and the United Kingdom have a comprehensive and efficient scheme of insurance providing for the contingencies of sickness and unemployment—although unemployment insurance, in the United Kingdom, is still restricted to a few important trades. Both France and Germany provide for compulsory insurance against the disabilities of old age, while Great Britain gives gratis an old age pension to all those without means to provide the necessaries of life. We are not, however, so much concerned here with the technicalities of these various insurance problems as with the imperative need of dealing with them.

Better Than Government.

"Without doubt private insurance corporations can handle life, accident and sickness insurance—the first two, certainly—more efficiently than can any government. Where the state grants free old age pensions, as in the United Kingdom, or state-assisted insurance against old age, as in France and Germany, the private corporation cannot successfully compete. There is no reason, however, why the problem should be neglected because of possible antagonism between the state and private corporations. Especially is unemployment insurance urgently necessary in America to-day. Unemployment and industrial depression are certain to follow at the close of the war—perhaps not for a year or two, but certain nevertheless—and if needless privation and suffering are to be prevented, a comprehensive scheme of out-of-work insurance should be mapped out now, and applied as soon as possible. On a contributary basis this will preserve the workman's self-respect, and permit him to maintain premium payments on his life policies, and eliminate the waste arising under the loan practice."

CANADA'S REVENUE

The revenue of the Dominion for the first six months of the fiscal year ending September 30, as shown in the financial statement issued by the department of finance, was $127,477,904, as compared with $103,689,680 during the same period last year, an increase of nearly $24,000,000. Ordinary expenditure was slightly in excess of $50,000,000, a decrease of almost half a million as compared with last year.

Capital expenditure, including war account totalled $95,144,093, as compared with $116,057,905 for the six months preceding 1916. The decrease is due to the fact that war expenditures in Canada from April to September last year amounted to $104,538,895, while this year's expenditure in Canada was $87,772,857. The decrease is due to the heavy movement of troops overseas. The debt of the Dominion now stands at $901,009,501, an increase of $36,865,910 for the month.

CANADA

"HOW MANY OF OUR MEN ARE LIABLE TO BE DRAFTED?"

The Canadian business man is asking this question often, now that the Military Service Act is the law of Canada. A simple means of answering it at once is being provided.

Medical Boards are in process of formation throughout the country for the free physical examination of all men who apply. The first class liable to call includes all single men and widowers without children between the ages of 20 and 34 inclusive, all men married after July 6, 1917, being classed as single for the purposes of the Act. In a very short time, the average employer may learn how many of his staff are liable for selection. Those adjudged physically unfit will be given a certificate which will secure them exemption from any Exemption Tribunal. Those found physically fit may still apply for exemption on any ground. The employer will be given a chance to decide if he should seek exemption for any employee whose physical condition renders him liable for selection.

This early medical examination, which quickly decides if a man is liable for selection or not, is a feature of the operation of the Military Service Act calculated to appeal strongly to the business community. It assists in definite planning for the future, enabling an employer of labor to learn at once what men will be left at their work and those who may be removed for military service. Haphazard withdrawals, the nightmare of business men of method and precision, are insured against by this timely arrangement.

Every employer of labor will find it to his advantage to note carefully the formation of Medical Boards in his locality and to be sure that his employees secure as early as possible this very important information as to their status under the Military Service Act.

Issued by The Military Service Council.

Saskatchewan's Fires Last Year, According to Occupancy and Cause

The following table from the annual report of Mr. A. E. Fisher, insurance superintendent, Saskatchewan, shows the fire losses in that province last year, according to occupancy and cause:—

ACTIVE SERVICE DEMANDS FITNESS

The operation of the military service act, as it has been explained in the press by the Military Service Council, has aroused considerable interest throughout the country. Many people, according to reports reaching official quarters, are surprised at the importance assumed by physical fitness in the making up of armies for active service.

As a matter of fact, physical condition is all important in the case of a soldier, explains a high official of the militia department. You will rarely find a veteran soldier who is not possessed of an extremely strong constitution. For the onerous duties of fighting in the trenches, men must be in perfect condition and that is why a certain percentage only of many thousands of reserves is available at any time for immediate reinforcement. Men who are not in category "A1," when the call comes, cannot be taken.

To many men, indeed, it is one of the attractions of military life that rugged health is demanded of those who would go to the front—where the vast majority of soldiers in training are always eager to go.

FINANCING WESTERN WHEAT

Successful financing of the western wheat crop was the outcome of a conference held following a luncheon given by Sir Thomas White at Ottawa last week.

There were present, among others, the prime minister, Sir George Foster (minister of trade and commerce), Sir Hardman Lever of the British treasury, Sir Vincent Meredith, Sir Edmund Walker, Sir Frederick Williams-Taylor, Sir John Aird, Sir George Burn, Messrs. E. L. Pease, C. A. Bogert and H. A. Richardson.

The international financial situation was fully discussed, and particularly the matter of the establishment of credits in Canada for the purchase of supplies, foodstuffs and grain by the Imperial government. In regard to the financing of the Western wheat crop, it was pointed out that the exportable surplus is valued at $350,000,000.

The Dominion government and the Canadian banks will take their share in the financial operations involved. The precise nature of the joint arrangements which will be made between the Dominion government, the banks and the Imperial government will be determined at a later date, but in the meantime the financing of the western wheat crop, with all that it means to Canada, seems assured of successful consummation.

CONTRACT FOR STEEL COMPANY'S WHARVES

The Great Lakes Dredging Company, Limited, of Canada, Port Arthur, Ont., have been awarded the contract for the construction of wharves, slips and dredging in connection with the steel plant to be erected for the Canadian Steel Corporation, Ojibway, Ont. The company, who have handled some large contracts in Canada, including the terminal works at Port Arthur and Fort William, bid against 15 contractors. Tenders were placed by equal number of United States and Canadian companies.

The Canadian Steel Corporation have acquired 2,500 acres of land at Ojibway with a frontage of two miles on the Detroit River. The proposed docks to be built by the Great Lakes Dredging Company, Limited, of Canada will be on this frontage. The slips to be built are 2,100 feet long by 250 feet. The Canadian Steel Corporation are asking for tenders for 150 houses to be built to accommodate the workmen. The Canadian Steel Corporation's total expenditure for this industry will be about $25,000,000.

LIFE UNDERWRITERS' CONVENTION

Speaking to *The Monetary Times*, Mr. G. Wetmore Merritt, manager for New Brunswick of the Great-West Life Assurance Company, said:—

"What pleased me most at the Winnipeg life insurance convention? I was pleased with the banquet, and one could not help being inspired by listening to the speeches, all of which were of a high order.

"I was pleased with the many papers that were read and the addresses given. They were most instructive and were food for reflection for the life insurance salesman. I was pleased with the advertising pictures. To my mind they were most excellent.

"I was pleased with the harmony and good-fellowship that was shown at the convention. I was pleased with Winnipeg's splendid western hospitality. It was tendered in a colossal way.

"What pleased me most of all was the selling contest. This contest showed the delegates who were then in attendance, how the insurance salesmen sell large volumes of life insurance. Such a practical demonstration must have been most beneficial to all those who were fortunate enough to witness it. I might be pardoned for making a suggestion, and it is that at the next convention, more sales of this nature be arranged for."

ALBERTA'S POPULATION INCREASED 32%

This was the Record in the Five Years, 1911-1916—Census Figures

The population of Alberta recorded, as of date, June 1st, 1916, numbered 496,525 as compared with 374,663 in 1911 and 185,412 in 1906, according to figures of the census office, Ottawa, just published. For the five years, 1911-1916, the population increased 121,862, or more than 32.5 per cent., as compared with an increase of 189,251, or 102.07 per cent. for the five years 1906-1911. From 1901 to 1906 the increase was 112,390 or 153.91 per cent. In the ten-year period 1906-1916 the population increased by 311,113 or 167.8 per cent., as compared with an increase of 301,641 in the ten years 1901 to 1911. The number of persons per square mile was 1.96 in 1916 as against 1.45 in 1911.

The population (496,525) comprised 277,256 males and 219,269 females, as compared with 223,989 males and 150,674 females in a population of 374,663 in 1911. In 1901 males outnumbered females by 9,016; in 1906 by 31,154; in 1911 by 73,315, and in 1916 by 57,987. In 1916 there were 126 males to every 100 females, as compared with a ratio of 149 in 1911, 140 in 1906, and 128 in 1901. For the province, as a whole, from 1906 to 1911, the male population increased by 106.86 per cent., and the female by 95.35 per cent., as compared with an increase of 23.78 and 45.53 per cent. respectively for the five-year period 1911-1916. In Alberta as well as in the other western provinces, the effects of the war are apparent in the smaller increase in the male population in the last quinquennium as compared with previous ones.

Figures of Urban Population.

There were 6 cities, 49 towns and 96 incorporated villages in 1916 as against an equal number of cities, 27 towns and 84 incorporated villages in 1911. The towns of Beverly, Coronation, Hanna and Redcliff appear for the first time as incorporated municipalities. Calgary was the only municipality organized as a city previous to 1901, being proclaimed in September, 1893. Edmonton did not attain cityhood until October, 1904, Lethbridge, Medicine Hat and Wetaskiwin in 1906 and Red Deer in 1913.

In 1916, Alberta possessed a city population of 133,319 as compared with 90,252 in 1911, and 30,119 in 1906 and 4,091 in 1901. There were six cities in the province in 1911 and 1916, the merging of Strathcona with Edmonton, under the name of Edmonton South, being replaced by advancing Red Deer to the status of a city. In the five years 1911-1916, the city population increased by 43,067 or 47.7 per cent., as compared with an increase of 60,133 or 199.4 per cent. in the preceding five years.

The population within town limits numbered 36,541 in 1916, 34,224 in 1911, 16,104 in 1906 and 9,164 in 1901. The town population shows a five-year increase of 2,317 or 6.77 per cent. from 1911 to 1916, and a ten-year increase of 20,437 or 126.9 per cent. from 1906 to 1916. Fifteen towns show a smaller population in 1916 than in 1911, of the towns having 1,000 or over only four showed an increase of 100 or better in the five years. There were 13 towns in 1916 with a population of 1,000 or better as against four 10 years ago.

Males outnumbered females in all the cities. The female population exceeded the male in the towns of Irvine, Morinville, Olds, St. Albert and Vegreville. For every 1,000 males there were 930 females in Calgary and 960 in Edmonton; in 1911 the proportion was Calgary 645, Edmonton, 845 females to every 1,000 males. In the total city population of 1916 there were 943 females to 1,000 males, as against 718 to 1,000 in 1911.

Dwellings and Families.

In 1916 it required [illegible] dwellings to accommodate [illegible] families or [illegible] families to every 100 dwellings as compared with 90,346 families housed in 87,672 dwellings or 103 families to every 100 dwellings. For the province as a whole the average number of persons per dwelling, was practically the same at each census, being 4.38 in 1916 and 4.27 in 1911. The size of the family was the same at each census (4.15).

The population (133,319) of the cities of Alberta in 1916 was distributed among 31,266 families occupying 27,345 dwellings, being at the average rate of 4.87 persons per dwelling and 4.26 per family. For every 100 dwellings there were 118.4 families in Calgary, 112.6 in Edmonton, 111.2 in Lethbridge and [illegible] in Medicine Hat. The size of families in Calgary and Edmonton were practically the same, being 4.23 for the former and 4.24 for the latter.

Service for Women

In the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

A SQUARE DEAL IN LIFE ASSURANCE

"First in the Northwest."

Do YOU know anything about "loadings"? ? ?

When the average Life Assurance Actuary figures out your premium he first finds the "net" premium, then adds to it a percentage called a "loading" to provide for expenses.

This method has been condemned by world famous actuaries for over half a century.

The Northwestern is the only Canadian Life Company that uses a scientific method of providing for expenses, and this results in

LOWER PREMIUMS

Write for our circular entitled "Life Assurance Rates" exposing the unsound methods generally followed and justifying our claim to be

Canada's only scientific Life Company.

The Northwestern provides the highest reserves of any Canadian Company.

TO CLOSE THE FRASER RIVER

Old Discussion is Reopened in Regard to Salmon Fisheries

The policy of closing the Fraser River to fishing for four years is discussed by Mr. Aemilius Jarvis, vice-president of the British Columbia Packers Association, in a statement to *The Monetary Times.* He says:—

"That the Fraser River should be closed to fishing for four years is being agitated by some leading canners both in the United States and Canada. This agitation is based on the failure of the river so far as sockeyes were concerned this year. Every decade or more the agitation arises. In 1904 Canada was ready to agree with the United States to a complete closure, but at the eleventh hour the United States backed out. This has left the impression that the United States would always back out. However, as Mr. Deming, the leading packer on the Puget Sound, has given it as his opinion that the closure should be instituted through international agreement, the matter is up for serious discussion on both sides of the line.

"It is known that W. A. Found, the superintendent of Dominion Fisheries, spent some time in August in sizing up conditions on the Sound, and is an enthusiastic believer in the efficacy of closing the Fraser; it will not be surprising if an effort is made to re-open the whole question of the Fraser River fisheries on lines similar to those laid down more than ten years ago.

Sockeyes and Spawning Beds.

"On one hand, it is said that the closing of the river to the fishing of sockeye will enable the sockeye to get up to the spawning beds in greater numbers and assist in the replenishing of the supply which at present gives every sign of being near the point of exhaustion. If this is done and the spawning streams cleared of obstructions it is hoped that in four years, the cycle of another big run, sockeye salmon will have recovered their numbers and restored the Fraser to its pristine place as the great sockeye river of the Pacific. It is difficult to see how the fishing for sockeye can be prevented when the fishing for other varieties is allowed. When a sockeye is caught in a net or trap will it be put back into the water, while the other kinds are retained? That would be a test for human nature.

"On the other hand it is stated that so long as the Puget Sound fishermen are allowed to use seines and traps in catching salmon of all kinds other than sockeye, it will be impossible to guard against their catching sockeye with the other fish. It is the overfishing of the fish by the Puget Sound fishermen that has reduced the supply on the Fraser River. To increase the supply it will be necessary to reduce fishing in order to allow sufficient fish to get up to the spawning beds.

"The strongest argument against the closing of the Fraser River is that in these war times such closure would reduce the available food supply by 50,000,000 lbs. a year for four years. If the closure would succeed in replenishing the Fraser with sockeye salmon, this price might be paid, but so long as there are doubts as to its efficiency and claims for the adoption of other methods to revive the Fraser, then a plan that would curtail the food supply of the world at a time when food is a real munition of war, must be scrutinized closely before being carried into effect.

Profitable to Operate.

"Some canneries still find it profitable to operate on the Fraser. It is profitable because it keeps the plant fit and going and thus eliminates greater depreciation which would result if it were idle. Besides, the crews are kept together and the equipment regularly overhauled if the plant is operated yearly. There would be no objection raised to any cannery ceasing operations at any time, but if some want to operate, why make them conform to the plan of their less courageous rivals?

"It is plain, however, that something must be done regarding the Fraser River fisheries. Removing the obstruction from the spawning streams keeping them clear and preventing the Indians from molesting the fish while they are spawning, will do a great deal of good, but under all this the best plan seems to be, if the food supply is to be kept up and economical management maintained, to stop all fishing for salmon on Puget Sound and the Fraser up to August 1st every year on both sides of the line. This would allow a sufficient number of the early and more vigorous fish to get up to the spawning grounds to insure a supply during the succeeding years. This appears to be a happy compromise between the present situation and the proposed total closure and better results would be obtained.".

NEW SOURCE OF TROUBLE

A number of doctors throughout the country have been writing Ottawa to ask if a certificate of physical unfitness from a family physician will be accepted at face value by a medical board instituted under the Military Service Act. The answer returned was a prompt negative.

Experience has shown that some family physicians are liable to be placed in an awkward position if certificates of physical unfitness granted by them are competent to secure freedom of responsibility under the Military Service Act for the sons of some of their patients. Doctors might easily be subjected to annoyances of a most disagreeable kind if the idea were to spread that any one of them, with a wave of his pen, might exempt a young man from military service. Under the scheme by which the Military Service Act is operated the authorities will be guided by the official medical boards.

CANADIAN TRADE

For the eight months of the calendar year, says a Montreal paper, Canada is credited with a favorable trade balance of $227,266,000, or about $37,000,000 ahead of the record established in the corresponding period a year ago. If comparison is made with the previous cycle of business activity in this country, say, around the 1912-13 period, when the eight-months' figures were showing unfavorable balances of upwards of $200,000,000, the net improvement in the trade position so far this year amounts to about $450,000,000.

While the August return shows a smaller excess of exports over imports than was indicated in a recent despatch from Ottawa, and one considerably lower than July's, the results of the two midsummer months combined are the best ever presented in the Canadian trade reports.

In the earlier part of the year, as a result of an excess of imports over exports in April, when shipping was badly congested, the balance in favor of Canada was lagging behind that of a year ago. But the difference has been made up, and something more as a result of the phenomenally good figures of July and August.

LIFE INSURANCE RETURNS

The North American Life Insurance Company, Toronto, reports good business for the month of September. They state that the business written amounted to $1,098,000, while the issued or the month was $985,386. This constitutes the biggest September record in the history of the company, showing an increase over the previous month and an increase over September of last year. Issued business for the nine months amounts to $9,116,325.

An interesting statement on the gain in insurance in force in Canada is furnished by the Continental Life Insurance Company, Toronto. The company says: "The gains in insurance in force in Canada since 1914 have amply justified the course taken by the agents, and proven the wisdom of their now devoting more time and attention to men over thirty-four years of age, the maximum limit set for single men and widowers without families coming under the first draft. In 1914 the gain of insurance in force was $73,570,-000; in 1915 it was $[illegible] and in 1916 the total gain was $[illegible]."

The [illegible] greater weight [illegible] the war, and life insurance companies are making the most of the opportunity.

The Crown Life Insurance Company, Toronto, also reports good returns. Applications received in September totalled $[illegible]. Business was dull during the first part of the month, owing to the Military Service Act. This disturbance has subsided, and applications, it is thought, should be plentiful from this time forward. Salesmen all over the country report excellent prospects.

LIBERTY LOAN IS DOING WELL

Some of the Big Subscriptions—Lists Will Close October 27th

The subscription lists of the second Liberty loan of the United States, opened on October 1st, will close on October 27th. Good progress has been made with the loan during its first two weeks. No announcement of the total amount subscribed to date, however, has been made. While the Bank of Montreal, the Canadian Pacific Railway and other Canadian corporations subscribed to the first Liberty loan, this action is not expected in the current offering in view of the forthcoming war loan in Canada. Every available dollar will be needed here to make our fourth domestic war loan a success. Neither is it anticipated that we shall have any large amount of subscriptions to our loan from the United States, as the subscribing of the $3,000,000,000 Liberty loan will fully occupy investment power of that country for the time being.

Liberty Loan Subscriptions.

Some of the larger subscriptions to the new Liberty loan offering in the New York reserve district, unofficially reported are as follow:—

Metropolitan Life Ins. Co.	$10,500,000
Corn Exchange Bank	10,000,000
Mutual Life Insurance Co.	10,000,000
New York Life Ins. Co.	10,000,000
United States Steel Corp.	10,000,000
Prudential Ins. Co., Newark	7,500,000
Western Union Telegraph Co.	5,500,000
Atch. Topeka & St. Fé Ry. Co.	5,000,000
Chatham & Phenix National Bank, New York City	5,000,000
First National Bank, New York City	5,000,000
Liberty National Bank	5,000,000
Marine Nat. Bank of Buffalo	5,000,000
Northern Pacific Ry. Co.	5,000,000
Southern Pacific, through Kuhn, Loeb & Co.	5,000,000
Union Pacific RR., through Kuhn, Loeb & Co.	5,000,000
Republic Iron & Steel Co.	4,800,000
Fidelity Trust Co., Newark	4,062,600
Hayden, Stone & Co.	3,000,000
Utah Copper Co.	3,000,000
Union Nat. Bank, Newark	2,521,250
Alaska Packers' Association	2,500,000
Manufacturers' Trust Co. of Brooklyn	2,500,000
Metropolitan Trust Co.	2,500,000
Importers & Traders' Nat. Bank	2,171,000
American Sugar Refining Co.	2,000,000
Emigrant Industrial Sav. Bank	2,000,000
Home Insurance Co.	2,000,000
United States Trust Co.	2,000,000
Bankers Trust Co.	1,721,000
Williamsburgh Savings Bank	1,500,000
Citizens' National Bank	1,034.200
Coal & Iron National Bank	1,023,450
Atlantic Gulf & West Indies	1,000,000
Bank of America	1,000,000
Bernhard, Scholle Co.	1,000,000
Chino Copper Co.	1,000 000
Goldman, Sachs & Co.	1,000,000
Hallgarten Co.	1,000,000
Maitland, Coppell Co.	1,000,000
Mercantile Trust & Deposit	1,000.000
National City Bank for German-American Ins. Co.	1,000,000
National Surety Co.	1,000,000
Nevada Consol. Copper Co.	1,000,000
Norfolk & Western Ry. Co. (subscribed $5,000,000, but this district will receive $1,000,000)	1,000,000
Ray Consolidated Copper	1,000,000
Spencer Trask & Co.	1,000.000
Wells, Fargo & Co.	1,000,000
Adolph, Lewisohn & Sons	1,000,000
Brooklyn Savings Bank	1,000,000
Bank of the Manhattan Co. (for themselves)	1,000,000
United States Rubber Co., through Kuhn, Loeb & Company	1,000,000
Jewelry Trade Committee	836,000
Irving National Bank	759,700
Stamford National Bank	630,400
Men's Clothing Trades Committee	600,000
Guaranty Trust Co.	567,150
Columbia Trust Co.	$ 542,000
Kings County Trust Co.	511,000
Broadway Trust Co.	500,000
California Packing Corp.	500,000
E. W. Bliss Co.	500,000
German-American Ins. Co.	500,000
Home Life Ins. Co.	500,000
Hornblower & Weeks, New York City	500,000
National City Bank for German Alliance Ins. Co.	500,000
Tiffany & Co.	500,000
Advance Rumley Co.	500,000
Continental Rubber Co.	300,000
E. F. Hutton & Co.	250.000
Jesup & Lamont	100,000
Jones & Baker	100,000
United States and Australasia Steamship Co.	50,000

Chief Features of Loan.

The chief features of the second Liberty loan being offered to the public are: Amount, $3,000,000,000 or more, the excess not to exceed one-half of the amount of over-subscription. Terms of bonds, maturity 25 years, redeemable at the option of the secretary of the treasury in 10 years. Denominations of bonds, $50 and multiples of $50. Interest rate, 4 per cent., payable semi-annually on November 15 and May 15. Terms of payment, 2 per cent. upon application, 18 per cent. November 15, 40 per cent. December 14, and 40 per cent. January 15, 1918.

The privilege of converting bonds of this issue into bonds of any succeeding issue bearing a higher interest rate than 4 per cent. during the period of the war is extended and through an arrangement under which bonds will be printed with only four coupons instead of 50 (to be exchanged at the end of two years for the bonds containing the full number of coupons) deliveries will be prompt. In this manner the issue of interim certificates will be avoided.

Details of Liberty Loans.

The first Liberty loan, offered May 14, 1917, consisted of two billion 3½ per cent. United States government bonds maturing in 30 years.

The second Liberty loan, offered October 1, 1917, consists of three billion or more 4 per cent. United States government bonds maturing in 25 years, but callable by the government on any interest date after the tenth year.

The first act authorized a total issue of $5,538,945,460 in 3½ per cent. bonds. It also authorized the issue of two billion short-time treasury certificates of indebtedness, the character of these being quite distinct from the bonds.

The second act authorizes a total issue of $7,538,945,460 in 4 per cent. bonds and cancels all unissued 3½ per cent. bonds authorized by the first act. Hence this act authorizes in fact four billion bonds over and above those authorized by the first act. The second act also authorizes the issue of four billion certificates. Provision is also made for two billion war-savings certificates, but regarding these plans have not yet been perfected.

Details of Selling Plan.

The bonds are sold direct from the United States treasury to the people. There is an appropriation of one-fifth of 1 per cent. for expenses for rent, clerk hire, postage, printing, etc., and the engraving of bonds; but no commission, brokerage, or profits are allowed. Bankers are contributing their services gratis. On all bonds of the first issue deliveries began in September.

Provisions Regarding Delivery.

It is expected that definitive bonds of this new loan in denominations up to and including $1,000 will be ready for delivery beginning October 15 or earlier, and definitive bonds will be ready for delivery against all subscriptions as soon as allotments and final payments have been made.

Colonel Henry Cockshutt, president of the Cockshutt Plough Company of Brantford, and J. H. Ashdown, president of the Ashdown Hardware Company of Winnipeg, have been elected to the board of directors of the Bank of Montreal.

Mr. H. A. Fish, for a number of years organizer for Grand Orange Lodge of Ontario, West, has been appointed as provincial inspector of the Monarch Life Assurance Company for western Ontario, with headquarters at Owen Sound, Ont.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual general meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors, and for the election of the Directors for the coming year, will be held in the Company's Board-room, 17 Toronto Street, Monday, the 29th day of October, 1917, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next to Shareholders of record at the close of business on the 15th day of October.

By order of the Board,
D. C. MACAROW,
General Manager.

Montreal, 2nd October, 1917.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Grand Trunk Railway of Canada.—The company has passed all interim dividends. Inability to obtain an advance in rates, despite heavy increases in working expenses owing to the war, was the reason assigned.

Kerr Lake Mining Company.—The company produced 210,388 ounces of silver in September. This compares with 200,855 ounces in August, 189,392 in July, 251,367 in June, and with an average of 216,102 ounces for the 12 months ended September 30.

Cape Breton Electric Company, Limited.—The company informs *The Monetary Times* that a semi-annual dividend of $3 per share on the preferred capital stock and a dividend of $1.50 per share on the common capital stock have been declared, both payable November 1, 1917, to stockholders of record at the close of business October 15, 1917.

Russell Motor Company.—The directors have declared payment in full of the four years' dividend in arrear on the preferred stock. This involves the payment of 28 per cent. of the preferred for the last four years, in addition to 1¾ per cent. for the quarter, payable on November 1 to shareholders of record October 11. The 7 per cent. dividend was also declared on the common stock. On the $1,200,000 preferred stock outstanding the total dividend of 29¾ per cent. would amount to $357,000, and on the $800,000 of common stock, the 7 per cent. disbursement amounts to $56,000. The company's annual meeting will be held on October 26th.

Consolidated Mining and Smelting Company.—Ore receipts at Trail Smelter from September 22 to 30, 1917, as reported by the company were 6,976 tons. Sullivan was the principal shipper, with 2,685 tons as the week's output, an increase of 324 tons over the preceding period. The total shipment from October 1, 1916, to date, from Sullivan is 132,002 tons. Le Roi Mines come second with the week's total at 1,810 tons, and the total to date of 57,130 tons. Centre Star was third on the list with the week's shipment at 1,589 tons. Shipments from mines other than those of the company were 3,578 tons for the week, and 106,864 from October 1 to date.

British Columbia Electric Railway.—Figures showing the increase of expenses of the company since the recent strike, which have caused a heavy decrease in the net revenue of the company, have been produced by George Kidd, general manager. In spite of an increase in the gross revenue for August there was a decrease of $15,877 in net revenue, since expenses increased $46,564. "Our net revenue for August," said Mr. Kidd, "was only $58,527, compared with $74,134 for August, 1916. The increases in our wage bill amounted to nearly $300,000 a year, but increases in the cost of materials have sent our expense bills up enormously. When it is considered that we required $80,000 a month to pay debenture interest, it will be seen with a revenue of only $58,527 a month there is nothing before the company but bankruptcy unless relief is awarded to us."

Lake Superior Corporation.—The annual meeting of the stockholders was held in Camden, N.J., last week. The meeting was long owing to the discussion created by the introduction of a series of typewritten questions offered by W. B. Nolan for answer by the management. In answer to a question, J. F. Taylor, president of Algoma Steel Company, said that earnings of the steel company for the last two months were subject to deduction for bond interest and depreciation of approximately $1,000,000. The directorate was elected by a vote of 281,871 shares. The Nolan minority interests did not vote. The following were elected directors: F. McOwen, H. Coppel, J. S. Dale, W. C. Franz, J. Frater Taylor, W. Cunningham, Sydney Mason, H. C. Coleman, Alex. Taylor, R. Home Smith, H. I. Underhill and James Hawson. At the meeting of the board, following the shareholders' meeting, officers were re-elected as follows: President, W. H. Cunningham; vice-presidents, H. Coppel, W. C. Franz and James Hawson; secretary, Alex. Taylor; treasurer, A. A. Pinkney.

Keep Informed

Our new Booklet of investment Securities contains, among other valuable information, latest available earnings, financial position, etc., of some of Canada's most prominent industrial enterprises.

A copy will be sent on request.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

POSITION WANTED.—Experienced Fire Insurance Inspector (Exempt), well acquainted with the Western territory, will be open to accept position in October; tariff companies only. Address Box 111, *The Monetary Times*, Winnipeg.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

INSPECTOR.—A tariff company wants a bright man as inspector in the North-West. Reply, stating full particulars, to P.O. box 579, Montreal.

Sherbrooke	2,626,427	2,138,277	+	488,150
Kitchener	2,357,895	1,913,014	+	444,881
Total	$924,680,373	$827,269,396	+	$97,410,977

Mr. Ambrose Monell, president of the International Nickel Company, has tendered his resignation to accept a commission as Colonel on the staff of the Commander of the American aviation forces abroad. Mr. Monell is well known in Canada.

Lake Of The Woods Milling Company

Has

Another Progressive Year

The Annual Report presented to shareholders shows steady increase in strength and growth in usefulness.

Montreal, October 4th.

Strength and stability are shown in the report of the Lake of The Woods Milling Company for the year ending August 31, 1917, which was presented to the shareholders on Wednesday. Net earnings for the year were $569,747.75, apportioned as follows:

Payment of interest for the year on the Company's Bonds......	$ 54,000
Payment of a dividend of 7% per annum on $1,500,000 Preferred Stock of the Company for the year	$105,000
Payment of a dividend of 8% per annum on $2,100,000 Common Stock of the Company for the year	$168,000
Written off Property Account....	$ 50,000
Written off Good-Will and Trade Marks Account	$ 50,000
	$427,000

This leaves a balance of $142,747.75, which is carried to Surplus Account. In view of the fact that the Bonds of the Company mature in 1923, the Directors thought it advisable to set up a Redemption Account and, with this end in view, have transferred from Surplus Account the sum of $200,000.00. After providing for this amount and adding the surplus carried forward this year, Surplus Account now stands at $831,883.52.

The Company's Medicine Hat Plant, which was destroyed by fire on April 29, 1916, was reconstructed and put into operation by January 2, 1917, from which time it has been running continuously.

Mr. W. A. Matheson was elected to the Board of Directors to fill vacancy caused by the death of Senator McKay.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Fingal, Ont.—October 5—Mr T. Gilbert's saw and gristing mill burned to the ground. Estimated loss, $1,200. No insurance carried. Cause, overheated fire box.

Lindsay, Ont.—September 29—Mr. J. Day's residence, stables and outbuildings totally destroyed. Estimated loss, $8,000. Small insurance carried.

Morinville, Alta.—September 30—Mr. N. Munier's livery barn, C. Velandre's residence and the blacksmith's shop of Mr. J. Coutre totally destroyed. Estimated loss, $5,000, partially covered by insurance.

Picton, Ont.—October 3—Shortt and Thompson's livery barns destroyed. Loss is covered by insurance.

Owen Sound, Ont.—October 4—Mr. Joseph Keeling's stable destroyed. Estimated loss, $700.

Quebec, Que.—October 4—Mr. Lemay's store. Estimated loss, $400; Mr. O. Godbout's barber shop badly damaged. Partly covered by insurance.

Sagwa, N.B.—October 3—Mr. E. B. Jones' summer home destroyed. Total insurance, $500, carried with Messrs. White and Calkin. Cause, spark from chimney.

St. John, N.B.—September 29—Several boathouses burned containing a number of motor boats, canoes and row-boats. Among the principal losers are Messrs. A. Latour, B. Latour and B. O'Cain, who lost their canoes and fittings, Messrs. Muir, Dickenson, Boisvert, Gregoire, J. C. Harbec, who suffer the loss of from one to three motorboats. The only insurance so far as can be learned was that carried on Mr. A. Latour's canoe which was about half the value and that carried on Mr. J. C. Harbec's motorboat which, it is understood, amounted to about $600.

St. Thomas, Ont.—October 3—D. L. Schaefer and Company's planing mill and box factory destroyed. Estimated loss, $2,500, partly covered by insurance.

Tillsonburg, Ont.—October 5—Mr. Chas. Holman's barn, containing the season's crops destroyed. Cause, spark from engine.

Victoria County, N.B.—September 27—Wapskehagen Lumber Company's yards damaged. Estimated loss, $690, partly covered by insurance.

Mr. W. A. Matheson, who has been connected with the Lake of the Woods Company for more than twenty-five years, being in charge of the wheat buying department until five years ago, when he was appointed manager of the Winnipeg branch, has been elected a director of the company to fill the vacancy caused by the death of Senator Robert McKay.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Brockville, Ont.—October 1—Mr. Jas. Fitzpatrick's motor boat and skiff. Estimated loss, $500. No insurance carried.

Canso, N.S.—September 23—A. N. Whitman and Son's coal shed. Estimated loss on stock, $850; on buildings, $725. Insurance on stock, $4,000; on buildings, $4,000, carried with 12 regular tariff companies.

Fergus, Ont.—September 28—Monkland Oatmeal Mill. Owners, Jas. Wilson and Sons. Estimated damage to stock, $14,000; to buildings, $50,000. *NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending August, were: imports 1915, $122,473,271; 1916, $50,627,035; 1917, $14,445,873; and exports 1915, $94,838,702; 1916, $225,544,713; 1917, $7,945,000. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

Swift Current, Sask.—September 14—Mr. Wm. Brunyee's livery stable. Tenants, Messrs. Grinder and Gurney. Estimated loss on horses, $1,200; on stock, $4,000; on buildings, $3,500. Insurance on stock, $1,000; on buildings, $2,000; total insurance, $3,000, carried in the Continental Insurance Company. Horses were insured at the R.N.W.M.P. headquarters.

British Columbia.—The following fire losses are reported to *The Monetary Times* by Mr. Jas. S. Rankin, chief fire adjuster for Vancouver:—

Vancouver, B.C.—July 14—Dufferin Syndicate, Limited. Occupant, Aberdeen Fish Company. Estimated loss, on building, $950; on contents, $500. Insurance on building, $1,000, carried in the Caledonian Insurance Company.

September 1—C. S. Jones and Son, Limited, tent and awning factory. Owner of building, Mr. B. T. Rogers. Estimated loss on building. $650; on contents, $1,500. Insurance carried in the following companies: Alliance of Philadelphia, on contents $15,000, on fixtures $1,000; Commercial Union Insurance Company, on contents $5,000; Glens Falls, on contents $7,000; Guardian, on contents $14,000, on fixtures $1,000; Northern, on contents $1,500, on fixtures $500; total insurance on contents $42,500, on fixtures $2,500. Insurance on building placed with Johnson and Higgins, New York. Cause, cigarette stub.

Deer Lake, B.C.—July 22—Mr. G. Doran's saw-mill. Loss on building, $1,500; on contents, $2,500. Insurance carried in the Aetna Insurance Company for the British Columbia Electric Railway Company only; on motor, $450. No insurance on mill building or machinery. Cause, sparks from burner.

Losthall Creek, B.C.—September 5—Mr. S. E. File's dwelling. Estimated loss on building, $900; on contents, $1,000; on fruit trees, $135. Insurance on building, $750; on contents, $700; on fruit trees, $150, carried in the Guardian Assurance Company.

Penticton, B.C.—September 28—The Penticton Hotel. Owner of building, Mrs. S. J. Barnes. Estimated loss on building, $4,500; on contents, $650. Insurance on contents, $2,300, carried in the North British and Mercantile Insurance Company. Cause, spark from chimney.

South Vancouver, B.C.—September 2—Mr. Jas. Rae's house. Occupant, Mr. Chas. Knight. Estimated loss on building, $150; on contents, $75. Insurance on building, $800, carried in the Yorkshire Insurance Company. Cause, rags in wood box

Victoria, B.C.—Fire Chief Thomas A. Davis reports the following fire losses for the month of September to *The Monetary Times*: Loss, buildings, $96; contents, $135; total, $231; insurance, buildings, $42,500; contents, $1,200; total, $43,700; property at risk, $339,150; box alarms received, 5; telephone alarms, 28; total, 33.

Vancouver, B.C.—Fire Chief Carlisle reports the following fire losses for the month of September to *The Monetary Times*: The fire department responded to 44 alarms during the month of September, as follows: Fires where damage occurred, 10; fires where no loss resulted, 4; false alarms, 12; bush fires (no loss), 9; chimney fires (no loss), 2; out of city limits, 2. The estimated total damage resulting from fires for this period was $3,419, of which $3,287 was covered by insurance, leaving the property loss above insurance at $132. The total value of the property involved was $141,650. On September 28th, at 3.54 a.m., a fire occurred in a store shed at the rear of the new Canadian Northern Railway depot, False Creek tide flats, and owned by the Northern Construction Company, Limited; this was caused by an overheated stove. The damage, amounting to $550 was also fully covered by insurance. The following shows the cause of fires or alarms for the month: Carelessness, cigarettes, 1; backfire in carburetter (auto), 1; bush fires, 9; children playing with matches, 1; chimney fires, 2; electrical origin, 1; false alarms, 12; fire broke out again, 1; flying sparks, 7; out of city limits, 2; overheated stove, 1; services not required, 4; unknown, 1; vapor lamp exploding, 1.

Mr. T. B. Macaulay, president of the Sun Life Assurance Company, Montreal, has accepted the Dominion chairmanship of the national committee on food resources. Mr. Macaulay will take charge of the provincial committees and work out the various matters of organization and policy.

Note.—An error was made in the August bank directory in reporting Jasper, Ont., as a new branch of the Bank of Nova Scotia.

TORONTO LIFE UNDERWRITERS' ASSOCIATION

A banquet was tendered last week by the Toronto Life Underwriters' Association to Mr. J. T. Wilson, president of the Dominion Life Underwriters' Association. Mr. J. L. Purdy, president of the local association, presided. In closing the meeting he said:—

"It is a fine thing, both for the present and future of our association, that we are able to command the services of Mr. J. T. Wilson and gentlemen like him for this important work. As some of you are aware, the duties connected with the presidency of the Toronto association are a sinecure, one dizzy and continuous round of pleasantries, and I wasn't a bit surprised the other day to learn that there are at least a dozen both aspiring and eligible candidates for the post for the year 1918. How could it be otherwise? You see, the machinery of our organization is so complete. I didn't invent it. I was fortunate enough to inherit it from Honorary President Bingeman, and a man would have to either be something more or less than human who did not swell visibly with pride at its contemplation. Let me tell you about it. Firstly, gentlemen, we have an executive committee which really executes; a membership committee which never fails to get the names upon the dotted line; then we have a finance committee which keeps us rolling in wealth; and then, gentlemen, there is the famous entertainment committee which our old friend, Billy Nugent, has brought to an incredible degree of perfection; and lastly, and by no means leastly, we have a secretary and treasurer whose assiduous labors on our behalf we can never hope to do more than recognize. The upshot of it is that the president has nothing whatever to do but to stand as I do this evening, gentlemen, surrounded by my peers, radiating the effulgence of the limelight—a most agreeable experience. But with President J. T. Wilson it is an entirely different matter. His is a man's job, which tests the mettle and capacity of the best men in the professions. The duties connected with his office are becoming alarmingly exacting and strenuous, and I have good authority for saying that the honor can nowadays only be accepted in the spirit and consciousness of great personal sacrifice, and on behalf of this association, President Wilson, which is second only to that of Winnipeg in numbers, but second to none in its devotion to the objects and principles of our organization, I promise you the hearty and continuous support of every member of the Toronto Life Underwriters' Association."

PREPARATIONS FOR OUR WAR LOAN

Widespread Selling System is Being Organized—Every Citizen's Help Needed

Canada's Victory loan of $150,000,000 will be offered to the public probably towards the end of November. The yield to the investor is likely to be a little more than 5½ per cent. Facilities will be given for conversion of former war loans into the present one, the coming loan to be one of varying maturities. Those who convert will have to do so into a long-term loan of 20 years or more.

The selling organization, which will be Dominion wide, is well in hand and the arrangements are practically monopolizing the time, labor and interest of the Canadian financial districts. The bond houses, as usual, are exerting their best efforts to make the loan a success. Their offices are doing little else than look after war loan arrangements, in co-operation with the department of finance. The banks are also taking a very active part in the preparations.

Sir Thomas White, in a statement last week, said that the selling organization for the loan will be composed of "thousands of agents, scattered throughout every part of the Dominion, in every country hamlet, lumber camp, mining camp, fishing port and crowded city, from the edges of the sea to the heights of the Rockies."

Well Planned Organization.

Next to the minister of finance will be the Dominion Victory loan executive, including many of the biggest and most public spirited financiers in the Dominion. Under them come the nine provincial committees, consisting of experienced financial workers in each province. Each provincial committee will then split up its province into districts (eight in Ontario) and place an expert bond man, preferably the head of some well-known house, at the head of each district. Under each district manager, or captain, will be five or six bond salesmen. Each of these lieutenants will have charge of, say, one county, aided by a local chairman or secretary. Each of these sections will be subdivided into towns or townships, and placed in charge of local committees composed of the persons best able to explain the new war loan to the people they call on.

The names of the Dominion executive committee are as follows: A. E. Ames, Toronto, chairman; J. M. Mackay, Montreal, and J. H. Gundy, Toronto, vice-chairmen; C. H. Burgess, Toronto, secretary; J. A. McQueenston, Toronto, assistant secretary; A. H. B. Mackenzie, Montreal, treasurer; Sir Augustus Nanton, Winnipeg; E. R. Wood, Toronto; G. H. Wood, Toronto; Edwin Hanson, Montreal; R. A. Stephenson, Montreal; W. A. MacKenzie, Toronto; W. C. Brent, Toronto; Rene Leclerc, Montreal; and J. W. Mitchell, Toronto.

Special Committees Appointed.

There will also be committees to deal with special matters arising out of the campaign. The publicity committee, of which Mr. F. W. Kerr, of Toronto, is chairman, will co-operate with the committee of the Canadian Press Association in preparing advertising matter for the publicity campaign, which will be inaugurated about October 20th.

The minister has invited the co-operation and has received assurances of support from the several provincial treasurers throughout the Dominion. He has also received assurances of hearty support of the loan by the Canadian Bankers' Association, the Bond Dealers' Association of Canada, the life, fire and fraternal assurance associations and other important organizations.

The Toronto Stock Exchange has named the following committee to co-operate: H. R. Tudhope, G. Tower Fergusson, E. G. Wills, A. Pardoe, Duncan Cassels and S. B. Playfair.

A special committee, headed by Mr. E. R. Wood, of Toronto, will canvass the wealthy men.

We Must do Better.

To the last domestic war loan there were only 40,000 subscribers of a population of over 7,000,000. This does not compare favorably with the Liberty loan of the United States. In the city of Detroit and its immediate environs, for example, there were 115,584 subscribers of 900,000 inhabitants, though the United States government was offering about half as much interest as Canada pays Canadian investors. In other words, only about four of every seven hundred Canadians bought a war bond, whereas the proportion in the United States was more like one in eighty.

The Canadian newspapers have joined forces, through the Canadian Press Association and Canadian Press Limited, to handle the educational side of the work and the five chief advertising agencies in Canada have combined to do the best [illegible] in Canada.

Name for War Loan.

Mr. W. Hartung, manager of the Kitchener branch of the Waterloo County Loan and Savings Company, writes *The Monetary Times* as follows:—

"I should think an appropriate title for the next war loan would be 'Prosperity Loan,' as we must have money in order to finance the munition orders, etc. If we were to lose munition orders on account of our inability to finance them, it would greatly affect our prosperity."

"A. M.", of Victoria, B.C., makes the following suggestions: "The Great Democracy Loan," "Democracy Loan," "Win-the-War Loan," "The People's Loan," and "Support-the-Boys Loan." The government has decided to call the issue the Victory loan.

INSURANCE AGENTS MUST RENEW LICENSES

The insurance agents' licenses in Ontario all expired on September 30th, and must be immediately renewed in order to save the penalties as provided in sub-section 9 of section 99 (a), which reads as follows:—

"Any person who contravenes any of the provisions of this section shall be guilty of an offence, and shall incur a penalty not exceeding $200, and not less than $20, recoverable under the Ontario Summary Convictions Act, and in case of a second or any subsequent conviction shall be liable to imprisonment for any term not exceeding six months."

The question has been often asked, what constitutes an agent? Section 99a (1), (2) and (3) is very plain as to the liability of any person transacting insurance without a license; the sub-sections are as follows:—

"(1) The word agent in this section shall include an acknowledged agent, sub-agent or any person, firm or corporation who shall, in any manner, transact the business of insurance by negotiating for, or placing risks, or delivering policies, or collecting premiums, but shall not include the officers and salaried employees of any company who do not receive commissions.

"(2) No agent shall act for any company in Ontario unless he has fully complied with the provisions of this section and has procured an agent's certificate of authority from the superintendent of insurance."

"(3) An agent's certificate of authority shall be issued only to a bona fide resident of Ontario who is an authorized agent for a licensed or registered company upon application filed with the superintendent, in such form as the superintendent shall prescribe, and each such certificate shall expire on the 30th day of September of the calendar year in which the same shall have been issued, but may be renewed upon due application to the superintendent."

During the year just closing, 8,000 licenses have been issued to residents of the province of Ontario to transact insurance therein. The fee is merely nominal, being $3, and every person must have a license in his possession before a company can accept business from him. Sub-section 7 provides that:—

"No corporation, nor any officer, agent or employee of a corporation shall accept from any person except the insured or a duly authorized agent any application or proposal for a policy of insurance."

BANKER AS LIFE INSURANCE SALESMAN

"One of the advantages the banker has as a life insurance agent is that he gets an insight into the general business conditions in his district and comes into contact with all classes of men, every man being a potential insurer." This statement was made by Mr. R. W. Simpson, formerly a bank manager at Cobourg, at the recent annual convention of the Monarch Life Assurance Company, Winnipeg. "He understands credits and collections," said Mr. Simpson, "and knows the best way to get cash out of a man, which is a very important factor in the life insurance business. Bankers should make excellent insurance men, for the above reasons, and also because, as a class, it should be an easy matter to convince them of the monetary gain accruing to them by entering the life insurance field."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

As noted in *The Monetary Times* recently, the city of Montreal had intended to make a popular bond issue of about $7,000,000 before the end of the year, in order to pay off an issue falling due on that date. Owing to the extensive war financing in both the United States and Canada this will be impossible and the deal is said to have been abandoned for the time being. It was intended to sell the bonds over the counter to the citizens, but the city comptroller has been advised by the bond houses that this could not be accomplished. This, coupled with advices from the minister of finance, that he did not desire other bond issues offered in the Canadian market at the time the new internal war loan is being floated, are the chief reasons for the abandonment of the scheme.

A Montreal dispatch says: "If the bond issue is not raised and the provincial government does not come to the rescue of the city by the date on which the $6,000,000 bond issue becomes due and help the city to finance itself, the Montreal municipality will have to refuse to take up its matured bond issue, and, in that case, with the large debts coming due and the big deficits in the city treasury, the city will be put into the hands of a commission, or in plainer words, a receiver, as there is nothing else ahead but bankruptcy. This has been caused by bad city governments and the low taxation, coupled with the large amount of property which is exempt from taxes which for the most part are religious edifices."

A deputation of the Montreal Citizens' Association waited upon Sir Lomer Gouin, premier of Quebec province, on Tuesday, with a request that the premier take the government of Montreal out of the hands of the board of control, and the city council, and appoint a commission of 19 representative citizens, these, in turn, to appoint and have control of five managers of the city for a term of five years. In approaching Sir Lomer with this proposal the citizens' association claimed that Montreal is already bankrupt, or soon will be, because of maladministration. The association's scheme is to have on the commission three Superior Court Judges, two French and two English bank presidents, the presidents of the Chambre de Commerce, the board of trade, the Montreal branch of the Canadian Manufacturers' Association, the Fire Underwriters' Association, the Association of Architects, the Society of Civil Engineers, the Saint Jean Baptiste Society, the Montreal Citizens' Association, the City Charities Commissioner, the president of the Trust and Loan Company, the president of the Canadian Pacific Railway and the president of the Grand Trunk Railway. The Montreal board of trade recently decided to ask Premier Gouin to name a commission of five to govern Montreal for a limited time, say, five years.

The premier stated on Tuesday that he would wait to hear from others before an answer to the request of the citizens' association would be given. He added: "I do not believe that Montreal is bankrupt, or on the verge of bankruptcy; nor do I believe that you should spread such report broadcast. When Montreal is bankrupt Canada will be bankrupt. Montreal is the richest city in Canada."

British Columbia.—The following certificates have been issued by the municipal department of the province of British Columbia: Nanaimo, by-law No 299, real property purchase, $6,000 10-years 6 per cent., payable half-yearly, October 3rd, 1917; Port Moody, by-law No. 88, municipal buildings, $8,000 26-years 6 per cent., payable half-yearly, October 3rd, 1917.

Edmonton, Alta.—For the sale of school districts debentures, tenders of which closed September 19th, the following awards were made: Block No. 1, $400 5-years 7 per cent. Finn's Lake S.D., Manufacturers Life Insurance Company, at 98. Block No. 2, $2,500 10-years 7 per cent. Wayne S.D., Bond and Debenture Corporation, at 98. Block No. 3 (not awarded). Block No. 4, $12,700 10-years 7 per cent. rurals, Geo. A. Stimson and Company, at 100.03.

Alberta.—Sealed tenders will be received by the debenture branch of the department of education, Edmonton, until 4 p.m., October 23rd, on five blocks of school district debentures amounting to $20,200. Separate tenders are to be made on each block: (1) Rurals, 10-years 7 per cent., Seven Nation S.D., $1,000; Violetdale S.D., $1,600; Fullview S.D., $2,000; Spring Park S.D., $700; Rearville S.D., $1,500; Darling S.D., $400; Carleton S.D., $1,200; Dry Crossing S.D., $1,300; Atlee S.D., $1,500; High Bank S.D., $1,200—$12,400. (2) Village, 20-years 7 per cent., Oyen S.D., $4,000. (3) Rural, 5-years 7 per cent., Gerald S.D., $1,000. (4) Village, 10-years 7 per cent., Ferintosh S.D., $800. (5) Consolidated, 10-years 7 per cent., Carseland C., S.D., $2,000—$20,200. All information required in connection with the above may be obtained from Mr. M. C. Elliott, manager of the debenture branch.

Saskatoon, Sask.—A special report of City Commissioner C. J. Yorath on assessment and taxation proposes: "(1) That the present assessment of land values be reduced by an average of 25 per cent. and the city assessor be instructed accordingly; (2) that the assessed value of improvements be increased from 25 to 40 per cent. of their fair actual value; (3) that the present business license fees and business tax be abolished and that application be made to the provincial legislature to amend the city act so as to enable the city to broaden the basis of taxation by imposing an income tax based upon the system in vogue in the state of Wisconsin and the system recommended by the Winnipeg commission; (4) that application be made to the provincial legislature for an amendment to the city act which will enable the city to impose an unearned increment tax, not exceeding 25 per cent. of the enhanced value, or difference in buying and selling price of all real estate bought or sold after the 1st day of January, 1918. The fund to be raised by this tax to be used as a reserve for financing the city's current or capital account as it deems best."

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from September 24th to 29th, 1917:—

School Districts.—*Cornwall. $2,500 19-years not ex. 8 per cent. annuity; Robt. Mollard, Fairy Hill. *Windcrest, $2,200 10-years not ex. 8 per cent. annuity; J. Quiding, Crestwynd. *Ballymena, $2,000 10-years not ex. 8 per cent. annuity; T. Hart, Nottingham. Clear Ridge. $2.000 10-years not ex. 8 per cent. annuity; J. O. Elliott, Strongfield.

Rural Telephone Companies.—Goodwater, $2,700 15-years not ex. 8 per cent. annuity; D. Dalgliesh, Goodwater. Engelfeld, $44,700 15-years not ex. 8 per cent. annuity; Jos. Nordick, Engelfeld. Heron, $1,100 15-years not ex. 8 per cent. annuity; A. A. Will, Heron. Shaunavon Eastern, $11,300 15-years not ex. 8 per cent. annuity; E. Luctkat, Shaunavon. North Redvers, $1,200 15-years not ex. 8 per cent. annuity; Alex. Coleman, Redvers. East Mount, $3,000 15-years not ex. 8 per cent. annuity; Robt. McGregor, Strassburg. Harris, $28,400 15-years not ex. 8 per cent. annuity; J. W. Reault, Harris. Dublin, $4,000 15-years not ex. 8 per cent. annuity; J. S. Burton, Zealandia.

Rural Municipality.—Enterprise, $5,000 10-years not ex. 7 per cent. instalment; L. J. Freeman, Richmond.

Town.—Grenfell, $7,000 20-years interest at 7 per cent. annually; John Walker, Grenfell.

The following is a list of debentures reported sold from September 24th to 29th, 1917:—

School Districts.—Eastview, $2,000. Stirling, $1,200, Brook Hill, $1,200; Canada Landed and National Investment Company, Limited, Winnipeg. Atwater, $5,500; Great-West Life Assurance Company. Norden, $800; Regina Public School Sinking Funds.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by
